

THE CENTURY DICTIONARY

PUBLISHERS' NOTE TO THE EDITION OF 1899.

SINCE The Century Dictionary was completed, in 1891, several editions have been issued, each of which has embodied the results of a careful revision of the text. Defects which have been detected have been remedied, statistical matter has been brought down to date, and important new words have been inserted; though it has not been found necessary to modify in any essential particular the plan or the substance of the work. The present edition, which comprises all the changes and additions thus made, has also been revised with the same care, and will be found to be abreast of the times. Having been originally published in the United States, the American spelling has been preserved.

PREFACE.

THE plan of THE CENTURY DICTIONARY includes three things the construction of a general dictionary of the English language which shall be serviceable for every literary and practical use; a more complete collection of the technical terms of the various sciences, arts, trades, and professions than has yet been attempted; and the addition to the definitions proper of such related encyclopedic matter, with pictorial illustrations, as shall constitute a convenient book of general reference. The attempt to accomplish these ends, and at the same time to produce a harmonious whole, has determined both the general character of the work and its details. This design originated early in 1882 in a proposal to adapt *The Imperial Dictionary* to American needs, made by Mr. Roswell Smith, President of The Century Co., who has supported with unfailing faith and the largest liberality the plans of the editors as they have gradually extended far beyond the original limits.

The most obvious result of this plan is a very large addition to the vocabulary of preceding dictionaries, about two hundred thousand words being here defined. The first duty of a comprehensive dictionary is collection, not selection. When a full account of the language is sought, every omission of a genuine English form, even when practically necessary, is so far a defect; and it is therefore better to err on the side of broad inclusiveness than of narrow exclusiveness. This is the attitude of THE CENTURY DICTIONARY. It is designed to be a practically complete record of the main body of English speech, from the time of the mingling of the Old French and Anglo-Saxon to the present day, with such of its offshoots as possess historical, etymological, literary, scientific, or practical value. The execution of this design demands that more space be given to obsolete words and forms than has hitherto been the rule in dictionaries. This is especially true of Middle English words (and particularly of the vocabulary of Chaucer), which represent a stage of the language that is not only of high interest in itself, but is also intimately connected, etymologically and otherwise, with living speech. Only a few of these words are contained in existing dictionaries. This is the case also, to a great degree, with the language of much later times. The literature of the sixteenth and seventeenth centuries, the formative period of modern English, abounds in words and idioms hitherto unrecorded by lexicographers. Not to include all of these terms which from their etymological connections, intrinsic literary value, or availability for modern use, are worthy of record, is to make, not a dictionary of English, but merely a dictionary of modern and selected English. A similar reason has led to the admission of an unusually large number of dialectal and provincial words. Until about the time of the Reformation the language existed chiefly in the form of dialects; and while the common literary tongue was establishing itself, and after it became established, its relations with dialectal and provincial forms were most intimate. Many "literary" words sank to the position of provincialisms, and on the other hand provincialisms rose to literary rank—a process which has been continuous to the present day. Thus both historically and with regard to present usage it is impossible to draw a hard and fast

line between these two sides of the language, either with respect to words or to their individual senses. This dictionary, therefore, includes words of dialectal form or provincial use which appear to be an important part of the history of the language. Within the sphere of mere colloquialism, slang, and cant, a much narrower rule of inclusion has, of course, been followed; but colloquialism and even slang must be noticed by the lexicographer who desires to portray the language in its natural and full outlines, and these phases of English have therefore been treated with liberality. Americanisms, especially, have received the recognition naturally to be expected from an American dictionary, many being recorded for the first time; on the other hand, many words and uses heretofore regarded as peculiar to this country have been found to be survivals of older or provincial English, or to have gained a foothold in broader English use. Another notable increase in the vocabulary is that due to the admission of the many terms which have come into existence during the present century—especially during the last twenty years—in connection with the advance in all departments of knowledge and labor, scientific, artistic, professional, mechanical, and practical. This increase is nowhere more conspicuous than in the language of the physical sciences, and of those departments of study, such as archæology, which are concerned with the life and customs of the past. Not only have English words been coined in astonishing numbers, but many words of foreign origin or form, especially New Latin and French, have been imported for real or imaginary needs. To consign these terms to special glossaries is unduly to restrict the dictionary at the point at which it comes into the closest contact with what is vital and interesting in contemporary thought and life; it is also practically impossible, for this technical language is, in numberless instances, too closely interwoven with common speech to be dis severed from it. A similar increase is noticeable in the language of the mechanical arts and trades. The progress of invention has brought nearly as great a flood of new words and senses as has the progress of science. To exclude this language of the shop and the market from a general English dictionary is as undesirable as to exclude that of science, and for similar reasons. Both these lines of development have therefore been recorded with great fullness. There is also a considerable number of foreign words—Latin, French, and other—not in technical use, which have been admitted because they either have become established in English literature or stand for noteworthy things that have no English names. Lastly, the individual words have been supplemented by the insertion of idiomatical phrases that are not fully explained by the definitions of their component parts alone, and have in use the force of single words; and of the numerous phrase-names used in the arts and sciences. The number of these phrases here defined is very large.

No English dictionary, however, can well include every word or every form of a word that has been used by any English writer or speaker. There is a very large number of words and forms discoverable in the literature of all periods of the language, in the various dialects, and in colloquial use, which have no practical claim upon the notice of the lexicographer. A large group not meriting inclusion consists of words used only for the nonce by writers of all periods and of all degrees of authority, and especially by recent writers in newspapers and other ephemeral publications; of words intended by their inventors for wider use in popular or technical speech, but which have not been accepted; and of many special names of things, as of many chemical compounds, of many inventions, of patented commercial articles, and the like. Yet another group is composed of many substantive uses of adjectives, adjective uses of substantives (as of nouns of material), participial adjectives, verbal nouns ending in *-ing*, abstract nouns ending in *-ness*, adverbs ending in *-ly* from adjectives, adjectives ending in *-ish*, regular compounds, etc., which can be used at will in accordance with the established principles of the language, but which are too obvious, both in meaning and formation, and often too occasional in use, to need separate definition. So also dialectal, provincial, or colloquial words must be excluded, so far as they stand out of vital relation to the main body of the language which it is the object of a general dictionary to explain. The special limitations of the technical and scientific vocabulary will be mentioned later.

Words that must
be excluded

None of these considerations is of the nature of a definite rule that can be used with precision in all cases. On the contrary, the question whether a word shall be included, even in a dictionary so comprehensive as this, must often be decided by the special circumstances of the case.

The sources of the English vocabulary thus presented are extremely various. No other tongue, ancient or modern, has appeared in so many and so different phases; and no other people of high civilization has so completely disregarded the barriers of race and circumstance and adopted into its speech so great a number of unnative words and notions. The making of the English language began, it may be said, with the introduction of Roman rule and Roman speech among the barbarous Celts of Britain. The Latin language, as the vehicle of civilization, affected strongly the Celtic, and also the speech of the Teutonic peoples, Saxons, Angles, and Jutes, who in the fifth century obtained a footing on the island. This Teutonic tongue, while assimilating something both of the native Celtic idiom, and of Latin in a Celtic guise, in time became the dominant language. The speech thus formed (called *Anglo-Saxon* or, as some now prefer, *Old English*) was raised almost to classic rank by the labors of Alfred and of the numerous priests and scholars who sought to convey to their countrymen in their native language the treasures of Latin learning and the precepts of the Latin Church. Though uniting in the ninth century with an influx of Scandinavian speech, and in the eleventh century, through the Norman conquest, with the stream which flowed through France from Rome, it remained the chief fountain of English. From these two elements, the Teutonic and the Latin (the latter both in its original form and as modified in the Romance tongues), our language has been constructed; though materials more or less important have been borrowed from almost every known speech.

The details of this history are exhibited in the etymologies. They have been written anew, on a uniform plan, and in accordance with the established principles of comparative philology. The best works in English etymology, as well as in etymology and philology in general, have been regularly consulted, the most helpful being those of Prof. Skeat and Eduard Muller, and the "New English Dictionary on Historical Principles," edited by Dr. J. A. H. Murray (which, however, could be consulted in revising the proofs of A and of part of B only); but the conclusions reached are independent. It has been possible, by means of the fresh material at the disposal of the etymologist, to clear up in many cases doubts or difficulties hitherto resting upon the history of particular words, to decide definitely in favor of one of several suggested etymologies, to discard numerous current errors, and to give for the first time the history of many words of which the etymologies were previously unknown or erroneously stated. Noteworthy features of the etymologies will be found to be the method followed in stating the ascertained facts of the history of each word, and the extensive collation of cognate or allied words. Beginning with the current accepted form or spelling, each important word has been traced back through earlier forms to its remotest known origin. Middle English forms are given, in important cases in numerous variants for the four centuries included in that period, and are traced to the Anglo-Saxon (in which are given the typical forms, with the important variants and the oldest glosses) or, as the case may be, to the Old French, including in special instances the Old French as developed in England, or Anglo-French. The derivation of the Anglo-Saxon or French form is then given. When an Anglo-Saxon or other Teutonic form is mentioned, the cognate forms are given from the Old Saxon, the Old Friesic, the Dutch, Low German, High German, and Icelandic in their several periods, the Swedish (and often the Norwegian), the Danish, and the Gothic. The same form of statement is used with the Romance and other groups of forms—the Old French and modern French, the Provençal, the Spanish, the Portuguese, the Italian, and sometimes in special instances the Wallachian and other Romance forms, being given in a regular order, and derived together from their Latin or other source. With the Latin are mentioned the Greek cognates, if any such existed, the Slavic forms, if concerned, and the Sanskrit, Persian, etc. If the Arabic or Hebrew is reached, other Semitic forms are sometimes

Method of etymological statement

PREFACE.

stated. The rule has been to deduce from a comparison of all the principal forms the primitive sense or form, and also to make the process of inference clear to the consulter of the dictionary. Of course, in a search through so vast a field, in which the paths of words have been in many instances effectually obliterated or confused, many points of uncertainty remain; but from the evidence at hand various degrees of approximation to certainty can be established, and these it has been sought clearly to indicate by terms of qualification. The various prefixes and suffixes used in the formation of English words are treated very fully in separate articles.

There are thus two distinct groups of forms in the etymologies: those in the line of derivation or direct descent, and those in the lines of cognation or collateral descent. A Greek word, for example, may occur not only in Anglo-Saxon (and English), but also in other Teutonic and in Romance and other tongues, and the full account of the English form requires the mention of the most important of these other forms as "parallel with" or "equal to" the Anglo-Saxon and English. To separate these groups more plainly to thought and to the eye, and to save the space which would be taken up by the frequent repetition of the words "from," "parallel with," and "whence," distinctive symbols are used. For "from" is used the sign \angle , denoting that the form without the angle is derived from the form within it; for "whence," the sign \succ , with a similar significance; for "parallel with" or "equal to" or "cognate with," the familiar sign of equality, $=$; for the word "root," the ordinary algebraic symbol $\sqrt{}$. An asterisk $*$ is prefixed uniformly to all forms which are cited either as probable or as theoretical, or as merely alleged; it indicates in all cases that the form so marked has not been found by the etymologist in the records of the language concerned, or in its dictionaries. But in some cases words are marked with the asterisk which are found in certain dictionaries, but have not been verified in the actual literature. Special care has been taken with the Anglo-Saxon words, unverified forms of which exist in the current dictionaries, some of them probably genuine, though not found in any of the accessible texts, and others due to early errors of editors and dictionary-makers.

Words of various origin and meaning, but of the same spelling (homonyms), have been distinguished by small superior figures (¹, ², ³, etc.). Such words abound in English. They are mostly common monosyllables, and much confusion exists not only in the explanation of them but also in their use, words of diverse origin having been, in many cases, regarded as one, with consequent entanglement or complete merging of meanings. In numbering these homonyms, the rule has been to give precedence to the oldest or the most familiar, or to that one which is most nearly English in origin. The superior numbers apply not so much to the individual word as to the group or root to which it belongs; hence the different grammatical uses of the same homonym are numbered alike when they are separately entered in the dictionary. Thus verbs and nouns of the same origin and the same present spelling receive the same superior number. But when two words of the same form, and of the same radical origin, now differ considerably in meaning, so as to be used as different words, they are separately numbered.

The etymologies have been written by Dr. Charles P. G. Scott, with the assistance, in the later parts of the work, of contributions from Prof. James A. Harrison, Prof. William M. Baskervill, Prof. Francis A. March, Jr., and others. In ascertaining the particular facts with regard to the origin of technical terms, much aid has been given by the specialists in charge of the various departments.

Of the great body of words constituting the familiar language the spelling is determined by well-established usage, and, however accidental and unacceptable, in many cases, it may be, and however much of sympathy and well-willing may be due to the efforts now making to introduce a reform, it is not the office of a dictionary like this to propose improvements, or to adopt those which have been proposed, and have not yet won some degree of acceptance and use. But there are also considerable classes as to which usage is wavering, more than one form being sanctioned by excellent authorities,

PREFACE.

either in this country or in Great Britain, or in both. Familiar examples are words ending in *-or* or *-our* (as *labor*, *labour*), in *-er* or *-re* (as *center*, *centre*), in *-ize* or *-ise* (as *civilize*, *civilise*); those having a single or double consonant after an unaccented vowel (as *traveler*, *traveller*; *worshipped*, *worshipped*), or spelt with *e* or with *æ* or *æ* (as *hemorrhage*, *diarrhea*; *hæmorrhage*, *diarrhæa*); and so on. In such cases, both forms are given, with an expressed preference for the briefer one, or the one more accordant with native analogies. The language is struggling toward a more consistent and phonetic spelling, and it is proper, in disputed and doubtful cases, to cast the influence of the dictionary in favor of this movement, both by its own usage in the body of the text, and at the head of articles by the order of forms, or the selection of the form under which the word shall be treated. Technical words not in general use, and words introduced from other languages, have also their varieties of orthographic form: the former, in part, because of the ignorance or carelessness of those who have made adaptations from Latin or Greek; the latter, because of the different styles of transliteration or imitation adopted. In such cases, slight variants are here sometimes disregarded, the more correct form being given alone, or with mere mention of others; in other cases, the different forms are given, with cross references to the preferred one, under which the word is treated. Finally, the obsolete words which have no accepted spelling, but occur only in the variety of forms characteristic of the periods from which they come, are treated regularly under that form which is nearest to, or most analogous with, present English, and the quotations, of whatever form, are as a rule presented there; side-forms are entered as liberally as seemed in any measure desirable, with references to the one preferred. All citations, however, are given in the orthography (though not always with the punctuation) of the texts from which they are taken.

The orthography

Still greater than the variation in the orthography, even the accepted orthography, of English words, is the variation in the pronunciation. And here the same general principles must govern the usage of the dictionary. No attempt is made to record all the varieties of popular, or even of educated, utterance, or to report the determinations made by different recognized authorities. It has been necessary, rather, to make a selection of words to which alternative pronunciations should be accorded, and to give preference among these according to the circumstances of each particular case, in view of the general analogies and tendencies of English utterance. A large number of scientific names and terms—words that are written rather than uttered, even by those who use them most—are here entered and have a pronunciation noted for the first time. For such words no prescriptive usage can be claimed to exist; the pronunciation must be determined by the analogies of words more properly English, or by those governing kindred and more common words from the same sources. With respect to many foreign words, more or less used as English, it is often questionable how far usage has given them an English pronunciation, or has modified in the direction of English the sound belonging to them where they are vernacular. In not a few instances a twofold pronunciation is indicated for them, one Anglicized and the other original. Words of present provincial use are for the most part pronounced according to literary analogies, without regard to the varieties of their local utterance. The principal exceptions are Scotch words having a certain literary standing (owing to their use especially by Scott and Burns); these are more carefully marked for their provincial pronunciation. Wholly obsolete words are left unmarked.

The pronunciation

There are certain difficult points in varying English utterance, the treatment of which by the dictionary calls for special explanation. One is the so-called "long *u*" (as in *use*, *muse*, *cure*), represented here, as almost everywhere, by *ū*. In its full pronunciation, this is as precisely *yoo* (*yo*) as if written with the two characters. But there has long existed a tendency to lessen or remove the *y*-element of the combination in certain situations unfavorable to its production. After an *r*, this tendency has worked itself fully out; the pronunciation *oo* (*o*) has taken the place of *ū* in that situation so generally as to be alone accepted by all recent authorities (although some speakers still show

plain traces of the older utterance). The same has happened, in a less degree, after *l*, and some of the latest authorities (even in England) prescribe always *loo* (*lo*) instead of *lū*; so radical a change has not been ventured upon in this work, in which *o* is written only after an *l* that is preceded by another consonant: cultivated pronunciation is much less uniform here than in the preceding case. But further, after the other so-called dental consonants *t*, *d*, *n*, *s*, *z*, except in syllables immediately following an accent, the usage of the majority of good speakers tends to reduce the *y*-element to a lighter and less noticeable form, while many omit it altogether, pronouncing *oo* (*o*). Of this class of discordances no account is taken in the re-spellings for pronunciation; usage is in too fluid and vacillating a condition to be successfully represented. After the sounds *ch*, *j*, *sh*, *zh*, however, only *o* is acknowledged. Another case is that of the *r*. Besides local differences in regard to the point of production in the mouth, and to the presence, or degree, of trilling in its utterance, a very large number, including some of the sections of most authoritative usage, on both sides of the Atlantic, do not really utter the *r*-sound at all unless it be immediately followed by a vowel (in the same or a succeeding word), but either silence it altogether or convert it into a neutral-vowel sound (that of *hut* or *hurt*). The mutilation thus described is not acknowledged in this dictionary, but *r* is everywhere written where it has till recently been pronounced by all; and it is left for the future to determine which party of the speakers of the language shall win the upper hand. The distinction of the two shades of neutral-vowel sound in *hut* and *hurt*, which many authorities, especially in England, ignore or neglect, is, as a matter of course, made in this work. The latter, or *hurt*-sound, is found in English words only before *r* in the same syllable; but it is also a better correspondent to the French *eu* and "mute *e*" sounds than is the former, or *hut*-sound. In like manner, the *arr*-sound is distinguished (as *â*) from the ordinary *e*- or *a*-sounds. Further, the two sounds written with *o* in *sot* and *song* are held apart throughout, the latter (marked with *ô*) being admitted not only before *r* (as in *nor*), but in many other situations, where common good usage puts it. But as there is a growing tendency in the language to turn *o* into *ô*, the line between the two sounds is a variable one, and the *ô* (on this account distinguished from *â*, with which from a phonetic point of view it is practically identical) must be taken as marking an *o*-sound which in a part of good usage is simple *o*. A similar character belongs to the so-called "intermediate *a*" of *ask*, *can't*, *command*, and their like, which with many good speakers has the full *a*-sound (of *far*, etc.), and also by many is flattened quite to the "short *a*" of *fat*, etc. This is signified by *a*, which, as applied to English words, should be regarded rather as pointing out the varying utterance here described than as imperatively prescribing any shade of it.

On the side of consonant utterance, there is a very large class of cases where it can be made a question whether a pure *t* or *d* or *s* or *z* is pronounced with an *i*- or *y*-sound after it before another vowel, or whether the consonant is fused together with the *i* or *y* into the sounds *ch*, *j*, *sh*, or *zh* respectively—for example, whether we say *nature* or *nachur*, *gradual* or *graydual*, *sûre* or *shor*, *visûal* or *vizhoal*. There are many such words in which accepted usage has fully ranged itself on the side of the fused pronunciation: for example, *vizhon*, not *vision*, for *vision*; *azhur*, not *azûre*, for *azure*, but with regard to the great majority usage is less decided, or else the one pronunciation is given in ordinary easy utterance and the other when speaking with deliberation or labored plainness, or else the fused pronunciation is used without the fact being acknowledged. For such cases is introduced here a special mark under the consonant—thus, *ṭ*, *ḍ*, *ṣ*, *ẓ*—which is intended to signify that in elaborate or strained utterance the consonant has its own proper value, but in ordinary styles of speaking combines with the following *i*-element into the fused sound. The mark is not used unless the fused sound is admissible in good common speech.

This same device, of a mark added beneath to indicate a familiar utterance different from an elaborate or forced one, is introduced by this dictionary on a very large scale in marking the sounds of the vowels. One of the most peculiar characteristics of English pronunciation is the way in which it slights the vowels of most unaccented syllables, not merely lightening them in point of quantity and stress, but changing their quality of sound. To write (as systems of re-spelling for pronunciation, and

General variations of

nants

even systems of phonetic spelling, generally do) the vowels of unaccented syllables as if they were accented, is a distortion, and to pronounce them as so written would be a caricature of English speech. There are two degrees of this transformation. In the first, the general vowel quality of a long vowel remains, but is modified toward or to the corresponding (natural) short: thus, *ā* and *ō* lose their usual vanish (of *ē* and *ō* respectively), and become, the one *e* (even, in some final syllables, the yet thinner *i*), the other the true short *o* (which, in accented syllables, occurs only provincially, as in the New England pronunciation of *home*, *whole*, etc.); *ē* and *o* (of *food*) become *i* and *u* (of *good*); *ā* or *ō* become (more rarely) *o*. This first degree of change is marked by a single dot under the vowel: thus, *ā*, *ē*, *ō*, *ū*, *o*, *ō*. In the second degree, the vowel loses its specific quality altogether, and is reduced to a neutral sound, the slightly uttered *u* (of *hut*) or *e* (of *hurt*). This change occurs mainly in short vowels (especially *a*, *o*, less often *e*, but *i* chiefly in the ending *-ity*); but also sometimes in long vowels (especially *ū* and *a*). This second degree of alteration is marked by a double dot under the vowel: thus, *a*, *e*, *o*, *i*, *a*, *ū*. Accordingly, the dots show that while in very elaborate utterance the vowel is sounded as marked without them, in the various degrees of inferior elaborateness it ranges down to the shortened or to the neutralized vowel respectively; and it is intended that the dots shall mark, not a careless and slovenly, but only an ordinary and idiomatic utterance—not that of hasty conversation, but that of plain speaking, or of reading aloud with distinctness. In careless talk there is a yet wider reduction to the neutral sound. It must be clearly understood and borne in mind that these changes are the accompaniment and effect of a lightening and slighting of utterance; to pronounce with any stress the syllables thus marked would be just as great a caricature as to pronounce them with stress as marked above the letter.

Vowels in unaccented syllables

In the preparation of the definitions of common words there has been at hand, besides the material generally accessible to students of the language, a special collection of quotations selected for this work from English books of all kinds and of all periods of the language, which is probably much larger than any that has hitherto been made for the use of an English dictionary, except that accumulated for the Philological Society of London. From this source much fresh lexicographical matter has been obtained, which appears not only in hitherto unrecorded words and senses, but also, it is believed, in the greater conformity of the definitions as a whole to the facts of the language. In general the attempt has been made to portray the language as it actually is, separating more or less sharply those senses of each word which are really distinct, but avoiding that over-refinement of analysis which tends rather to confusion than to clearness. Special scientific and technical uses of words have, however, often been separately numbered, for practical reasons, even when they do not constitute logically distinct definitions. The various senses of words have also been classified with reference to the limitations of their use, those not found in current literary English being described as obsolete, local, provincial, colloquial, or technical (legal, botanical, etc.). The arrangement of the definitions historically, in the order in which the senses defined have entered the language, is the most desirable one, and it has been adopted whenever, from the etymological and other data accessible, the historical order could be inferred with a considerable degree of certainty; it has not, however, been possible to employ it in every case. The general definitions have also been supplemented by discussions of synonyms treating of about 7000 words, contributed by Prof. Henry M. Whitney, which will be found convenient as bringing together statements made in the definitions in various parts of the dictionary, and also as touching in a free way upon many literary aspects of words.

Definitions of common words

Many of the extracts mentioned above, together with some contained in the *Imperial Dictionary* and in other earlier or special works, have been employed to illustrate the meanings of words, or merely to establish the fact of use. They form a large collection (about 200,000) representing all periods and branches of English literature. In many cases they will be found useful from a historical point of view, though, as was intimated above, they do not furnish a complete historical

record. All have been verified from the works from which they have been taken, and are furnished with exact references, except a few obtained from the *Imperial Dictionary*, which could not readily be traced to their sources, but were of sufficient value to justify their insertion on the authority of that work. Their dates can be ascertained approximately from the list of authors and works (and editions) cited, which will be published with the concluding part of the dictionary. These quotations have been used freely wherever they have seemed to be helpful; but it has not been possible thus to illustrate every word or every meaning of each word without an undue increase in the bulk of the book. The omissions affect chiefly technical and obvious senses.

In defining this common English vocabulary, important aid has been received from Mr. Benjamin E. Smith, who has also had, under the editor-in-chief, the special direction and revision of the work on all parts of the dictionary, with the charge of putting the book through the press; from Mr. Francis A. Teall, who has also aided in criticizing the proofs; from Mr. Robert Lilley, in the preliminary working-up of the literary material as well as in the final revision of it; from Dr. Charles P. G. Scott, who has also had special charge of the older English, and of provincial English; from Prof. Thomas R. Lounsbury, who has contributed to the dictionary the results of a systematic reading of Chaucer; from Dr. John W. Palmer, who has aided in revising the manuscript prepared for the press, and has also contributed much special literary matter; from Prof. Henry M. Whitney, who has given assistance in preparing the definitions of common words in certain later divisions of the work and has also examined the proofs; from Mr. Thomas W. Ludlow; from Mr. Franklin H. Hooper; from Mr. Leighton Hoskins, who has also contributed material for the definitions of most of the terms in prosody; from Miss Katharine B. Wood, who has superintended the collecting of new words and the selection and verification of the quotations; from Miss Mary L. Avery; and from many others who have helped at special points, or by criticisms and suggestions, particularly Prof. Charles S. Peirce and Prof. Josiah D. Whitney.

Much space has been devoted to the special terms of the various sciences, fine arts, mechanical arts, professions, and trades, and much care has been bestowed upon their treatment. They have been collected by an extended search through all branches of technical literature, with the design of providing a very complete and many-sided technical dictionary. Many thousands of words have thus been gathered which have never before been recorded in a general dictionary, or even in special glossaries. Their definitions are intended to be so precise as to be of service to the specialist, and, also, to be simple and "popular" enough to be intelligible to the layman. It is obvious, however, that the attempt to reconcile these aims must impose certain limitations upon each. On the one hand, strictly technical forms of statement must in many cases be simplified to suit the capacity and requirements of those who are not technically trained; and, on the other, whenever (as often, for example, in mathematics, biology, and anatomy) a true definition is possible only in technical language, or the definition concerned is of interest only to a specialist, the question of immediate intelligibility to a layman cannot be regarded as of prime importance. In general, however, whenever purely technical interests and the demands of popular use obviously clash, preference has been given to the latter so far as has been possible without sacrifice of accuracy. In many instances, to a technical definition has been added a popular explanation or amplification. It is also clear that the completeness with which the lexicographic material of interest to the specialist can be given must vary greatly with the different subjects. Those (as metaphysics, theology, law, the fine arts, etc.) the vocabulary of which consists mainly of abstract terms which are distinctly English in form, of common English words used in special senses, or of fully naturalized foreign words, may be presented much more fully than those (as zoölogy, botany, chemistry, mineralogy, etc.) which employ great numbers of artificial names, many of them Latin.

The technical material has been contributed by the gentlemen whose names are given in the list of collaborators, with the assistance at special points of many others; and all their work, after editorial revision, has been submitted to them in one or more proofs for correction. This method of obtaining

both accuracy and homogeneity has, perhaps, never before been so fully adopted and faithfully applied in a dictionary. A few special explanations are necessary with regard to the work in several of the technical departments.

To the biological sciences a degree of prominence has been given corresponding to the remarkable recent increase in their vocabulary. During the last quarter of a century there has been an extensive reorganization and variation of the former systems of classification, from which have come thousands of new names of genera, families, etc.; and also a profound modification of biological conceptions, which has led both to new definitions of old words and to the coinage of many new words. All these terms that are English in form, and for any reason worthy of record, have been included, and also as many of the New Latin names of classificatory groups as are essential to a serviceable presentation of zoology and botany. The selection of the New Latin names in zoology has been liberal as regards the higher groups, as families, orders, etc., whether now current or merely forming a part of the history of the science; but of generic names only a relatively small number have been entered. Probably about 100,000 names of zoological genera exist, 60,000 at least having a definite scientific standing; but the whole of them cannot, of course, be admitted into any dictionary. The general rule adopted for the inclusion of such names is to admit those on which are founded the names of higher groups, especially of families, or which are important for some other special reason, as popular use, an established position in works of reference, the existence of species which have popular English names, etc. A similar rule has been adopted with regard to botanical names. The common or vernacular names of animals and plants have been freely admitted; many naturalized and unnaturalized foreign names, also, which have no English equivalents and are noteworthy for special literary, commercial, or other reasons, have been included. The definitions that have a purely scientific interest have been written from a technical point of view, the more popular information being given under those technical names that are in familiar use or under common names. In the zoological department is properly included anatomy in its widest sense (embracing embryology and morphology), as the science of animal structure, external and internal, normal and abnormal. Its vocabulary necessarily includes many Latin, or New Latin, words and phrases which have no English technical equivalents.

The biological
sciences.

The definitions of that part of general biological science which in any way relates to animal life or structure, including systematic zoology, have been written by Dr. Elliott Coues, who has been assisted in ichthyology and conchology by Prof. Theodore N. Gill, in entomology by Mr. Leland O. Howard and Mr. Herbert L. Smith, and in human anatomy by Prof. James K. Thacher. Special aid has also been received from other naturalists, particularly from Prof. Charles V. Riley, who has furnished a number of definitions accompanying a valuable series of entomological cuts obtained from him. Prof. Thacher has also defined all terms relating to medicine and surgery. The botanical work was undertaken by Dr. Sereno Watson, with assistance, in cryptogamic botany, from Mr. Arthur B. Seymour, and has been conducted by him through the letter G; at that point, on account of practical considerations connected with his official duties, he transferred it to Dr. Lester F. Ward. Mr. Seymour also withdrew, his work passing, under Dr. Ward's editorship, to Prof. Frank H. Knowlton. All the definitions of the terms of fossil botany have been written by Prof. J. D. Whitney.

In the treatment of the physical and mathematical sciences an equally broad method has been adopted. While their growth has, perhaps, not been so great, from a lexicographical point of view, as has that of biology, it is certainly almost as remarkable. The remodeling and readjustment of former ideas, and the consequent modification of the senses of old terms and the coinage of new, have been hardly less marked; while one department, at least—that of chemistry—has kept pace in the invention of names (of chemical compounds) with zoology and botany. To this must be added the almost numberless practical applications of the principles and results of physical science. The department of electrotechnics is a marked example of the formation within a comparatively few years of a large technical vocabulary, both scientific and mechanical. The adequate definition of all the lexicographical matter thus furnished involves a very complete presentation of the present status of human knowledge of these sciences. The definitions in physics have been

sciences

written by Prof. Edward S. Dana, with the collaboration, in electrotechnics, of Prof. Thomas C. Mendenhall, and in many special points, particularly those touching upon mathematical theory, of Prof. Charles S. Peirce. Professor Dana has also contributed the definitions of mineralogical terms, including the names of all distinct species and also of all important varieties. He has been assisted in defining the names of gems and the special terms employed in lapidary work by Mr. George F. Kunz. The lithological definitions, as also all those relating to geology, mining, metallurgy, and physical geography, have been contributed by Prof. J. D. Whitney. Professor Peirce has written the definitions of terms in mechanics, mathematics, astronomy, and astrology, of weights and measures, and of the various names of colors. In the mathematical work the aim has been to define all the older English terms, and all the modern ones that can be considered to be in general use, or are really used by a number of English mathematical writers, but not all the numerous terms that may be found only in special memoirs. All English names of weights and measures, as well as many foreign names, have been entered, but, as a rule, those of the latter that are at once obsolete and not of considerable importance have been omitted. As regards chemistry, it has of course been impossible to include names of compounds other than those that have a special technical and practical importance. The chemical definitions have been written by Dr. Edward H. Jenkins, with assistance from Dr. Isaac W. Drummond in defining the coal-tar colors, the various pigments, dyes, etc., and the mechanical processes of painting and dyeing.

The definitions comprehended under the head of general technology (including all branches of the mechanical arts) have been contributed by Prof. Robert H. Thurston, with the collaboration, in defining the names of many tools and machines, of Mr. Charles Barnard, and, in various mechanical matters which are closely related to the special sciences, of the gentlemen who have been named above—as of Prof. Mendenhall in describing electrical machines and appliances, of Prof. Dana and Prof. Peirce in describing physical and mathematical apparatus, of Prof. J. D. Whitney in describing mining-tools and processes, etc. The terms used in printing and proof-reading have been explained by Mr. F. A. Teall, with the aid of valuable contributions of material from Mr. Theodore L. De Vinne. Special assistance in collecting technological material has been received from Mr. F. T. Thurston, and, at particular points, from many others.

The terms of the philosophical sciences have been exhibited very completely, with special reference to their history from the time of Plato and Aristotle, through the period of scholasticism, to the present day, though it has not been possible to state all the conflicting definitions of different philosophers and schools. The philosophical wealth of the English language has, it is believed, never been so fully presented in any dictionary. Both the oldest philosophical uses of English words and the most recent additions to the vocabulary of psychology, psycho-physics, sociology, etc., have been given. The definitions of many common words, also, have been prepared with a distinct reference to their possible philosophical or theological applications. The logical and metaphysical, and many psychological definitions have been written by Prof. Peirce. The same method of treatment has also been applied to ethical terms, and to those peculiar to the various sociological sciences. In political economy special assistance has been received from Prof. Albert S. Bolles, Mr. Austin Abbott, and others. Prof. Bolles has also contributed material relating to financial and commercial matters.

In the department of doctrinal theology considerable difficulty has naturally been experienced in giving definitions of the opinions held by the various denominations which shall be free from partisanship. The aim of the dictionary has been to present all the special doctrines of the different divisions of the Church in such a manner as to convey to the reader the actual intent of those who accept them. To this end the Rev. Dr. Lyman Abbott, to whom this branch of the work has been intrusted, has consulted at critical points learned divines of the various churches; though, of course, the ultimate responsibility for the statements made in the dictionary on these and other theological matters rests with him and with the editor-in-chief. Aid has been obtained in this manner from the Right Rev. Thomas S. Preston, the Rev. Dr. William R. Huntington, the Rev. Dr. Daniel Curry, Prof. V. L. Conrad, and others. Besides the

purely theological definitions, others, very numerous and elaborate, have been given of terms designating vestments, ornaments, rites, and ceremonies, of words relating to church architecture, church music, etc., etc. Systems of religion other than the Christian, as Mohammedanism, Confucianism, etc., are treated with considerable detail, as are also the more simple and barbarous forms of religious thought, and the many related topics of anthropology. Church history is given under the names of the various sects, etc. Assistance in matters relating to liturgies, and particularly to the ritual of the Greek Church, has been received from Mr. Leighton Hoskins.

In defining legal terms, the design has been to offer all the information that is needed by the general reader, and also to aid the professional reader by giving, in a concise form, all the important technical words and meanings. Professional terms now in common use have been defined in their general and accepted sense as used to-day in the highest courts and legislative bodies, not excluding, however, the different senses or modes of use prevalent at an earlier day. Particular attention has also been given to the definitions of common words which are not technically used in law, but upon the definition of which as given in the dictionaries matters of practical importance often depend. Statutory definitions, as for example of crimes, are not as a rule given, since they vary greatly in detail in the statutes of the different States, and are full of inconsistencies. Definitions are also given of all established technical phrases which cannot be completely understood from the definitions of their separate words, and of words and phrases from the Latin and from modern foreign languages (especially of Mexican and French-Canadian law) which have become established as parts of our technical speech, or are frequently used without explanation in English books. The definitions have been written by Mr. Austin Abbott.

The definitions of the principal terms of painting, etching, and engraving, and of various other art-processes, were prepared by Mr. Charles C. Perkins some time before his death. They have been supplemented by the work of Mr. Thomas W. Ludlow, who has also had special charge of architecture, sculpture, and Greek and Roman archæology; and of Mr. Russell Sturgis, who has furnished the material relating to decorative art in general, ceramics, medieval archæology, heraldry, armor, costumes, furniture, etc., etc. Special aid has also been received from many architects, artists, and others. The musical terms have been defined by Prof. Waldo S. Pratt, who has had the use of a large collection of such definitions made by Mr. W. M. Ferriss. Many definitions of names of coins have been contributed by Mr. Warwick Wroth, F. S. A., of the Department of Coins of the British Museum.

The fine arts

A very full list of nautical terms and definitions has been contributed by Commander Francis M. Green, and of military terms by Captain David A. Lyle.

The inclusion of so extensive and varied a vocabulary, the introduction of special phrases, and the full description of things often found essential to an intelligible definition of their names, would alone have given to this dictionary a distinctly encyclopedic character. It has, however, been deemed desirable to go somewhat further in this direction than these conditions render strictly necessary. Accordingly, not only have many technical matters been treated with unusual fullness, but much practical information of a kind which dictionaries have hitherto excluded has been added. The result is that THE CENTURY DICTIONARY covers to a great extent the field of the ordinary encyclopedia, with this principal difference—that the information given is for the most part distributed under the individual words and phrases with which it is connected, instead of being collected under a few general topics. Proper names, both biographical and geographical, are of course omitted except as they appear in derivative adjectives, as *Darwinian* from *Darwin*, or *Indian* from *India*. The alphabetical distribution of the encyclopedic matter under a large number of words will, it is believed, be found to be particularly helpful in the search for those details which are generally looked for in works of reference; while the inevitable discontinuity of treatment which such a method entails has been reduced to a minimum by a somewhat extended explanation of central words

Encyclopedic
features

(as, for example, *electricity*), and by cross references. Such an encyclopedic method, though unusual in dictionaries, needs no defense in a work which has been constructed throughout from the point of view of practical utility. In the compilation of the historical matter given, assistance has been received from the gentlemen mentioned above whenever their special departments have been concerned, from Prof. J. Franklin Jameson in the history of the United States, from Mr. F. A. Teall, and from others. Special aid in verifying dates and other historical matters has been rendered by Mr. Edmund K. Alden.

The pictorial illustrations have been so selected and executed as to be subordinate to the text, while possessing a considerable degree of independent suggestiveness and artistic value. Cuts of a distinctly explanatory kind have been freely given as valuable aids to the definitions, often of large groups of words, and have been made available for this use by cross references; many familiar objects, also, and many unfamiliar and rare ones, have been pictured. To secure technical accuracy, the illustrations have, as a rule, been selected by the specialists in charge of the various departments, and have in all cases been examined by them in proofs. The work presented is very largely original, cuts having been obtained by purchase only when no better ones could be made at first hand. The general direction of this artistic work has been intrusted to Mr. W. Lewis Fraser, manager of the Art Department of The Century Co. Special help in procuring necessary material has been given by Mr. Gaston L. Feuardent, by Prof. William R. Ware, by the Smithsonian Institution, by the American Museum of Natural History in New York, and by the Academy of Natural Sciences in Philadelphia.

In the choice of the typographical style the desire has been to provide a page in which the matter should be at once condensed and legible, and it is believed that this aim has been attained in an unusual degree. In the proof-reading nearly all persons engaged upon the dictionary have assisted, particularly those in charge of technical matters (to nearly all of whom the entire proof has been sent); most efficient help has also been given by special proof-readers, both by those who have worked in the office of The Century Co., and by those connected with The De Vinne Press.

Finally, acknowledgment is due to the many friends of the dictionary in this and other lands who have contributed material, often most valuable, for the use of its editors. The list of authorities used, and other acknowledgments and explanations that may be needed, will be given on the completion of the work. It should be stated here, however, that by arrangement with its publishers, considerable use has also been made of Knight's *American Mechanical Dictionary*.

The figures by which the synonym-lists are sometimes divided indicate the senses or definitions with which they are connected

The title-words begin with a small (lower-case) letter, or with a capital, according to usage When usage differs, in this matter, with the different senses of a word, the abbreviations [cap] for "capital" and [l c] for "lower-case" are used to indicate this variation

The difference observed in regard to the capitalizing of the second element in zoological and botanical terms is in accordance with the existing usage in the two sciences Thus, in zoology, in a scientific name consisting of two words the second of which is derived from a proper name, only the first would be capitalized But a name of similar derivation in botany would have the second element also capitalized

The names of zoological and botanical classes, orders, families, genera, etc, have been uniformly italicized, in accordance with the present usage of scientific writers.

Egyptian Phoenician Early Greek and Latin

a² (a or ā), *undef. art.* [*ME* *a* (before consonants), earlier *an*, orig. with long vowel, *< AS an, one, an see an¹*] The form of *an* used before consonants and words beginning with a consonant-sound as, a man, a woman, a year, a union, a eulogy, a oneness, a hope. *An*, however, was formerly often used before the sounds of *h* and initial long *u* and *ou* even in accented syllables (as, *an* hospital, *an* union), and is still retained by some before those sounds in unaccented syllables (as, *an* historian, *an* united whole, *an* euphonious sound). The form *a* first appears about the beginning of the thirteenth century. It is placed before nouns of the singular number and also before plural nouns when *few* or *great many* is interposed [*Few* was originally singular as well as plural, and the article was singular (*ME* *a*) or plural (*ME* *ane*) to agree with it. In the phrase *a great many*, the article agrees with *many*, which is properly a noun (*AS* *mennu* see *many¹*, *n*), the following plural

a¹ noun, as in the phrase *a great many books*, is really a partitive genitive.]

a² (a or ā), *prep.* [*< ME. and late AS a, reduced form of an, on, on, in: see on.*] A reduced form of the preposition *on*, formerly common in all the uses of *on*, but now restricted to certain constructions in which the preposition is more or less disguised, being usually written as one word with the following noun. (a) Of place. *On, in, upon, unto, into*, the preposition and the following noun being usually written as one word, sometimes with, but commonly without, a hyphen, and regarded as an adverb or a predicative adjective, but best treated as a prepositional phrase. In such phrases a denotes (1) Position as, *to lie abed*, *to be afloat*, *to take a horseback*, *to stand a tipple*. (2) Motion as, *to go ashore*, "*how found did they drive their team a field way*". (3) Direction as, *to go ahead*, *to turn aside*, *to draw aback* (modern, *to draw back*). (4) Intention as, *to take apart*, *to burst asunder*. Similarly—(b) Of state. *On, in, etc.* as, *to be alive* [*AS on lif*], *to be asleep* [*AS on slæpe*], *to set afloat*, *to be afloat*, *to set adrift*. In this use now applicable to any verb (but chiefly to motion verbs and dissyllabic) take *a* as a noun as, *to be aglow* with excitement, *to be a swim*, *to be all a tremble*. (c) Of time. *On, in, at, by, etc.*, remaining in some colloquial expressions as, *to stay out a nights* (often written *o' nights*), *to go fishing a Sunday*; now *a days* (generally written *nowadays*). Common with adverbs of repetition as, *twice a day* [*< ME. twices a day, < AS twice on dæge*], *once a week* [*< ME. ones a wike, < AS dem on wican*], *three times a year* [*of ME. thre times a yr, < AS thrim æthum on gear*], etc. *a day* being a reduced form of *on day* (*of to day*), equivalent to *per diem*, *per annum*, etc. But in this construction the preposition *a* is now usually regarded as the indefinite article (varying to *an* before a vowel), "*four miles an hour*", "*ten cents a yard*", etc., being explained as elliptical for "*four miles in an hour*", "*ten cents for a yard*", etc. (d) Of process. In course of, with a verbal noun in *-ing*, taken passively as, *the house is a building*, "*while the ark was a preparing*" (1 Pet. in 20), while these things were a doing. The prepositional use is clearly seen in the alternative construction with *in* as, "*Forty and six years was this temple in building*," John. in 20. In modern use the preposition is omitted and the verbal noun is treated as a present participle taken passively as, *the house is building*. But none of these forms of expression has become thoroughly popular; the popular instinct being shown in the recent development of the desired "progressive passive participle" as, *the house is being built*, *the work is being done*, etc. This construction though condemned by logicians and purists, is well established in popular speech and will probably pass into correct literary usage. (e) Of action. *In, to, into*, with a verbal noun in *-ing*, taken actively (1) With *be* as, *to be a coming*, *to be a doing*, *to be a fighting*. Now only colloquial or provincial, literary usage omitting the preposition and treating the verbal noun as a present participle as, *to be coming*, *to be doing*. (2) With verbs of motion as, *to go a fishing*, *to go a wooing*, *to go a begging*, *to fall a crying*, *to go a going*. The preposition is often joined to the noun by a hyphen as, *to go a fishing*, or sometimes omitted, as, *to go fishing*, *to act going*, etc. For other examples of the uses of *a prep.*, see the prepositional phrases *abed*, *aboard*, *ahead*, etc. or the simple nouns.

a⁴ [Another spelling of *o*, now written *o'*, a reduced form of *of*, the *f* being dropped before a consonant, and the vowel obscured. Cf *a⁷*, *a⁸*, *a⁴*.] A reduced form of *of*, now generally written *o'*, as in *man-o'-war*, *six o'clock*, etc.

The name of John a Gaunt Shak., Rich. II, 1. 1
It is six a'clock

B. Jonson, Every Man in his Humor, 1. 4

a⁵ (a), *pron.* [E dual, corruption of *I*, being the first element, obscured, of the diphthong *ai*.] A modern provincial corruption of the pronoun *I*.

a⁶ (a), *pron.* [E dual, < ME dual *a*, corruptly for *he*, *he*, *heo*, *she*, *he*, *it*, *heo*, *hi*, *they*.] An old (and modern provincial) corruption of all genders and both numbers of the third personal pronoun, *he*, *she*, *it*, *they*. So *quotha*, that is, *quothe*.

A babbled of green fields Shak., Hen. V, 1. 1

a⁷ (a), *v.* [E dual, < ME *a*, *ha*, reduced form of *have*, the *t* being dropped as in *a⁴* or *o'* for *of* (ov).] An old (and modern provincial) corruption of *have* as an auxiliary verb, unaccented, and formerly also as a principal verb.

I had not thought my body could a vicked Beau and W.

a⁸ (ā) [Sc., usually written *a'*, = E *all*, like Sc *ca'* = E. *call*, *fa'* = *fall*, *ha'* = *hall*, etc.] All.

For a' that, an' a' that,
His ribband, star, an' a' that,
The man o' independent mind,
He looks an' laughs at a that
Burns, For A' That

a⁹ (a or ā), *interj.* [See *ah* and *O*.] The early form of *ah*, preserved, archaically, before a leader's or chieftain's name, as a war-cry (but now treated and pronounced as the indefinite article).

The Border sloop ran the sky,
A Home! a Gordon! was the cry
Scott, Marmion

a¹⁰ [L *ā*, the usual form of *ab*, from, of, before consonants see *ab-*.] A Latin preposition, meaning of, off, away from, etc. It occurs in certain phrases as, *a priori*, *a posteriori*, *a mensa et thoro*, etc., also in certain personal names of medieval or modern origin as, Thomas a Kempis, that is Thomas of Kempen, the school name given to Thomas Hammeken born at Kempen near Dusseldorf, Abraham a Sancta Clara, that is Abraham of St. Clare, the name assumed by Ulrich Megoric. The true name of Thomas a Becket (written also A' Becket, and, in an English fashion, a Becket, a Becket) was simply Thomas Becket or Beket, the *a* appears to be a later insertion, though supported by such late Middle English names as Wydo del Becket, John de Becket, William atte Becket, etc., that is of or at the brook [**becket*], not found as a common noun, being appar. a dim. of *beck*, a brook, or perhaps (*cf. bequet, bequet*, a pike (fish), dim. of *bec*, *beck*).

a- A prefix or an initial and generally inseparable particle. It is a relic of various Teutonic and classical particles, as follows.

a-1 [*< ME a-, < AS ā- (= OS ā- = OHG a-, u-, uor-, MHG a-, o-, G a- = Goth us-, before a vowel u-, before u-), a common unaccented prefix of verbs, meaning 'away, out, up, on', often merely intensive, in mod. E usually without assignable force. It appears as an independent prep. in OHG *u*, Goth *us*, out, and as an accented prefix of nouns and adjectives in OHG *MIH* *ā* *u*, *D* *oor*, *AS* *or*, *E* *or* in *orient* and *ort*, *q* *v*. In nouns from verbs in AS, *ā* the accent fell upon the prefix, which then retained its length, and has in one word, namely, *E oakum*, < AS *a-cumba*, entered mod. E with the reg. change of AS *a* under accent, losing all semblance of a prefix.] An unaccented inseparable prefix of verbs, and of nouns and adjectives thence derived, originally implying motion away, but in earlier English merely intensive, or, as in modern English, without assignable force, as in *abide*, *abode*, *arise*, *anale*, *ago* = *agone*, etc. The difference between *abide*, *arise*, *anale*, etc., and the simple verbs *bide*, *rise*, *nale*, etc., is chiefly syllabic or rhythmic. In a few verbs this prefix has taken in spelling a Latin semblance, as in *accuse*, *afraid*, *allay*, for *a curse*, *a fright*, *a lay*.*

a-2 [*< ME a-, usually and prop. written separately, a, < late AS a, a reduced form of ME and AS an, on see a³, prep. and on.*] An apparent prefix, properly a preposition, the same as *a³, prep.* When used in for a substantive it forms what is really a prepositional phrase, which is now generally written as one word, with or without a hyphen, and regarded as an adverb or as a predicative adjective as, *to lie abed*, *to be asleep*, *to be all a tremble*, etc. With verbal nouns in *-ing* it forms what is regarded as a present participle either active, as, *they are a coming* (colloq.) or passive, as, *the house was a building*. In the latter uses the *a* is usually, and in all it would be properly, written separately as a preposition. See *a³, prep.*, where the uses are explained.

a-3 [*< ME a-, or separately, a, < AS ā (only in *adun*, *adunt*, a reduced form of *of dunc*), a reduced form of *of*, E *of*, *off* see *of*, *off*, and *cf. a⁴*.] A prefix, being a reduced form of Anglo-Saxon *of*, prep., English *off*, from, as in *adown* (which see), or of later English *of*, as in *anew*, *afresh*, *akin*, etc. (which see).*

a-4 [*< ME a-, a reduced form of *of*, < AS *of*, an intensive prefix, orig. the same as *of*, prep. see *a-3* and *of*.*] A prefix, being a reduced form of Anglo-Saxon *of*, an intensive prefix, as in *athirst*, *ahungry* (which see).

a-5 [*< ME a-, a reduced form of *and*, *q*, *v*.*] A prefix, being a reduced form of *and* (which see), as in *along¹* (which see).

a-6 [*< ME a-, var. of *u*, *y*, *e*, reduced forms of *ge*, AS *ge-* see *u*.] A prefix, being one of the reduced forms of the Anglo-Saxon prefix *ge-* (see *u*), as in *along²* [*< AS *gelang**], *aware* [*< AS *ge-u**], *aford*, now spelled *afford*, simulating the Latin prefix *af-* [*< AS *ge-forthian**], *among* [*< AS *ge-mang**, mixed with *on-ge-mang* and *on-mang*], etc. The same prefix is otherwise spelled in *enough*, *cris*, *ylept*, etc.*

a-7 [*< ME a-, reduced form of *at*, < AS *at*, in *at-foian*, mixed in later E with *on-foian*, *afore* see *afore*.] A prefix, being a reduced form of *at*, mixed with *a-* for *on-*, in *afore* (which see).*

a-8 [*< ME a-, a reduced form of *at* in north. E, after *leel* *at*, to, as a sign of the infn, like E. to, see *at*.] A prefix, in *ado*, originally at *do*, northern English infinitive, equivalent to English *to do*. See *ado*.*

a-9. [A mere syllable.] A quasi-prefix, a mere opening syllable, in the interjections *aha*, *ahoy*. In *aha*, and as well in *ahoy*, it may be considered as *ah*.

a-10. [A reduced form of D. *hōud*. Cf. *a-9*.] A quasi-prefix, a mere opening syllable, in *avast*, where *a-*, however, represents historically Dutch *hou* in the original Dutch expression *hou* *vast* = English *hold fast*.

a-11 [*< ME a-, OF a-, < L. ad-*, or assimilated *ab-*, *ac-*, *af-*, etc. see *ad-*.] A prefix, being a reduced form of the Latin prefix *ad-*. In Old French and Middle English regularly *a*, and so properly in modern French and English, as in *avouch* [ult. < L. *advocare*], *amount* [ult. < L. *ad montem*], *avanche* [ult. < L. *ad vallem*], *abet*, *ameliorate*, etc., but in later Old French and Middle English *a* took in spelling a Latin semblance, *ad*, *ac*, *af*, etc., and so in modern English, as in *address*, *around*, *affect*, *aggravate*, etc., where the doubled consonant is unetymological. See *ad-*.

a-12. [*< L. a-*, a later and parallel form of *ad-* before *sc-*, *sp-*, *st-*, and *gn-*.] A prefix, being a reduced form (in Latin, and so in English, etc.) of the Latin prefix *ad* before *sc-*, *sp-*, *st-*, and *gn-*, as in *ascend*, *aspire*, *aspect*, *astut*, *ingent*, *agnate*, etc.

a-13 [*< ME a-, < OF a-, < L. ab-* see *ab-*.] A prefix, being a reduced form (in Middle English, etc.) of Latin *ab-*, as in *abate* (which see). In a few verbs this *a-* has taken a Latin semblance, as in *abs-tain* (treated as *ab-stain*), *as-soil*. See these words.

a-14 [*< L. a-* for *ab-* before *v* see *ab-*.] A prefix, being a reduced form (in Latin, and so in English, etc.) of the Latin prefix *ab-*, from, as in *avert* (which see).

a-15 [*< ME a-, < OF a-* for reg. OF *e-*, *ex-*, < L. *ex-*, out see *e-* and *ex-*.] A prefix, being an altered form of *e-*, reduced form of Latin *ex-*, as in *amend*, *abash*, etc., *aforce*, *afray* (now *afforce*, *affray*), etc. (which see).

a-16 [*< ME a-, reduced form of *an-* for *en-*, < OF *en-* see *en-*.] A prefix, being a reduced form of *an-* for *en-*, in some words now obsolete or spelled in semblance of the Latin, or restored, as in *acloy*, *acumber*, *aparr*, etc., later *acloy*, *acucumber*, modern *encumber*, *impair*, etc.*

a-17 [Ult. < L. *ah*, interj.] A quasi-prefix, representing original Latin *ah*, interj., in *alas* (which see).

a-18 [*< Gr a-*, before a vowel *av*, inseparable negative prefix, known as alpha privative (Gr *α-στερητικός*) = L. *in-* = Goth. AS *E*, etc., see *un-*.] A prefix of Greek origin, called alpha privative, the same as English *un-*, meaning not, without, -less, used not only in words taken directly or through Latin from the Greek, as *abyss*, *adamant*, *aculectic*, etc., but also as a naturalized English prefix in new formations, as *achromatic*, *asexual*, etc., especially in scientific terms, English or New Latin, as *Apteryx*, *Asiphonata*, etc.

a-19 [*< Gr a-* copulative (*a-αποιστικός*), commonly without, but sometimes and prop. with, the aspirate, *a-*, orig. **sa-* = Skt *sa-*, *sam-*. Cf. Gt *apa*, together, = E *same*, *q* *v*.] A prefix of Greek origin, occurring unfelt in English *acolyte*, *adelphous*, etc.

a-20 [*< Gr a-* intensive (*a-επιτατικός*), prob orig the same as *a-* copulative see *a-19*.] A prefix of Greek origin, occurring unfelt in *atlas*, *amaurosis*, etc.

a-21 [Ult. < Ar *al*, the.] A prefix of Arabic origin, occurring unfelt in *apocryph*, *azimuth*, *hazard* (for **azard*), etc., commonly in the full form *al-*. See *al-*.

a-1 [L. *a-* (pl. *-æ*), It. *a-* (pl. *-e*), Sp. Pg. *-a* (pl. *-as*), Gr. *-a*, *-η* (pl. *-ai*, L. spelling *-æ*), = AS. *-u*, *-i*, or lost; in E. lost, or represented unfelt by silent final *e*.] A suffix characteristic of feminine nouns and adjectives of Greek or Latin origin or semblance, many of which have been adopted in English without change. Examples are (a) Greek (first declension— in Latin spelling), *idea*, *coma*, *banisio*, *nausia*, etc. (b) Latin (first declension), *area*, *arena*, *formula*, *copula*, *nebula*, *vertebra*, etc. (c) Italian, *opera*, *gazzia*, *stanza*, etc. (d) Spanish, *armada*, *botella*, *manilla*, etc. (e) Portuguese, *madraça*, (f) New Latin, chiefly in scientific terms, *atamina*, *soda*, *alioia*, etc. *dakha*, *fuchina*, *camellia*, *urutaria*, etc. *amacha*, *Branta*, etc. common in geographical names derived from or formed according to Latin or Greek, as *Asia*, *Africa*, *America*, *Polymeria*, *Arabia*, *Florida*, etc. In English this suffix marks sex only in personal names, as in *Cornelia*, *Julia*, *Maria*, *Anna*, etc. (some having a corresponding masculine, as *Cornelius*, *Julius*, etc.), and in a few feminine terms from the Italian, Spanish, etc., having a corresponding masculine, as *donna*, *doña*, *duenna*, *signora*, *schora*, *sultana*, *inamorata*, etc., corresponding to masculine *don*, *signor*, *schor*, *sultan*, *inamorato*, etc.

a-2 [L. *-a*, pl. to *-um*, = Gr. *-a*, pl. to *-ov*, 2d declension, L. *-a*, *-æ*, pl. to *-um*, *-e*, = Gr. *-a*,

neut. pl., 3d declension; lost in AS. and E., as in *head, deer, sheep*, etc., pl., without suffix.] A suffix, the nominative neuter plural ending of nouns and adjectives of the second and third declensions in Greek or Latin, some of which have been adopted in English without change of ending. Examples are (a) in Greek, *phenomena*, plural of *phenomenon*, *misamata*, plural of *misamata*, etc. (b) in Latin, *strata*, plural of *stratum*, *data*, plural of *datum*, *genera*, plural of *genus*, etc. Some of these words have also an English plural, as *automata*, *criticisms*, *dogmas*, *memoranda*, *media*, etc. This suffix is common in New Latin names of classes of animals, as in *Mammalia*, *Amphibia*, *Crustacea*, *Protozoa*, etc., these being properly adjectives, agreeing with *animalia* understood.

-a³. [Sometimes written, and treated in dictionaries, as a separate syllable, but properly written as a suffix, being prob. a relic of the ME. inflexive *-e*, which in poetry was pronounced (*e g.*, ME. *stil-e, mil-e* see quot.) whenever the meter required it, long after it had ceased to be pronounced in prose.] An unmeaning syllable, used in old ballads and songs to fill out a line.

Jog on, jog on, the footpath way,
And merrily hent the stile a,
A merry heart goes all the day,
Your sad tires in a mile a.

Quoted by Shak. W T, iv 2

aam (ām), *n.* [*D.* *aam*, a liquid measure, = *G.* *ahm*, also *ohm* (see *ohm*); = *Heb.* *āma*, *<ML.* *ama*, a tub, tierce, *<L.* *kama*, *ama*, *<Gr.* *am*, a water-bucket, pail.] A measure of liquids used, especially for wine and oil, in Holland, Germany, Switzerland, Livonia, Esthonia, Denmark, and Sweden, a tierce. Its value differs in different localities: thus, in Amsterdam an *aam* of wine = 41 gallons, and an *aam* of oil = 37½ gallons, while in Brunswick an *aam* of oil = 39½ gallons. Also written *aum*, *aume*, *avm*, *awme*.

Aardvark (*Orycteropus capensis*)

aardvark (ārd'vārk), *n.* [*D.* *< aarde*, = *E.* *earth*, + *vark*, used only in dim form *varken*, a pig; = *E.* *farrow* and *E.* *pork*, *q v*] The ground-hog or earth-pig of South Africa. See *Orycteropus*.

Aardwolf (*Proteles lauridi*)

aardwolf (ārd'wulf), *n.* [*D.* *< aarde*, = *E.* *earth*, + *wolf* = *E.* *wolf*] The earth-wolf of South Africa. See *Proteles*.

Aaronic (a-ron'ik), *a* [*LL.* *Aaron*, *<Gr.* *Ἀαρών*, *<Heb.* *Āharōn*, perhaps, says Gesenius, the same with *hārōn*, a mountaineer, *<haram*, be high] 1. Pertaining to Aaron, the brother of Moses, or to the Jewish priestly order, of which he was the first high priest, as, the *Aaronic* priesthood; *Aaronic* vestments. — 2. In the Mormon hierarchy, of or pertaining to the second or lesser order of priests. See *priesthood* and *Mormon*.

Aaronical (a-ron'ik-al), *a* [*< Aaronic* + *-al*] Pertaining to or resembling the Aaronic priesthood.

Aaronite (ar'gn-it or ā'ron-it), *n.* [*< Aaron* + *-ite*] A descendant of Aaron, the brother of Moses. The Aaronites were hereditary priests in the Jewish church, and next to the high priest in dignity.

Aaronitic (ar'gn-it'ik), *a* [*< Aaronite* + *-ic*] Of or pertaining to the Aaronites.

The assumption that the representations in regard to the origin of the Aaronite priesthood are essentially false cannot well be sustained, unless it can be proved that Hebrew literature did not arise until about the eighth century B C, as the critics claim.

Schaff Herzog, Encyc. p. 1023

Aaron's beard (ar'onz- or ā'ronz-bērd), *n.* [See *Ps.* xxxiii. 2.] 1 A dwarf evergreen shrub, *Hypericum calycinum*, with large flowers (the largest of the genus) and numerous stamens, a native of southeastern Europe, and sometimes found in cultivation, St John's-wort so called from the conspicuous hair-like stamens. — 2 The smoke-tree, *Rhus Cotinus*. — 3 A species of saxifrage (*Saxifraga sarmentosa*) found in cultivation, Chinese saxifrage.

Aaron's rod (ar'onz- or ā'ronz-rod), *n.* [See *Ex.* vii. 10, Num. xvii. 8.] 1 In arch, an ornament consisting of a straight rod from which pointed leaves sprout on either side. The term is also applied to an ornament consisting of a rod with one serpent entwined about it, as distinguished from a caduceus, which has two serpents. — 2 A popular name of several plants with tall flowering stems, as the goldenrod, the hag-father, etc.

Ab (ab), *n.* [*Heb.* (cf *Heb.* *ch.* verdure.) The eleventh month of the Jewish civil year, and the fifth of the ecclesiastical year, answering to a part of July and a part of August. In the Syrian calendar Ab is the last summer month.

ab- [*ab-*, prep *ab*, older form *ap* = *Etrur.* *av* = *Gr.* *ἀπό* = *Skt.* *apa* = *Goth.* *af* = *OHG.* *aba*, *MHG.* *G.* *ab* = *AS.* *of* (rarely, as a prefix, *af-*), *E.* *of*, *off* see *of*, *off*, *apo*, and *a-*, *a-*, *a-*] A prefix of Latin origin, denoting disjunction, separation, or departure, off, from, away, etc., as in *abduct*, *abjure*, etc. Before *c* and *t*, *ab* becomes (*in Latin*, and so *in English* etc.) *abs*, as in *abscond*, *absorb*, etc., before *v* and *m*, it becomes *a*, as in *avert*, *amentia*, etc. — In *abacinate* and *abacinate*, the prefix (reduced to *a* in *abracadabra*, which see) is rather an assimilation of *ad*.

A. B. 1 An abbreviation of the Middle and New Latin *Artium Baccalarius*, Bachelor of Arts. In England it is more commonly written *B. A.* See *bachelor*. — 2 An abbreviation of *able-bodied*, placed after the name of a seaman on a ship's papers.

abal (ab'ā), *n.* [*Ar.* *abā*] 1 A coarse woollen stuff, woven of goats' or camels' or other hair or wool in Syria, Arabia, and neighboring countries. It is generally striped, sometimes in plain bars of black and white or blue and white, sometimes in more elaborate patterns. — 2 (a) An outer garment made of the above, very simple in form, worn by the Arabs of the desert. The illustration shows such an abal, made of two breadths of stuff sewed together to make an oblong about four by nine feet. This is then folded at the lines *a b*, *a b*, the top edges are sewed together at *a c*, *a c*, and armholes are cut at *a f*, *a f*. A little simple embroidery in

abacus (ab'a-kus), *n.*, pl *abaci* (-i) [*L.*, a sideboard, counting-table, etc., *<L.* *abax*, *<Gr.* *ἀβας*, a reckoning-board, sideboard, etc., said to be from *Phen abak*, sand strewn on a surface for writing, because the ancients used tables covered with sand on which to make figures and diagrams.] 1 A tray strewn with dust or sand, used in ancient times for calculating. — 2 A contrivance for calculating, consisting of beads or balls strung on wires or rods set in a frame.

The abacus was used, with some variations in form, by the Greeks and Romans, and is still in every day use in many eastern countries from Russia to Japan for even the most complex calculations. The sand strewn tray is supposed to have been introduced from Babylon into Greece by Pythagoras, who taught both arithmetic and geometry upon it. Hence this form is sometimes called *abacus Pythagoricus*. In the form with movable balls, they are used simply as counters to record the successive stages of a mental operation. The sum shown in the ancient engraving of a Chinese abacus (called *suanyan* or "reckoning board") is 5,190,401.

the form of a capital, the column or pillar, and upon which rests, in

classic styles, the lower surface of the architrave. In the Greek Doric it is thick and square, with out sculptured decoration. In the Ionic order it is thinner and ornamented with moldings on the sides. In the Corinthian also it is ornamented and has concave sides and truncated corners. In medieval architecture the abutment was abandoned and the arch placed directly on the column or pillar, the abacus, however, was retained until the decline of the style. In Byzantine work it is often a deep block affiliated with

abatement (a-bāt-'ment), n. [OF. *abatement*, < *abatre*, beat down see *abate*, v.] 1. The act of abating, or the state of being abated; diminution, decrease, reduction, or mitigation: as, *abatement of grief* or pain.

The spirit of accumulation requires *abatement* rather than increase. *J. S. Mill*, *Pol. Econ.*, I. xiii. § 2.
Such sad *abatement* in the goal attained.
Louill, *Voyage* to Vinland.

2. The amount, quantity, or sum by which anything is abated or reduced, deduction; decrease. Specifically, a discount allowed for the prompt payment of a debt, for damage, for overcharge, or for any similar reason, *rebate*.

Would the Council of Regency consent to an *abatement* of three thousand pounds?

Macaulay, *Hist. Eng.*, xiii.

3. In *her.*, a mark annexed to coat-armour, in order to denote some dishonorable act of the person bearing the coat of arms, or his illegitimate descent. Nine marks for the former purpose are mentioned by heralds, but no instance of their actual use is on record. The bendlet or baton sinister (which see), a mark of illegitimacy, is of the nature of an abatement, but the paternal shield, although charged with the baton sinister, would generally be the most honorable bearing within reach of the illegitimate son. Abatements generally must be regarded as false heraldry, and are very modern in their origin. The word is also used to denote the turning up-side down of the whole shield, which was common in the degrading of a knight. Also called *rebate* and *nut*.

Throwing down the stars [the nobles and senators] to the ground, putting dishonourable *abatements* into the fairest coats of arms. *J. Spenser*, *Righteous Ruler*.

4. In law (a) Removal or destruction, as of a nuisance. (b) Failure, premature end, suspension or diminution, as of an action or of a legacy. See *abate*. (c) The act of intruding on a freehold vacated by the death of its former owner, and not yet entered on by the heir or devisee. (d) In *revenue law*. (1) A deduction from or refunding of duties on goods damaged during importation or in store. (2) A deduction from the amount of a tax. The mode of abatement is prescribed by statute. — 5. In *carp.*, the waste of a piece of stuff caused by working it into shape. — *Plea in abatement*, in law, a defense on some ground that tends to suspend or defeat the particular action and thus distinguished from a *plea in bar*, which goes to the merits of the claim. Thus a plea that the defendant is now insane would be only a *plea in abatement*, because, if sustained, it would at most only suspend the action while his insanity continued, but a plea that he was insane at the time of the transactions alleged would be a *plea in bar*, as showing that he never incurred any liability whatever. — *Syn.* 1. *Decrease*, *decline*, *diminution*, *subside*, *intermission*, *waning*, *ebb*. 2. *Rebate*, *allowance*, *deduction*, *discount*, *mitigation*.

abbé (a-bâ'), *n* [F, < L. *abbat*, acc. of *abbas* see *abbot*] In France, an abbot (a) More generally, and especially before the French revolution (1) Any secular person, whether ecclesiastic or layman, holding an abbey in *commendam*, that is, enjoying a portion, generally about one third, of its revenues, with certain honora, but, except by privilege from the pope, having no jurisdiction over the monks, and not bound to residence. Such persons were styled *abbés commendataires*, and were required to be in orders, though a dispensation from this requirement was not uncommonly obtained. (2) A title assumed, either in the hope of obtaining an abbey or for the sake of distinction, by a numerous class of men who had studied theology, practiced celibacy, and adopted a peculiar dress, but who had only a formal connection with the church, and were for the most part employed as tutors in the families of the nobility, or engaged in literary pursuits. (b) In recent usage, a title assumed, like the Italian title *abate* (which see), by a class of unbeneficed secular clerics

abbes (ab'es), *n*. [ME. *abbesse*, *abbes*, < OF *abbesse*, *abesse* = Pr *abadessa*, < L *abbatissa*, fem. of *abbas* see *abbot*, and cf. *abbotess*.] 1 A female superior of a convent of nuns, regularly in the same religious orders in which the monks are governed by an abbot; also, a superior of canonesses. An *abbes* is, in general, elected by the nuns, and is subject to the bishop of the diocese, by whom she is invested according to a special rite called the *benediction of an abbes*. She must be at least forty years of age, and must have been for eight years a nun in the same monastery. She has the government of the convent, with the administration of the goods of the community, but (cannot, on account of her sex, exercise any of the spiritual functions pertaining to the priesthood. Some times civil or feudal rights have been attached to the office of *abbes*, as also jurisdiction over other subordinate convents.

2 A title retained in Hanover, Wurtemberg, Brunswick, and Schleswig-Holstein by the lady superiors of the Protestant seminaries and sisterhoods to which the property of certain convents was transferred at the Reformation.

abbot (ab'ot), *n.* [*<ME abbot, abbod, <AS abbot, usually abba, abba, <L abbâtem, sec. of abbas, an abbot, <L abba, father: see abba¹*.] 1. Literally, father. a title originally given to any monk, but afterward limited to the head or superior of a monastery. It was formerly especially used in the order of St. Benedict, rector being employed by the Jesuits, *guardianus* by the Franciscans, *prior* by the Dominicans, and *archimandrite* or *hegumenos* by the Greek and Oriental churches, to designate the same office. Originally the abbots, like the monks, were usually laymen, later they were required to be in holy orders. They were at first subject to the bishop of the diocese, but in the contentions between the bishops and abbots the latter in many cases gradually acquired exemption from jurisdiction of the bishops and became subject to the pope directly, or to an *abbot general*, or *archabbot*, who exercised a supervision over several associated abbots. As the influence of the religious orders increased, the power, dignity, and wealth of the abbots increased proportionally, many of them held rank as temporal lords, and, as mitred abbots, exercised certain episcopal functions in the territory surrounding their monasteries. In the reign of Henry VIII. twenty six abbots sat in the House of Lords. Until the sixteenth century abbots were chosen from the monks by the bishop, since that time they have been generally elected by the monks themselves, ordinarily for life. In some instances, where the administration of the revenues of an abbey fell under the civil authority, the conferring of the benefice, and therefore the nomination of the abbot, came into the hands of the temporal sovereign, a practice variously regulated by concordats with the different countries. The right of confirmation varies, the solemn benediction of an abbot ordinarily belongs to the bishop of the diocese, occasionally to the head abbot, or to a special bishop chosen by the abbot elect. In some instances of exempt abbots it has been conferred by the pope in person.

2. In later usage, loosely applied to the holder of one of certain non-monastic offices. (a) The principal of a body of parochial clergy, as an Episcopal rector. (b) A cathedral officer at Toledo, Spain. (c) In the middle ages, the head of various guilds, associations, and popular assemblies as, *abbot* of bell ringers, the *abbot* of merriment.

3. A title retained in Hanover, Würtemberg, Brunswick, and Schleswig-Holstein by the heads of certain Protestant institutions to which the property of various abbots was transferred at the Reformation. See *abbeys*.

2. — **Abbot of abbots**, a title formerly conferred upon the abbot of the original Benedictine monastery of Monte Cassino. — **Abbot of merriment** (in England), **abbot of unreason** (in Scotland), the personage who took the principal part in the Christmas revels of the populace before the Reformation. — **Abbot of the people** (*abbas populi*). (a) From 1270 to 1339, the nominal chief magistrate of the republic of Genoa. (b) The chief magistrate of the Genoese in Galata. — **Abbot of yellow-beaks**, or **freshmen**, a mock title at the University of Paris. — **Cardinal abbot**, a title borne by the abbots of Cluny and Vendôme, who were *ex officio* cardinals. — **Mitred abbot**, an abbot who has the privilege of using the insignia and exercising certain of the functions of a bishop. — **Regular abbot**, an abbot duly elected and confirmed, and exercising the functions of the office. — **Secular abbot**, a person who is not a monk, but holds an abbacy as an ecclesiastical benefice with the title and some of the revenues and honors of the office. See def. 3, above. — **Titular abbot**, a person possessing the title but not exercising the functions of an abbot, as when an abbey had been confiscated or given in commendam. See *abbe*. — **Triennial abbot**, an abbot appointed for three years instead of, as ordinarily, for life. — *Syn* *Abbot, Prior*. See *prior*.

= *Syn* 2. *Abbreviation, Contraction*. An abbreviation of a word is strictly a part of it, generally the first letter or

syllable, taken for the whole, with no indication of the remaining portion as, *A D* for *Anno Domini*, *Gen.* for *Genesis*, *math.* for *mathematics*, *Alex* for *Alexander*. A contraction, on the other hand, is made by the elision of certain letters or syllables from the body of the word, but in such a manner as to indicate the whole word as, *read payt* or *read payt* for *received payment*, *conrad* for *contracted or continued*, *Wm* for *William*. In common usage, however, this distinction is not always observed.

abbreviatio placitorum (a-bré-vi-ä'shi-ö plas-i-tö-rum). [*ML*.] Literally, an abridgment of the pleas; a brief report of law-cases, specifically, notes of cases decided in the reign of King John, which constitute the earliest English law-reports, and embody the germs and early developments of the common law.

abbreviator (a-bré-vi-ä-tor), *n.* [*<ML. abbreviator, <LL. abbreviare: see abbreviate, v*.] 1. One who abbreviates, abridges, or reduces to a smaller compass; specifically, one who abridges what has been written by another.

Sir W. Hamilton, Logie

2. One of a number of secretaries in the chancery of the pope who abbreviate petitions according to certain established and technical rules, and draw up the minutes of the apostolic letters. They formerly numbered 72, of whom the 12 principal were styled *de majori parte* (literally, of the greater part), from the part in the chancery where they wrote) and 22 others *de minori parte* (of the lesser part) the remainder being of lower rank. The number is now reduced to 11, all *de majori parte*. They sign the apostolic bulls in the name of the cardinal vice-chancellor. The *abbreviator of the curia* is a prelate not belonging to the above college, but attached to the office of the apostolic datary (*sedatarius*), he expedites bulls relating to pontifical laws and constitutions, as for the canonization of saints, and the like.

Abderite (ab-de-rit), *n.* [*<L. Abdërita, also Abderitis, <Gr. Ἀβδῆριτις, <Ἀβδῆρα, 1. Abdera*.] 1. An inhabitant of Abdera, an ancient maritime town in Thrace — 2. A stupid person, the inhabitants of Abdera having been proverbial for their stupidity. — **The Abderite**, Democritus of Abdera, born about 460 B. C., and the most learned of the Greek philosophers prior to Aristotle. He was with Epicurus, the founder of the atomic or atomistic philosophy (see *atomism*), the first attempt at a complete mechanical interpretation of physical and psychological phenomena. The tradition that Democritus always laughed at the follies of mankind gained for him the title of the laughing philosopher. Fragments of some of his numerous works have been preserved.

abdest (ab'dent), *n.* [*Per. ābdast, <āb, water, + dast, hand*.] Purification or ablution before prayer: a Mohammedan rite.

Abdevenham (ab-dev'n-ham), *n* In *astrology*, the head of the twelfth house in a scheme of the heavens.

abdomen (ab-dom'en or ab'do-men), *n* [*L*, of uncertain origin, perhaps *ureg* *<abdicare*, put away, hide, conceal see *abdicate*] 1 The belly; that part of the body of a mammal which lies between the thorax and the pelvis, the perivisceral cavity containing most of the di- gestive and some of the urogenital organs and associated structures. It is bounded above by the diaphragm, which separates it from the thoracic cavity, below by the rim of the pelvic cavity, with which it is continuous, behind by the vertebral column and the psoas and quadratus lumborum muscles. In front and laterally by several lower ribs the iliac bones and the abdominal muscles proper. The walls of the abdomen are lined with the serous membrane called *peritoneum*, and are externally invested with common integument. Its external surface is arbitrarily divided into certain

definite regions, called *abdominal regions* (see *abdominal*). The principal contents of the abdomen, in man and other mammals, are the end of the esophagus, the stomach, the small and most of the large intestine, the liver, pancreas, and spleen, the kidneys, suprarenal capsules, ureters, bladder (in part), uterus (during pregnancy at least), and sometimes the testicles, with the associated nervous, vas- cular, and serous structures. The apertures in the ab- dominal walls are, usually, several through the diaphragm, for the passage of the esophagus, nerves, blood vessels, and lymphatics, in the groin, for the passage of the fem- oral vessels and nerves and the spermatic cord, or the round ligament of the uterus, and at the navel, in the fetus, for the passage of the umbilical vessels.

2 In vertebrates below mammals, in which there is no diaphragm, and the abdomen con- sequently is not separated from the thorax, a region of the body corresponding to but not co- incident with the human abdomen, and varying

in extent according to the configuration of the body

Thus, the ab- domen of a serpent is coex- tensive with the under side of the body from head to tail, and in descriptive ornithology "pectus is re- stricted to the swelling an- terior part of the gastrum, which we call belly or *ab- domen* as soon as it begins to straighten out and flatten"

Coues, *N A Birds*, p. 100

portion, and containing the greater part of the digestive apparatus. It is divided into a number of rings or segments, typically eleven (or ten, as in *Hymen- optera* and *Lepidoptera*), on the sides of which are small respiratory stigmata, or spiracles

4 In *Arthropoda* other than insects, the cor- responding hinder part of the body, however distinguished from the thorax, as the tail of a lobster or the apron of a crab — **5** In *asci- dian* (*Tunicata*), a special posterior portion of the body, situated behind the great pharyn- geal cavity, and containing most of the ali- mentary canal

abdominal regions, in *human anat*, certain regions into which the abdomen is arbitrarily divided for the purpose of mapping its surface with reference to the viscera which lie beneath these regions respectively

Two hori- zontal parallel lines being drawn around the body, one (a a) crossing the cartilage of the ninth rib, the other (b b) crossing the highest point of the iliac bone, the abdominal surface is divided into three zones, an upper, a middle, and a lower, respectively

called *epigastric*, *umbilical*, and *hypogastric*. Each of these is subdivided into three parts by two vertical lines (c c), each drawn through the middle of Poupart's liga- ment

The central part of the epigastric zone (1) re- tains the name of *epigastric*, its lateral portions (4 4) are the *right* and *left hypochon- driae* regions, the middle part of the umbilical (2) is called the *umbilical* region, while its lateral portions (5 5) are the *right* and *left lumbar* regions, the middle portion of the hypogastric zone (3) is called the *hypogastric* region, but sometimes the *pubic* re- gion, while its lateral por- tions (6 6) are called the *right* and *left iliac* (or *inguinal*)

regions. The adjoining region of the thigh, below the fold of the groin, is properly ex- cluded — **Abdominal respi- ration**, that type of respiration in which the action of the diaphragm, and consequently the movement of the abdo- men, is most marked

contrasted with *thoracic* or *costal respiration* — **Abdominal ribs**, in *herpet*, a series of transverse ossifications in the wall of the abdomen of some reptiles, as dinosaurs and crocodiles, in the latter the series consists of seven on each side, lying superficial to the recti muscles. They are quite distinct from true ribs, and considered by some to be dermal ossifications

Abdominal dermal ribs are developed in some species [of *Dinosauria*], if not in all

Huxley, *Anat Vert*, p. 227

Abdominal ring, in *anat* (a) *Internal*, an oval opening in the fascia of the transversalis abdominis (trans- verse muscle of the abdomen), about midway between the superior iliac spine and the pubic spine, and half an inch above Poupart's ligament (b) *External*, a similar oblong opening in the fascia of the obliquus externus abdominis (external oblique muscle of the abdomen), further down and nearer the mid line of the body. These rings are respectively the inlet and outlet of the inguinal canal

Also called *inguinal rings* — **Abdominal scutellum**, in *herpet*, the short, wide, imbricated scales which lie along the belly of a serpent from chin to anus

— **Abdominal segments**, in *entom*, etc., the individual somites or rings of which the abdomen of an insect, a crustacean, etc., is or may be composed

— **Abdominal vertebrae**, in *ichth*, all the vertebrae behind the head which have ribs or rib- like processes arching over the visceral cavity

— **Abdom- inal viscera**, those organs, collectively considered, which are situated in the abdomen, being especially those of the digestive system See *abdomen*, I

abduce (ab-dū's), *v. t.*; pret. and pp. **abduced**, ppr. **abducing**. [*L. abducere*, < *ab*, away, + *ducere*, lead: see *ductile*] 1. To draw or lead away by persuasion or argument.—2. To lead away or carry off by improper means; abduct. [Rare]—3. To draw away or aside, as by the action of an abductor muscle.

If we *abduce* the eye unto either corner, the object will not duplicate.
Sir T. Browne, Vulg. Err., iii 20

abducens (ab-dū'senz), *n*; pl. **abducens** (-enz'tēz). [*L. see abducere*, < *a*] In anat., one of the sixth pair of cranial nerves, so called because it is the motor nerve of the rectus externus (external straight) muscle of the eye, which turns the eyeball outward.

abducent (ab-dū'sent), *a.* and *n.* [*L. abducere*], ppr. of *abducere*, draw away. see *abduce*.] 1. *a.* Drawing away, pulling aside. In anat., specifically applied—(a) to those muscles which draw certain parts of the body away from the axial line of the trunk or of a limb, in contradistinction to the *adduct* muscles or *adductors*, (b) to motor nerves which effect this action—**Abducent nerves**, the sixth pair of cranial nerves, the abducens.

II. *n.* That which abducts; an abducens

abduct (ab-duk't), *v. t.* [*L. abducere*, ppr. of *abducere*, lead away: see *abduce*] 1. To lead away or carry off surreptitiously or by force, kidnap.

The thing is self evident, that his Majesty has been *abducted* or spirited away, "*enlevé*," by some person or persons unknown.
Carlyle, French Rev., II iv 4

2. In *physiol.*, to move or draw away (a limb) from the axis of the body, or (a digit) from the axis of the limb. opposed to *adduct*

abduction (ab-duk'shon), *n.* [*L. abductio(n)*, < *abducere* see *abduce*] 1. The act of abducting or abducting (a) In law, the act of illegally leading away or carrying off a person, more especially, the taking or carrying away of a wife, a child, a ward, or a voter by fraud, persuasion, or open violence (b) In *physiol.*, the action of the muscles in drawing a limb or other part of the body away from the axis of the body or of the limb, as when the arm is lifted from the side, or the thumb is bent away from the axis of the arm or the middle line of the hand (c) In *anat.*, the receding from each other of the extremities of a fractured bone.

2. [*NL. abductio*, a word used by Giulio Pacio (1550-1635), in translating *ἀναγωγή* in the 25th chapter of the second book of Aristotle's *Prior Analytics*, in place of *deductio* and *reductio*, previously employed] In *logic*, a syllogism of which the major premise is evident or known, while the minor, though not evident, is as credible as or more credible than the conclusion. The term is hardly used except in translations from the passage referred to.

After referring to another variety of ratiocinative procedure, which he calls *Apagoge* or *Abduction* (where the minor is hardly more evident than the conclusion, and might sometimes conveniently become a conclusion first to be proved), Aristotle goes on to treat of *objection* generally.
Græce, Aristotle, vi

abductor (ab-duk'tor), *n.* [*NL. see abducere* see *abduce*.] One who or that which abducts. Specifically, in anat. [*pl. abductores* (ab-duk'tōrēz)], a muscle which moves certain parts from the axis of the body or of a limb as the *abductor pollicis*, a muscle which pulls the thumb outward, opposed to *adductor*. The abductor muscles of the human body are the *abductor pollicis* (abductor of the thumb) and *abductor minimi digiti* (abductor of the least digit) of the hand and foot respectively. The first dorsal interosseous muscle of the human hand is sometimes called the *abductor indicis* (abductor of the forefinger). The *abductor tertii intermedii* (abductor of the third internode of the second digit) is a peculiar muscle of both hand and foot of the gibbon (*Hyllobates*), arising from the second metacarpal or metatarsal bone, and inserted by a long tendon into the proximal base of the ungual internode of the second digit. The *abductor metacarpi quinti* (abductor of the fifth metacarpal) is a muscle of the hand in certain lizards. For the abductor in human anatomy, see *cut under muscle*.

abe (a-bē'), *v. t.* [*For be*, prefix unmeaning, or as in *ado*] Used in the same sense as *be*. Also spelled *abee*.—To let *abe*, to let be, let alone. Hence, *let abe* is used in the substantive sense of forbearance or connivance, as in the phrase *let abe for let abe* one act of forbearance in return for another, mutual forbearance.

I am for *let abe* for *let abe*.
Sentt, Pirate, II xvii

Let *abe*, let alone, not to mention, far less, as, he couldna dit, *let abe* stand. [Scotch]

abeam (a-bē'm), *prep.* *phr.* as *adv.* or *a.* [*< ab*, prep., on, + *beam*.] *Naut.*, in or into a direction at right angles to the keel of a ship; directly opposite the middle part of a ship's side, and in line with its main-beam. as, we had the wind *abeam*.

The wind was hauling round to the westward, and we could not take the sea *abeam*.
Kane, Sec. Grinn. Exp., II 257

The sea went down toward night, and the wind hauled *abeam*.

abearing (a-bār'ing), *n.* [*ME. abearing* verbal *n* of *abear*, *abear*] Behavior, demeanor

abecedarian, *n.* Plural of *abecedarian*

abecedarian (ā-bē-sē-dā'ri-an), *a.* and *n.* [*< F. abecedarie*, < *LL. abecedarius* (psalmi abecedarii, alphabetical psalms), < *a* + *be* + *ce* + *da*, the first four letters of the alphabet (cf. *alphabet*), + *-arius*: see *-arian*] 1. *a.* Pertaining to or formed by the letters of the alphabet—2. Pertaining to the learning of the alphabet, or to one engaged in learning it, hence, relating to the first steps in learning.

There is an *abecedarian* ignorance that precedes knowledge, and a *Doctoral* ignorance that comes after it.
Cotton, tr. of Montaigne, I 606

Another form is *abecedary*

Abecedarian psalms, *hymns*, etc., psalms, hymns, etc. (as the 119th psalm), in which the verses of successive distinct portions are arranged in alphabetical order

II. *n.* 1. One who teaches or learns the letters of the alphabet—2. [*cap*] A follower of Nicolas Storch, an Anabaptist of Germany, in the sixteenth century. The *Abecedarians* are said to have been so called because Storch taught that study or even a knowledge of the letters was unnecessary, since the Holy Spirit would impart directly a sufficient understanding of the Scriptures.

abecedarium (ā-bē-sē-dā'ri-um), *n*; pl. *abecedaria* (-ā) [*Nent of LL. abecedarium* see *abecedarian*.] An a-b-c book

It appears therefore that all the Italic alphabets were developed on Italian soil out of a single primitive type, of which the *abecedaria* exhibit a comparatively late survival.
Innocent Taylor, The Alphabet, II 131

Logical abecedarium, a table of all possible combinations of any finite number of logical terms. *Peirce*

abecedary (ā-bē-sē-dā'ri), *a.* and *n.* [*< L. abecedarium* see *abecedarian*] 1. *a.* Same as *abecedarian*.

Abelian (ā-bē'l'-i-an), *n.* [*< Abel* + *-ian*, also *Abelite*, < *LL. Abelianus*, pl., < *Abel* see *-ite-1*] A member of a religious sect which arose in northern Africa in the fourth century. The *Abelians* married, but lived in continence, after the manner, as they maintained, of Abel, and attempted to keep up the sect by adopting the children of others. They are known only from the report of St. Augustine, written after they had become extinct. Also called *Abelites* and *Abelonians*.

Abelian (ā-bē'l'-i-an), *a.* Of or pertaining to the Norwegian mathematician Niels Henrik Abel (1802-1829).—**Abelian equation**, an irreducible algebraic equation, one of whose roots is expressible as a rational function of a second, and shown by Abel to be solvable by the solution of a second equation of a lower degree—**Abelian function**, in *math.*, a hyperelliptic function, a symmetric function of inverses of Abelian integrals. The name has been used in slightly different senses by different authors, but it is best applied to a ratio of double theta functions—**Abelian integral**, one of a class of ultrahyperelliptic integrals first investigated by Abel, any integral of an algebraic function not reducible to elliptic functions.

Abelite, **Abelonian** (ā-bē'l'-it, ā-bē'l'-o-ni-an), *n.* Same as *Abelian*.

Abelmoschus (ā-bēl-mos'kus), *n.* [*ML. < Ar. abu'l-mosk*, -mosk, father (source) of musk *abu*, father, *al*, the, *mosk*, musk, musk: see *abba-1* and *musk*] A generic name formerly applied to some species of plants now referred to *Hibiscus*, including 1 *moschatus* or *H. Abelmoschus*, the *abelmosk* or muskmallow of India and Egypt, producing the muskseed used in perfumes, and 2 *H. esculentus*, the okra. See *Hibiscus*.

abelmosk (ā-bēl-mosk), *n.* [*< ML. Abelmoschus*] A plant of the former genus *Abelmoschus*. Also spelled *abelmusk*.

abel-tree (ā-bēl-trē), *n.* Same as *abele*.

abelwhackers, *n.* See *abelwhackers*.

Abeona (ā-bē-ō'nā), *n.* [*LL. Abeona*, the goddess of departing, < *L. abire*, go away, *abeo*, I go away, < *ab*, away, + *ire*, go, < *eo*, I go] 1. In *Rom. myth.*, the goddess who presided over departure, as of travelers.—2. [*NL. (Chas. Girard, 1854)*] In *ichth.*, a genus of viviparous embiotocoid fishes of the family *Holconotidae*, represented by such surf-fishes as 1 *troubridgei*, of the Californian coast—3. In *entom.*, a genus of hemipterous insects. *Stål*, 1876

aber (ab'er), *n.* [*Gael. abar* = *W. abai*, a confluence of waters, the mouth of a river. Cf. *Gael. abhar*, with same senses, = *W. yfwr*, influx: see *inver*] A Celtic word used as a prefix to many place names in Great Britain, and signifying a confluence of waters, either of two rivers or of a river with the sea. *Aberriden*, *Aberdour*, *Abercromby*, *Aberystwith*.

aberdavine, *n.* See *aberdavine* *Iatham*

aberdenn (ab'er-dēn), *n.* [*Etym. uncertain* Cf. *aberdenn*] In *ornith.*, a name of the knot (which see), *Tringa canutus*.

aberdervine (ab'er-de-vin'), *n.* [*Etym. unknown* see below] The siskin, *Chrysomitris spinus*, a well-known European bird of the finch family (*Fringillidae*), nearly related to the goldfinch, and somewhat resembling the green variety of the canary-bird. See *siskin*. Also spelled *aberdavin*, *abadvine*. [*Local, Eng.*]

About London, the siskin is called the *aberdervine* by bird catchers. *Reuss*, ed. of Montagu's Dict., 1831, p. 2

[The word (*aberdervine*) is not now in use. If it ever was I believe it was first published by Abhu (1737) and that it was a bird catcher or bird dealer's name about London, but I suspect it may have originated in a single bird dealer, who coined it to give fictitious value to a common bird for which he wanted to get a good price. Book writers have gone on repeating Abhu's statement without adding any new information and I have never met with any one who called the siskin or any other bird by this name. No suggestion as to its etymology seems possible. *Prof. A. Newton*, letter.]

aberr (ab'er'), *v. t.* [*< L. aberrare* see *aberrate*] To wander, err. [Rare]

Divers were out in this account, *aberrant* several ways from the true and just compute, and calling that our year, which perhaps might be another.
Sir T. Browne, Vulg. Err., iv 12

aberrance (ab'er'ans), *n.* Same as *aberrancy*

aberrancy (ab'er'an-si), *n.*, pl. *aberrancies* (-is) [*< L. as if *aberrantia*, < *aberrant* (-t)-s see *aberrant*] A wandering or deviating from the right way, especially, a deviation from truth or rectitude. Another form is *aberrance*. [Rare]

They do not only swarm with errors, but vices depend on them. Thus they commonly affect no man any further than he deserves his reason, or complies with their aberrancies.
Sir T. Browne, Vulg. Err., i 3

Aberrancy of curvature, in *math.*, the angle between the normal to a curve at any point and the line from that point to the middle point of the infinitesimal chord parallel to the tangent

aberrant (ab-er'ant), *a.* [*L. aberrant(-t)s*, ppr of *aberrare* see *aberrate*.] 1 Wandering, straying from the right or usual course.

An aberrant lark appears about three hundred miles west south west of Ireland, in latitude 51°, longitude 18° west. *Science* 111 343

2. In *zool* and *bot*, differing in some of its characters from the group in which it is placed said of an individual, a species, a genus, etc.

In certain aberrant *Rotalia* the shell is commonly of a rich crimson hue. *N. B. Carpenter, Micros*, § 459

The more aberrant any form is the greater must have been the number of connecting forms which have been exterminated or utterly lost.

Darwin, Origin of Species, p 387

Aberrant duct of the testis, in *anat*, a slender tube or diverticulum from the lower part of the canal of the epididymis, or from the beginning of the excretory duct of the testis (vas deferens). It varies from 2 to 14 inches in length, is coiled up into a fusiform mass extending up the spermatic cord 2 or 3 inches, and terminates blindly. Two or more such tubes are occasionally found together, but they are sometimes entirely wanting. See *testis*. Also called *vas aberrans*, *vacuum aberrans*.

aberrate (ab-er'at), *v* *t*, pret. and pp *aberrated*, ppr. *aberrating*. [*L. aberratus*, ppr of *aberrare*, stray from, *ab*, from, + *errare*, to stray see (1)]. To wander or deviate from the right way, diverge. [Rare.]

The product of their defective and aberrating vision. *Dr Quincey*

aberration (ab-er-rā'shon), *n* [*L. aberratio(-n-)*, *aberrare* see *aberrate*.] 1 The act of wandering away, deviation, especially, in a figurative sense, the act of wandering from the right way or course, hence, deviation from truth or moral rectitude.

So then we draw near to God, when, repenting us of our former aberrations from him, we renew our covenants with him. *Sp. Hall, Sermon on James iv* 8

The neighbouring churches, both by petitions and messengers, took such happy pains with the church of Salem, as presently recovered that holy flock to a sense of his [Roger Williams's] aberrations. *C. Matha, Mag. Chron*, vii 1

2. In *pathol* (a) A wandering of the intellect, mental derangement. (b) Vicious hemorrhage. (c) Diapedesis of blood-corpuscles. (d) Congenital malformation.—3. In *zool* and *bot*, deviation from the type, abnormal structure or development.

In whichever light therefore, insect aberrations is viewed by us, we affirm that it does exist.

Wollaston, Var. of Species, p 2

4. In *optics*, a deviation in the rays of light when unequally refracted by a lens or reflected by a mirror, so that they do not converge and meet in a point or focus, but separate, forming an indistinct image of the object, or an indistinct image with prismatically colored edges. It is called *spherical* when, as in the former case, the imperfection or blurring arises from the form of curvature of the lens or reflector, and *chromatic* when, as in the latter case, there is a prismatic coloring of the image arising from the different refrangibility of the rays composing white light, and the consequent fact that the foci for the different colors do not coincide. Thus, in fig 1, the rays passing through the lens *L* near its edge have a focus at *A*, while those which pass near the axis have a focus at *B*, hence, an image formed on a screen placed at *m* would appear more or less distorted or indistinct.

Fig 1

Fig 2

Fig 1, diagram illustrating the spherical aberration of a lens. Fig 2, diagram illustrating the chromatic aberration.

In fig 2 the violet rays (v) have a focus at *A*, while the less refrangible red rays (r) come to a focus at *B*. A spot of light with a red border would be observed on a screen placed at *a*, and one with a blue border on a screen at *b*. In the eye the iris and crystalline lens partially eliminate these aberrations. Optical instruments corrected for chromatic aberration are called *achromatic*.

5. In *astron*, the apparent displacement of a

heavenly body due to the joint effect of the motion of the rays of light proceeding from it and the motion of the earth. Thus, when the light from a star that is not directly in the line of the earth's motion is made to fall centrally into a telescope, the telescope is in reality inclined slightly away from the true direction of the star toward that in which the earth is moving, just as one running under a vertically falling shower of rain, and holding in his hand a long necked flask, must incline his mouth forward if he does not wish the sides of the neck to be wetted. This phenomenon, discovered and explained by Bradley (1728), is termed the *aberration of light*, and its effect in displacing a star is called the *aberration of the star*. The annual aberration, due to the motion of the earth in its orbit, amounts to 20' 4" in the maximum, the diurnal aberration, due to the rotation of the earth, is only 0' 3" at most. Sec *planetary aberration*, below.—**Circle of aberration**, the circle of colored light observed in experiments with convex lenses between the point where the violet rays meet and that where the red rays meet. **Constant of aberration**, see *constant*.—**Crown of aberration**, a luminous circle surrounding the disk of the sun, depending on the aberration of its rays, by which its apparent diameter is enlarged.—**Planetary aberration (see 5, above), better called the *equation of light*, an apparent displacement of a moving body, as a planet, owing to its not being in the same position at the moment the light reaches the earth that it was when the light left it.—**Syn**. 1 Deviation, divergence, departure.—2 (a) Derangement, hallucination, illusion, delusion, eccentricity, mania.**

aberrational (ab-er-rā'shon-al), *a* Characterized by aberration, erratic.

aberruncator (ab-er-rung-kāt), *v* *t*, pret. and pp *aberruncated*, ppr. *aberruncating*. [An erroneous form of *aberruncate*, as if *L. aberruncare*, *ab*, from, + *runcare*, to weed, out, + *runcare*, uproot, weed, hence the unauthorized sense given by Bailey. See *aberruncate*.] To pull up by the roots, extirpate utterly. *Johnson*

aberruncated, pulled up by the roots, weeded. *Bailey*

aberruncation (ab-er-rung-kā'shon), *n* [*aberruncate*]. Extirpation, extirpation, removal.

aberruncator (ab-er-rung-kā-tor), *n* [*aberruncate* Cf *L. runcator*, a weeder.] 1 An implement for extirpating weeds, a weeder or weeding-machine.—2. An instrument for pruning trees when their branches are beyond easy reach of the hand. There are various forms of these implements, but they all consist of two blades, similar to those of stout shears, one of which is fixed rigidly to a long handle, while the other forms one arm of a lever to which a cord passing over a pulley is attached. Also written more properly, *aberruncator*.

abet (a-bet'), *v* *t*, pret. and pp. *abetted*, ppr. *abetting*. [*ME abetten*, *OF abetter*, *abier*, instigate, deceive, *a-* (*L. ad-*), to, + *biter*, bait, as a bear, *cf* *Iceal betas*, bait, cause to bite see *bait*, *i*, also *bet*, a shortened form of *abet*.] 1 To encourage by aid or approval used with a personal object, and chiefly in a bad sense.

They abetted both parties in the civil war, and always furnished supplies to the weaker side, lest there should be an end put to these fatal divisions.

Addison, Freeholder, No 28

Note, too, how for having abetted those who wronged the native Irish, England has to pay a penalty.

H. Spencer, Social Statics, p 487

2† To maintain, support, uphold.

"Then shall I sooner quoth he, "so God me grace, Abett that virgins cause disconsolate."

Spenser, F. Q., I x 64

3. In *law*, to encourage, counsel, incite, or assist in a criminal act—implying, in the case of felony, personal presence. Thus, in *military law*, it is a grave crime to aid or abet a mutiny or secession, or excite resistance against lawful orders. In *Scott law*, a person is said to be *abetting* though he may only protect a criminal, conceal him from justice, or aid him in making his escape.

Hence—4. To lead to or encourage the commission of.

Would not the fool abet the stealth Who rashly thus exposed his wealth?

Gay, Fables, ii 12

=**Syn** To support, encourage second countenance, aid, assist, back, connive at, stand by, further.

abet (a-bet'), *n* [*ME abet*, instigation, *OF abet*, instigation, deceit (*ML abettum*), *abeter* see *abet*, *v*.] The act of aiding or encouraging, especially in a crime. *Chaucer*

abetment (a-bet'ment), *n* [*abet* + *-ment*.] The act of abetting, that which serves to abet or encourage.

abettal (a-bet'al), *n* [*abet* + *-al*.] The act of abetting; aid. *Bailey* [Rare.]

abetter, **abettor** (a-bet'er, -or, or -ôr), *n*. [Formerly *abettour*, *abet* + *-er*, *-or*.] 1.

One who abets or incites; one who aids or encourages another to commit a crime; a supporter or encourager of something bad. *Abettor* is the form used in law.

But let th abettor of the Panther's crime Learn to make fairer wars another time.

Dryden, Hind and Panther, l 1647

In law, an *abettor*, as distinguished from an *accessory*, is more especially one who, being present, gives aid or encouragement.

2. One who aids, supports, or encourages. in a good sense.

It has been the occasion of making me friends and open abettors of several gentlemen of known sense and wit.

Pope, Letters, June 15, 1711

=**Syn**. 1 *Abettor*, *Accessory*, *Accomplice*. See *accomplice*.

abevacuation (ab-ē-vak-ū-ā'shon), *n*. [*NL abevacuatio(-n-)*; see *ab-* and *evacuatio*.] In *med*, variously used to signify a morbid evacuation, whether excessive or deficient.

ab extra (ab eks'trā), [*L.*] From without—opposed to *ab intra* (which see).

Those who are so fortunate as to occupy the philosophical position of spectators *ab extra* are very few in any generation. *Lovell, Among my Books*, 1st ser., p 140

abeyance (a-bā'ans), *n* [*OF abeyance*, *abeyance*, *a-* (*L. ad-*), to, at, + *beance* ("beance"), expectation, desire, *cf* *beant*, expecting, thinking, ppr. of *beere*, *baer* (*F. bayer*), gape, gaze at, expect anxiously, *cf* *ML badare*, gape.]

1. In *law*, a state of expectation or contemplation. Thus, the fee simple or inheritance of lands and tenements is in abeyance when there is no person in being in whom it can vest, so that it is in a state of expectancy or waiting until a proper person shall appear. So also where one man holds land for life, with remainder to the heirs of another, and the latter is yet alive, the remainder is in abeyance, since no man can have an heir until his death. Titles of honor and dignities are said to be in abeyance when it is uncertain who shall enjoy them. Thus, in *Eng law*, when a nobleman holding a dignity descendible to his heirs general dies leaving daughters, the king by his prerogative may grant the dignity to any one of the daughters he pleases, or to the male issue of one of such daughters. While the title to the dignity is thus in suspension it is said to be in abeyance.

2. A state of suspended action or existence, or temporary inactivity.

Upon awaking from slumber, I could never gain, at once, thorough possession of my senses, the mental faculties in general, but the memory in especial, being in a condition of absolute abeyance. *Poe, Tales*, l 333

abeyancy (a-bā'an-si), *n* The state or condition of being in abeyance. *Hawthorne*

abeyant (a-bā'ant), *a*. [*Inferred from abeyance* see *ab-* and *-ant*.] In *law*, being in abeyance.

abgregate (ab-grē-gāt), *v* *t* [*L. abgregatus*, ppr of *abgregare*, lead away from the flock, *ab*, from, + *greg* (*grēg-*), flock. Cf. *congregate*, *segregate*.] To separate from a flock. *Cockeram*, 1612

abgregation (ab-grē-gā'shon), *n*. [*ML abgregatio(-n-)*, *L. abgregare* see *abgregate*.] The act of separating from a flock. *Bailey*.

abhal (ab'hāl), *n* A name given in the East Indies to the berries of the common juniper, *Juniperus communis*. Also spelled *abhel* and *abhal*.

abhel, *n*. See *abhal*.

abominable (ab-hom'i-nā-bl), *a*. An old mode of spelling *abominable*, on the supposition that it was derived from *ab homino*, from or repugnant to man, ridiculed as pedantic by Shakspeare in the character of the pedant Holofernes.

This is *abominable* (which he would call *abominable*).

Shak, *L. L.*, v 1

[*Abominable* occurs in the *Promptorium Parvulorum* (c 1440), and in Gower, *abominacynon* is in Wycliffe's New Testament, *abominacynon* in Chaucer, and *abomy nacyon* in Mandeville. Fuller has *abominial*, a form made to suit the false etymology.]

abhor (ab-hôr'), *v*; pret. and pp *abhorred*, ppr. *abhorring*. [*L. abhorrere*, shrink from, *ab*, from, + *horrere*, bristle (with fear): see *horrid*.] 1. *trans*. 1. Laterally, to shrink back from with horror or dread; hence, to regard with repugnance, hate extremely or with loathing, loathe, detest, or abominate. as, to *abhor* evil, to *abhor* intrigue.

Thou didst not *abhor* the virgin's womb. *Te Deum*

Nature *abhors* the old, and old age seems the only disfigurement. *Emerson, Essays*, 1st ser., p 239

2† To fill with horror and loathing; horrify.

Abies (äb'i-éz), *n.* [*L. abies* (*abiet*-), the silver fir; origin unknown] A genus of trees, the firs, of the suborder *Abietineae*, natural order *Coniferae*, some of which are valuable for their timber. It differs from *Pinus* in its solitary leaves and in the thin scales of its cones, which ripen the first year from the allied genera *Picea*, *Taxus*, etc., with which it has sometimes been united. It is distinguished by its closely sessile leaves, by the bracts of the female aments being much larger than the scales, and by having erect cones with deciduous scales. It includes 16 or 18 species,

confined to the northern hemisphere, and equally divided between the old and new worlds. To it belong the silver fir of central Europe (*A. pectinata*), the balsam fir of eastern North America (*A. balsamea*), the red and white firs of western America (*A. grandis*, *concolor*, and *nobilis*), the sacred fir of Mexico (*A. religiosa*), etc. See *fir*

abietene (äb'i-é-tén), *n.* [*L. abies* (*abiet*-), the fir, + -ene] A hydrocarbon obtained by distillation from the resin of the nut-pine of California, *Pinus Sabiniana*. It consists almost wholly of normal heptane, C₇H₁₆, and is a nearly colorless mobile liquid, having a strong aromatic smell, highly inflammable, and burning with a white, smokeless flame

abietic (äb-i-ét'ik), *a.* [*L. abies* (*abiet*-), the fir, + -ic.] Of or pertaining to trees of the genus *Abies*, derived from the fir—**Abietic acid**, C₂₀H₃₀O₂, an acid obtained from the resin of some species of pine, larch, and fir. These resins are anhydrides of abietic acid or mixtures containing it

abietin (äb'i-é-tin), *n.* [*L. abies* (*abiet*-), the fir, + -in²] A tasteless, odorless resin, derived from the turpentine obtained from some species of the genus *Abies*.

Abietineae (äb'i-é-tin'ë-ö), *n. pl.* [*NL*, < *L. abies* (*abiet*-), the fir, + -inæ.] A suborder of the natural order *Coniferae*, distinguished by bearing strobiles (cones) with two inverted ovules at the base of each scale, which become winged samaroid seeds. The leaves are linear or needle shaped, and never two ranked. It includes many of the most valuable kinds of timber trees, viz., pine (*Pinus*) true cedar (*Cedrus*), spruce (*Picea*), hemlock spruce (*Tsuga*), Douglas spruce (*Pseudotsuga*), fir (*Abies*), and larch (*Larix*)

abietinic (äb'i-é-tin'ik), *a.* Pertaining to or derived from abietin as, **abietinic acid**

abietite (äb'i-é-tit'), *n.* [*L. abies* (*abiet*-), the fir, + -ite²] A sugar, C₁₂H₂₂O₁₁, obtained from the needles of the European silver fir, *Abies pectinata*

Abietites (äb'i-é-tit'ëz), *n.* [*NL*, pl. see *planta*] < *L. abies* (*abiet*-), the fir] A genus of fossil plants, natural order *Conifera*, occurring in the Wealden and Lower Greensand strata

Abigail (äb'i-gäl), *n.* [*Abigail*, the "waiting gentlewoman" in Beaumont and Fletcher's play of "The Scornful Lady"—so named, perhaps, in allusion to the expression "thine handmaid" applied to herself by Abigail, the wife of Nabal, when carrying provisions to David see *1 Sam* xxv. 2-41] A general name for a waiting-woman or lady's-maid [Colloq.] Sometimes written as a common noun, without a capital

All my abilities in thy behalf
Shak., Oth. III 3

=Syn 1 Ability, Capacity, power, strength, skill, dexterity, faculty, capability, qualification, efficiency. Ability denotes active power or power to perform, and is used with regard to power of any kind. Capacity conveys the idea of receptivity, of the possession of resources, it is potential rather than actual, and may be no more than undeveloped ability. Ability is manifested in action, while capacity does not imply action, as when we speak of a capacity for virtue. Capacity is the gift of nature, ability is partly the result of education or opportunity.

What is a power, but the ability or faculty of doing a thing? What is the ability to do a thing, but the power of employing the means necessary to its execution?

A Handmaid, Federalist, No. 33
Capacity is requisite to devise, and ability to execute, a great enterprise

Abiogenesis was formerly supposed to prevail quite widely even among comparatively complex forms of life. It is now proved that it occurs, if at all only in the simplest microscopic organisms, and the weight of evidence is adverse to the claim that it has been directly demonstrated there. The tendency of recent biological discussion however, is toward the assumption of a process of natural evolution of non-living into living matter at the dawn of life on this earth. Also called *abiogony*. See *biogenesis* and *heterogenesis*.

At the present moment there is not a shadow of trustworthy direct evidence that *abiogenesis* does take place, or has taken place within the period during which the existence of life on the globe is recorded
Huxley, Anat. Invert, p. 40

A common termination of English adjectives, especially of those based on verbs. To the base to which it is attached it generally adds the notion of capable of, worthy of, and sometimes full of, causing, as, *obtain-able*, capable of being obtained, *tolerable*, capable of being borne, *laudable*, worthy of praise, *credible*, that may be believed, or worthy of belief, *formidable*, full of force, *horrible*, terrible, full of or causing horror, terror. Many of these adjectives, such as *tolerable*, *credible*, *legible*, have been borrowed directly from the Latin or the French, and are in a somewhat different position from those formed by adding the termination to an already existing English word, as in the case of *obtainable*. Adjectives of this kind, with a passive signification, are the most numerous, and the base may be Anglo-Saxon or Latin (*at-able*, *bear-able*, *readable*, *blue-able*, etc., any of the former kind. Of those in *able* with an active signification we may mention *detectable*, *suitable*, *capable*. Of a neuter signification are *endurable*, *equable*, *conformable*. All these are from verbal bases but there are others derived from nouns, such as *actionable*, *objectionable*, *praisable*, *salable*, *serviceable*. As to when *able* and when *ible* is to be used, Mr. Fitzedward Hall remarks: "Generally, the termination is *ible*, if the base is the essentially uncorrupted stem of a Latin infinitive or supine of any conjugation but the first. To the rule given above, however, there are many exceptions. To all verbs, then, from the Anglo-Saxon, to all based on the uncorrupted infinitival stems of Latin verbs of the first conjugation and to all substantives, whensoever sprung we annex *able* only." See his work "On English Adjectives in *-ible*, with Special Reference to *Rehable*," pp. 45-47.

able-bodied (ā'bl-bod'id), *a* [L. *abilis* + *body* + *-ed*.] Having a sound, strong body, having strength sufficient for physical work as, a dozen *able-bodied* men, an *able-bodied* sailor. In a ship's papers abbreviated to *A B*.

=Syn. To *abolish*, *Repeal*, *Rescind*, *Recall*, *Revoke*, *Abrogate*, *Annul*, *Cancel*, and, destroy, do away with, set aside, nullify, annihilate, quash, vacate, make void, extirpate, eradicate, suppress, uproot, erase, expunge. *Abolish* is a strong word, and signifies a complete removal, generally but not always by a summary act. It is the word specially used in connection with things that have been long established or deeply rooted, as an institution or a custom, as, to *abolish* slavery or polygamy. *Repeal* is generally used of the formal rescinding of a legislative act. *Abrogate*, to *abolish* summarily, more often as the act of a ruler, but sometimes of a representative body. *Annul*, literally to bring to nothing, to deprive of all force or obligation, as a law or contract. *Rescind* (literally, to cut short) is coextensive in meaning with both *repeal* and *annul*. *Recall* (*rescue*), *Cancel* is not used of laws, but of deeds, bonds, contracts, etc., and figuratively of what ever may be thought of as crossed out. [In legal parlance, *rescind* is never applied to a statute. It is the common expression for the act of a party in justly repudiating a contract. *Repeal* is never applied to a contract, it is the common expression for the termination of the existence of a statute by a later statute. *Annul* is the common expression for the judicial act of a court in terminating the existence of any obligation or conveyance. *Cancel* is used when the instrument is obliterated actually or in legal contemplation; the other words when the obligation is annihilated irrespective of whether the instrument is left intact or not.]

I have never doubted the constitutional authority of Congress to abolish slavery in this District [of Columbia].
Lincoln, in Raymond, p. 184

Leaving out amended acts and enumerating only acts entirely repealed, the result is that in the last three sessions there have been repealed 650 acts belonging to the present reign.
H. Spencer, Pop. Sci. Mo., XXV. 6

The king also rescinded the order by which the Bishop of London had been suspended from the exercise of his functions.
Buckle

Whose laws, like those of the Medes and Persians, they cannot alter or abrogate.
Burke

Your promises are sins of inconsideration at best, and you are bound to repent and annul them.

Swift, Sent. of a Ch. of Eng. Man.

abolition (ab-ô-lîsh'on), *n.* [*< F. abolition*, *< L. abolitio* (n.), *< abolere*, annul, abolish. see *abolish*.] 1 The act of abolishing, or the state of being abolished, annulment; abrogation, utter destruction as, the *abolition* of laws, decrees, ordinances, rites, customs, debts, etc., the *abolition* of slavery. The most frequent use of the word in recent times has been in connection with the effort to put an end to the system of slavery, which was finally accomplished in the United States in 1865 by the thirteenth amendment to the Constitution.

For the amalgamation of races, and for the abolition of villenage, she [Britain] is chiefly indebted to the influence which the priesthood in the middle ages exercised over the laity.
Macaulay, Hist. Eng., I.

24. In law. (a) Permission to desist from further prosecution. (b) Remission of punishment; condonation. [In the civil, French, and German law, *abolition* is used nearly synonymously with *pardon*, *remission*, *grace*. *Grace* is the generic term, *pardon*, by those laws, is the clemency extended by the prince to a participant in crime who is not a principal or accomplice, *remission* is granted in cases of involuntary homicide and self-defense. *Abolition* is used when the crime cannot be remitted. The prince by letters of *abolition* may remit the punishment, but the infamy remains unless letters of *abolition* have been obtained before sen-

tence has been rendered. *Bouvier*] = *Syn.* Overthrow, annulment, obliteration, extirpation, suppression.

Specifically, one of those who favored and sought to effect the abolition of slavery in the United States. Before 1840 these persons generally advocated gradual and voluntary emancipation. After that time many began to insist on immediate abolition without regard to the wishes of the slaveholders. A portion of the abolitionists formed the Liberty party, which afterward acted with the Free Soil and Republican parties and finally became merged in the latter. See *abolition*.

abolitionize (ab-ô-lîsh'on-iz), *v. t.*, pret. and pp. *abolitionized*, ppr. *abolitionizing*. To imbue with the doctrines or principles of abolitionists.

abolla (a-bol'a), *n.*, pl. *abollæ* (-ê) [*L.*, *< (ir) abollæ*, contracted form of *abollæ*, a cloak, *< abollare*, throw back, *< aboll*, back, + *ollare*, throw. The *ab* form *abollæ* was in turn borrowed from the Latin *ab* in *Rom. antip*, a loose woolen cloak. Its precise form is not known. It differed from the *toga* and was worn especially by soldiers. Perhaps on this account, it was adopted by Stoic philosophers, who affected great austerity of life. whence Juvenal's expression *factus majoris abolla*, a crime of a deep philosopher.

aboma (a-bô'mâ), *n.* [*< Pg. aboma*.] The name in Guinea of some very large boa or anaconda of the family *Pythonidae* or *Boidæ*, of the warmer parts of America. The specimen determined, and the name is probably of general applicability to the huge tree snakes of the American tropics. As a book name, *aboma* is identified with the *Epicrates cenchrus* usually misspelled *Epicrates cenchrus* after the Linn. Cyc., 1836. This is a species called by Schuter the thick necked tree boa. A *Cucurulus* species is known as the brown aboma, *Epicrates nuchalis*. Some such serpent is also called the ringed boa, *boa aboma*. In any case, the aboma is a near relative of the anaconda *Epicrates murinus* and of the common boa, *Boa constrictor*. Compare *boa* and *boon*.

abortion (a-bōr'shon), *n.* [*L.* *abortio* (*-n*), miscarriage, < *aborti*, miscarry see *abort*, *v.*] 1 Miscarriage, the expulsion of the fetus before it is viable—that is, in women, before about the 28th week of gestation. Expulsion of the fetus occurring later than this, but before the normal time, is called (when not procured by art as by a surgical operation) *premature labor*. A somewhat less distinction has been sometimes drawn between *abortion* and *miscarriage*, by which the former is made to refer to the first four months of pregnancy and the latter to the following three months. Criminal abortion is procured, or intentional abortion procured at any period of pregnancy, by artificial means, and solely for the purpose of preventing the birth of a living child, feticide. At common law the criminality depends on the abortion being caused after quickening. Some modern statutes provide otherwise.

In the penitential discipline of the Church, abortion was placed in the same category as infanticide, and the stern sentence to which the guilty person was subject imprinted on the minds of Christians, more deeply than any mere exhortations, a sense of the enormity of the crime. Abraham, *a* See *Ibrahim*

Abrahamic (ä-brä-ham'ik), *a* [*<L Ibrahim*, < *Gr Ἀβραάμ*, *repi* Heb 'Ibrahim, father of a multitude, orig 'Ibrahim lit father of height] Of or pertaining to the patriarch Abraham

Abrahamides (ä-brä-ham'id-ē), *n pl* [*NL*, < *Abraham* + *-ides*] The descendants of Abraham; the Hebrews

This [Biblical] revelation of origins was a whole system of religion, pure and elevating, placing the *Abrahamides* who for ages seem alone to have held to it, on a plane of spiritual vantage immeasurably above that of other nations

Dawson, Orig of World, p 71

Abrahamite (ä-brä-ham-it or ä-bräm-it), *n*

[*<ML Abrahamita*, *pl*, as *Ibrahim* + *-ite²*] 1 One of a Christian sect named from its founder, Abraham of Antioch (ninth century), and charged with Paulician (Gnostic) errors. — 2 One of a sect of Donists in Bohemia, who came into prominence about 1782, and were banished to Hungary by the Emperor Joseph II for nonconformity

They seem to have professed the religion of Abraham before his circumcision to have believed in God, the immortality of the soul, and a future state of rewards and punishments but to have rejected baptism and the doctrine of the Trinity, and to have acknowledged no scripture but the decalogue and the Lord's prayer

Abrahamitical (ä-brä-ham-it'i-kal or ä-bräm-it'i-kal), *a* Relating to Abraham or to the Abrahamites

Abraham-man (ä-brä-ham- or ä-bräm-man), *n* 1 Originally, a mendicant lunatic from Bethlehem Hospital, London The wards in the ancient Bethlam (Bethlehem) bore distinctive names as of some saint or patriarch That named after Abraham was devoted to a class of lunatics who on certain days were permitted to go out begging They bore a badge, and were known as *Abraham men* Many however, assumed the badge without right and begged, feigning lunacy Hence the more received meaning came to be — 2 An impostor who wandered about the country seeking alms, under pretense of lunacy. Hence the phrase *to sham Abraham*, to feign sickness

Matthew sceptic and scoffer had failed to subscribe a prompt belief in that pain about the heart he had muttered some words in which the phrase "shamming Abraham," had been very distinctly audible

Charlotte Fronte, Shirley, xxxiii

Abraham's-balm (a-'bra-hamz- or a-'bramz-bām), *n* An old name of an Italian willow supposed to be a charm for the preservation of chastity. See *agnus castus*, under *agnus*.

Abraham's-eye (a-'bra-hamz- or a-'bramz-ē), *n* A magical charm supposed to have power to deprive of eyesight a thief who refused to confess his guilt.

Abramida (ab-ra-mīdī'nā), *n* pl [NL, *< Abramus (Abramid-) + -ina*] In Günther's classification of fishes, the twelfth subfamily of *Cyprinidae*, having the anal fin elongate and the abdomen, or part of it, compressed. It includes the genus *Abramus* and similar freshwater fishes related to the bream.

Abramis (ab-'ra-mis), *n* [NL, *< Gr abramus (abramus)*], the name of a fish found in the Nile and the Mediterranean, perhaps the bream, but not etym. related to *abram*. A genus of fishes of the family *Cyprinidae*, typified by the common freshwater bream of Europe, *A. brama*. The name has been adopted with various modifications by different ichthyologists, being restricted by some to old world forms closely allied to the bream and extended by others to include certain American fishes less nearly related to it, such as the common American shiner etc. (*G. Cooper*, 1847. See *bream*).

Abranchia (a-brang-'ki-ā), *n* pl [NL, neut. pl. of *abbranchius* see *abbranchious*] A name given to several different groups of animals which have no gills. (a) To a group of vertebrates comprising mammals, birds, and reptiles (or *Mammalia* and *Sauropsida*) whose young never possess gills. The group is thus contrasted with *Batrachia* and *Pisces* collectively. In this sense the term has no exact classificatory significance. (b) To a group of gastropodous mollusks, variously rated by naturalists as a suborder, an order, or a subclass, the *Apneusta* or *Desmognathia* of some, related to the *Neobornia* but having no branchial tuft on the surface of the body (clitellum) and no shell except when in the larval state. This group includes the families *Lamprogoniidae*, *Phyllonotidae* and *Lysipidae*. (c) To an order of *Annelida* the *Oligochaeta*, which are without branchia and respire by the surface of the body. There are several families among them the *Lumbricidae*, to which the common earthworm belongs. They are mostly hermaphrodite and undergo no metamorphosis. They have no feet, but the body is provided with bristles (setae). The mouth is rudimentary and suction, as in the related order *Hirudinea* (leeches). The species are mostly land or freshwater worms. (d) In Cuvier's system of classification to the third family of the order *Annelida*, containing the earthworms (*Lumbricina* *setacea*) and the leeches thus approximately corresponding to the two modern orders *Oligochaeta* and *Hirudinea*. It included, however, some heterogeneous elements as the Gordians. Some times called *Abranchia* and also *Thaumacia*. [If it is advisable to apply the term to any group of animals it is probably to be retained in the second of the senses above noted.]

abbranchian (a-brang-'ki-ān), *n* One of the *Abranchia*.

Abranchiata (a-brang-'ki-ā'tā), *n* pl [NL, neut. pl. of *abbranchiatus* see *abbranchiate*] A term sometimes used as synonymous with *Abranchia*.

abbranchiate (a-brang-'ki-āt), *a* [*< NL abbranchiatus* see *abbranchious* and *-ate*] Devoid of gills, or of pertaining to the *Abranchia*.

abbranchious (a-brang-'ki-ūs), *a* [*< NL abbranchius, < Gr a- priv + βραχία, gills*] Same as *abbranchiate*. [Rare]

The second family of the *abbranchious* Annelides, or the *Abranchia* without bristles.

(*Cuvier*, *Régne Anim* (tr of 1840), p. 508)

(*Johnson*, *Cynthia's Revels*, v. i.)

abrasion (ab-'ra-zhōn), *n* [*< L abrasio(n)-, < abradere, see abraide*] 1 The act of abrading; the act of wearing or rubbing off or away by friction or attrition. Common examples of abrasion are: (a) The wearing or rubbing away of rocks by ice bergs or glaciers by currents of water laden with sand shingle, etc. by blown sand or by other means. (b) The natural wearing, or wear and tear, to which coins are subjected in course of circulation, as opposed to intentional or accidental defacement.

It is one of the most curious phenomena of language, that words are as subject as coin to defacement and abrasion. (*G. P. Marsh*, *Lect on Eng Lang*, Int., p. 10)

2 The result of rubbing or abrading, an abraded spot or place. applied chiefly to a fretting or excoriation of the skin by which the underlying tissues are exposed. — 3 In *pathol.*, a superficial excoriation of the mucous membrane of the intestines, accompanied by loss of substance in the form of small shreds. — 4 The substance worn away by abrading or attrition. (*Berkley*)

gem, often bearing a mystical figure (which generally combines human and brute forms) and an unintelligible legend, but sometimes inscribed with the word *Abrazas*, either alone or accompanying a figure or a word connected with Hebrew or Egyptian religion, as *Iao, Sabaoth, Osmi*. — 2 A mystical word used by the Gnostic followers of Basilides to denote the Supreme Being, or, perhaps, its 365 emanations collectively, or the 365 orders of spirits occupying the 365 heavens. Later it was commonly applied to any symbolical representation of Gnostic ideas. It is said to have been coined by Basilides in the second century, from the sum of the Greek numerical letters expressing the number 365, thus: α = 1, β = 2, γ = 100 α = 1, ξ = 60, α = 1. Total, 365.

Also written *Abrazas*.

= **Syn 2** *Abridgment Compendium, Fynton's Abstract, Compendius, Synopsis Summarium, Sullabus, Brief, Digest* An *abridgment* is a work shortened by condensation of statement, or by omitting the less essential parts. A *compendium*, or *compend*, is a concise but comprehensive view of a subject. In general it does not imply, as *abridgment* does the existence of a larger or previous work. An *epitome* contains only the most important points of a work or subject, expressed in the smallest compass. An *abstract* is a bare statement or outline of facts, heads or leading features in a book, lecture, subject, etc. (*Conspicuous and synopsis* are, literally, condensed views—the substance of any matter so arranged as to be taken in at a glance. *Synopsis* implies orderly arrangement under heads and particulars. A *summary* is a brief statement of the main points in a work or treatise, less methodical than an *abstract* or a *synopsis*. It may be a recapitulation. A *syllabus* is commonly a synopsis printed for the convenience of those hearing lectures, but the term is also applied to certain legal documents. (*See syllabus*) *Brief* is generally confined to its technical legal meanings. (*See brief*) A *digest* is a methodical arrangement of the material of a subject, as under heads or titles. It may include the whole of the matter concerned as a *digest* of laws. There may be an *abridgment* of a dictionary, a *compend* or *compendium* of literature, an *epitome* of a political situation, an *abstract* of a sermon, a *compendium* or *synopsis* of a book, a *summary* of the arguments in a debate, a *digest* of opinions on some moot point.

By this *abruption* posterity lost more instruction than delight

Johnson, Life of Cowley

abruptly (a-brupt'-li), *adv* 1 Brokenly, by breaking or being broken off suddenly as, the path or the discourse ended *abruptly* — 2 Precipitously, or with a very steep slope as, the rocks rise *abruptly* from the water's edge — 3 Suddenly, without giving notice, or without the usual forms as, the minister left France *abruptly* — 4 With

an abrupt termination **Abruptly pinnate**, (*cr* meaning without an odd leaflet or terminal) said of a pinnate leaf

abruptness (a-brupt'-nes), *n* The state or quality of being abrupt (*a*) the state or quality of being broken off, steep or ragged sudden breach of continuity precipitousness (*b*) Suddenness, unceremoniousness or vehemence (*c*) Any want of continuity or smoothness

Some other languages for their soft and melting fluency as having no *abruptness* of consonants have some advantage of the English

Hovell, Fortunate Travels, p 154

Abrus (ä-brus), *n* [NL, prop. **Habrus*, *< Gr. aβρος, graceful, elegant, delicate*] A small genus of leguminous plants. A *precatorius*, or Indian *liocore* is a woody twiner indigenous to India, but now found in all tropical countries where its root is often used as a substitute for licorice. Its polished party colored seeds of the size of a small pea called *crabs eyes*, *purple beads*, and *pequity* or *John Crane beans* are employed for rosaries, necklaces, etc. and as a remedy in diseases of the conjunctiva. They have given the Hind name of *ratti* (Hind *ratti ratti*) to a weight (2.1875 grains) used by Hindu jewelers and druggists. *See ratti weights*

abs- A prefix of Latin origin, a form of *ab-*, used (as in Latin) before *c, g, t*, as in *abscond, abstain, abstract, etc*

absciss (ab'ses), *n* [*< L. abscissus, a going away, in medical language an abscess, < abscedere, go away, < abs, lengthened form of ab, away, + cedere, go see cede*] In med, a collection of pus in the tissues of any part of the body

abscissed (ab'ses-t), *p a* Diseased with an abscess or with abscesses

abscission (ab-sesh'-on), *n* [*< L. abscissio(n)-, < abscedere, go away. see abscess*] 1 Departure

Neither justly excommunicated out of that particular church to which he was orderly joined, nor excommunicating himself by voluntary schism, declared *abscession*, separation, or apostasy

By Gauden, Tears of the Church, p 37

2. In med, an abscess
abscess-root (ab'ses-rōt), *n* A popular name of the plant *Polemonium reptans*

abscond (ab-sind'), *v t* [*< L abscondere, cut off, tear off, < ab, off, + condere, cut, = Gr skōnō, cut, separate see scission and schism*] To cut off [Rare]

Two syllables *absconded* from the rest
Johnson, Rambler, No 90

abscess (ab-sis'), *v t*, *pret* and *pp abscessed*, *ppr abscessing* [*< L abscessus, pp of abscondere, cut off, < ab, off, away, + cadere, cut*] *Cf sciss, incise, & and praece, a*] To cut off or away

abscissa (ab-sis'u), *n*, *pl abscissae* or *abscissas* (-sē, -zē) [*L (fr of Gr αποσπασμένη), abbreviation of recta ex diametro abscissa, line cut off from the diameter, fem of abscissus, cut off, pp of abscondere see abscond*] In *math* (*n*) In the conic sections, that part of a transverse axis which lies between its vertex and a perpendicular ordinate to it from a given point of the conic Thus (fig 1) In the parabola P A C, A M, the part of the axis A B cut off by the ordinate P M, is the *abscissa* of the point P (*b*) In the system

of Cartesian coordinates, a certain line used in determining the position of a point in a plane Thus (fig 2), let two fixed intersecting lines (axes) OY and OX be taken, and certain directions on them (as from O toward X and from O toward Y) be assumed as positive From any point, as P, let a line be drawn parallel to OY and cutting OX in M Then will the two quantities OM and MP, with the proper algebraic sign, determine the position of the point P OM, or its value is called the *abscissa* of the point, and the fixed line OX is called the *axis of abscissas* See coordinate, *n* 2

abscissio infiniti (ab-sis'h'i ō in-fī-nī'ti) [*L*, *lit*, a cutting off of an infinite (number) see *abscission* and *infinite*] In *logic*, a series of arguments which exclude, one after another, various assertions which might be made with regard to the subject under discussion, thus gradually diminishing the number of possible assumptions

abscission (ab-sizh'on), *n* [*< L abscessio(n)-, < abscondere, cut off see abscond*] 1 The act of cutting off, severance, removal

Not to be cured without the *abscission* of a member
Jen Taylor

2 The act of putting an end to, the act of annulling or abolishing *Sir T Browne*—**3** Retrenchment [Rare]—**4** The sudden termination of a disease by death *Hooper, Med Diet*—**5** In *rhct*, a figure of speech consisting in a sudden reticence, as if the words already spoken made sufficiently clear what the speaker would say if he were to finish the sentence as, "He is a man of so much honor and candor, and such generosity—but I need say no more"—**6** In *astrology*, the cutting off or preventing of anything shown by one aspect by means of another—**Abscission of the cornea**, in *surg*, a specific cutting operation performed upon the eye for the removal of a staphyloma of the cornea

absconce (ab-skons'), *n* [*< ML absconsa, a dark lantern, fem of L absconditus, for absconditus, pp of abscondere, hide see abscond and scond*] *Eccl*, a dark lantern holding a wax-light, used in the choir in reading the absolution and benediction at matins, and the chapters and prayers at lauds

abscond (ab-skond'), *v t* [*< L abscondere, hide, put away, < ab, away, + condere, put, lay up, < con-, for cum, together, + dare, in comp, a weakened form of dare, put, = E do*] **1** *Intrans* To retire from public view, or from the place in which one resides or is ordinarily to be found, depart in a sudden and secret manner, take one's self off, decamp, especially, to go out of the way in order to avoid a legal process

He must, for reasons which nobody could divine have *absconded*
Barham, Ingoldshy Legends, I 150

2. To hide, withdraw, or lie concealed: as, "the marmot absconds in winter," Ray, Works of Creation

A fish that flashes his freckled side in the sun and as suddenly *absconds* in the dark and dreamy waters again
Lovell, Study Windows, p 377

= *Syn* Escape, retreat, flee, run away, make off

II, trans To conceal
Nothing discoverable in the lunar surface is ever covered and *absconded* from us by the interposition of any clouds or mists but such as rise from our own globe
Hentley, Sermons, viii

absconded (ab-skond'ed), *a* Hidden, secret; recondite In her said of a bearing which is completely covered by a suppurated charge Thus, if a shield has three mules in pale, the middle one of the three would be completely hidden or *absconded* by a shield of pretense or ineffectual cover

I am now obliged to go far in the pursuit of beauty which lies very *absconded* and deep
Shaffesbury, Moralists, p 3

abscondedly (ab-skond'ed-ly), *adv* In concealment or hiding

An old Roman priest that then lived *abscondedly* in Oxon
Wood, Athens Oxon, I 631

abscondence (ab-skond'ens), *n* Concealment, seclusion

absconder (ab-skond'er), *n* One who absconds

absconsio (ab-skons'io), *n*, *pl absconsiones* (ab-skons'io-nēz) [*NL, < L abscondere, hide see abscond*] In *anat* and *surg*, a cavity or sinus

absence (ab'sens), *n* [*< ME absent, < OF absent, ausent, F. absence = Sp Pg ausencia = It assenza, < L absentia, absence, < absen(-t)-, absent see absent, a*] 1 The state of being absent, the state of being away or not present as, speak no ill of one in his *absence*

Say, is not *absence* death to those who love it
Pope, Autumn

We met on the lip of our companion the presence or *absence* of the great masters of thought and poetry to his mind
Emerson, Domestic Life

2 The period of being away or absent as, an *absence* of several weeks or years—**3** The state of being wanting, non-existence at the place and time spoken of, want, lack as, the *absence* of evidence

In the *absence* of conventional law *Chancellor Kent*

4 Absent-mindedness, inattention to things present a shortened form of *absence of mind*

To conquer that abstraction which is called *absence*
Landor

For two or three days I continued subject to frequent involuntary fits of *absence* which made me insensible, for the time, to all that was passing around me
B Taylor, Lands of the Saracen, p 147

Absence of mind, habitual or temporary forgetfulness of, or inattention to, one's immediate surroundings

Decree in absence, in *Scots law*, a decree pronounced against a defendant who has not appeared and pleaded on the merits of the cause—**Leave of absence**, permission from a superior to be absent In the United States army an officer is entitled to 30 days leave in each year on full pay He may permit this time to accumulate for a period not exceeding four years *Whittem, Mil Dict*

absent (ab'sent), *a* and *n* [*< ME absent, < OF absent, ausent, F absent = Sp Pg ausente = It assente, < L absen(-t)-, being away (ppr of absce, be away), < ab, away, + sen(-t)-, ppr (= fr sen (ovr-) = Skt. sant, being, = E sooth, true see sooth), < inf esse, be see essence, am, is, and cf present*] **1** *a* 1 Not in a certain place at a given time, not in consciousness or thought at a certain time, away opposed to *present*

With this she fell distract,
And, her attendants absent, swallow'd fire
Shak, J C, iv 3

The picture or visual image in your mind when the orange is present to the senses is almost exactly reproduced when it is *absent*
J Wake, Idea of God, p 140

2 Not existing, wanting, not forming a part or attribute of as, among them refinement is *absent*, revenge is entirely *absent* from his mind—**3** Absent-minded (which see)

From this passage we may gather not only that Chaucer was small of stature and slender, but that he was accustomed to be twitted on account of the abstracted or *absent* look which so often tempts children of the world to offer their wearers a penny for his thoughts
A W Ward, Life of Chaucer, III

Absent with leave (*mlt*), said of officers permitted to absent themselves from their posts, and of enlisted men on furlough—**Absent without leave** (*mlt*) said of officers and soldiers (sometimes of deserters) who have absented themselves from their posts without permission, they are so reported in order to bring their offense under the cognizance of a court martial In the United States army, an officer absent without leave for three months may be dropped from the rolls of the army by the President, and is not eligible to reappointment *Whittem, Mil Dict*—**Syn** 3 *Absent* Inattentive, Abstracted, Preoccupied, Diverted, Distracted An *absent* man is one whose mind wanders unconsciously from his immediate sur-

roundings, or from the topic which demands his attention, he may be thinking of little or nothing An *abstracted* man is kept from what is present by thoughts and feelings so weighty or interesting that they engross his attention He may have been so preoccupied by them as to be unable to begin to attend to other things, or his thoughts may be diverted to them upon some chance suggestion In all these cases he is or becomes *inattentive* *Distracted* (literally, dragged apart) is sometimes used for *diverted*, but denotes more properly a state of perplexity or mental uneasiness sometimes approaching frenzy

II, n One who is not present; an absentee

Let us enjoy the right of Christian *absentia*, to pray for one another
By Morton, To Abp Usher

absent (ab-sent'), *v t* [*< F. absenter = Sp. Pg ausentar = It assentare, < L assentare, cause to be away, be away, < absen(-t)-, absent see absent, a*] To make absent; take or keep away. now used only reflexively, but formerly sometimes otherwise, as by Milton as, to *absent* one's self from home; he *absented* himself from the meeting

If thou didst ever hold me in thy heart,
Absent thee from fidelity awhile
Shak, Hamlet, v 2

What chance
Absent's thee, or what chance detain's?
Milton, P L, x 108

absentaneous (ab-sen-tā'nē-us), *a* [*< ML absentaneus, < L absent(-t)-, absent see absent, a*] Relating to absence, absent *Barley*

absentation (ab-sen-tā'shon), *n* [*< ML absentatio(n)-, < L absentare, make absent see absent, v*] The act of absenting one's self, or the state of being absent [Rare]

His *absentation* at that juncture becomes significant
Sir W Hamilton, Discussions, p 229

absentee (ab-sen-tē'), *n* 1 One who is absent, more narrowly, one who withdraws from his country, office, estate, post, duty, or the like Specifically applied, generally by way of reproach, to landlords and capitalists who derive their income from one country, but spend it in another in which they reside **2** In *law*, one who is without the jurisdiction of a particular court or judge

absenteeism (ab-sen-tē'izm), *n* The practice or habit of being an absentee, the practice of absenting one's self from one's country, station, estate, etc *Absenteeism* in France, under the old régime, was one of the greatest evils, and a prominent cause of the first revolution, and in Ireland it has been a cause of much popular discontent

Partly from the prevailing *absenteeism* among the landlords, these peasants of the north (of Russia) are more energetic, more intelligent, more independent, and consequently less docile and pliable, than those of the fertile central provinces *D M Wallace, Russia, p 109*

absenteeship (ab-sen-tē'ship), *n* Same as *absenteeism*

absenter (ab-sen'tēr), *n* One who absents himself

He [Judge Foster] has fined all the *absenters* \$20 apiece
Lori Thurlow, Sir M Foster

absente reo (ab-sen'tē rē'ō) [*L absente, abl of absen(-t)-, absent, reo, abl of reus, a defendant, < res, an action see res*] The defendant being absent a law phrase

absently (ab'sent-ly), *adv* In an absent or inattentive manner, with absence of mind

absentment (ab'sent'ment), *n* [*< absent, v, + -ment*] The act of absenting one's self, or the state of being absent *Barrow* [Rare]

absent-minded (ab'sent-min'ded), *a* Characterized by absence of mind (see *absence*); inattentive to or forgetful of one's immediate surroundings

absent-mindedness (ab'sent-min'ded-nes), *n* The quality, state, or habit of being absent-minded

absentness (ab'sent-nes), *n* The quality of being absent, inattentive, or absent-minded, absent-mindedness

absy-book (ab'sē-buk), *n* [That is, *a-b-o book* see *a-b-o*] A primer, which sometimes included a catechism

And then comes answer like an *Absy book*
Shak, K John, I 1

absidole (ab-sid'ōl), *n* Same as *apsidole*
absinth (ab'sinth), *n* [*< F absinth, < L absinthum see absinthum*] 1 Wormwood See *absinthum*—**2** Absinthe (which see)

absinthate (ab-sin'thāt), *n* A salt formed by a combination of absinthic acid with a base
absinthe (ab'sinth, F pron ab-sant'), *n* [*F, < L absinthum see absinthum*] The common name of a highly aromatic liqueur of an opaline-green color and bitter taste, an abbreviation of *extract d'absinthe*, extract of absinthium It is prepared by steeping in alcohol or strong spirit bitter herbs, the chief of which are *Artemisia Absinthium*, *A mutellina*, *A spicata*, besides which some recipes mention plants that are not of this genus, and

can be intended only to modify the bitter of the wormwoods, the liquor so flavored is then redistilled. It is considered tonic and stomachic. Its excessive use produces a morbid condition differing somewhat from ordinary alcoholism. Vertigo and epileptiform convulsions are marked symptoms, and hallucinations occur without other symptoms of delirium tremens. The use of it prevailed at one time among the French soldiers in Algiers, but it is now forbidden throughout the French army. The most common way of preparing it for drinking is by pouring it into water drop by drop or allowing it to trickle through a funnel with a minute opening, so prepared, it is called *la humaine*, and is common in the cafés of France, Italy, and Switzerland.

absinthial (ab-sin'thi-al), *a* Of or pertaining to wormwood, hence, bitter *N. E. D.*
absinthian (ab-sin'thi-an), *a* Pertaining to or of the nature of wormwood

Temporing absinthian bitterness with sweets
Randolph, Poems (1652), p. 60

absinthiate (ab-sin'thi-āt), *v. t.* pret. and pp. *absinthiated*, ppr. *absinthiating* [*L. absinthiatum*, pp. adj., containing wormwood, < *absinthum* see *absinthum*] 1 To impregnate with wormwood — 2 To saturate with absinthe

Latinised English and *absinthiated* barrack-room morality
The Spectator, No. 4045, p. 1154

absinthic (ab-sin'thik), *a* Of or pertaining to absinthium or wormwood — **Absinthic acid**, an acid derived from wormwood, probably identical with succinic acid

absinthin (ab-sin'thin), *n* The crystalline bitter principle ($C_{20}H_{28}O_4$) of wormwood, *Artemisia Absinthium*

absinthine (ab-sin'thin), *a* Having the qualities of absinth or wormwood, *absinthic* *Carlyle*

absinthism (ab-sin'thizm), *n* The cachectic state produced by the use of absinthe (which see)

absinthium (ab-sin'thi-um), *n* [*L.* < *Gr. aynthion*, also *aynthos* and *aynthia*, wormwood, of Pers. origin] The common wormwood, *Artemisia Absinthium*, a European species, much cultivated for its bitter qualities. It contains a volatile oil which is the principal ingredient in the French liqueur absinthe

Artemisia Absinthium
 Leaf and flowering branch

absinthol (ab-sin'thol), *n* The chief constituent of oil of wormwood, $C_{10}H_{16}O$

absis (ab'sis), *n*. Same as *apex*

absist (ab-sist'), *v. t.* [*L.* *abstere*, withdraw, < *ab*, off, + *stere*, stand, a reduplicated form of *stare*, to stand see *stat*, *stand*] To desert

absistencer (ab-sis'tens), *n*. A standing off, a refraining or holding back.

absit (ab'sit), *n* [*L.* third pers. pres. subj. of *abesse*, be away] In colleges, a leave of absence from commons

absit omen (ab'sit ō'men) [*L.* lit, may the omen be away *absit*, third pers. pres. subj. of *abesse*, be away, *omen*, an omen see *absent* and *omen*] May it not be ominous! May the omen fail!

absolute (ab'so-lūt), *a.* and *n.* [*ME. absolūt*, < *OF. absolūt*, < *L. absolutus*, complete, unrestricted, *absolute*, pp. of *absolvere*, loosen from see *absolve*] 1. *a* 1 Free from every restriction, unconditional as, the only *absolute* necessity is logical necessity, *absolute* skepticism, *absolute* proof — 2 Perfect; complete; entire, possessed as a quality in the highest degree, or possessing the essential characteristics of the attribute named in the highest degree as, *absolute* purity, *absolute* liberty

What philosophical inquiry aims at is, to discover a proof, by subjective analysis, of a greater certainty in the law, of an inviolable uniformity in nature, of what may properly be called an *absolute* uniformity, if only the word *absolute* is used as opposed to incomplete or partial, and not as opposed to relative or phenomenal

S. Hodgson, Phil. of Reflection, II iv § 1

Hence — 3. Perfect; free from imperfection sometimes applied to persons.

May seem as shy, as grave, as just, as *absolute*
As Angelo *Shak*, *M. for M.*, v. 1

So *absolute* she seems,
 And in herself complete. *Milton*, *P. L.*, viii 547

4. Fixed; determined, not merely provisional, irrevocable.

O, pass not, Lord, an *absolute* decree,
 Nor bind thy sentence unconditional
Dryden, Annus Mirabilis

5. Viewed independently of other similar

things; not considered with reference to other similar things as standards, not comparative merely opposed to *relative* as, *absolute* position; *absolute* velocity (see below). (Careful writers, without an explanation, or unless the context makes the meaning clear do not use the word in this sense, so that, though it has always belonged to the word, it is considered as secondary.)

Such a code is that here called *Absolute Ethics* as distinguished from *Relative Ethics* — a code the injunctions of which are alone to be considered as absolutely right in contrast with those that are relatively right or least wrong, and which, as a system of ideal conduct is to serve as a standard for our guidance in solving, as well as we can, the problems of real conduct

H. Spencer, Data of Ethics § 104

6 Unlimited in certain essential respects, arbitrary, despotic applied especially to a system of government in which the will of the sovereign is comparatively unhampered by laws or usage as, an *absolute* monarchy

As Lord Chamberlain, I know, you are *absolute* by your office, in all that belongs to the dignity and good manners of the stage
Dryden, Orig. and Prog. of Satire

All *absolute* governments, of whatever form concentrate power in one uncontrolled and irresponsible individual or body, whose will is regarded as the sense of the community
Cathoun, Works, I 37

7 Certain, infallible

The colour of my hair — he cannot tell
 Or answers "dark at random, while, be sure,
 He's *absolute* on the figure, five or ten,
 Of my last subscription
Mrs. Browning, Aurora Leigh, III

8 Dominating, prepotent, exacting strict obedience

Tapped on her head
 With *absolute* forefinger *Mrs. Browning*

9 Ultimate, not derived from anything else as, an *absolute* principle — 10 Immeasurable, not definable by measurement, not led up to by unmeasurable gradations as, the distinction between right and wrong is *absolute*

The opposition is no longer of the rigid or *absolute* nature which it was before
A. Seth

11 In *gram*, standing out of the usual syntactical relation or construction applied to the case of a noun and an adjunct in no relation of dependence upon the rest of the sentence, and defining the time or circumstances of an action as, the *genitive absolute* in Greek, the *ablative absolute* in Latin, the *locative absolute* in Sanskrit, and the *nominative absolute* in English

Absolute alcohol See *alcohol* — **Absolute atmosphere**, an absolute unit of pressure, equal to one million grams per centimeter second square, that is, one million times the pressure produced on a square centimeter by a force of one gram accelerated every second by a velocity of one centimeter per second — **Absolute ego**, in *metaph*, the non individual, pure ego, neither subject nor object, which, according to the German metaphysician J. G. Fichte, posits the world — **Absolute electrometer** See *electrometer* — **Absolute equation**, in *astron*, the sum of the optic and eccentric equations, he forms being the apparent inequality of a planet's motion in its orbit due to its unequal distance from the earth at different times, an effect which would subsist even if the planet's real motion were uniform, and the latter being the inequality due to a real lack of uniformity in the planet's motion — **Absolute estate**, in *law*, an unqualified, unconditional estate entitling the owner to immediate and unlimited possession and dominion — **Absolute form** See *form* — **Absolute identity**, the metaphysical doctrine that mind and matter are phenomenal modifications of the same substance — **Absolute instrument**, an instrument designed to measure electrical or other physical quantities in terms of absolute units See *unit* — **Absolute invariant**, in *alg*, an invariant entirely unchanged by a linear transformation of the quantity — **Absolute magnitude**, magnitude without regard to sign, as *plus* or *minus* opposed to *algebraical magnitude* — **Absolute measure**, that which is based simply on the fundamental units of time, space and mass, and does not involve a comparison with any other arbitrary quantity, especially not any gravitation unit, whose value varies with the latitude and elevation above the sea. Thus, the absolute measure of a force is that of the velocity it would impart to the unit mass in a unit of time. The units so derived are called *absolute units*, for example, the poundal or dyne See *unit*

Absolute position, position in absolute space — **Absolute pressure** (a) That measure of pressure which includes atmospheric pressure (b) Pressure expressed in absolute measure, commonly in absolute atmospheres (which see) — **Absolute problem**, a qualitative problem in which it is sought to discover whether an object possesses a given character, but not to compare different objects — **Absolute proposition**, in *logic*, a reality not as it is conceived, but as it exists independently of all thought about it — **Absolute reciprocal** See *reciprocal* — **Absolute space**, space considered as the receptacle of things, and not as relative to the objects in it opposed to *optical extension* — **Absolute temperature**, temperature measured from the absolute zero of temperature (see below) on the absolute or thermodynamic scale of temperature, which is defined by the condition that the area included between two fixed adiabatic lines and any two isothermal lines is proportional to the difference of temperatures for those lines on this scale. This absolute scale of temperature differs by very small quantities, usually negligible, from that of an air thermometer, and by the absolute temperature is often meant the temperature on the latter scale above the absolute zero —

Absolute term. (a) In *logic*, a general class name, as *man*, as opposed to a relative or connotative term (b) In *alg*, that term of an equation or quantity in which the unknown quantity does not appear, or, if it appears, has the exponent 0. Thus in the equation $x^2 + 12x - 24 = 0$, which may also be written $x^2 + 12x - 24x^0 = 0$, the term written -24 in the first form and $-24x^0$ in the second form is called the *absolute term* — **Absolute time**, time regarded as a quasi substance independent of the events it brings into relationship, that is, which occur in it

Absolute, true, and mathematical time, in itself and its own nature out of relation to anything out of itself flows equally, and is otherwise called duration relative, apparent, and vulgar time is any similar and external measure of duration by motion (whether accurate or iniquitous) which the vulgar use in place of true time, as an hour, a day, a month, a year

Sir I. Newton, Principia (trans.) Def. 8 Scholium

Absolute velocity, the velocity of a body with reference not to other moving bodies, but to something immovable

We know nothing about *absolute velocities* in space, for we have no standard of comparison

A. Danab, Prin. of Physics, p. 15

Absolute zero of temperature, the lowest possible temperature which the nature of heat admits the temperature at which the particles whose motion constitutes heat would be at rest that temperature at which if it were maintained in the refrigerator of a perfect thermodynamic engine the engine would convert all the heat it should receive from its source into work. This temperature has been proved to be 273 degrees below the zero of the centigrade scale. See *absolute temperature* = *Syn.* 1 Unconditional, independent — 2 Finished, perfect, rounded consummate complete — 3 Arbitrary, autocratic, unrestricted, irresponsible — 4 Positive, decided, certain sure — 5 Prepotent, imperative, dictatorial — 6 Immediate, direct, self-existent

II. *n.* 1. In *metaph* (a) That which is free from any restriction, or is unconditional; hence, the ultimate ground of all things, God. as, it is absurd to place a limit to the power of the *Absolute*

Being itself and the types which follow, as well as those of logic in general may be looked upon as definitions of the *Absolute*, or metaphysical definitions of God at least the first and third typical form in every mind may

Heigl, Logic, II by Wallace, § 85

The contention of those who declare the *Absolute* to be unknowable is that beyond the sphere of knowable phenomena there is an Existence, which partially appears in the phenomena, but is something wholly removed from them, and in no way cognizable by us

G. H. Trues, Probs. of Life and Mind, II 430

(b) That which is perfect or complete as, its beauty approximates the *absolute* (c) That which is independent of some or all relations, the non-relative

The term *absolute* is of a twofold ambiguity corresponding to the double signification of the word in Latin. *Absolutum* means what is freed or loosed, in which sense the *absolute* will be what is absolved from relation, comparison, limitation, condition, dependence, etc. In this meaning the *absolute* is not opposed to the infinite. *Absolutum* means finished, perfected, completed, in which sense the *absolute* will be what is out of relation, etc., as finished, perfect, complete, total. In this acceptation — and it is that in which for myself I exclusively use it — the *absolute* is diametrically opposed to, is contradictory of, the infinite

Sir W. Hamilton, Discussions (3d ed.), p. 13, foot note

Whatever can be known or conceived out of all relation, that is to say, without any correlative being necessarily known or conceived along with it is the known *Absolute*

Terrier, Institutes of Metaph, prop. 22

2. In *math*, a locus whose projective relation to any two elements may be considered as constituting the metrical relation of these elements to one another. All measurement is made by successive superpositions of a unit upon parts of the quantity to be measured. Now, in all shiftings of the standard of measurement if this be supposed to be rigidly connected with an unlimited continuum supposed upon that in which lies the measured quantity, there will be a certain locus which will always continue unmoved, and to which, therefore, the scale of measurement can never be applied. This is the *absolute*. In order to establish a system of measurement along a line we first put a scale of numbers on the line in such a manner that to every point of the line corresponds one number, and to every number one point. If then we take any second scale of numbers related in this manner to the points of the line, to any number, x of the first scale, will correspond just one number, y , of the second. If this correspondence extends to imaginary points, x and y will be connected by an equation linear in x and linear in y , which may be written thus $xy + ax + by + c = 0$. The scale will thus be shifted from $x = 0$ to $y = 0$ or $x = -c/a$. In this shifting, two points of the scale remain unmoved, namely those which satisfy the equation $x^2 + (a + b)x + c = 0$. This pair of points which may be really distinct, coincident, or imaginary, constitute the *absolute*. For a plane, the *absolute* is a curve of the second order and second class. For three dimensional space it is a quadric surface. For the ordinary system of measurement in space producing the Euclidean geometry, the *absolute* consists of two coincident planes joined along an imaginary circle which circle is itself usually termed the *absolute*. See *distance* and *quaternion ratio* — **Philosophies of the absolute**, certain systems of metaphysics founded on Kant's critique of reason — most prominently those of Fichte, Schelling, and Hegel — which, departing from the principles of Kant, maintain that the *absolute* is cognizable

absolutely (ab'so-lūt-lī), *adv* Completely; wholly, independently; without restriction,

limitation, or qualification, unconditionally, positively, peremptorily

Command me *absolutely* not to go

Milton, P. L., l. 1156

Absolutely we cannot disown it; we cannot *absolutely* approve, either willingness to live or forwardness to die

Hooker, Eccl. Pol., v.

As a matter of fact, *absolutely* pure water is never found in the economy of nature

Huxley, Physiol., p. 115

absoluteness (ab-sol'ūt-nēs), *n* The state of being absolute, independence, completeness, the state of being subject to no extraneous restriction or control, positiveness, perfection

If you have lived about as the phrase is, you have lost that sense of the *absoluteness* and the sanctity of the habits of your fellow patriots which once made you so happy in the midst of the m

solving, or the state of being absolved, release
from consequences, obligations, or penalties,
specifically, release from the penal conse-
quences of sin

God's *absolution* of men is his releasing of them from
the bands of sin with which they were tied and bound

French, Study of Words, p. 240

(a) According to *Rom. Cath. theol.*, a remission of sin,
which the priest, on the ground of authority received
from Christ, makes in the sacrament of penance (which
see) "It is not a mere announcement of the gospel, or a
bare declaration that God will pardon the sins of those
who repent but, as the Council of Trent defines it, is a
judicial act by which a priest as judge passes a sen-
tence on the penitent. *Cath. Dict.* (b) According to *Prot.

vine forgiveness on the ground of his repentance and faith
In the Roman Catholic Church the priest pronounces the
absolution in his own name "I absolve thee" In *Prot.
testant* communions that use a form of *absolution* and in
the Greek Church, it is pronounced in the name of God
and as a prayer "God [or Christ] absolve thee"

By *absolution* [in the Augsburg Confession] is meant the
official declaration of the clergyman to the penitent that
his sins are forgiven him upon finding or believing that he
is exercising a godly sorrow and is trusting in the blood
of Christ

Shedd, Hist. of Christ. Doct.

absolutism (ab-sol'ū-tizm), *n* [*absolute* + *-ism*,
after *l'* *absolutisme* = *l'* *absolutisme*] 1 The
state of being absolute. Specifically in *political sci-
ence*, that practice or system of government in which the
power of the sovereign is unrestricted, a state so gov-
erned — **despotism**

The province of *absolutism* is not to dispose of the
national life, but to maintain it without those checks on
the exercise of power which exist elsewhere

Woodsy, Intro. to Inter. Law, § 99

From the time of its first conversion Germany has never
taken kindly to the claims of *absolutism* (either of author-
ity or of belief, so strongly put forward by the Church)

G. S. Hall, German Culture, p. 310

2 The principle of absolute individual power

sorbing-well, a vertical excavation or shaft sunk in the
earth to enable the surface water to reach a permeable
bed which is not saturated with water, and can there-
fore take up or *absorb* and carry off the water which has access

to it from above Such wells are sometimes called *nega-*
tive wells, *waste-wells*, and *draw wells*, also, in the south
of England, *dead wells* The geological conditions favoring
their use are rare, but they have occasionally been found
practicable and convenient in connection with manufactur-
ing establishments — **Syn** 4. To *absorb*, *engross*, *swal-*
low up, *engulf*, *engage*, *arrest*, *rivet*, *fix* (See *engross*)
Absorb and *engross* denote the engagement of one's whole
attention and energies by some object or occupation, but
absorb commonly has connected with it the idea of mental
passivity, *engross* that of mental activity Thus, one is
absorbed in a novel, but *engrossed* in business The words,
however, are sometimes used interchangeably *Swallow up*
and *engulf* have a much stronger figurative sense, *engulf*
generally expresses misfortune

absorbability (ab-sōr-bā-bil'i-ti), *n* The state
or quality of being absorbable

absorbable (ab-sōr'ba-bl), *a*. Capable of being
absorbed or imbibed

absorbed (ab-sōrb'd'), *p* *a*. 1 Drawn in or

2 To consider as a form apart from matter, attend to as a general object, to the neglect of special circumstances, derive as a general idea from the contemplation of particular instances, separate and hold in thought, as a part of a complex idea, while letting the rest go. This meaning of the Latin *abstrahere* with the corresponding meaning of *abstractus*, first appears toward the end of the great dispute between the nominalists and realists in the twelfth century. The invention of these terms may be said to embody the upshot of the controversy. They are unquestionably translations of the Greek *apagagein* and *apagagein*, though we cannot say how the Greek terms became known in the West so early. The earliest passage is the following: "We, as those thoughts (*intellektus*) are by abstraction (*per abstractionem*), which either contemplate the nature of any form in itself with out regard to the subject matter, or think any nature in differently (*indifferenter*) apart, that is, from the difference of its individuals." On the other hand, we may speak of abstraction when any one endeavors to contemplate the nature of any subject essence apart from all form. Either thought, however, the *abstraction* as well as the *abstracting*, seems to convey the thing otherwise than it exists. *De Intellectus*, in Cousin's *Fragmenta Philosophica* (2d ed.), p 481. This old Latin having been long forgotten, an erroneous idea of the origin of the term arose. "Abstraction means synonymously the active withdrawal of attention from one thing in order to fix it on another thing." *Sully*. [This plausible but false notion gave rise to the phrase to abstract (intrans) from. See below.]

3. To derive or obtain the idea of

And thus from divers accidents and acts

5 To extract us, to abstract spirit. *Boyle*

= *Syn. 2* To disengage, isolate, detach. **4.** See *abridge*.

II. intrans. To form abstractions, separate ideas, distinguish between the attribute and the subject in which it exists, as, "brutes abstract not," *Locke*.

Thus the common consciousness lives in abstraction, though it has never abstracted. *F. Carol Hegel*, p 159

To abstract from, to withdraw the attention from as part of a complex idea, in order to concentrate it upon the rest.

I noticed the improper use of the term abstraction by many philosophers in applying it to that on which the attention is converged. This we may indeed be said to prescind, but not to abstract. Thus let A, B, C, be three qualities of an object. We prescind A, in abstracting from B and C, but we cannot without impropriety say that we abstract A. *Hamilton, Lectures on Metaph*, xxv. [This is all founded on a false notion of the origin of the term. See above.]

abstract (ab-strakt'), *a* and *n* [*<L abstractus, pp of abstrahere see abstract, v*] As a philosophical term, it is a translation of Gr. *ra'z' apaploew*. **1.** *a.* **1** Conceived apart from

matter and from special cases: as, an abstract number, a number as conceived in arithmetic, not a number of things of any kind. Originally applied to geometrical forms (the metaphor being that of a statue hewn from a stone), and down to the twelfth century restricted exclusively to mathematical forms and quantities. (Aldous, about A D 600, defines *abstract number*.) It is now applied to anything of a general nature which is considered apart from special circumstances; thus, abstract right is what ought to be done independently of instituted law. [The phrase in the abstract is preferable to the adjective in this sense.]

Abstract natures are as the alphabet or simple letters whereof the variety of things consisteth, or as the colours mingled in the painter's shell, wherewith he is able to make infinite variety of faces and shapes.

Baron, Valerius Maximus, xiii
Hamilton, Works, I 129

Consider the positive science of 'crystallography, and presently it appears that the mineralogist is studying the abstract crystal, its geometrical laws and its physical properties.

G. H. Lewis, Probs of Ifit and Mind, I 1 § 61

2 In *gram* (since the thirteenth century), applied specially to that class of nouns which are formed from adjectives and denote character, as *goodness, audacity*, and more generally to all nouns that do not name concrete things. *Abstract* in this sense is a prominent term in the logic of Occam and of the English nominalists.

Of the name of the thing itself, by a little change or twisting, we make a name for that accident which we consider, and for 'living put into the account 'life', for 'moved' motion, for 'hot', 'heat', for 'long', 'length', and the like, and all such names are the names of the accidents and properties by which one matter and body is distinguished from another. These are called 'names abstract', because severed, not from matter, but from the account of matter. *Hobbes, Leviathan*, I 4

A mark is needed to show when the connotation is dropped. A slight mark put upon the connotative term answers the purpose, and since it is not meant that anything should be connoted. In regard to the word *black*, for example, we merely annex to it the syllable *ness*, and it is immediately indicated that all connotation is dropped, so in *whiteness, hardness, dryness, lightness*. In these words, we form, at the words which have been denominated *abstract* as the connotative terms from which they are formed have been denominated concrete and as these terms are in frequent use, it is necessary that the meaning of them should be well remembered. It is now also manifest what is the real nature of *abstract terms*, a subject which has in general presented such an appearance of mystery. They are simply the concrete terms with the connotation dropped.

James Mill, Analysis of the Human Mind, ix

Why not say at once that the *abstract* name is the name of the attribute?

J. S. Mill

3 Having the mind drawn away from present objects, as in ecstasy and trance, abstracted as, "abstract as in a trance," *Milton*, P L, viii 462—**4** Produced by the mental process of abstraction, as, an abstract idea. Under this head belong two meanings of *abstract* which can hardly be considered as English, though they are sometimes used by writers influenced by the German language. They are—(a) General, having relatively small logical comprehension wide, lofty indeterminate. This is the usual meaning of *abstract* in German, but its establishment in English would greatly confuse our historical terminology. (b) Resulting from analytical thought, severed from its connections, falsified by the neglect of important considerations. This is the Hegelian meaning of the word, carrying with it a tacit condemnation of the method of analytical mechanics and of all application of mathematics.

5 Demanding a high degree of mental abstraction, difficult, profound, abstruse, as, highly abstract conceptions, very abstract speculations—**6** Applied to a science which deals with its object in the abstract as, abstract logic, abstract mathematics opposed to applied logic and mathematics—**7** Separated from material elements, ethereal, ideal.

Love's not so pure and abstract as they use
To say, which have no mistress but their muse

The sensation of cold is really due to an abstraction of heat from our own bodies.

W. J. Carpenter, Energy in Nature, p 41

Wordsworth's better utterances have the bare sincerity, the absolute abstraction from time and place, the immunity from decay, that is long to the grand simplicities of the Bible.

Lowell, Among my Books, 2d ser, p 248

2 The act of abstracting or concentrating the attention on a part of a complex idea and neglecting the rest or supposing it away, especially, that variety of this procedure by which we pass from a more to a less determinate concept, from the particular to the general, the act or process of refining or sublimating.

The mind makes the particular ideas, received from particular objects, to become general, which is done by considering them as they are in the mind such appearances, separate from all other existences, and the circumstances of real existence, as time, place, or any other concomitant ideas. This is called *abstraction*, whereby ideas, taken from particular beings, become general representatives of all of the same kind.

Locke, Human Understanding, II xi § 9

To be plain, I own myself able to abstract in one sense, as when I consider some particular parts or qualities separated from others, with which, though they are united in some object, yet it is possible they may really exist without them. But I deny that I can abstract one from another, or conceive separately, those qualities which it is impossible should exist so separated, or that I can frame a general notion by abstracting from particulars in the manner aforesaid. Which two last are the proper acceptations of *abstraction*.

Berkeley, Prin of Human Knowl, Int, § 10

The active mental process by which concepts are formed is commonly said to fall into three stages, comparison, abstraction, and generalization. When things are widely unlike one another, as for example different fruits, as a strawberry, a peach, and so on, we must, in order to note the resemblance, turn the mind away from the differ-

ences of form, colour, etc. This is the difficult part of the operation. Great differences are apt to impress the mind, and it requires a special effort to turn aside from them and to keep the mind directed to the underlying similarity. This effort is known as *abstraction*.

Sully, Outlines of Psychology, ix

This was an age of vision and mystery, and every work was believed to contain a double or secondary meaning. Nothing escaped this eccentric spirit of refinement and abstraction.

T. Warton, Hist. Eng. Poetry

3. A concept which is the product of an abstracting process, a metaphysical concept; hence, often, an idea which cannot lead to any practical result, a theoretical, impracticable notion, a formality, a fiction of metaphysics.

Art I, delicate as an abstraction of the dawn and vesper sunlight, flies around the shipwrecked men to console them.

A. H. Welsh, Eng. Lit., I 388

Tangents, sines, and cosines are not things found isolated in Nature, but, because they are abstractions from realities, they are applicable to Nature.

G. H. Lewes, Probs. of Life and Mind, I 1 § 71

The mild abstractions of the schoolmen were succeeded by the fanciful visions of the occult philosophers.

I. D. Isidore, Amen. of Lit., II 285

4. Inattention to present objects, the state of being engrossed with any matter to the exclusion of everything else, absence of mind as, a fit of abstraction.

Keep your hood about the face,

They do so that affect abstraction here.

Leopold, Princess, II

The tank was nearly five feet deep and on several occasions I narrowly escaped an involuntary bath as I entered may room in moments of abstraction.

O. Donovan, Merv, xl

5. In distillation, the separation of volatile parts from those which are fixed. It is chiefly used with relation to a fluid that is repeatedly poured upon any substance in a retort and distilled off, to change its state or the nature of its composition. — *Abstraction from singulars but not from matter*, in the *Scottish Logic*, the degree of abstraction required to form such a concept as that of a white man, where we cease to think of the individual man, but yet continue to attend to the color, which is a material passion. — *Concrete abstraction*, same as *partial abstraction*. — *Divisive abstraction*, same as *negative abstraction*. — *Formal abstraction*, the mental act of abstraction, as distinguished from the resulting concept. — *Intentional abstraction*, mental abstraction, separation in thought. — *Logical abstraction*, that process of abstractive thought which produces a general concept. — *Mathematical abstraction*, the act of thinking away color, etc., so as to gain pure geometrical conceptions. — *Metaphysical abstraction*, a process of abstraction carried further than the mathematical. — *Minor abstraction*, a kind of abstraction involved in conscious perception, according to the Thomists. — *Negative abstraction*, separation of one concept from another in the sense of denying one of the other. — *Objective abstraction*, the concept produced by the act of abstracting. — *Partial abstraction*, the imagining of some sensible thing deprived of some extensive part, as a man without a head. — *Physical abstraction*, abstraction from singulars, that grade of abstraction required in physics. — *Precisive abstraction*, the thinking of a part of a complex idea to the neglect of the rest, but without denying in thought those predicates not thought of.

Real abstraction, the real separation of one thing from another, as the (supposed) abstraction of the soul from the body in ecstasy.

Abstractional (ab-strak'shon-al), *a*. Pertaining to abstraction. *II Bushnell*

Abstractionist (ab-strak'shon-ist), *n*. One who occupies himself with abstractions, an idealist, a dreamer.

The studious class are their own victims; they are abstractionists and spend their days and nights in dreaming some dream.

Emerson, Montaigne

— *Syn.* *Absurd, Silly, Foolish, Stupid, Irrational, Unreasonable, Preposterous, Injunctive, Ridiculous, Non-sensical, Senseless, Incongruous, Unwise, Ill-judged, Ill-advised* (See *foolish*). *Foolish, absurd* and *preposterous* imply a contradiction of common sense, rising in degree from *foolish*, which is commonly applied where the contradiction is small or trivial, that which is *foolish* is characterized by weakness of mind, and provokes our contempt. That which is *silly* is still weaker and more contemptible in its lack of sense, *silly* is the extreme in that direction. That which is *absurd* does not directly suggest weakness of mind but it is glaringly opposed to common sense and reason, as, that a thing should be unequal to itself is *absurd*. That which is *preposterous* is the height of absurdity, an absurdity as conspicuous as setting a thing wrong side before. It excites amazement that any one should be capable of such an extreme of foolishness. That which is *irrational* is contrary to reason but not especially to common sense. *Unreasonable* is more often used of the relation of man to each other. It implies less discredit to the understanding, but more to the will, indicating an unwillingness to conform to reason. *Irrational* ideas, conclusions, *unreasonable* demands, assumptions people. An *unfathomable* person is so possessed by a misleading idea or passion that his thoughts and conduct are controlled by it and turned into folly. He who is *stupid* appears to have little intelligence, that which is *stupid* is that which would be natural in a person whose powers of reasoning are defective or suspended.

It is a fault to heaven,

A fault against the dead a fault to nature,

To reason most *absurd*. *Shak., Hamlet, I 2*

From most *silly* men we can at least extract a laugh; but those of the modern antique school have a ponderous, a leaden kind of fatuity, under which we groan.

George Eliot, Silly Novels

How wayward is this *foolish* love! *Shak., I 1 1 2*

A man who cannot wile with wit on a proper subject is dull and *stupid*. *Edinburgh Spectator, No. 201*

The brave man is not he who feels no fear

For that were *stupid* and *irrational*.

Thomas Bailey, Paul

She entertained many *unreasonable* prejudices against him, before she was acquainted with his personal worth.

Edinburgh

Though the error be easily fallen into, it is manifestly *preposterous*.

heterogeneous group now broken up or retained in a much modified and restricted sense See *Acalepha* The leading genera of Cuvierian acalephs were *Medusa*, *Cyanea*, *Rhizostoma*, *Actinia*, *Beroë*, and *Cestum* composing the *Acalepha simplicia*, with *Physalia*, *Physophora*, and *Diphyes*, constituting the *Acalepha hydrotica*

Acalepha (ak-a-lē'fē), *n*, *pl* [*NL* (sing. *acalēpha*), < Gr *akalēphē*, a nettle, also a mollusk (*Urtica marina*) which stings like a nettle] A name given to a large number of marine animals included in the subkingdom *Cœlentelata*, and represented chiefly by the *Medusae* and their allies, in popular language known as sea-nettles, sea-blubbers, jolly-fish, etc. Other forms once included under it are the *Discozoa* and *Lucernaria* (both in class *Hydrozoa*), and the *Ctenophora* (in class *Actinozoa*) The most typical of the *Acalepha*, the *Medusae*, are gelatinous, free swimming animals, consisting of an umbrella shaped disk containing canals which radiate from the center, whence hangs the digestive cavity All have thread cells or urticating organs (see *nematophore*) which discharge minute barbed structures, irritating the skin like the sting of a nettle, hence the name of the group **acalephan** (ak-a-lē'fan), *a* and *n* 1. *a* Pertaining to the *Acalepha*

II. n An acaleph
acalephe (ak'-a-lēf), *n* See *acaleph*.
acalephoid (ak-a-lē'foid), *a* [*Gr* *akalēphē*, a sea-nettle, < *akalē*, form] Like an acaleph or a medusa [Less common than *medusoid*]
acalycal (a-kal'-i-ka), *a* [*Gr* *a-* priv + *kalys*, calyx, + *-al*] In bot, inserted on the receptacle without adhesion to the calyx said of stamens

acalycine (a-kal'-i-sin), *a* [*Gr* *a-* priv + *kalys*, *L* *calyx*, a cup, + *-ine*] see *calyx*] In bot, without a calyx

acalycinous (ak-a-lis'-i-nus), *a* Same as *acalycine*

acalyculate (ak-a-lis'-i-lāt), *a* [*Gr* *a-* priv + *NL* *calyculus* + *-ate*] In bot, having no calyculus or accessory calyx *N E D*

Acalyptate (ak'-a-lip-tā'tē), *n* *pl* [*NL*, < Gr *a-* priv + *NL* *alyptrata*, *q v*] A section of dipterous insects or flies, of the family *Muscidae*, which, with the exception of the *Anthomyia*, are characterized by the absence or rudimentary condition of the tegulae or membranous scales above the halteres or poisoning-wings, whence the name contrasted with *Calyptrata*

acamptia (a-kamp'si-a), *n* [*NL*, < Gr *akamptia*, inflexibility, < *akamptos*, unbent, rigid, < *a-* priv + *kamptos*, bent] Inflexibility of a joint See *ankylosis*

acamptia (a-kamp'si), *n* Same as *acamptia*

acanaceous (ak-a-nā'shi-us), *a* [*L* *acan-os*, < Gr *akan-os*, a prickly shrub (< *akē*, a point; cf *akē*, a point, prickle, + *-aceous*] In bot, armed with prickles said of some rigid prickly plants, as the pineapple

candelliere (a kan-del-i-ā're) [It *a* to, with, *candelliere* = *F* *chandelier*] In the style of a candlestick said of arabesques of symmetrical form, having an upright central stem or shaft

Acanonia (ak-a-nō'n-i-a), *n* [*NL*, a fuller form *Acanonida* occurs, formation uncertain] The typical genus of the subfamily *Acanonida*

Acanonida (ak'-a-nō-ni'-i-dā), *n* *pl* [*NL*, < *Acanonia* + *-ida*] In entom, one of the thirteenth subfamilies into which the family *Eulophidae* (which see) has been divided [The regular form of the word as a subfamily-name would be *Acanonina*]

acantha (a-kan'thā), *n*, *pl* *acanthæ* (-thē) [*NL*, < Gr *akanthā*, a prickle, thorn, spine, a prickly plant, a thorny tree, the spine (of fish, serpents, men), one of the spinous processes of the vertebrae, < *akē*, a point. Cf *Acanthus*] 1. In bot, a prickle — 2. In zool, a spine or prickly fin — 3. In anat (a) One of the spinous processes of the vertebrae (b) The vertebral column as a whole — 4 [*cap*.] In entom, a genus of coleopterous insects

acanthabole, **acanthobolus** (a-kan'thā-bōl, ak-an-thā'bō-lus), *n*; *pl* *acanthaboli*, *acanthaboli* (-bōl-i) Same as *acanthobolus*

Acanthaceæ (ak-an-thā'sē-ē), *n* *pl* [*NL*, < *Acanthus* + *-aceæ*] A large natural order of gamopetalous plants, allied to the *Scrophulariaceæ* They are herbaceous or shrubby with opposite leaves, irregular flowers, and two or four stamens, and are of little economic value Several genera (*Justicia*, *Aphelandra*, *Thunbergia*, etc.) are very ornamental and are frequent in cultivation

acanthaceous (ak-an-thā'shi-us), *a* [*NL* *acanthaceus* see *acantha* and *-aceous*] 1 Armed with prickles, as a plant — 2. Belonging to the order *Acanthaceæ*; of the type of the *acanthus*.

tail is furnished with a horny spine at the end whence the generic name, *Acanthura*, the death adder of Australia, has long immovably hung, and is considered the most venomous reptile of that country.

acanthophorus (ak-an-thoŏ'ŏ-rus), *n* [*Gr* *ακανθόφορος*, bearing spine or prickles, *< ἄκανθα*, a spine or prickle, *< ἄκων*, *< φέρω* = *E* *bear*!] Having or producing spines or prickles. Also spelled *acanthophorous*.

Death adder of Australia (*Acanthophis antarcticus*)

Acanthophractes (a-kan-thō-frak'tēs), *n.* pl. [NL, < Gr *ἀκανθα*, a thorn, + *φρακτος*, included verbal adj. of *φρασσειν*, fence in, inclose] A suborder of acanthurid fish, including a skeleton of 20 radial spicules regularly grouped according to J. Müller's law, and a fenestrated or solid shell around the central capsule formed by connected transverse processes

acanthopod (a-kan'tho-pod), *a* and *n.* [*acanthopoda*] *I. a* Having spiny feet

II. n An animal with spiny feet, one of the *Acanthopoda*

Acanthopoda (ak-in-thop'ō-dā), *n.* pl. [NL, < Gr *ἀκανθα*, a spine + *ποδ* (-ad-) = *Foot*] In Latreille's system of classification, a group of chalcid beetle, the first tribe of the second section of *Chalcidines* with broad flattened feet beset outside with spines, short 4-jointed tarsi, depressed body, dilated prosternum, and curved 11-jointed antenne longer than the head. The group corresponds to the genus *Heterocera* of Ross. These insects burrow in the ground near water

acanthoptere (ak-an-thop'ter), *n.* [See *Acanthopteri*] One of the *Acanthopteri*

Acanthopteri (ak-an-thop'te-ri), *n.* pl. [NL, pl. of *acanthopterus* see *acanthopterous*] Same as *Acanthopterygii* (*h*)

acanthopterous (ak-an-thop'te-rus), *a* [*acanthopterus*, < Gr *ἀκανθα*, a spine, + *πτερον*, a wing, = *E feather*] *1* Spiny-winged, as the cassowary. *2* Having spiny fins, of the nature of the *Acanthopteri* or *Acanthopterygii*, acanthopterous fin. *3* Having spines as, an *acanthopterous* fin

acanthopterygian (a-kan'thop-te-ri-jian), *a* and *n.* *I. a* Of or pertaining to the *Acanthopterygii*, having the characters of the *Acanthopterygii*

II. n One of the *Acanthopterygii*, a fish with spiny fins

Acanthopterygii (a-kan'thop-te-ri-jī-ī), *n.* pl. [NL, pl. of *acanthopterygius* see *acanthopterygius*] A large group of fishes to which various limits and values have been assigned. The name was introduced into systematic ichthyology by W. L. Cuvier and Ray, adopted by Arted, and largely used by subsequent naturalists. (*a*) In Cuvier's system of classification the first order of fishes, characterized by hard spiny rays in the dorsal fin, as the common perch, bass, and mackerel. The spiny finned fishes. (*b*) In Günther's system of classification an order of teleosts with part of the rays of the dorsal and ventral fins spiny, and the lower pharyngeals separate. The last character eliminates the labrids and several other families retained by Cuvier, but by Günther referred to a special order *Pharyngognathi*. (*c*) In Gill's system of classification, a suborder of *Teleostei* with ventral thorn or jugular (sometimes suppressed) spines generally in the anterior portion of the dorsal and anal fins and to the outer edges of the ventral, normal symmetrical head, and pharyngeal bones either separate or united. The pectinate, hemibranchial, and opisthionous fishes are excluded as different orders and the *Perciformes*, *Isocephali*, *Parasomus*, and *Acipenser* as special suborders. Even thus limited it comprises more species than any other suborder or order of fishes. The perch, bass, porgy, mackerel, and swordfish are examples

acanthopterygius (a-kan'thop-te-ri-jī-us), *a* [*acanthopterygius*, < Gr *ἀκανθα*, a thorn, a spine, + *πτερον*, the fin of a fish, dim. of *πτερος*, a wing, a fin, < *πτερό*, a wing, = *E feather*] Having the characters of the *Acanthopterygii* or spiny-finned fishes, belonging to the *Acanthopterygii*, acanthopterygian

Acanthorhini (a-kan-thō-rī-nī), *n.* pl. [*acanthorhinus*, < Gr *ἀκανθα*, a spine, + *ῥις*, a nose] An ordinal name suggested by Bonaparte, 1811, as a substitute for *Holoccephala* (which see)

Acanthorhynchus (a-kan-thō-rīng'kus), *n.* [NL, < Gr *ἀκανθα*, a thorn, + *ῥινχος*, snout] *1* A genus of Australian birds, of the family *Mythophagidae* and subfamily *Myzomela* so called from their slender acute bill. The species are *A. tenuirostris* and *A. superciliosus*. J. Gould, 1837. *2* A genus of helminths. *Desong*, 1850

acanthosis (ak-an-thō'sis), *n.* [NL, < Gr *ἀκανθα*, a spine, + *-osis*] A name applied to any disease affecting primarily the stratum spinosum (prickle-cells) of the epidermis

Acanthothetis (a-kan-thō-tē'tis), *n.* [NL, < Gr *ἀκανθα*, a thorn, + *τετις*, a squid] A genus of fossil cephalopods, of the family *Ichthyotida*, characterized by the almost rudimentary condition of the rostrum and the large pen-like form of the prodorsum. It occurs in the Triassic rocks, and is not dissimilar to the oldest known cephalopod of the dibranchiate or acetaliferous order

Acanthotheca (a-kan-thō-thē'kē), *n.* pl. [NL, < Gr *ἀκανθα*, a thorn, + *θεκη*, a case] Same as *Pentastomula*. Also written *Acanthotheca*

acanthous (a-kan'thus), *a* [*acanthus*, < Gr *ἀκανθα*, a spine. see *acantha* and *-ous*] Spiny

acanthurid (ak-an-thū'rid), *n.* A fish of the family *Acanthuridae*

Acanthuridae (ak-an-thū'ri-dē), *n.* pl. [NL, < *Acanthus* + *-idae*] A family of acanthopterygian fishes typified by the genus *Acanthus*, to which various limits have been ascribed. See *Trachidae*

Acanthus (ak-an-thū'rus), *n.* [NL, < Gr *ἀκανθα*, spine, + *-ος*, tail] *1* The representative genus of the family *Acanthuridae*, characterized by spines on the sides of the tail, whence the name. The species are numerous in the tropical seas, and are popularly known as doctors, surgeons, surgeon fishes, barbers, etc. Synonymous with *Tha*

2 A genus of reptiles. *Daudin*. *3* A genus of coleopterous insects. *Knab*, 1827

Acanthus (a-kan'thus), *n.* [*acanthus*, < Gr *ἀκανθα*, a spine, + *-ος*, tail] *1* The representative genus of the family *Acanthuridae*, characterized by spines on the sides of the tail, whence the name. The species are numerous in the tropical seas, and are popularly known as doctors, surgeons, surgeon fishes, barbers, etc. Synonymous with *Tha*

2 [*l c*] The common name of plants of this genus. *3* In *zoöl*, a genus of crustaceans. *4* [*l c*] In *arch*, a characteristic ornament derived from or resembling the conventionalized foliage or leaves of the acanthus, used in capitals of the Corinthian and Composite orders, and in Roman, Byzantine, medieval, and Renaissance architecture generally, as upon friezes, cornices, modillions, etc.

Acanthyllis (ak-an-thī'lis), *n.* [*acanthyllis*, < Gr *ἀκανθα*, a thorn, + *ῥις*, a nose] A genus of American, Indian, and Australian birds of the swift family, *Cypselidae*, the spine-tailed swifts, now usually referred to the genus *Cathura*. Usually written *Acanthylis*. *Bou*, 1826

acanticone, acanticon (a-kan'ti-kon, -kon), *n.* [*acanti*, a point, + *anti*, against, + *con*, a cone] A variety of epidote, ardenalite (which see)

a cappella, alla cappella (a or al'la ku-pol'la) [*it a* (*l a*), to, according to, *alla* (= *a la*), to the, *cappella*, church, chapel, church musicians see *chapel*] In the style of church or chapel music. Applied to compositions sung without instrumental accompaniment or with an accompaniment in unison with the vocal part, as, a mass *a cappella*

acapsular (a-kap'sū-lu), *a* [*acapsular*, < Gr *ἀκαπς*, a point, + *αἰμα*, a capsule] Without a capsule

acardia (a-ka'di-a), *n.* [NL, see *acardius*] In *teratol*, absence of a heart

acardiac (a-ka'di-ak), *a* [*acardiacus*, < Gr *ἀκαρδίας*, without a heart] Without a heart

acardiacus (ak-ar-di'a-kus), *n.* pl. *acardiace* (-si) [NL, see *acardiac*] In *teratol*, that parasitic part of a double monster in which the heart is absent or rudimentary. *Acardiaceus minor* is a shapeless mass covered with skin. *Acardiaceus major* has a head, while the thorax and abdomen are rudimentary. In *acardiaceus acardiacus* the head is lacking, the thorax rudimentary, and the pelvis and posterior limbs well developed. *Acardiaceus anceps* has a well developed trunk and rudimentary head, limbs, and heart

acardius (a-ka'di-us), *n.* pl. *acardi* (-i) [NL, < Gr *ἀκαρδίας*, without a heart, < *acapsular* + *καρδία* = *E heart*] Same as *acardiaceus*

acarian (a-ka'ri-an), *a* [*acarus*, *q v*] Of or pertaining to the order *Acarida*, belonging to or resembling the genus *Acarus*

In some cases of the an acarian parasite, called by Owen the *Demodex folliculorum*, is present in the affected follicle. *E W Richardson*, *Prevent. Med.*, p. 261

acaricide (a-ka-ri'sid), *n.* [*acarus* + *-ida*, a killer, < *κατερε*, kill. Cf *homicide*, *parricide*, *matricide*] A substance that destroys mites

acarid (ak'a-rid), *n.* [*Acarida*] One of the *Acarida*, a mite

Acarida (a-ka-ri'dā), *n.* pl. [NL, < *Acarus* + *-ida*] An order of the class *Arachnida*, including those insects, as the mites, ticks, itch-insects, etc., which are without a definite line of demarcation between the unsegmented abdomen and the cephalothorax, the head, thorax, and abdomen appearing united in one. They are with or without eyes, the mouth is either suctorial or masticatory, the respiration is either tracheal or dermal, and the legs are 8 in number in the adult and 6 in the young, being in some cases terminated by suckers, in others by setae. There are several families of *Acarida*, with numerous genera and species, mostly oviparous and generally parasitic, but many are found in excrementitious or decaying animal matter, or on plants while some are marine and others live in fresh water. Those which live on plants are often very injurious to vegetation, and frequently form a kind of gall, sometimes resembling a fungus or a bud's nest, as the witch knot of the birch, caused by members of the genus *Phytoptus*. The garden mites (*Trombididae*) including the harvest tick (*Leptus autumnalis*), the spider mites (*Tetranychidae*), and the wood mites (*Oribatidae*) live mostly upon vegetation. The true ticks (*Ixodidae*) attach themselves to the bodies of various animals, the water mites (*Hydrachnidae*) are, at least in part, parasitic upon animals such as aquatic insects, mollusks, and even mammals. The chalcid mite, *Acarus domesticus*, is typical of the family *Acarida* and of the whole order. The mange mite, *Demodex folliculorum*, type of the family *Demodex*, is found in the sebaceous follicles of man, as well as in the dog. The itch mite, which burrows into the skin, is the *Sarcoptes scabiei*, type of the family *Sarcoptidae*. The mites and ticks are also called collectively *Acarida*, *acaridans*, *acarins*, and *monomeresomata*. See cuts under *flower mite*, *itch mite*, and *harvest tick*

Acarid (a-ka-ri'dē), *n.* pl. [NL, < *Acarus* + *-ida*] A family of the order *Acarida* (which see), including the true mites, as the cheese-mite, *Acarus domesticus*. See *Acarus* and *cheese-mite*

accent (ak-sent), *n* [*F* *accent* = *Sp* *acento* = *Pg* *It* *accento*, < *L* *accentus*, accent, tone, *LL* also a blast, signal, fig intensity, < *accinere*, sing to (see *accutor*), < *L* *ad*, to, + *cinere*, sing see *cant* and *chant*] 1 A special effort of utterance by which, in a word of two or more syllables, one syllable is made more prominent than the rest. This prominence is given in part by a raised pitch, in part by increased force or stress of voice, and in part (as a consequence of these) by a fuller pronunciation of the constituents of the syllable. These elements are variously combined in different languages. In English elevation of pitch is conspicuous when a word is spoken or read by itself as a word without any reference to a sentence of which it forms or should form a part but in connected speech the tone and modulation of the sentence dominate those of the individual words composing it, and the change of pitch may be absent or even reversed, the other elements giving without its aid the required prominence. By the native grammarians of the classical languages of our family (Greek, Latin and Sanskrit) change of pitch was recognized as constituent of accent. They called a syllable *acute* if its tone was sharpened or raised, *grave* if it remained at the general level of utterance, and *circumflex* if it began at acute pitch and ended at grave. A word of three or more syllables often has in our language, besides its principal accent another and lighter or secondary one, or even also a third such secondary accents are denoted in this work by a double accent mark, thus, *val'ue* to distinguish an antepenultimate. The vowels of wholly unaccented syllables in English are much modified, being either made briefer and lighter or else reduced even to the sound of the so-called neutral vowel the "short *u*" of *but*. These two effects are marked in this work by writing respectively a single or a double dot under the vowel in the respelling for pronunciation. *Emphasis* differs from *accent* in being expended upon a word which is to be made prominent in the sentence.

2 A mark or character used in writing to direct the stress of the voice in pronunciation, or to mark a particular tone, length of vowel-sound or the like. There is commonly only one such sign (used to mark the stress or accent in English except in words on elocution, in which are employed the three Greek accents namely the acute (´), the grave (`) and the circumflex (˘ or ˝). In elocution the first shows when the voice is to be raised and is called the rising inflection, the second when it is to be depressed and is called the falling inflection and the third when the vowel is to be uttered with an undulating sound and is called the compound or waving inflection. An accent over the *e* in *ed* is sometimes used in English poetry to denote that it is to be pronounced as a distinct syllable as *lord* or *loved*.

3 In printing, an accented or marked letter, a type bearing an accentual or diacritical mark. The accents most generally used in English type (chiefly for foreign words) and regularly furnished in a full font, are the vowels bearing the acute (´), grave (`) and circumflex (˘) accents, and the diacritical (˙) and cedilla (¸) of French (˘) and the Spanish *ñ* (˜). Accents for occasional use are the vowels marked long (ˉ) and short (˘) and other marked letters required for technical works or peculiar to certain languages.

4 Manner of utterance, peculiarity of pronunciation, emphasis, or expression. Specifically a peculiar modulation of the voice or manner of pronunciation marked by subtle differences of elocution, characteristic of the spoken language of a given district or a particular rank in society, and especially of each distinct nationality

Your *accent* is something finer than you could purchase in so removed a dwelling. *Shak*, As you Like It, III, 2.

7 In *eccles* chanting, one of the seven forms of modulation used in parts sung by the officiating priest or his assistants, viz, the immutable, medium, grave, acute, moderate, interrogative, final—8 In music (a) A stress or emphasis given to certain notes or parts of bars in a composition. It is divided into two kinds, grammatical and rhetorical or esthetic. The first is perfectly regular in its occurrence, always falling on the first part of a bar, the esthetic accent is irregular, and depends on taste and feeling. (b) A mark placed after the letter representing a note to indicate the octave in which it is found. Thus, if C is in the great octave (see *octave*) c is an octave above, c' an octave above that, c'' in the next, and so on.

9 In *math* and *mech* (a) In all literal notation, a mark like an acute accent placed after a letter in order that it may, without confusion, be used to represent different quantities. In this way *a*, *b*, *c*, *a'*, *b'*, *c'*, etc., may stand for magnitudes as different in value as those which, but for the use of the accents, must be represented by different letters. *L* terms so marked are read thus: *a* prime or first (*a'*), *a* second (*a''*), a third (*a'''*), etc. (b) In *geom* and *trigon*, a mark at the right hand of a number indicating minutes of a degree, two such marks indicating seconds as, 20° 10' 30" = 20 degrees, 10 minutes, 30 seconds. (c) In *measur* and *engin*, a mark at the right hand of a number used to denote feet, inches, and lines, thus, 3' 6" 3''' = 3 feet, 6 inches, 7 lines. (d) In *plans* and *drawings*, a mark similarly used after repeated letters or figures, to indicate related or corresponding parts, and read as in algebra. See above, (a) *Syn* See *emphasis* and *inflection*.

II. n, pl *accessories* (-iz) 1 In law, one who is guilty of a felony, not by committing the offense in person or as a principal, nor by being present at its commission, but by being in some other way concerned therein, as by advising or inciting another to commit the crime, or by concealing the offender or in any way helping him to escape punishment An *accessory before the fact* is one who counsels or incites another to commit a felony, and who is not present when the act is done after the fact, one who receives and conceals, or in any way assists, the offender, knowing him to have committed a felony In high treason and misdemeanor, by English law there are no accessories, all implicated being treated as principals See *abettor*

An accessory is one who participates in a felony too remotely to be deemed a principal (Bishop)

In that state [Massachusetts], too the aider and abettor, who at common law would have been but a mere *accessory*, may be indicted and convicted of a substantive felony without any regard to the indictment or conviction of the principal (Am Cyc., I 58)

The prevailing rule of the criminal law, that there may be principals and accessories to a crime, has no application whatever to treason (Am Cyc., XV 861)

2 That which accedes or belongs to something else as its principal, a subordinate part or object, an accompaniment

The wealth of both Indies seems in great part but an accessory to the command of the sea (Bacon, Essays, xxix) The aspect and accessories of a den of banditti (Carlyle)

3 In the fine arts, an object represented which is not a main motive or center of interest, but is introduced to balance the composition or in some way enhance its artistic effectiveness In a portrait for example everything but the figure is an accessory

In painting the picture of an Oriental, the pipe and the coffee cup are indispensable accessories

B. Taylor, Lands of the Saracen, p. 178

[In all uses interchangeable with *accessary*, but *accessory* is more common] = **Syn** 1 Abettor, accomplice See the definitions of these words

acciaccatura (at-ehh-kah-to-ra), *n* [It, lit, the effect of crushing, < *acciaccare*, bruise, crush, < *acciare*, mince, crush, < *accia*, an ax, < *L* *accia*, an ax see *ax*] In music (a) A grace-note one half step below a principal note, struck at the same time with the principal note and immediately left, while the latter is held Before a single note it is indicated in the same manner as the short appoggiatura Before a note of a chord it is indicated by

a stroke drawn through the chord under the note to which it belongs It is now used only in organ music (b) More frequently, a short appoggiatura See *appoggiatura*

accidence (ak'si-dens), *n* [A misspelling of *accidents*, pl, or an acronym of *L* *accidentia*, neut pl, as *accidence* of *L* *accidentia*, fem. sing see *accident*, 6] 1 That part of grammar which treats of the accidents or inflection of words, a small book containing the rudiments of grammar

I never yet did learn mine *accidence* (John Taylor (the Water-Poet).

We carried an *accidence*, or a grammar, for form (Lamb, Christ's Hospital)

The story of my life, And the particular accidents gone by, Since I came to this life (Shak., Temp., v 1) Whichever words tumble out under the blind accidents of the moment, those are the words retained (De Quincey, Style, I)

2 Specifically, an undesired or unfortunate happening, an undesigned harm or injury, a casualty or mishap In legal use, an accident is (a) An event happening without the concurrence of the will of the person by whose agency it was caused. It differs from *mistake*, in that the latter always supposes the violation of the will of the agent in producing the event, although that will is caused by erroneous impressions on the mind *Edin Irvington* See *mistake* (b) Sometimes, in a loose sense, any event that takes place without one's foresight or expectation (c) Specifically, in equity practice, an event which is not the result of personal negligence or misconduct

3 The operation of chance, an undesigned contingency, a happening without intentional causation; chance, fortune as, it was the result of *accident*, I was there by *accident*

Prizes of *accident* as oft as merit (Shak., T and C, III 3)

All of them, in his opinion, owe their being to fate, accident, or the blind action of stupid matter (Duguid)

4 That which exists or occurs abnormally, something unusual or phenomenal, an uncommon occurrence or appearance

Noon accident for noon divination (Chaucer, Clerk's Tale, I 607)

The accident was loud, and here before the With full cry (Milton, S A, I 1552)

5 Irregularity, unevenness, abruptness (a) Any chance, unexpected, or unusual quality or circumstance

The happy accidents of old English houses (H. James, Jr., Portraits of Places, p. 202)

(b) An irregularity of surface, an undulation as, the undine was favored by the accidents of the ground

6 A non-essential In logic (translation of Gr *συμβεβηκε*) (a) Any predicate, mark, character, or whatever is in a subject or inheres in a substance In this sense opposed to *substance* (b) A character which may be present in or absent from a member of a natural class in this sense it is one of the five predicables, viz., genus, difference, species, property, accident Accidents are divided into *separable* and *inseparable* The distinction between an *inseparable accident* and a *property* is not clear

If two or three hundred men are to be found who cannot live out of Madeira, that inability would still be an accident and a peculiarity of each of them (H. Newman, Gram of Assent, p. 83)

7 In gram., a variation or inflection of a word, not essential to its primary signification, but marking a modification of its relation, as gender, number, and case See *accidence*

See *form*.—**Accidental light**, in *painting*, a secondary light which is not accounted for by the prevalent effect, such as the rays of the sun darting through a cloud, or between the leaves of a thicket, or the effects of moonlight, candle light, or burning bodies, in a scene which does not owe its chief light to such a source.—**Accidental point**, in *persp.*, that point in which a right line drawn from the eye parallel to another given right line cuts the picture or plane. Thus, suppose AB to be the line given in perspective, CFF the perspective plane, D the eye, DE the line parallel to AB, then DE is the accidental point = **Syn** 1 *Accidental, Chance, Casual, Fortuitous, Incidental, Contingent*. The first four are the words most commonly used to express occurrence without expectation or design. *Accidental* is the most common, and expresses that which happens outside of the regular course of events. *Chance* has about the same force as *accidental*, but it is not used predicatively. There is a tendency to synonymize *accidental* and *casual*, so as to make the former apply to events that are of more consequence than an *accidental* fall, a *casual* remark. As to actual connection with the main course of events, *casual* is the word most opposed to *incidental*, the connection of what is *incidental* is real and necessary, but secondary, as an *incidental* benefit or evil. An *incidental* remark is a real part of a discussion, a *casual* remark is not. *Fortuitous* is rather a learned word not applicable in many cases where *accidental* or even *casual* could be used. It is rarely if ever used when speaking of that which is unfavorable or undesirable, thus, it would not be proper to speak of a *fortuitous* shipwreck. It is chiefly used with the more abstract words, as, *fortuitous* events, a *fortuitous* resemblance. That which is *contingent* is dependent upon something else for its happening, as, his recovery is *contingent* upon the continuance of mild weather. See *occasional*.

II. n 1 Anything happening, occurring, or appearing accidentally, or as if accidentally, a casualty. Specifically—(a) In music, a sign occurring in the course of a piece of music and altering the pitch of the note before which it is placed from the pitch indicated by the signature, or restoring it to the latter after it has undergone such alteration. There are five such signs: the sharp (#), double sharp (x), flat (b), double flat (bb), and natural (n). The sharp raises the pitch a half step, the double sharp a whole step, the flat lowers the pitch a half step, the double flat a whole step, the natural annuls the effect of a previous sharp or flat occurring either in the signature or as an accidental. The effect of an accidental is usually limited to the bar in which it occurs. (b) In medicine, resulting from morbid action, chiefly employed in this sense by French writers, but adopted by some English authors. (c) In painting, a fortuitous or chance effect resulting from the incidence of luminous rays or accidental lights upon certain objects, whereby the latter are brought into greater emphasis of light and shadow.

2 An unessential property, a mere adjunct or circumstance.

He conceived it just that accidentals should sink with the substance of the accusation
Fuller

Conceive as much as you can of the essentials of any subject, before you consider its accidentals
Watts, Logic

acclimatization (a-kli'mā-ti-zā'shon), *n* The act or process of acclimatizing, or state of being acclimatized, the modification of physical constitution which enables a race or an individual to live in health in a foreign climate Some writers use this word with regard to brute animals and plants only, using *acclimation* when speaking of man Also spelled *acclimatization*

Acclimatization is the process of adaptation by which animals and plants are gradually rendered capable of surviving and flourishing in countries remote from their original habitats or under meteorological conditions different from those which they have usually to endure, and which are at first inimical to them

R Wallace Encyc Brit, I 84

acclimatize (a-kli'mā-tīz), *v* [*< ac- (< L ad, to) + climata + -ize*, after *acclimate* from *F*] To accustom or habituate to a foreign climate, adapt for existence in a foreign climate especially used of adapting a race or stock for permanent existence and propagation as, to acclimatize plants or animals Also spelled *acclimatise*

Young soldiers, not yet acclimatized die rapidly here. *London Times*

A domesticated animal or a cultivated plant need not necessarily be acclimatized; that is, it need not be capable of enduring the severity of the seasons without protection. The canary bird is domesticated but not acclimatized, and many of our most extensively cultivated plants are in the same category

R Wallace Encyc Brit, I 84

acclimatizer (a-kli'mā-tī-zēr), *n* One who introduces and acclimatizes foreign species Also spelled *acclimatise*

= *Syn* 1 *Accurate, Correct, Exact, Precise, Acc.*, careful, particular, true, faithful, strict, painstaking, unerring. Of these words *correct* is the feeblest. It is barely more than not faulty as stated by some standard or rule. *Accurate* implies careful and successful endeavor to be correct as, in *accurate* accountant, and, by extension of the meaning, *accurate* accounts, an *accurate* likeness. *Exact* is stronger, carrying the accuracy down to minute details as an *exact* likeness. It is more commonly used of things which *precise* is used of persons as, the *exact* truth he is very *precise* in his ways. *Precise* may imply an excess of nicety, but *exact* and *accurate* rarely do so, as, she is prim and *precise*. As applied more specifically to the processes and results of thought and investigation, *exact* means absolutely true, *accurate*, up to a limited standard of truth, *precise* as closely true as the utmost care will secure. Thus, the *exact* ratio of the circumference to the diameter cannot be stated, but the value 3.14159265 is *accurate* to eight places of decimals, which is sufficiently *precise* for the most refined measurements. *Acc* emphasizes the attention paid to minute and delicate points often in a disparaging sense as, he is more *acc* than wise.

What is told in the fullest and most *accurate* annals bears an infinitely small proportion to that which is suppressed

Acera (as'-e-ri), *n*. [NL, fem sing or neut pl of *Acerus*, < Gr *ακερος*, without horns see *Acerus* and *acerous*.] 1 A genus of mollusks, of the family *Bullidae* or *Tornatellidae*, belonging to the testibranchiate division of opisthobranchiate gastropods.

Aceria bulla, one of the *Bullidae*.

These bubble shells have a thin horny shell flattened and almost inclosed, with a slit at the suture as in the olive shells, the head is long and without eyes. The genus was instituted in this form by Lamarck, 1818. *A. bullata* is an example. Originally spelled *Acera*. O F Muller, 1776.

2 Used as a pl. A group of apterous insects without antennae. In this sense, the word is now a mere synonym of *trachuda* (which see).—3 [Used as a pl.] A group of gastropodous mollusks without tentacles. [Disused.]

Aceraceae (as'-e-rä-sé-ä), *n* pl Same as *Acerinae*.

Aceræ (as'-e-rä), *n* pl [NL, fem pl. see *Acera*.] Same as *Acera*, 2 and 3.

aceran (as'-e-ran), *n* One of the *Acera*, in any of the meanings of that word.

acerate (as'-e-rät), *a* [*Acer*, maple, + *-ate*.] A salt of acetic acid.

aceratophorous (as'-e-rä-tôf'-o-rus), *a* [*Acer* + *priv* + *ακερος* (kerat-), horn + *-φόρος*, < *φέρω* = *E bear*.] Not bearing horns, hornless as, an *aceratophorous* ruminant. [Little used.]

acerb (a-seb'), *a* [= *F aceris* = Sp. *Pg*. It *acervo*, < *L acerbus*, bitter, sour, < *acer*, sharp, bitter see *acid*.] Sour, bitter, and harsh to the taste, sour, with astringency or roughness, hence, figuratively, sharp, harsh, etc.

We have a foible for Ritson with his oddities of spelling, his *acerb* humor, and his obstinate disbeliefs in Doctor Percy's folio manuscript.

South, *Study Windows*, p 359

The dark, *acerb*, and caustic little professor.
Charlotte Brontë, *Villette*, xix

acerbate (a-sei'-bät or as'-er-bät), *v* *t*, pret and pp *acerbated*, ppl *acerbating* [*L acerbus*, pp of *acereb*, make bitter or sour, < *acerbus*, bitter, sour see *acerb*, and *acerbatus*.] To make sour, bitter, or harsh to the taste, hence, to embitter or exasperate. [Rare.]

acerbate (a-sei'-bät or as'-er-bät), *a* [*L acerbatus*, pp see the verb.] Embittered, exasperated, severe. *A B D*

acerbic (a-sei'-bik), *a* Of a harsh character. *A B D*

acerbitude (a-sei'-bi-tüd), *n* [*L acerbitudo* (rare), equiv in sense to *acribitas* see *acribity*.] Sourness, acerbity. *Bailey* [Rare.]

acribity (a-sei'-bi-ti), *n*, pl *acribities* (-tiz) [Earlier *acribita*, < *F acerbis* = Sp *acribidad* = *It acerbita*, < *L acerbitas* (-is), sharpness, sourness, harshness, < *acerbus*, sharp see *acerb*.] 1 Sourness, with roughness or astringency of taste.—2 Poignancy or severity.

It is ever a rule that any over great penalty, besides the acerbity of it, denudes the execution of the law.

Bacon, *Works* II 542

We may imagine what acerbity of pain must be endured by our Lord.

Barrow, *Sermons*, xxvi

3 Harshness or severity, as of temper or expression.

The lectures of Hazlitt display more than his usual strength, acuteness and eloquence, with less than the usual acerbity of his temper.

Whipple, *1888 and Rev*, II 10

acerdese (as'-e-rdēs), *n* [*F*.] Gray oxid of manganese a name given by Blaudant to the mineral manganite.

acere (as'-e-ri), *n* A mollusk of the genus *Acer*.

aceric (a-sei'-ik), *a* [*L acer* (see *acer*) + *-ic*.] Pertaining to the maple, obtained from the maple.

Aceric acid, an acid found in the juice of *Acer campstri*, the common European maple.

Acerina (as'-e-rä-nä), *n* [NL, as *Acerus*, q v, + *-ina*.] 1 A genus of crustaceans. *Rapin*, 1814.—2 A genus of percid fishes, the popes. *Cuvier*, 1817.

Acerinæ (as'-e-rin'-e-ä), *n* pl [*Acer* + *-inæ* + *-æ*.] A suborder of the *Sapindaceae*, distinguished from the rest of the order by its opposite leaves and exalbuminous seeds. It includes the maple (*Acer*), the box elder (*Agrulus*), and a third genus *Dobsonia*, of a single species native of the Himalayas.

Acerininae (as'-e-rin'-i-nä), *n* pl [*Acerina*, 2, + *-ina*.] A name proposed as a subfamily designation for the genus *Acerina*, including the ruffe and related percid fishes having a cavernous head and a single dorsal fin.

acerose (as'e-rōs), *a* [*< L acerous*, chaffy, *< acus* (*acer-*) = (*Gr* *αἰσρος*, chaff, akin to *Εἰς*, *awn*, *q v*, and also to *L acer*, sharp, and *acus*, a needle, from a root **ac*, be sharp. The second sense seems to rest upon *L acus* (*acus*), a needle, but the form can be derived only from *acus* (*acer-*), chaff. In *bot* (a) Chaffy, resembling chaff. [Very rare.] (b) Straight, slender, rigid, and sharp-pointed, as the leaves of the pine, needle-shaped.

ACERUS (PINE) LINE.

acerotet, *a* Probably a misprint for *acerose*. "Acrotet, brown bread." *Cockram* (1612). "Acrotet, brown bread, not rangled, chaff-bread, hanged bread." *Munster* (1625).

acerous (as'e-rōs), *a* Same as *acerose*.

acerous (as'e-rōs), *a* [*< Gr* *ἀκρῶς*, collateral form of *αἰσρος*, *chaffy*, without horns, *< ac-* + *krōs*, a horn.] 1 Of or pertaining to the *Acer*. 2 Having minute or undeveloped antennae, as an insect. 3 Having no horns, acanthophorous.

acerra (as'e-rā), *n* [*L*] In *Rom antiq* (a) A box or casket used to hold the incense which was thrown upon the altar during sacrifices. (b) A small portable altar on which incense was burned, especially at funeral ceremonies.

Ancient Acerra

acertain, *v t* An occasional and more correct form of *ascertain* (which see).

Acerus (as'e-rōs), *n* [*NL*, *< Gr* *ἀκρῶς*, without horns. See *acerous*.] 1 In *ornith*, a genus of hornbills, family *Bucerotidae*, having no casque. *A. niger* is the type and only species. *R. B. Hodgson*, 1832. Also spelled *Acrois*. 2 In *entom*, a genus of coleopterous insects. *Dejean*, 1833.

acervat (as'e-r'vat), *a* [*< L acervatus*, *< acervus*, a heap, akin to *acer*, sharp, pointed, and perhaps to *acer*, a maple-tree.] Pertaining to a heap. [Rare.]

acervate (as'e-r'vat), *v t*, *pret* and *pp* *acervated*, *ppr* *acervating*. [*< L acervatus*, *pp* of *acervat*, heap up, *< acervus*, a heap. See *acervat*.] To heap up. [Rare.]

acervate (as'e-r'vat), *a* [*< L acervatus*, *pp* see the verb.] In *bot*, heaped, growing in heaps, or in closely compacted clusters.

acervately (as'e-r'vat-lē), *adv* In an acervate manner, in heaps. [Rare.]

acervation (as'e-r'va-shon), *n* [*< L acervatio* (*n*), *< acervare*, heap up. See *acervate*, *v*.] The act of heaping together. *Bullock*, 1676.

acervative (as'e-r'va-tiv), *a* Heaped up, forming a heap. [Rare.]

Piled together irregularly or in an acervate manner. *W. B. Carpenter*.

acervose (as'e-r'vōs), *a* [*< L* as if **acervosus*, *< acervus*, a heap.] Full of heaps. *Bailey*.

Acervulina (as'e-r'vū-lī-nā), *n* [*NL*, *< acervulus*, *q v*, + *-ina*] A genus of foraminifers, of the family *Valvulinidae*.

Acervulinae (as'e-r'vū-lī-nē), *n pl* [*NL*, *< acervulus*, *q v*, + *-ina*] A group of foraminiferous thizopodous protozoans, in which the spiral form of the shell is so obscured or effaced by the irregular addition of new chambers that the whole appears as if heaped together.

acervuline (as'e-r'vū-līn), *a* [*< NL acervulus*, *q v*, + *-ine*.] 1 Having the form or appearance of little heaps, heaped up. [Rare.]

The latter are often piled up in an irregular acervuline manner. *W. B. Carpenter*. *Micros* § 493.

2 Of or pertaining to the *Acervulina*.

acervulus (as'e-r'vū-lus), *n*, *pl* *acervuli* (-lī) [*NL*, a little heap, dim. of *acervus*, a heap. See *acervat*.] In *anat*, a mass of calcareous gritty particles, consisting principally of earthy salts, found within and sometimes on the outside of the conarium or pineal body of the brain, brain sand. Commonly called *acervulus cerebri* (acervulus of the brain).

acescence (as'es-ens), *n* [*< F* *acescent* = *It* *acescenza*, *< L* as if **acescentia*, *< acescere* (*-s*), *ppr* of *acere*, become sour. See *acescent*.]

The act or process of becoming acescent or moderately sour.

acescenty (as'es-en-sī), *n* [See *acescence*.] The state or quality of being moderately sour, mild acidity.

Nurses should never give suck after fasting, the milk having an acescent very prejudicial to the recipient. *W. Jones*, *Life of Bp Home*, p. 550.

acescent (as'es-ent), *a* [*< F* *acescent* = *Fr* *acescente*, *< L* *acrescere* (*-s*), *ppr* of *acere*, become sour, *< acer*, be sour. See *acid*.] Turning sour, becoming tart or acid by spontaneous decomposition, as vegetable or animal juices or infusions, hence, slightly sour, acidulous, subacid.

The vinegar which is most esteemed for culinary purposes is that prepared from wine from the *acescent* varieties of which it is extensively manufactured in France. *W. A. Miller*, *Flora of Chem*, § 1277.

Aceste (as'es-ē), *n* [*NL*, *< (F)* *Gr* *ἀκίστος*, fem. of *ἀκίστος*, curable, easily revived, *< ακίσθησις*, cure, heal.] A notable genus of sputangoid sea-urchins. *A. bellifera* is a species having most of the upper surface occupied by the deeply sunken odd anterior umbilicarium with a narrow fucoid and large flattened spines incised over the hollow in which are a number of great discoidal suckers.

Aceste may be regarded as a permanent form of the young of *Schizaster*. *Stead*, *Nat Hist* 1: 176.

acetablet (as'e-tā-bl), *n* [*< OF* *acetabule*, *< L* *acetabulum*. See *acetabulum*.] 1 An acetabulum, a measure of about one eighth of a pint. *Holland*. 2 In *anat*, same as *acetabulum*, 2 (a).

acetabula, *n* Plural of *acetabulum*.

acetabular (as'e-tā-bū-lar), *a* Belonging to the acetabulum, of the nature of an acetabulum, cotyloid, cup-like.

Acetabulifera (as'e-tā-bū-lī-fē-rā), *n pl* [*NL*, neut. pl. of *acetabulifer*. See *acetabuliferous*.] A name introduced by D. Origny, 1834, as an ordinal term for the cephalopods with suckers on the inner faces of the arms, that is the cuttlefish, squids, and all other living cephalopods except the *Nautidae*. Same as *Cephalopoda* (*chata* and *Dibranchiata* (which see).

acetabuliferous (as'e-tā-bū-lī-fē-rōs), *a* [*< NL* *acetabulifer*, *< L* *acetabulum*, a sucker, + *ferre* = *E* *bear*.] 1 Having or bearing acetabula. 2 Pertaining to the *Acetabulifera*, having rows of cup-like suckers, as the cuttlefish.

acetabuliform (as'e-tā-bū-lī-fōrm), *a* [*< L* *acetabulum*, a cup-shaped vessel, + *-formis*, *< forma*, shape.] 1 In *bot*, having the form of a shallow cup or bowl. 2 Having the form of an acetabulum, sucker-shaped, cup-like, cotyloid.

acetabulum (as'e-tā-bū-lum), *n*, *pl* *acetabula* (-lā) [*L*, *< acetum*, vinegar. See *acetum*.] 1 In *Rom antiq* (a) A vinegar-cup, a small wide-mouthed vessel of earthenware or metal sometimes placed on the larger food dishes, in which vinegar or other condiment was served. (b) A dry or liquid measure, 0.677 of a liter. *Davies*, *q et Saqho*. (c) A similar cup or vessel used by jugglers in their feats. 2 In *anat* (a) The cavity of the os innominatum, or hip-bone, which receives the head of the femur, the cotyle, or cotyloid cavity formed at the junction of the ilium, ischium, and pubis. See cuts under *sacrum*, *quater*, *innominate*. (b) A cotyloid on lobe of the placenta of ruminating animals. (c) In insects, the socket of the trunk in which the leg is inserted. (d) A cup-like sucker such as those with which the arms of the cuttlefish and other dibranchiate cephalopodous mollusks are provided. See cut under *Sepia*. (e) A sessile or pedunculate sucker-like organ on the ventral surface of certain entozoa. 3 In *bot* (a) The cup- or saucer-like fructification of many lichens. (b) The receptacle of certain fungi. 4 In *music*, an ancient instrument, made either of earthenware or of metal, used like a kettledrum or struck against another acetabulum after the manner of cymbals.

Acetabulum (the two small vessels shown resting on the large dish).

acetal (as'e-tāl), *n* [*< acet-* + *al* (*alcohol*)] A colorless mobile liquid, $C_2H_5O_2$, with an ether-like odor, produced by the imperfect oxidation of alcohol, under the influence of platinum black.

acetamid, **acetamide** (as'e-tā-mīd or -mīd, or as'e-tā-mīd or -mīd), *n* [*< acet-* + *amid*] A white crystalline solid, CH_3CONH_2 , produced by distilling ammonium acetate, or by heating ethyl acetate with strong aqueous ammonia. It combines with both acids and metals to form unstable compounds.

acetanilide (a-set-an'ī-līd), *n*. [*< acet-* + *anilide*] A substance, $C_6H_5NHCO_2H$, formed by heating aniline and glacial acetic acid for several hours, or by the action of acetyl chloride or acetic anhydride on aniline. *Forbes*.

acetari (as'e-tā-rī), *n* [*< L acetaria*. See *acetaria*.] A dish of raw herbs with vinegar, a salad.

acetarious (as'e-tā-rī-us), *a* [*< L* **acetarius*, *adj*, found only in neut. pl. *acetaria*, as noun *acetariary*.] 1 Containing acetary, as certain fruits. 2 Used in salads, as lettuce, mustard, cress, endive, etc.

acetary (as'e-tā-rī), *n* [*< L acetarius* (see *hokera*, herbs), herbs prepared with vinegar and oil, salad, neut. pl. of **acetarius*, *< acetum*, vinegar. See *acetum*. Cf *It acetario*, a salad.] An acid pulpy substance in certain fruits, as the pear, enclosed in a congeries of small calcareous bodies toward the base of the fruit. *Chauv.*

acetate (as'e-tāt), *n* [= *F* *acétate* = *Sp* *Pg* *aceto*, *< NL* *acetatum*, *< L* *acetum*, vinegar. See *acetum* and *-ate*.] In *chem*, a salt formed by the union of acetic acid with a base.

acetated (as'e-tā-ted), *p a* [As if *pp* of **acetat*, *v*.] Combined with acetic acid.

acetication (as'e-tī-shon), *n* [As if *< *aceticate*, *v*.] Same as *acetylation*.

acetic (as'e-tīk or as'e-tīk), *a* [= *F* *acétique* = *Sp* *Pg* *aceto*, *< NL* *aceticus*, *< L* *acetum*, vinegar. See *acetum*.] Having the properties of vinegar, sour. — **Acetic acid**, $C_2H_4O_2$, a colorless liquid with a strongly acid and pungent smell and taste. In the arts it is chiefly prepared by the oxidation of alcohol (acetic fermentation) and by the dry distillation of wood. It is present in vinegar in a dilute and impure form. In its pure state, at temperatures below 62 F., it is a crystalline solid, and is known as *glacial* or *crystalline acetic acid*.

Acetic anhydride, $(C_2H_3O)_2$, a colorless mobile liquid with an odor like that of acetic acid but more irritating. On standing in contact with water it is gradually converted into acetic acid. Also called *acetic acid*. — **Acetic ethers**, compounds consisting of acetates of alcohol radicals. Common acetic ether is a limpid mobile liquid having a penetrating, refreshing smell, and a pleasant burning taste. It is used in medicine and as a flavoring ingredient in the poorer classes of wine. It is prepared by distilling a mixture of alcohol oil of vitriol, and sodium acetate. — **Acetic ferment**, a microscopic fungus (*Mycoderma aceti* of Pasteur) belonging to the group of micro bacteria which is the agent in the production of vinegar in wine. *Idet* etc. by the oxidation of alcohol.

aceticidin (as'e-tī-dīn), *n* [*< acet-* + *-id* + *-in*.] Same as *aceticum*.

aceticification (as'e-tī-fī-kā-shon), *n* [*< acetic* + *-fication*.] The act or process of aceticizing or becoming acetic, conversion into vinegar.

Chemical aceticification, the conversion of wine, beer, cider and other alcoholic fluids into vinegar. It has been shown to depend upon the presence of a minute fungus (*Mycoderma aceti* of Pasteur), which derives its food from the albuminous and mineral matter present in the liquor, it is very rapidly developed, and, absorbing the oxygen of the air, transmits it to the alcohol, which by oxidation is transformed into vinegar. See *Fermentation*.

aceticifer (as'e-tī-fēr), *n* An apparatus for hastening the acetication of fermented liquors by the exposure of large surfaces to the air. The liquor enters the top of a cask or vat containing layers of shavings or brushwood by which it is divided and distributed, and as it trickles downward, comes into intimate contact with air which is admitted through perforations in the sides of the vat.

aceticify (as'e-tī-fī), *v*, *pret* and *pp* *aceticified*, *ppr* *aceticifying*. [*< L* *aceticum*, vinegar, + *E* *-fy*, make.] *I. trans* To convert into vinegar, make aceticous.

II. intrans To become aceticous, be converted into vinegar.

acetimeter, **acetometer** (as'e-tīm'e-tēr, -tōm'e-tēr), *n* [= *F* *acétimètre* = *Pg* *acetometro*, *< L* *acetum*, vinegar, + (*Gr* *μέτρος*, a measure)] An instrument for ascertaining the specific gravity of vinegar or acetic acid.

acetimetrical (as'e-tī-met'ri-kal), *a* [*< *acetimetrie* (*< acetimeter*) + *-al*.] Of or pertaining to acetimetry.

The acetimetrical method employed by the Excise.

acetimetry (as'e-tīm'e-trī), *n* The act or process of ascertaining the specific gravity of vinegar or acetic acid.

aceticin (as'e-tīn), *n* [*< acet-* + *-in*.] A compound obtained by the union of one molecule of glycerin with one, two, or three molecules of acetic acid. The aceticins may also be regarded as glycerin in which one, two or three atoms of hydrogen are replaced by acetyl. They include monoaceticin ($C_3H_7O_4$), diaceticin or aceticidin ($C_7H_{13}O_5$), and triaceticin ($C_{11}H_{19}O_6$). *Watts*.

aceto- A prefix to names of chemical compounds, signifying the presence of acetic acid or acetyl radical.

aceto-gelatin (as'e-tō-jel'a-tīn), *a* Containing acetic acid and gelatin. — **Aceto-gelatin emulsion**, an emulsion formed of pyroxilin, acetic acid, alcohol, and gelatin used for coating certain photographic plates.

acetometer, n. See *aceticimeter*

acetone (as'e-tōn), *n.* [*acet-ic* + *-one*.] 1 A limpid mobile liquid, (CH₃)₂CO, with an agreeable odor and burning taste, produced by the destructive distillation of acetates. It is procured on a large scale from the aqueous liquid obtained in the dry distillation of wood.

2 The general name of a class of compounds which may be regarded as consisting of two alcoholic radicals united by the group CO, or as aldehydes in which hydrogen of the group COH has been replaced by an alcoholic radical.

acetone (as'e-tōn), *n.* [*NL*, < *E* *acetone* + *Gr* *alpa*, blood.] In *pathol.*, a diseased condition characterized by the presence of acetone in the blood. It results from various causes and may be a symptom of various diseases. Also spelled *acetone*.

acetonic (as'e-ton'ik), *a* Pertaining to or derived from acetone.

acetose (as'e-tōs), *a* Same as *acetous*, 1

aceticity (as'e-tis'i-ti), *n.* [= *F* *acéticité* = *Sp* *aceticidad* = *It* *aceticità*, < *NL* as if **aceticus* (< *Gr* *aceticus*, < *acetous* and *-ity*)] The state or quality of being acetic or sour, acidity, sourness, tartness

The juice or pulpe of Tamarinds hath a great aceticity
Woodall, Surgeon's Mat., p. 175

aceticus (as'e-tus or as'e-tus), *a* [= *F* *aceticus* = *Sp* *acético*, < *NL* *aceticus*, < *L* *aceticus*, vinegary see *aceticum*] 1 Having a sour taste, vinegary. Boyle. Also written *acetic*.

2 Of or pertaining to vinegar, causing or connected with acidification. **Acetic acid**, a term formerly applied to impure and dilute acetic acid, under the notion that it was composed of carbon and hydrogen in the same proportions as in acetic acid but with less oxygen. It is now known that no such acid exists so that this term has fallen into disuse. **Acetic fermentation**, the process by which alcoholic liquors as beer or wine, yield acetic acid by oxidation. See *fermentation*.

aceticum (a-s'e-tum), *n.* [*L*, vinegar, in form pp neut. *aceticum*, see *vinum*, sour wine] of *acetic*, be sour, akin to *acer*, sharp, sour. See *acid* and *acrid*. Hence (from *aceticum*, not from neut. adj. *aceticum*) Goth *akut* = *AS* *æcid*, *æcid* = *OS* *acid* = *OD* *acid*, *acid*, *D* *acid*, *acid* = *LG* *acid* = *OHG* *ezih*, *MHG* *ezich*, *G* *essig* = *Dan* *eddike* (< *Ice* *edil*) = *Sw* *ättika*, vinegary.] Vinegar (which see)

acetyl (as'e-til), *n.* [*acet-ic* + *-yl*, < (*Gr* *acet-*, matter, substance)] A univalent radical supposed to exist in acetic acid and its derivatives. Aldehyde may be regarded as the hydride, and acetic acid as the hydrate, of acetyl.

acetylene (a-s'e-ti-lēn or as'e-ti-lēn), *n.* [*acet-yl* + *-ene*] A colorless endothermic gas, C₂H₂, having a characteristic disagreeable odor and burning with a luminous smoky flame. Illuminating gas contains a small amount of it and it is probably formed from other gaseous compounds during the combustion of illuminating gas. It is also formed from its elements, carbon and hydrogen, when the latter are passed between carbon points in an atmosphere of hydrogen and also by the imperfect combustion of illuminating gas and other hydrocarbons. It is prepared on a commercial scale by the decomposition of water with certain metallic carbides, calcium carbide being chiefly used for the purpose. At pressures of less than two atmospheres it is not explosive except by the action of fulminant. Under greater pressure it explodes at low red heat with a violence nearly equal to that of gunpowder. With certain metals and metallic salts it forms explosive compounds. The acetylene series of hydrocarbons has the general formula (C₂H)_n, it includes acetylene (C₂H₂) propyne (C₃H₄), butyne (C₄H₆), and pentyne (C₅H₈).

acetylic (as'e-til'ik), *a* Of or pertaining to acetyl.

acetylation (as'e-til-i-zā'shon), *n.* [*acet-yl* + *-ation*] In *chem.*, the process of combining or causing to combine with the radical acetyl or with acetic acid.

ach¹, *n.* Same as *ache²*

ach² (ach), *n.* [*F* *ach*, < *Gr* *ak*, gigantic swallow-wort, a sprout of sugar-cane.] An East Indian name of several species of plants of the rubiacious genus *Morinda*.

Achaean, a and *n.* See *Achæan*

Achæmenian (ak'e-mē-ni-an), *a* [*L* *Achæmenius*, *n.*, < *Gr* *Ἀχαιμένης*, a Persian king, ancestor of the *Achæmenides*, (< *Ἀχαιμένης*)] Pertaining or relating to the *Achæmenides*, an ancient royal family of Persia, historically beginning with Cyrus, about 558 B.C., and ending with the conquest of the Persian empire by Alexander the Great, 330 B.C.

achenium, n. See *achenium*.

achenocarp (a-kē-nō-kārp), *n.* [Irreg. < *Gr* *ach-*, priv. + *χαίρω*, gape, + *ἀκρόν*, fruit.] In *bot.*, any dry indehiscent fruit.

Achenodon (a-kē-nō-don), *n.* [*NL*, < *Gr* *ach-*, priv. + *χαίρω*, gape, + *ὀδόν* (< *δόν*) = *E* *tooth*.] A genus of fossil carnivorous mammals o

North America, having a squaline type of dentition, considered by Cope as referable to the family *Tritylodontidae*. There are several species, *A. masoni*, the type-species, was as large as a large bear. *F. D. Cope*, 1873.

Achæta (a-kē'tā), *n.* pl. [*NL*, neut. pl. of *achatus* see *achatus*] An ordinal name for geophyrenas without setæ, with a terminal mouth, dorsal anus, and the anterior region of the body retractile. It includes the families *Sipunculidae* and *Priapulidae*.

achæteous (a-kē'tus), *a* [*NL*, *achatus*, < (*Gr* *ach-*, priv. + *χαίρω*, have)] Having no setæ, not chaetiferous, specifically, pertaining to the *achata* (which see).

achage (ā'kāj), *n.* [*ache¹* + *-age*] The state or condition of having aches. [Rare]

The Pope could dispense with his Cardinale, and his achage, and his breakage, if that were all
Templeton, Queen Mary, 1. 1

Achaian (a-kā'yan) *a* and *n.* See *Ichæan*

achane (a-kā'nē), *n.* [*Gr* *αχάνη*] An ancient Persian measure for grain.

Acharinina (ak-a-rī-nī-na), *n.* pl. [*NL* for *acharina* (?), < *Icharnes*, a genus of fishes, < *Gr* *αχάρων* *αχάρων*, *αχάρων* a sea-fish.] In Günther's classification of fishes, the third subfamily group of his family *Nandidae*, having hidden pseudobranchiae or false gills, five ventral rays, and teeth on the palate. It is constituted for fresh water fishes from tropical America which properly belong to the genus *Cubilia* of the family *Cubiliidae*.

acharnement (a-sharn'ment), *n.* [*F*, < *acharnier*, give a taste of flesh (to dogs, etc.), refl. *acharnier*, thirst for blood, < *L* as if **acharnare*, < *ad*, to, + *caro* (carn-), flesh see *carnal*] Blood-thirstiness, as of wild beasts or of infuriated men. Ferocity, eagerness for slaughter. [Rare]

achate¹ (ak'āt), *n.* [*L*, *achates* see *agate*] An agate.

The crystall, jacinth achate ruby red
John Taylor

achate², *n.* [Assimilated form of *agate*, q. v.] See *agate*

Achatina (ak-a-tī-nā), *n.* [*NL*, < *L* *achates*, agate see *agate*] A genus of land-snails, of the family *Helicidae*. It is typified by the large, snail shells of Africa, and is distinguished by an inflated and abruptly truncate columella. The species of this genus which comprises some of the largest terrestrial mollusks live chiefly in water about trees; they are mostly African. The small species formerly referred to *Achatina* are little related to the genus. *Lamarck*, 1799. Also *Ichatium* (*Linn.*, 1807) and *Agathina* (*DeSimples*).

Achatinella (a-kat-i-nē-lā), *n.* [*NL*, dim. of *achatina*] A name used with various limits for a genus of *Helicidae* with shells of moderately small size, resembling those of *Achatina*. It has numerous representatives peculiar to the Sand and Islands. *W. Sarsenau*, 1928. The genus has also been named *Helicites*.

Achatinina (a-kat-i-nē-nā), *n.* pl. [*NL*, < *achatina* + *-ina*] A subfamily of land-snails, of the family *Helicidae*, distinguished from *Helicina* proper by the character of the lingual dentition, the usually sharp lip, truncate columella, swollen body-whorl, and elongate spire. The group includes the largest known pulmonates, some being 10 inches long. Most of the species are African, those of the genus *Achatina* are known as *agate shells*. See cut under *Achatina*.

achaturt, *n.* [Assimilated form of *acaturt*, *acatur* see *acatur*, *n.*] Same as *acatur*.

ache¹, *ake* (āk), *n.* [In this pronunciation prop. spelled *ake*, < *ML* *ake*, but formerly two pronunciations existed, āk and āch (ak and ach), the latter, prop. indicated by the spelling *ache*, representing ME *ache*, also spelled *che*, < *AS* *ice*, *n.*, *ache* (< *acian*, *v.*), the former representing ME *ake*, directly < *aken*, < *AS* *acan*, *ache*, a strong verb see *ache²*, < *Gr* *stark* and *starch*, both < *AS* *stear*. The anomalous modern spelling *ache*, with *ch* pron. *l*, has been supposed to rest upon the notion that the word is derived from the *Gr* *ἀχος*, pain, distress, but there is no connection between the two words, nor is there any with the interj. *ah* = *L* *ah* = *G* *ach* = *Dan* *ah*, *ak*.] Pain of some duration, in opposition to sudden twinges or spasmodic pain, a continued dull or heavy pain, as in toothache or earache.

Myself was lost,
Gone from me like an ache
Lowell, Under the Willows

[The old pronunciation of the noun (*ach*, formerly *ach*) led to a similar pronunciation of the verb. In the following couplet *ache*, *v.*, is made to rhyme with *patch*.
Or Gellia wore a velvet mastic patch
Upon her temples when no tooth did ache
Bp Hall, Satires, vi. 1

Thus pronounced, the plural of the noun and the third person singular of the verb were dissyllabic.

A coming shower your shooting corns presage,
Old aches thro' your hollow tooth will rage
Swift, City Shower

This pronunciation has been used, on the stage at least, even in the present century, being required by the meter in such passages as the following.

Th' rack thee with old cramp
Fill all thy bones with aches, make that your
Shak., Tempest, i. 2. 1

Syn. See *pain*, *n.*, and *agony*

ache², *ake* (āk), *v. t.*, pret. and pp. *ached*, *aked*, pp. *aching*, *aking* [In this pronunciation prop. spelled *ake*, the spelling *ache* prop. representing a different pronunciation (*ach*, formerly *ach*) in imitation of the noun see *ache¹*, *n.* < *ML* *achen*, *achen* (never **achen*), < *AS* *acan* (strong verb, pret. *ac*, pp. *acan*, like *acan*, *E* *shake*, and *tacan*, *I* *take*), *ache*, prob. cognate, notwithstanding the wide divergence of meaning, with *Ice* *ala* (strong verb, pret. *ok*, pp. *clum*), drive, move, = *L* *agere* = *Gr* *ἀγω*, drive see *act*, *agent*.] To suffer pain, have or be in pain, or in continued pain, be distressed physically as, his whole body ached.

ache³ (āch), *n.* [*ME* *ache*, < *OF* *ache*, "the herb smallage, *ache des jardins*, parsley" (< *Gr* *ἀχνη*, a species of *Euphorbia*, perhaps the sun-spurge (or parsley?)) Cf. *smallage*, *ice*, *small ache*] A name of garden-parsley, *Petroselinum sativum*.

Achean, Achæan (a-kē'an), *a* and *n.* [*L* *Achæus*, < *Gr* *Ἀχαιός*, belonging to *Agam.*, *Achæan*, *L* *ichæa*] 1 *a* Pertaining to Achæan (Achæan) in the Peloponnesus, to the Achæans (Achæans, Achæi, or Achæoi), or to the confederacy called the Achæan League. The Achæan League, originally a confederation for religious observances formed by the cities of Achæa on the abolition of monarchic government and the establishment of democracy. The league was gradually broken up by the Macedonians, but was renewed by the Achæans on a purely political basis about 250 B.C. when they threw off the Macedonian yoke, constituted an enlightened and purely federal republic, and for over a century stood as an efficient bulwark to the declining liberties of Greece.

2 *n.* An inhabitant of Achæa (Achæan), or one of the ancient Greek people (Achæoi) from whom that country took its name. The name Achæoi is in Homer used as a generic term for all the Greeks, but was later applied to the most important tribes of castles in Peloponnesus and was finally restricted, after the Dorian conquest, to the inhabitants of the region on the gulf of Corinth in the northwestern part of the Peloponnesus.

Also spelled *Ichæan*, in closer imitation of the Greek.

achech, *n.* In *Egypt* *antig.*, a fabulous animal, half lion half bird, like the *Griffin*.

acheck¹, *n.* [*ME* *achen* (only in pp. *ached*, in passage quoted below), < *a-* (or *a-*) + *cheken* see *check*, *r.*] To check, stop, hinder.

acheket, *n.* See *achole*

acheless (ak'less), *a* [*ache¹* + *-less*] Without ache or throb.

achelort. A corrupt spelling of *ashlar*.

achene (a-kē'n), *n.* English form of *achenium*.

Also spelled *akene*.

achenia, *n.* Plural of *achenium*.

achenial (a-kē-ni-al), *a* Pertaining to an achenium.

achenium (a-kē-ni-um), *n.*, pl. *achenia* (-i)

[*NL*, also written *achenium*, irreg. (< *Gr* *ἀχαιον*, not gaping) < *a-* priv. + *χαίρω*, gape, akin to *E* *yau*, *q. v.*] 1 In *bot.*, a small, dry and hard, one-celled, one-seeded, indehiscent fruit, strictly, a single and free carpel of this character, as in the buttercup, avens, etc., but extended to all similar fruits resulting from a compound ovary, even when invested with an adnate calyx, as in the order *Compositæ*. Also written *achene*,

achorion (a-ko'ri-on), *n*; pl *achoria* (-i) [NL, < *achor*] The name given to one of the three principal dermatophytes, or epiphytes of the skin.

Fights dragon like, and does achieve as soon
As draw his sword Shak. Col. iv 7

It is the constituent of the crusts of favus (achor), and belongs to the group of fungoid plants denominated *Oidium*. It consists of spores, sporidia or tubes filled with spores, and empty branched tubes or mycelium *Eramus Wilson*.

Achras (ak'ras), *n* [L, <Gr *αχράς*, a kind of wild pear-tree] A genus of plants consisting of a single species, *A. Sapota*, of the natural order *Sapotaceae*. It is an evergreen tree, with thick shining leaves and milky juice, a native of tropical America and is often cultivated for its edible fruit the sapodilla or sapodilla plum. Its bark (Jamaica bark) is astringent and is used as a febrifuge the seeds are aperient and diuretic. 2 A genus of coleopterous insects *Waterhouse*, 1879.

achrocythemia, achrolocythemia (a-kroi-ō-si-thē-mi-ā), *n* [NL, <prop *achrocythemia*, <Gr *αχρος*, same as *αχρος*, colorless (see *achroous*), + *αίμα*, a cavity (<*κίεω*, contain), + *αίμα*, blood] In *pathol*, diminution of the normal amount of hemoglobin in the red blood-corpuscles. Also called *oligochromemia*.

achroite (ak'rō-it), *n* [Gr *αχρος*, colorless, + *ίτις*] A colorless variety of tourmalin found on the island of Elba.

achroma (a-krō'ma), *n* [NL, <Gr *α-priv* + *χρῶμα*, color see *achromatic*] In *pathol*, lack of pigment in the skin, achromasia.

achromasia (ak-ro-mā'zi-ā), *n* [NL, <Gr *αχρωμασία*, without color see *achromatic*] In *pathol*, lack of pigment in the skin.

achromatic (ak-rō-mat'ik), *a* [Gr *αχρωματός*, without color (<*α-priv*, without, + *χρῶμα*(*τ*), color), + *α-σ* see *chromatic*] Destitute of color, free from coloration, transmitting light without decomposing it into its constituent colors as, an *achromatic lens* or *telescope*.

The human eye is not *achromatic*. It suffers from chromatic aberration as well as from spherical aberration. *Tyndall, Light and Heat*, p. 72.

Achromatic condenser, an achromatic lens placed between the mirror and the stage of a microscope to concentrate the light upon the object when the light from the concave mirror is not sufficiently intense. — **Achromatic lens**, a lens sensibly free from chromatic aberration. It is usually composed of two lenses made of glass having different refractive and dispersive powers (for example, a double convex lens of crown glass [a] and a concave convex lens of flint glass [b]), the forms of which are so adjusted that one lens very nearly corrects the dispersion of the other without however, destroying its refraction. — **Achromatic telescope or microscope**, a telescope or microscope in which the chromatic aberration is prevented usually by means of an achromatic object glass.

achromatically (ak-rō-mat'ik-al-i), *adv* In an achromatic manner.

achromaticity (a-krō-ma-tis'i-ti), *n* [Gr *αχρωματία*, + *ιότης*] The state or quality of being achromatic, achromatism. See *equation*.

achromatin (a-krō-ma-tin), *n* [Gr *αχρωματός*, not colored, + *ίνη*] In *bot*, that portion of the basic substance of the nucleus of a vegetable-cell which, under the action of staining agents, becomes less highly colored than the rest.

achromatisation, achromatise, etc See *achromatization, achromatize, etc*.

achromatism (a-krō-ma-tizm), *n* [Gr *αχρωματισμός*, Cf *F achromatism*] The state or quality of being achromatic, absence of coloration as, to secure perfect *achromatism* in a telescope.

achromatization (a-krō-ma-ti-zā'shon), *n* The act of achromatizing or depriving of color. Also spelled *achromatisation*.

achromatize (a-krō-ma-tiz), *v t*, pret and pp *achromatized*, ppr *achromatizing* [Gr *αχρωματίζω*, as if <Gr *α-priv* + *χρωματίζω*, to color, < *χρῶμα*(*τ*), color] To render achromatic, deprive of color, or of the power of transmitting colored light. Also spelled *achromatise*.

For two kinds of light a flint glass prism may be achromatized by a second prism of crown glass. *A. Danell, Prin of Physics*, p. 480.

achromatopsis (a-krō-ma-top'si-si), *n* [Gr *α-priv* + *χρῶμα*(*τ*), color, + *ὄψις*, sight, < *ὀψ*, the eye, face see *opte*] Color-blindness, or inability to see or distinguish colors. Also called *acrotachromacy*.

achromatopsia (a-krō-ma-top-si), *n* Same as *achromatopsis*.

achromatosis (a-krō-ma-tō'sis), *n* [NL, <Gr *αχρωματός*, without color, + *οσις*] A name applied to diseases characterized by a lack of pigment in integumental structures, as albinism, vitiligo, or canities.

achromatous (a-krō-ma-tus), *a* [Gr *αχρωματός*, without color see *achromatic*] Without color, of a lighter color than normal as, *achromatous spots*.

achromophilous (a-krō-mof'i-lus), *a* [Gr *α-priv* (a-18) + *chromophilous*] In *embryol*, not chromophilous (which see) See *extract*.

The substance of the ovum [of *Asaria*] is also remarkably differentiated,—that of the polar disk alone exhibiting a vertical striation and differentiating into two layers superficial and subequatorial (termed *achromophilous* and *chromophilous* respectively) *Lucas, Brit N*, 117.

achromous (a-krō-mus), *a* [Gr *α-priv* + *χρῶμα*, color] Colorless, without coloring matter.

achronic, achronical (a-kron'ik, -i-k l), *a* An erroneous spelling of *achronic* *achronical*.

achroödextrine (ak'rō-ō-dēks'trin), *n* [Gr *αχρος*, colorless (see *achroous*), + *δextrine*] Dextrine which is not colored by iodine contrasted with *erythrodextrine*.

ach-root (ach'rot), *n* [Gr *αχ2* + *root*] The root of *Morinda tinctoria*, used in India as a dye. See *ach2*.

achroous (ak'rō-us), *a* [Gr *αχρος*, also *αχρωος*, colorless, < *α-priv* + *χρῶμα*, color, < *α-priv* + *χρῶμα*, color] Colorless, achromatic.

achylous (a-ki'lus), *a* [Gr *αχλός*, < *α-priv* + *χλός*, chyle] Without chyle. *Syd Soc Lex*.

Achyrodon (a-ki'ro-don), *n* [NL, <Gr *αχρῶν*, pl *αχρῶν*, chaff, bran, husks, + *ὄδον* (*ὄδον*) = *E tooth*] A genus of fossil mammals from the Purbeck beds of England, having teeth of the insectivorous type, and more than eight molars and pre-molars. *Owen*, 1877.

acicle (as'ikl), *n* Same as *acicula*, 2. *Dana*, *Crustacea*, 1: 444.

acicula (a-sik'ū-lā), *n*, pl *acicular* (-lā) [L, a needle, a small pin, dim of *acus*, a needle, from same root as *acer*, sharp, *acus*, an edge, *acutus*, sharp, etc see *acid*, *acute*, *acerb*] 1 A needle, pin, or bodkin, of wood or bone, used by Roman women as a hair-pin. It was not smaller than an *acus* (which see), but of inferior material. — 2 A spine or prickle of an animal or plant. Also called *acule*. — 3 [cap] A name applied to several genera of gastropods, and retained for the representative genus of the family *Aciculidae*, inhabiting Europe. 1 *fusca* is the best-known form. — 4 [cap] A genus of worms.

acicula, n Plural of *aciculum*. **Aciculacea** (a-sik'ū-lā'sē-n), *n* pl [NL, < *Acicula* + *-acea*] A synonym of *Aciculida* (which see).

acicular (a-sik'ū-lār), *a* [NL, *acicularis*, < *Acicula*, a needle see *acicula*] Having the shape of a slender needle or stout bristle, hav-

ing a sharp point like a needle as, an *acicular prism*, like those of stibnite, in *acicular* bill, as that of a humming-bird. Other forms are *aciculat*, *aciculat*, *aciculiform*, and *aciculine*.

The silver salt crystallizes from its aqueous solution in small acicular prisms. *F. Frankland, Exper in Chem*, p. 30.

Acicular blamuth See *akimute*.

acicularly (a-sik'ū-lār-i), *adv* In an acicular manner, in the manner of needles or prickles.

aciculate, aciculat (a-sik'ū-lāt, -lā-ted), *a* [NL, *aciculatus*, < *Acicula* see *acicula*] Needle-shaped, acicular, aciculiform.

aciculi, n Plural of *aciculus*.

aciculid (a-sik'ū-lid), *n* A gastropod of the family *Aciculida*.

Aciculidae (as-i-kū'lī-dē), *n* pl [NL, < *Acicula*, q v, + *-ida*] A family of operculate pulmoniferous mollusks, represented by the European genus *Acicula* (which see) and the West Indian *Geometaria*. They have very small turriculate shells with few whorls and a thin operculum the outer lip plain or produced into a tongue and the eyes on the back of the head.

aciculiform (a-sik'ū-lī-fōrm), *a* [NL, *acicula*, needle, + *-formis*, < *forma*, form] Same as *acicular*.

aciculine (a-sik'ū-līn), *a* [NL, *aciculinus*, < *Acicula* see *acicula*] Same as *acicular*.

aciculum (a-sik'ū-lum), *n*, pl *acicula* (-lā) [NL, a neut form to *acicula*, q v] In *zool*, one of the slender sharp stylets which are em-

bedded in the parapodia of some annelids, as the *Polycheta*. The notopodial and the neuropodial divisions of the parapodia each carry one of these acicula. **aciculus** (a-sik'ū-lus), *n*, pl *aciculi* (-lī) [NL, a mass form of *acicula*, q v] In *bot*, a strong bristle.

acid (as'id), *a* and *n* [= *F acide* = *Sp Pq* It *acido*, < *L acidus*, sour, < *acere*, be sour (> *acetum*, q v), akin to *acer*, sharp, *acus*, edge, Gr *ακμῆ*, *E acme*, edge, etc, all from *√*ah*, be sharp, pierce] 1 *a* Sour, sharp, or biting to the taste, tasting like vinegar as, *acid fruits* or liquors. **Acid rock** See *acid*.

2 *n* [NL, *acidum*, neut of *L acidus*, a] Originally, a substance possessing a sour taste like that of vinegar, in modern chemical use, a name given to a large number of compounds which do not necessarily possess this property. It does not appear that very great importance was at any time attached to sourness as a characteristic of acids from a chemical point of view. The following properties are common to most acids: 1st solubility in water. 2d a taste (in some acids on account of their corrosive mass this property can be perceived only after dilution with a large quantity of water). 3d the power of turning vegetable blues to red. 4th the power of decomposing most carbonates and displacing the carbonic acid with effervescence. 5th the power of destroying more or less completely the characteristic properties of alkalis at the same time losing their own distinguishing characters, forming salts. In modern chemistry an acid may be defined a salt of hydrogen or it may be defined as a compound containing one or more atoms of hydrogen which become displaced by a metal or by a radical possessing to a certain extent metallic functions. An acid containing one such atom of hydrogen is said to be *monobasic* one containing two such atoms *bibasic* etc. Acids of a greater basicity than unity are frequently termed *polybasic* acids. When an acid contains oxygen its name is generally formed by adding the terminal *ic* either to the name of the element with which the oxygen is united or to an abbreviation of that name. Thus sulphur forms with oxygen sulphuric acid nitrogen nitric acid and phosphorus phosphoric acid. But it frequently happens that the same element forms two acids with oxygen and in this case the acid that contains the larger amount of oxygen receives the terminal syllable *ic* while that containing less oxygen is made to end in *ous*. Thus we have sulphurous, nitrous and phosphorous acid each containing a smaller proportion of oxygen than that necessary to form respectively sulphuric nitric and phosphoric acid. In some instances however the same element forms more than two acids with oxygen in which case the two Greek words *oxy* (*oxy*) under and *hyper* (*hyper*) over, are prefixed to the name of the acid. Thus an acid of sulphur containing less oxygen than sulphuric acid is termed hyposulphurous acid and another acid of the same element containing, in proportion to sulphur, more oxygen than sulphurous acid and less than sulphuric might be named either hyper-sulphurous or hypsulphuric acid but the latter term has been adopted. The prefix *per* is frequently substituted for *hyper*. **Acetic acid, fatty acid, nitric acid, etc** See these adjectives. — **Nordhausen acid**, brown fuming sulphuric acid, a solution of sulphur trioxide in sulphuric acid, used as a solvent of indigo, and at present in the manufacture of artificial alizarin. It is named from the place where it was first manufactured.

acid-green (as'id-grēn'), *n* A coloring matter, a sulphonic acid of various sorts of benzaldehyde-greens. It is one of the coal tar colors. It dyes a brighter color than the so called solid green. It is also called *Holzer's green*, and *light green S*. *Benedikt and Knecht Chem of Coal tar Colors*, p. 84.

acidic (a-sid'ik), *a* 1 Acid in *chem*, applied to the acid element, as silicic, in certain salts opposed to *basic*. — 2 Containing a large amount of the acid element as, the *acidic feldspars*, which contain 60 per cent or more of silica. — **Acidic (or acid) rock**, a crystalline rock which contains a relatively large amount of silica, through the presence of an acidic feldspar and sometimes also of free quartz, as a prominent constituent. For example trachyte is an acid or acidic rock, basalt, a basic rock.

acidiferous (as-i-dif'ē-rus), *a* [NL, *acidum*, acid, + *L ferre* = *L bear*, + *-ous*] Bearing, producing, or containing acids, or an acid. **Acidiferous mineral**, a mineral which consists of an earth combined with an acid, as calcium carbonate, aluminate, etc.

acidifiable (a-sid'i-fī-a-bl), *a* [Gr *acidify* + *-able*, = *F acidifiable*] Capable of being acidified, or of being converted into an acid.

acidific (as-i-dif'ik), *a* Producing acidity or an acid, acidifying. Said of the element (oxygen, sulphur, etc.) which in a binary compound is considered as uniting the basic and acidic elements. Thus in calcium silicate calcium is called the basic silicon the acidic, and oxygen the acidic element. *Dana*.

acidification (a-sid'i-fī-kū'shon), *n* [Gr *acidify*, = *F acidification* = *Sp acidificación* = *Pg acidificação*] The act or process of acidifying, or of changing into an acid.

Acidification is intended to break up, corrode, or carbonize the albuminiferous matters. *W. I. Carpenter, Soap etc*, p. 204.

acidifier (a-sid'i-fī-er), *n* One who or that which acidifies specifically, in *chem* that which has the property of imparting an acid quality. **acidify** (a-sid'i-fī), *v*, pret and pp *acidified*, ppr *acidifying* [Gr *acid* + *-fy* = *F acidifier* = *Pg acidificar*] 1 *trans* To make acid, con-

vert into an acid; render sour; sour, literally or figuratively

Such are the plights of Louvet, his thin existence all acidified with rage and preternatural insight of suspicion (Carbide, French Rev., III, 311-312)

II *intrans* To become acid or sour
acidimeter (as-i-dim'e-t'r), *n* [=Pg *acidimetrum*, <NL *acidim.*, <Gr *akros*, a measure] An instrument for determining the purity or strength of acids. See *acidimetry*

acidimetrical (as-i-dim'e-tri-kal), *a* Of or pertaining to acidimetry

The *acidimetrical* process is in every way similar to that practiced in alkalinimetry (Fre. Dict., I, 19)

acidimetry (as-i-dim'e-t'r-i), *n* [=Pg *acidimetria*, <NL *acidim.*, <Gr *akros*, a measure] The act or process of measuring the strength of acids. Specifically, the process of estimating the amount of acid in a liquid by finding exactly how much of a standard alkaline solution is required to neutralize a measured quantity of the given solution

acidity (a-sid'i-ti), *n* [=Fr *acidité* = It *acidità*, <L *acidula* (t), sourness, < *acidus*, sour; see *acid*] The quality of being acid or sour, sourness, tartness, sharpness to the taste

acid-magenta (as'id-ma-jen'ti), *n* A coal-tar color, a green metallic-looking powder giving a red color when dissolved in water. It is a mixture of the mono- and disulphonic acids of rosanilin. Also called *magenta S* and *rubine S*. Used for dyeing and for coloring waxes. *Benedikt and Kuecht*, Chem. of Coal tar (Colors), p. 36

acidness (as'id-nos), *n* Sourness, acidity

acidometer (as-i-dom'e-tor), *n* [Cf *acidimetry*] A form of hydrometer used to measure the strength of an acid

acid-pump (as'id-pump), *n* A glass pump used for drawing corrosive liquids from carboys and other vessels. It has valves and joints and is convertible into a siphon. A vacuum is created in it by means of an elastic rubber bulb, which controls its action without coming into contact with the acid

acidula (a-sid'u-le), *n* pl [L, fem pl (see *acidula*), waters of *acidulus*, see *acidulous*] A name formerly given to springs of cold mineral waters, from their sharp and pungent taste. N. J. D.

acidulate (a-sid'u-lat), *v* *t*, *pret* and *pp* *acidulated*, *pp* *acidulating* [Cf L as if **acidulatus*, pp of **acidulare*, < *acidulus*, somewhat sour; see *acidulous*] 1 To tincture with an acid, render somewhat acid or sourish

This latter flask is filled partly with mercury and partly with water *acidulated* with a tenth part of sulphuric acid (Science, III, 260)

2 Figuratively, to sour, as the mind, embitter, make cross or capricious

Persons were especially liable to diabolical possession when the intellect was impaired by disease and the temper *acidulated* by suffering (Locky, Rationalism, I, 10)

acidulicis (as-i-dul'sis), *a* [Conti of NL **acidulus*, <L *acidulus*, sour, acid, + *dulcis*, sweet; see *dulce*] Both sour and sweet

acidulent (a-sid'u-lent), *a* [Cf **acidulans*, pp of **acidula*, sour slightly, < *acidula*, slightly sour; <L *acidulus*, see *acidulous*] Somewhat acid or sour, tart, hence, peevish, as, "anxious acidulent face," Carlyle, French Rev., I, 14

acidulous (a-sid'u-lus), *a* [Cf **acidulus*, slightly sour, dim of *acidus*, sour; see *acid*] 1 Slightly sour, subacid, as cream of tartar, oranges, gooseberries, etc. 2 Figuratively, sour in feeling or expression, sharp, caustic, harsh

Acidulous enough to produce effervescence with alkalies (O. B. Holmes, Autocrat, iv)

It is beautiful therefore to find a woman George Eliot, darting utterly out of that mood of hate or even of acidulous satire in which Thackeray so often worked (Tanner, The Eng. Novel, p. 207)

acid-yellow (as'id-vel'o), *n* A coal-tar color, consisting of the sodium salts of the sulphonic acids of amido-azobenzene or aniline yellow. It is a yellow powder, easily soluble in water and is used for dyeing olive, moss green and brown. Also sometimes called *fast yellow*. *Benedikt and Kuecht*, Chem. of Coal tar (Colors), p. 18

acierage (as'i-rā-j), *n* [Cf **acurari*, < *acur* = Fr *acur* = Sp *acero*, steel, < ML *aciar*, *aciarum*, steel, < L *acus*, edge, sword-edge] The process of depositing a layer of iron on another metal by means of electrical action. Steel type and copper plates are sometimes treated in this way thus increasing their durability without injury to their artistic character. When thus coated with iron they are said to be steel faced

acierate (as'i-rā-tāt), *v* *t* To convert into steel
acieration (as-i-rā-shon), *n* [Cf *acur*, steel, + *-ation*] Conversion into steel, a word occasionally used by writers on the metallurgy of iron and steel

Withdrawing trial pieces from time to time and breaking them so as to ascertain to what depth the *acieration* has proceeded (Encyc. Brit., XIII, 342)

aciform (as'i-fōrm), *a* [Cf L *acus*, a needle, + *forma*, shape] Shaped like a needle

acillate, **acillated** (a-sil'i-lāt, -ā-ted), *a* [Cf Gr *akros*, a-18] + *ciliatus* see *cilia*] Not ciliated, having no cilia

Acilius (a-sil'i-us), *n* [NL, < L *Acilius*, a Roman name] A genus of water-beetles of the family *Dytiscidae*, containing species of moderate size, with ciliated hind tarsi and round tarsal disks in the male. *Acilius* is a European species. *A. fraternus* is a common New England insect, about 3/4 of an inch long, having the black portions of the elytra closely punctured upon a yellow surface

acinaceous (as-i-nā'shi-us), *a* [Cf L *acinus*, a berry, esp a grape, a grape-stone or kernel, + *-aceus*] Consisting of or full of kernels

acinaces (a-sin'a-sēs), *n* [L, < Gr *akavakh*, a short, straight sword, < Pers *ahank* ('ahanak), a short sword, < *ahan*, *ahan*, a sword, lit non, + dim term *-eh*, *-ak*, now applied only to ritual objects (< *-ch* to ritual objects)] A short, straight dagger, peculiar to the Medes and Persians. It seems to have been worn on the right side, but perhaps only when a longer weapon was worn on the left. Modern writers have recognized the acinaces in a dagger shown in sculptures at Persepolis, also in the dagger of the Mithra sacrificial groups

acinacifolious (a-sin'a-si-fō'li-us), *a* [Cf L *acinaces*, a short sword, + *folium*, leaf] Having acinaceiform leaves. N. J. D.

acinaciform (a-sin'a-si-fōrm), *a* [Cf L *acinaces*, a short, straight sword, taken to mean a similar, + *-formis*, < *forma*, shape] In bot, resembling a similar in shape as, an *acinaciform* leaf, one which has one edge convex and

thin, the other straight and thick, as in species of *Mesembryanthemum*, an *acinaciform* pool, as of some beans

acinarious (as-i-nā'ri-us), *a* [Cf L *acinarius*, pertaining to the grape, < *acinus*, the grape; see *acinus*] In bot, covered with little spherical stalked vesicles resembling grape-seeds, as in some algae

acinnesia (as-i-nō'si-us), *n* Same as *akinesia*

Acineta (as-i-nē'tā), *n* [NL, < Gr *akinetos*, motionless, < *a-* priv + *kinē*, move] 1 A genus of noble epiphytallous rotifers, from Central America, much prized as hothouse plants. 2 A genus of suctorial infusorian protozoans. See *Acinet* and *Acinet* *Phlebotomus*

Acinet (as-i-nē'tō), *n* pl [NL, see *Acineta*] An order of the class Infusoria (the Infusoria *Acinet* or *suctoria*), the adult members of which have no cilia and no proper mouth, and are non-locomotive. The body, which is fixed and stalked, is provided with radiating retractile suctorial

processes or tubular tentacles, having at their extremities a knob or disk-like sucker, through which nutrient matter is imbibed

The *Acinet* multiply by several methods. One of these consists in the development of ciliated embryos in the interior of the body. These embryos result from a separation of a portion of the endoplasm and its conversion into a globular or oval form which in some species is wholly covered with vibratile cilia while in others the cilia are confined to a zone around the middle of the embryo. The germ makes its escape by bursting through the body wall of its parent. After a short existence (sometimes limited to a few minutes) in the condition of a free swimmer, immotile, provided with an endoplasm and a contractile vacuole, but devoid of a mouth, the characteristic knobbed radiating processes make their appearance, the cilia vanish, and the animal passes into the *Acinet* state. Huxley, Anat. Invert., p. 94

acinetan (as-i-nē'tan), *n* One of the *Acineta* suctorial tentaculiferous infusorian

Acinetidae (as-i-nē'ti-dē), *n* pl [NL, < *Acineta* + *-ida*] A family constituting the order *Acinet*

The leading genus is *Acineta*
acinetiform (as-i-nē'ti-fōrm), *a* and *n* [Cf NL *Acineta* + L *-formis*, < *forma*, shape] 1. *a* Having the form of *Acineta*, resembling an acinetan in form

Balbiani asserts that the *acinetiform* embryos observed not only in Parametrium but in many other ciliated Infusoria are not embryos at all, but parasitic Acinet

II. *n* An infusorian animalcule resembling an acinetan, whether an embryonic stage of some ciliate infusorian or a member of the order *Acineta*. Also written *acinetiform*.

Acinetina (as'i-nē'ti-nā), *n* pl [NL, < *Acineta* + *-ina*] A group of infusorians with a single aperture, and elongate, non-vibratile cilia, originally established by Ehrenberg in 1838 as a division of his *Polygastrica* equivalent to *Acinet* (which see)

acini, *n* Plural of *acinus*

aciniform (us'i-ni-fōrm), *a* [Cf NL *aciniformis*, <L *acinus*, grape (see *acinus*), + *-formis*, < *forma*, shape] 1 Having the form of grapes, or being in clusters like grapes, acinose. 2. In anat, of a deep purplish tint, resembling a grape in color applied to one of the pigmentary layers of the iris, technically called the tunica aciniformis. See *uvula*

acinose (as'i-nos), *a* [Cf L *acinus*, like grapes, < *acinus*, a grape] 1 Resembling a grape or a bunch of grapes, consisting of granular concretions. 2 Specifically, in anat, consisting of acini. Applied to glands in which the duct enlarges at the distinctly glandular portion into a little spherical vesicle (acinus), or into a little sacule (lobule), lined with small, cuboidal epithelial cells (acini), or in which the duct branches and ends in more or less numerous lobuli, formed of acini. Acinose glands are distinguished from tubular glands

acinous (as'i-nus), *a* Same as *acinose*

acinus (as'i-nus), *n*, pl *acini* (-ni) [L, a berry, esp a grape, also a grape-stone, kernel] 1 In bot (a) One of the small diupelets or berries of an aggregate baccate fruit, as the blackberry, etc., or the contained stone or seed. See cut under *Rubus*. (b) A grape-stone. 2 In anat (a) Formerly, the smallest lobule of a gland. (b) Now, generally, the smallest sacular subdivision of an acinose gland, several of which subdivisions make up a lobule. Also called *alveolus*. (c) A lobule of the liver

-acious [Cf L *-āci-* (nom *-ar*, acc *-āci-*), > It *-aci*, Sp *-az*, Fr *-ace*], a suffix added to verbs to form adjectives expressing intensity of physical or mental action, as *aud-ac*, daring, *cap-ac*, holding much, *fall-ac*, deceitful, *loqu-ac*, talking much, *pugn-ac*, inclined to fight, etc., + *-ous* (Cf *-acy*, 3) A compound adjective termination of Latin origin, forming, from Latin verb-stems, adjectives expressing intensity of physical or mental action, as in *audacious*, daring, very bold, *capacious*, holding much, *fallacious*, deceitful, *loquacious*, talking much, *pugnacious*, inclined to fight, *mendacious*, ready at lying, *voracious*, very lively, *voracious*, eating much, etc. Such adjectives are accompanied by nouns in *-acity*, and the nouns rarely by verbs in *-acitate*, as, *capacious*, *capacity*, *capacitate*, etc.

Acipenser (as-i-pen'ser), *n* [L, also spelled *acipenser* and *acipenser* (> Gr *akiphsos*), the sturgeon, perhaps < **aci-* (= Gr *akis*), swift, + a form of *penna* (OL *perna*), a wing, same as *penna*, a wing, a fin (Cf *acipiter* and the etymology there suggested)] The typical genus of the family *Acipenseridae*, including all the

ordinary sturgeons (and with the shovel-nosed sturgeons, *Scapherhynchops*, the only other genus, composing the family), characterized by the flattened tapering snout, a spiracle over each eye, and 5 distinct rows of bony plates. The common sturgeon *A. sturio*, is found both in Europe and North America, it sometimes attains a length of 18 feet. The green sturgeon of the Pacific coast is *A. medius*. The European sterlet is *A. ruthenus*. The largest known species is the Russian sturgeon, the beluga, *huso*, or *hausen*, *A. huso*, sometimes attaining a length of 26 feet and a weight of 3000 pounds. *A. glandulatus* is a fourth example, known as the osseter. Also often spelled *Acospenser*

Acipenser (as-i-pen'se-réz), *n. pl.* [NL., pl. of *Acipenser*] An ordinal term suggested by Bonaparte, 1837, as a substitute for *Sturiones* or *Chondrostei* (which see)

acipenserid (as-i-pen'se-ríd), *n* One of the *Acipenseridae*, a sturgeon

Acipenseridae (as-i-pen'se-rí-dē), *n. pl.* [NL., < *Acipenser* + *-idae*] The sturgeons, a family of chondrosteous ganoid fishes, sometimes including only the genus *Acipenser*, sometimes also the genus *Scaphirhynchops*. The body is elongate, subcylindrical with 5 rows of bony bachelors, the snout is produced, subpatulate or conical, with the mouth on its lower surface, small, transverse, protractile, and toothless, there are 4 barbs in a transverse series on the lower side of the snout, the ventral fins have a single series of fulcra in front, and the dorsal and anal fins approximate to the caudal, which is heterocercal. See *Acipenser*.

Acipenserina (as-i-pen'se-rí-nē), *n. pl.* [NL., < *Acipenser* + *-ina*] A subfamily of *Acipenseridae*, typified by the genus *Acipenser*. By older ichthyologists it was made coequal with the family. Later it has been restricted to *Acipenseridae* with spiracles, subconical snout, and thick tail, and thus made to include only the true sturgeons.

acipenserine (as-i-pen'se-rín), *n* One of the *Acipenserina*

acipenseroid (as-i-pen'se-róid), *n* and *n. I. a* Having the characters of the *Acipenseridae*

II. n A fish of the family *Acipenseridae*, an acipenserid

Acipenseroidae (as-i-pen'se-róid-ē), *n. pl.* [NL.] Same as *Acipenseridae*

Acipenseroides (as-i-pen'se-róid-ē-i), *n. pl.* [*Acipenser* + *-oides*] A name used by some ichthyologists as a subordinal name in place of *Chondrostei*

acirurgy (as-i-rí-jí), *n* [*Gr* *akis*, a point, + *-surgya* (*-o-surgya*), in comp., working, < *iperv* = *E* work see *demyurgy* and *surgery*] Operative surgery

3. To own the genuineness of, own as binding or of legal force as, to *acknowledge* a deed

4. To admit or certify the receipt of, give information of the arrival of as, to *acknowledge* a letter or a remittance — To *acknowledge* a deed (or other instrument), in law, to avow before a proper officer or court that one has executed it for the purpose of having a certificate thereof appended which will qualify the instrument to be admitted in evidence or to record or both without further proof of genuineness. As often used the word implies not only the avowal of the party but also the procuring of the official certificate. Thus a deed said to have been *acknowledged* when it actually bears the certificate = *Syn.* *Acknowledge*, *admit*, *Confess* *Own* *Transmit*, *concede*, *allow*, *assent*, to *profess* take cognizance of. To *acknowledge* is to state one's knowledge of it may have a personal object as, he *acknowledged* her as his wife, as applied to acts, it often implies confession under external pressure. *Admit* has a similar reference to so limited or forced assent as, he *admitted* the charge, he *admitted* that his opponent was a good man. *Confess* implies the admission of that which is not creditable as wrong conduct, and belongs rather to specified things or particular transactions. He *acknowledged* the authorship of the book, he *admitted* the truth of the proposition, he *confessed* that he was guilty of the theft. *Confess* is the strongest of these words being applied to actions of more moment than *acknowledge*, *admit* or *own*. To *own* is a less formal act there is a tendency on account of its brevity, to apply the word to anything that a man takes home to himself. To *avow* is a bolder act generally performed in spite of adverse influences, and does not necessarily imply that the action or sentiment avowed is blameworthy. To *acknowledge* an error, *admit* a fact, *confess* a fault, *own* one's folly, *avow* a belief.

You must not only *acknowledge* to God that you are a sinner, but must particularly enumerate the kinds of sin whereof you know yourself guilty. Wake

acology (a-kol'ō-jī), *n*. [*a*³, Gr *ἀκος*, remedy, + *-λογία*, < *λέγειν*, speak see *-ology*] The doctrine of remedies, surgical and medical.

Acolothus (ak-ō-lō'thus), *n* [NL, prop *acolithus*, < Gr *ἀκόλιθος*, a follower see *acolyth*, *acolyte*.] A genus of moths belonging to the family *Zygænidæ*, founded by Clemen in 1862.

Acolothus americanus: a, larva; b, pupa; c, cocoon; d, moth; e, moth with outstretched wings

They are small and delicate and of somber colors. The larvae are somewhat hairy and feed gregariously undergoing transformation in some crevice within tough oval cocoons. They have a habit of following, one another in Indian file. *A. americanus* (now placed in *Hartmannia*) destroys grape leaves.

acolithus, *n* [*a*³, Gr *ἀκόλιθος*, *acolyth*, + *-ιθς* see *acolyte*] Same as *acolyte*.

acolytin (ak-ō-lī'tin), *n* [NL, *Aconitum* *lycoctonum*], the plant from which it is derived (see *Aconitum*), + *-in*²] An alkaloid derived from *Aconitum lycoctonum*, and identical with napellin.

acolyte (ak'ō-lī't), *n* [*a*³, ME *acolit*, *acolyt*, < OF *acolyte* = Sp *acolito* = Pg *acolyto* = It *accolito*, < ML *acolytus*, *acolutus*, *acolythus* (> E *acolyth*), *acolutus*, prop *acolithus*, an acolyte, < Gr *ἀκόλιθος*, a follower, an attendant, < *a-* copulative + *κόλιθος*, a way, a journey, from the same root as *κόλῳ*, set in motion, urge on, and *κείλειν*, command] 1 One who waits on a person, an attendant, an assistant.

With such chiefs, and with James and John as *acolytes*. *Mallet*

2 In the Rom Cath Ch, one ordained to the fourth and highest of the minor orders, ranking immediately below the subdeacon. See *orders*. His office is to serve those of the superior orders in the ministry of the altar, light the candles, prepare the wine and water, etc. The name is now commonly extended to the boys who exercise these offices without ordination.

3 In *astron*, an attendant or accompanying star or other heavenly body, a satellite.

But she (the moon) is the earth's nearest neighbor, and therefore conspicuous, her constant *acolyte* whose obsequious and rapid motions demand and compel attention. *New Princeton Rev.*, I 47

Sometimes written *acolyth*, and formerly also *acolithite*, *acolythe*, *acolythist*, *acolithist*.

acolyth, **acolythe** (ak'ō-lī'th, -lī'th), *n* [*a*³, ML *acolythus*, for *acolithus*, the correct form of *acolyth* see *acolyte*] See *acolyte*.

acolythate (a-kol'ī-tāt), *n* [*a*³, *acolyth* + *-atē*³] The state, office, or orders of an acolyte.

acolythical (ak-ō-lī'th-ī-kal), *a* [*a*³, *acolyth* + *-al*] Belonging or pertaining to an acolyte.

acolythist (a-kol'ī-tist), *n* Same as *acolyte*.

acomber, *v. t* See *acumber*.

Acorns (ak'ō-nis), *n* [NL, < Gr *ἀκν*, a sharp point (or *ἄκν*, a needle), + *-μν* = E *mouse*] A genus of rodents of the family *Muridae* and subfamily *Murina*, having sharp flattened spines in the fur. The skull and teeth are as in the genus *Mus*.

acon (ā-kon), *n* [*a*³, Gr *ἀκων*, a dart] A boat used for traveling over mud-beds. See *extract*.

Walton also invented the pousse pied or *acon*, a kind of boat which is still in use. The *acon* is composed of a plank of hard wood which constitutes the bottom and is called the sole. This plank is bent in the fore part in such a manner as to form a sort of prow. Three light planks, which are nailed together at the sides and back complete this simple boat. *F. P. Wright, Anim. Life*, p. 558

acondylous, **acondylose** (a-kon'di-lus, -lōs), *a* [*a*³, Gr *ἀκύνδυλος*, without knuckles or joints, < *ἀ-* priv + *κύνδυλος*, a knuckle, a joint see *a-lō*, *condyle*, and *-ous*, *-ose*] In *bot*, jointless.

aconella (ak-ō-nel'ā), *n* [NL, < *aconitum* + *-ella*] In *chem*, an organic base obtained from the root of *Aconitum Napellus*, closely resembling if not identical with narcotin.

aconellin (ak-ō-nel'in), *n* [*a*³, *aconella* + *-in*²] Same as *aconella*.

aconin, **aconine** (ak'ō-nin), *n*. [*a*³, *aconitum* + *-in*²] An organic base derived from aconitin, and probably identical with napellin.

aconitate (a-kon'ī-tāt), *n*. [*a*³, *aconite* + *-ate*¹] A salt formed by the union of aconitic acid with a base.

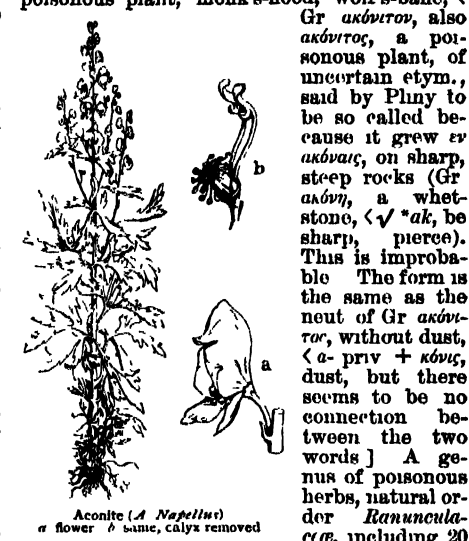

aconite (ak'ō-nī't), *n*. [= F. *aconit* = Sp Pg. *aconito*, < L. *aconitum* see *Aconitum*.] The plant wolf's-bane or monk's-hood, *Aconitum Napellus*. It is used in medicine, especially in cases of fever and neuralgia. See *Aconitum*. *Nepal* *aconite* (consists of the roots of *A. ferox* and probably other species indigenous in the Himalayas, it is also called *bukh*, *bush*, and *bisk*. *N. inter* *aconite* is a ramunculeous plant, *Eranthis hiemalis*, a native of Italy, and one of the earliest spring flowers.

aconitia (ak-ō-nī'tī), *n*. [NL, < L. *aconitum*] Same as *aconitin*.

aconitic (ak-ō-nī'tik), *a*. Of or pertaining to aconite. **Aconitic acid**, $C_6H_8O_6$, a tribasic acid found combined with lime in some species of the genus *Aconitum* and in a few other plants. It is also obtained by the dry distillation of citric acid. Also called *equisetioic acid*. See *achillea* *acid*, under *achillea*.

aconitin, **aconitine** (a-kon'ī-tin), *n* [*a*³, *aconite* + *-in*²] A highly poisonous narcotic alkaloid, $C_{30}H_{47}NO_7$, obtained from the roots and leaves of several species of *Aconitum*. It forms white powdery grains, or a compact, vitreous, transparent mass, is bitter, acrid, and very soluble in alcohol. It is an important remedy in neuralgia, especially of the fifth cranial nerve. Also called *aconitia* and *aconitina*.

Aconitum (ak-ō-nī'tum), *n*. [L. *aconitum*, a poisonous plant, monk's-hood, wolf's-bane, < Gr *ἀκόνιτον*, also *ἀκόνιτος*, a poisonous plant, of uncertain etym., said by Pliny to be so called because it grew *ev* *ἀκόνιτι*, on sharp, steep rocks (Gr *ἀκόνις*, a whetstone, < *√* *ak*, be sharp, pierce). This is improbable. The form is the same as the neut of Gr *ἀκόνιτω*, without dust, < *a-* priv + *κόνις*, dust, but there seems to be no connection between the two words.] A genus of poisonous herbs, natural order *Ranunculaceæ*, including 20

species, natives of the mountains of the northern hemisphere. They have very irregular, showy flowers, and are often found in cultivation, as the common monk's hood (*A. Napellus*) and wolf's bane (*A. lycoctonum*). The roots and leaves chiefly of *A. Napellus*, are used medicinally. See *aconitin*. The bark of *Nepal*, used in poisoning arrows and also as a source of aconitin, is derived mainly from *A. ferox*.

aconitia, *n* Plural of *aconitum*.

Aconitias (a-kon'ti-as), *n* [L, < Gr *ἀκοντίας*, a quick-darting serpent, a meteor, < *ἀκων*, a javelin, dart, < *akē*, a point] The leading genus of the family *Aconitidæ* (which see).

aconitid (a-kon'ti-id), *n* A lizard of the family *Aconitidæ*.

Aconitidæ, **Aconitadæ** (ak-on-ti'i-dē, -a-dē), *n*. pl [NL, < *Aconitias* + *-adæ*, or *-adæ*] A family of saurian or lacertilian reptiles of the scincoid group, related to the *Anguidæ*, the family to which the well-known slow-worm of Europe belongs. They are weak, timid, and perfectly harmless lizards, resembling snakes in consequence of the apparent absence of limbs. *Aconitias* is the leading genus, giving name to the family. There are numerous species, inhabiting chiefly the warmer or dryer parts of the old world. *Aconitias meleagris* is sometimes called the dart snake, from its manner of darting upon its prey.

aconitium (a-kon'shūm), *n*, pl *aconitia* (-shī) [NL, < Gr *ἀκόνιτιον*, a small dart, dim of *ἀκων*

Acopa (a-kō-pā), *n pl* [NL, <Gr *a-* priv + *cop*, a handle, the handle of an oar, an oar] 1. A primo division of the *Tunicata* or *Ascidia*, in which the ascidians proper are distinguished collectively from the *Copelata* or *Appendicularia*. See extract. Compare cuts under *Ascidia* and *Appendicularia*

These two classes were formerly separated according to whether they had or had not a propelling tail, as the names of the classes showed. I have retained the nomenclature without giving an importance to this character which does not belong to it, the larvae of many *Acopa* have the directive organ. A much greater difference between the two divisions is to be found in the characters of their spiracles. In the *Copelata* these open to the exterior. In the *Acopa* they open into a cavity, which is formed from a part of the rudimentary spiracle of the *Copelata*. Gegenbaur, Comp Anat (trans), p 389

The fruit of the oak, a one-celled, one-seeded, coriaceous, rounded or elongated nut, the base of which is surrounded by an indurated scaly cup. Acorns have been used for food, and are still eaten in various countries. The sweet acorn is the fruit of the *Quercus Ballota* of northwestern Africa, and is quite palatable, as are also several American species. All are excellent food for swine

acorn-moth (ā-kōrn-moth), *n*. A guest moth, described as *Holcocera glandulella*, but subsequently referred to the genus *Blatobasis*, belonging to the *Tineida*. Its color is ash gray with two distinct spots near the middle of the fore wings and a transverse pale stripe across the hind third. Its larva is grayish white with a light brown head and cervical and caudal shields, and is commonly met with in insect feeding chiefly on those acorns that have been occupied by the acorn weevil. See cut in preceding column

acorn-oil (ā-kōrn-oil), *n*. A volatile oil, of buttery consistence and pungent odor, obtained from the acorns of *Quercus robur*

acorn-shell (ā-kōrn-shel), *n* 1. The shell of the acorn.—2. One of the carapaces of the genus *Balanus*, a bivalve called by this name from a supposed resemblance of some of the species to acorns. See *Balanus* and *Cirripedia*

acorn-weevil (ā-kōrn-wēv'el), *n*. The popular name for certain species of the curculionid genus *Balaninus*, as *B. uniformis* (Le Conte), *B. rectus* (Say), and *B. quercus* (Horn), which live in the larval state within acorns. The females possess extremely long and slender beaks, by means of which they pierce the rind of the acorn and push an egg into the interior. The larva is a light gray grub of elongate curved shape, not differing essentially from other curculionid larvae. The affected acorn drops prematurely, and the full grown larva eats its way out to change to a pupa in the ground. See cut under *Balaninus*

acorn-worm (ā-kōrn-wērn), *n*. A name given to the *Balanoglossus*, the type and sole member of the order *Enteropneusta* so called from the acorn-like shape of the anterior end of its body. See *Balanoglossus*, *Enteropneusta*

(Law L.) acria, arum*, from *Tent*] 1 Originally, an open plowed or sowed field. This signification was gradually lost after the acre was made a definite measure of surface. Still used in the plural to denote fields or land in general*

My bosky *acres*, and my unshrubbed down. Shak., *Tempest*, IV, 1

Over whom *acres* walked those blessed feet. Shak., *I. Hen. IV*, I, 1

2 A superficial measure of land, usually stated to be 40 poles in length by 4 in breadth, but 160 perches (= 4840 square yards, or 43,560 square feet) make an acre, however shaped. An acre, as a specific quantity of land, was reckoned in England as much as a yoke of oxen could plow in a day till the establishment of a definite measure by laws of the thirteenth century and later. This is known in Great Britain and the United States as the statute acre, to distinguish it from the customary acres still in use to some extent in Scotland, Ireland, and Wales. The Scotch acre is larger than the statute acre as it contains 6150.4 square yards, 48 Scotch acres being equal to 61 statute acres. The Irish acre is 7840 square yards, 100 Irish acres being nearly equivalent to 162 statute acres. In Wales different measures, the *crw*, the *stang*, the *padarn* are called *acres*. The true *crw* is 4320 square yards, the *stang* is 340. There is also the Cornish acre of 5700 square yards. Among the customary English acres are found measures of the following numbers of perches: 80 (of hops) 90 (of hops), 107, 110, 120 (shut acre), 130, 132, 144, 144 (forest acre) 200 (for copyhold land in Lincolnshire) 212, 250 (of wood). The Lancashire acre has 2908 square yards, the Westmoreland acre 6700 square yards, the Cheshire acre 10,240 square yards. Often abbreviated to *A.* or *a.*

The *acre* was in many cases a small field simply *i. e.*, an *ager*, and a hundred and twenty small fields were called a hide. A standard *acre* was hardly established until the thirteenth century.

D. W. Ross, *German Landholding*, Notes, p. 131

II. n One of the acridia

Acrididæ, Acridiidae (a-krid'i-dē, ak-ri-dī'i-dē), *n pl* [*NL*, *<* *Acridium*, *acridium*, + *-ida*] A family of saltatorial orthopterous insects, including the locusts or short-horned grasshoppers, having the hind legs fitted by enlargement of the femora for leaping related to the crickets (*Gryllidæ*) and to the long-horned grasshoppers and katydids (*Locustidæ*)

In *Gryllidæ* and *Locustidæ* the antennæ are long and setaceous. In *Acrididæ* they are short and stout, rarely clavate. The ovipositor in the two former families is often very large, in *Acrididæ* there is no ovipositor. *Pascoe*, *Zool Class*, 1880, p 115

acridii (a-krid'i-i), *n pl* [*NL*, masc pl] Same as *acridia*

acridity (a-krid'i-ti), *n* [*<* *acrid* + *-ity*, after *acrid*] The quality of being acrid, pungency conjoined with bitterness and corrosive irritation, acridness

Acridium (a-krid'i-um), *n* [*NL*, also written *improp Acridium*, *<* Gr *ἀκρίδιον*, dim of *ἀκρίς*, a locust *see Acris*] A leading genus of grasshoppers, giving name to the family *Acrididæ*

acridly (ak'rid-li), *adv* With sharp or irritating bitterness

acridness (ak'rid-nes), *n* The quality of being acrid or pungent

acridophagus (ak-ri-dof'a-gus), *n*, *pl acridophagi* (-ji) [*NL*, *<* Gr *ἀκρίδωφάγος*, *<* *ἀκρίς* (ak'rid), a locust (*see Acris*), + *φάγειν*, eat] A locust-eater

They are still *acridophagi*, and even the citizens far prefer a dish of locusts to the "fasikh" which at as anchovies, saidings, and herrings in Egypt. *R F Burton*, *El Medinah*, p 343

Acridotheres (ak'ri-dō-thē'rēs), *n* [*NL* (Vieillot, 1816), *<* Gr *ἀκρίς* (ak'rid), a locust, + *θηρ*, hunt or chase, *<* *θηρ*, a hunting, the chase] A notable genus of old-world sturnoid passerine birds, founded by Vieillot in 1816, the minus or minus-birds, several species of which are among the commonest and most characteristic birds of India and zoologically related countries. They are bilious and are allied to *Tringa*. *A. tristis* is a leading example. The species have often been referred to the Australian genus *Trachurus* (which see). *Crithidia* is an erroneous form of *Acridotheres* apparently originating with Cuvier

acrimonious (ak-ri-mō'ni-us), *a* [= *F acrimonia* = *Pg acrimonioso*, *<* *ML acrimoniosus*, *<* *L acrimonia*, acrimony] 1 Abounding in acrimony or acridness, acrid, corrosive [Now rare]

If gall cannot be rendered acrimonious and bitter of itself. *Harvey*, *Consumption*

2 Figuratively, severe, bitter, virulent, caustic, stinging applied to language, temper, etc.

The factions have the cunning to say, that the bitterness of their spirit is owing to the harsh and acrimonious treatment they receive. *Ames*, *Works*, II 113

If we knew the man, we should see that to return an acrimonious answer would be the most ridiculous of all possible modes of retort. *Whipple*, *1ss* and *Rev* I 13

acrimoniously (ak-ri-mō'ni-us-li), *adv* In an acrimonious manner, sharply, bitterly, pungently

acrimoniousness (ak-ri-mō'ni-us-nes), *n* The state or quality of being acrimonious

acrimony (ak'ri-mō-m), *n* [= *F acrimonia* = *Sp* *Pg* *It acrimonia*, *<* *L acrimonia*, sharpness, pungency, austerity, *<* *acer* (*ac-*), sharp, pungent *see acid* and *acid*] 1 Acridity, harshness or extreme bitterness of taste, pungency, corrosiveness [Now rare]

Those milks [in certain plants] have all an acrimony, though one would think they should be lenitive. *Bacon*, *Nat Hist*, § 639

2 Figuratively, sharpness or severity of temper, bitterness of expression proceeding from anger, ill nature, or potulience, virulence

Acrimony of voice and gesture. *By Hackst*, *Life of Abp Williams*

In his official letters he expressed with great acrimony his contempt for the king's character and understanding. *Macaulay*, *Hist Eng*, xii

Acrimony of the humors, an imaginary acid change of the blood, lymph, etc., which by the humorists was conceived to cause many diseases. *Dunham*—**Syn. 2** *Acrimonia*, *Acriditas*, *Harshness*, *Severity*, *Partness*, *Sourness*, *Bitterness*, *Virulence*, *Rancor*, *Acerbity*, *Crabbedness*, *Intractability* (*see harshness*) These words express different degrees of severe feeling, language, or conduct their significance being determined largely by their derivation and primary use. *Tartarus* is the mildest term applying generally to language, it implies some wit or quickness of mind, and perhaps a willingness to display it. As *tartarus* is the subacid quality of mind, so *acrimony* is its acidity, it is a biting sharpness. It may or may not proceed from a true predominantly sourness as the Anglo-Saxon *foracrimony* with more suggestion of permanent quality—sourness of look or language proceeding from a sour nature. *Bitterness*, which is founded upon a kindred figure, is sourness with a touch of rancor. It is more positive and aggressive. *Sourness* and *bitterness* contain less malignity than *acrimony*. *Virulence* rises to a high degree of malignity, and *rancor* to such a height as almost to break down self-control, the whole nature is envenomed, rancid. These words are almost never applied to conduct, *acrimony* and *harshness*, being founded upon a different figure, are naturally and often so applied. They convey the idea of roughness to the touch. *Acridity* is the lighter of the two, it is often a roughness of manner, and may be the result of anger. It has a sharper edge than *harshness*. *Harshness* is the most applicable to conduct, demands, etc., of all the list, it may proceed from insensibility to others' feelings or

rights. *Severity* has a wide range of meaning, expressing often that which is justified or necessary, and often that which is harsh or hard, as applied to language or conduct. It is a weighty word. We may speak of *acrimony* in debate or of feeling, *acridity* of manner, *harshness* of conduct, language, requirements, terms, treatment, *severity* of censure, punishment, manner, *tartarous* of reply, *sourness* of aspect, *bitterness* of spirit, feeling, retort, *virulence* and *rancor* of feeling and language

It is well known in what terms of *acrimony* and personal hatred Swift attacked Dryden

The orators of the opposition declared against him with great animation and *acridity*. *Macaulay*, *Hist Eng*, v

He that by harshness of nature and arbitrariness of commands uses his children like servants is what they mean by a tyrant. *Sir W Temple*

Severity, gradually hardening and darkening into misanthropy, characterizes the works of Swift

The Dean (Swift), the author of all the mirth, preserves an inviolable gravity and even *sourness* of aspect. *Macaulay*, *Addison*

To express themselves with smartness against the errors of men, without bitterness against their persons. *Steele*, *Tatler*, No 242

No authors draw upon themselves more displeasure than those who deal in political matters, which is justly incurred, considering that spirit of rancor and virulence with which works of this nature abound. *Addison*

Thy hate to mingle in the filthy fray, Where the soul sours, and gradual rancor grows, Inhibits more from peevish day to day. *Thomson*, *Castle of Indolence*, l 17

Acris (ak'ris), *n* [*NL*, *<* Gr *ἀκρίς* (ak'rid), a locust (*L gryllus*)] A genus of tree-frogs of the family *Hylidæ*. *Acris gryllus*, a characteristic example, is common in the United States, its loud rattling pipe being heard everywhere in the spring. *Dumeril and Bibron*

acrisia (a-kris'i-ā), *n* [*NL*, *<* Gr *ἀκρίσια*, want of judgment, the undecided character of a disease, *<* *ἀκρίος*, undecided, undiscernible, *<* *ἀ-* priv + *κρίω*, separated, distinguished, *<* *κρίνω*, separate, distinguish, judge *see crisis* and *crisis*] A condition of disease such as to render prognosis impossible or unfavorable, absence of determinable or favorable symptoms

acrisy (ak'ri-si), *n* [*<* *acrisia*] 1 Same as *acrisia*—2 Injudiciousness [Rare]

Acrita (ak'ri-tā), *n pl* [*NL*, *<* Gr *ἀκρίτα*, neut pl of *ἀκρίτος*, undiscernible, indiscriminate *see acrisia*] A name originally proposed for that group of animals in which no distinct nervous system exists or is discernible. It thus included, besides all of the *Protozoa*, such as the *Amoebæ*, some of the *Polysyllæ*, certain *Alveolæ*, the *Polysyllæ*, etc. The name has been employed by different writers with varying latitude of significance, but is now disused, except as a (loose) synonym of *Protozoa* and other low forms of the *Evolution* *Acridia*, since it has been shown to apply to no natural group of animals. *See Crithidia*. Also incorrectly written *Acris*, after the French

acritan (ak'ri-tan), *a* [*See Acrita*] Of or belonging to the *Acrita*

acrite (ak'rit), *a* Same as *acritan*

acritical (a-krit'i-kal), *a* [*<* Gr *ἀ-* priv. + *κριτικός*, *Pg acritico*, not critical *<* Gr *ἀκρίτος*, under *acrisia*] In *pathol* (a) Having no crisis as, an *acritical abscess* (b) Giving no indications of a crisis as, *acritical symptoms*

acritochromacy (ak'ri-tō-kro'mā-si), *n* [*<* *acritochromatic* *see acry*] Inability to distinguish between colors, color-blindness, achromatopia

From imperfect observation and the difficulty experienced in communicating intelligently with the Fakimo, I was unable to determine whether *acritochromacy* existed among them to any great extent. *Ar. Cruise of the Corwin*, 1881, p 24

acritochromatic (ak'ri-tō-kro'mat'ik), *a* [*<* Gr *ἀκρίτος*, not distinguishing (*see acrisia*), + *χρῶμα* (-r-), color] Characterized by or affected with acritochromacy, unable to distinguish between colors

acritude (ak'ri-tūd), *n* [*L acritudo*, sharpness, *<* *acer*, sharp *see acrid*] An acid quality, bitter pungency, biting heat [Rare]

acrity (ak'ri-ti), *n* [*After F acrité*, *<* *L acritas* (-t-), *<* *acris*, sharp *see acrid*] Sharpness, keen severity, strictness

The acuity of prudence, and severity of judgment. *A. Gorges*, *ti of Bacon*, *De Sap Vet*, xviii

acro- [*L*, etc., *<* Gr *ἀκρο-*, combining form of *ἀκρος*, at the furthest point or end, terminal, extreme, highest, topmost, outermost, neut *ἀκρος*, the highest or furthest point, top, peak, summit, headland, end, extremity; fem *ἀκρη*, equiv to *ἀκρος*. Cf *ἀκρ*, a point, edge, and *see acid*, etc.] In *zool* and *bot*, an element of many compounds of Greek origin, referring to the top, tip, point, apex, summit, or edge of anything. In a few compounds *acro-* (*acr-*) improperly represents Latin *acer*, *acris*, sharp, pungent. as, *acronarcotic*, *acrolin*.

acroama (ak-rō-ā'mā), *n.*; *pl.* **acroamata** (-am-ā-tā). [*Gr* ἀκρόαμα, anything heard, recitation, < ἀκρόαομαι, hear, prob. akin to ἀλβω, hear, see *chiont.*] 1. Rhetorical declamation, as opposed to argument.

Facioti expanded the argument of Pacius into a special *Acroama*, but his eloquence was not more effective than the reasoning of his predecessors.

Sir W. Hamilton, Discussions, p. 153 (*N E D*)

2 Oral instruction designed for initiated disciples only, esoteric doctrine. See **acroamatic**. **acroamatic** (ak-rō-a-mat'ik), *a*. [*L.* *acroamaticus*, < *Gr* ἀκροατικός, designed for hearing only, < ἀκρόαμα(τ-), anything heard see *acroama*] Abstruse, pertaining to deep learning.

opposed to *esoteric*. Applied particularly to those writings of Aristotle (also termed *esoteric*) which possessed a strictly scientific content and form, as opposed to his exoteric writings or dialogues, which were of a more popular character. The former were addressed to "hearers" that is, were intended to be read to his disciples or were notes written down after his lectures, hence the epithet *acroamatic*. All the works of Aristotle which we possess, except a few fragments of his dialogues, belong to this class. See *esoteric*. An equivalent form is *acrotic*.

We read no *acroamatic* lectures.

Acroamatic proof or method, a scientific and strictly demonstrative proof or method.

acroamatical (ak-rō-a-mat'ik-al), *a*. Of an *acroamatic* or abstruse character, *acroamatic*.

Aristotle was wont to divide his lectures and readings into *acroamatic* and *exoteric*. *Hales, Golden Remains*.

acroamatics (ak-rō-a-mat'iks), *n. pl.* [*Pl* of *acroamatic* see -ics] Aristotle's *acroamatic* writings. See *acroamatic*. Also called *acrotics*.

acroasis (ak-rō-ā'sis), *n.* [*L.* < *Gr* ἀκροασίς, a hearing or lecture, < ἀκρόαομαι, hear see *acroama*] An oral discourse.

acrotic (ak-rō-at'ik), *a*. [*L.* *acroticus*, < *Gr* ἀκροτικός, of or for hearing, < ἀκροτής, a hearer, < ἀκρόαομαι, hear see *acroama*] Same as *acroamatic*.

acrotics (ak-rō-at'iks), *n. pl.* Same as *acroamatics*.

acrobasis (ak-rōb'a-sis), *n.* [*NL*, < *Gr* ἀκρον, the top or end, + βασίς, a going (cf *acrobat*)]

Exemplifications of *Acrobasis*. a, leaflets attacked by larva of *A. juglandis* (walnut case-worm); b, case of larva; c, wings of *A. nebulosa*; d, wings of *A. juglandis*; e, wings of *A. nebulosa*.

A genus of moths belonging to the *Phycida*, a family founded by Zeller in 1839. The larvae skeletonize leaves, forming for themselves silken tubes either straight or crumpled. *A. juglandis* (Le Baron), the

Apple-leaf Crumpler (*Acrobasis indigimella*). a, case, containing caterpillar; b, case in winter; c, head and thoracic joints of larva, enlarged; d, moth (the cross shows natural size).

walnut case-bearer, feeds upon walnut and hickory, fastening the leaves together and skeletonizing them from base to tip. *A. indigimella* (Zeller) is a common pest on apple trees and is known as the apple leaf crumpler.

acrobat (ak-rō-bat), *n.* [*F.* *acrobat* = *Sp.* *acrobato* = *Pg.* *It.* *acrobata* (cf *NL.* *Acrobates*),

< *Gr* ἀκροβάτωρ, walking on tiptoe, also going to the top, < ἀκρον, the highest point, top, summit, neut. of ἀκρος, highest, topmost, + βασις, verbal adj. from βαίνω, go, = *F.* *come*, *q* v.] 1 A rope-dancer, also, one who practises high vaulting, tumbling, or other feats of personal agility. — 2 A species of the genus *Acrobates*.

Acrobates (ak-rōb'at-ēz), *n.* [*NL*, < *Gr* as if *ἀκροβάτης, equiv. to ἀκροβάτωρ see *acrobat*] A genus or subgenus of marsupial quadrupeds of the family *Phalangeridae*, peculiar to Australia. It is related to *Petaurus*, and includes such pygmy possums as the opossum mouse, *Acrobates pygmaeus*, one of the most diminutive of marsupials, being hardly larger than a mouse. Like various other so-called flying quadrupeds, the opossum mouse is provided with a parachute. The genus was founded by Desmarest in 1820. Also written *Acrobata*.

Opossum mouse of New South Wales (*Acrobates pygmaeus*).

acrobatic (ak-rō-bat'ik), *a*. [= *F.* *acrobatique*, < *Gr* ἀκροβάτικος, fit for climbing, < ἀκροβάτωρ, see *acrobat*] Of or pertaining to an acrobat or his performances, as, *acrobatic* feats, *acrobatic* entertainments.

Made his pupil's brain manipulate the whole extraordinary catalogue of an American young lady's school curriculum, with *acrobatic* skill.

acrobatically (ak-rō-bat'ik-al-i), *adv.* In the manner of an acrobat, with *acrobatic* skill or dexterity.

acrobaticism (ak-rō-bat'iz-m), *n.* [*Gr* *acrobat* + -ism] The performance of *acrobatic* feats, the profession of an acrobat.

Acrobrya (ak-rōb'ri-a), *n. pl.* [*NL*, neut. *pl.* of *acrobryus* see *acrobryus* (cf *Ar. amphibrya*)] A term used by Endlicher as a class name for plants growing at the apex only, the higher cryptogams equivalent to *acrotyus*.

acrobryous (ak-rōb'ri-us), *a*. [*NL.* *acrobryus*, < *Gr* ἀκρον, at the end, + βρύοι, a flower.] In bot., growing at the apex only, of the nature of *Acrobrya*.

Acrocarpi (ak-rō-kar'pī), *n. pl.* [*NL*, *pl.* of *acrocarpus* see *acrocarpus*] In bot., a division of the mosses, containing the genera in which the capsule terminates the growth of a primary axis.

acrocarpus (ak-rō-kar'pus), *a*. [*NL.* *acrocarpus*, < *Gr* ἀκροκαρπύς, fruiting at the top, < ἀκρον, at the end or top, + καρπός, fruit.] In bot., having the fruit at the end or top of the primary axis. Applied to mosses.

The flower of mosses either terminate the growth of a primary axis (*Acrocarpus* mosses), or the flower is placed at the end of an axis of the second or third order (*Pleurocarpus* mosses). *Sachs, Botany* (trans.), p. 319.

acrocephaly (ak-rō-sef'al'ik or ak-rō-sef'a-lik), *a*. In *ethnol.*, pertaining to or characterized by *acrocephaly*, high-skulled as, *acrocephalic* men or tribes.

acrocephaline (ak-rō-sef'a-lin), *a*. [*Gr* *Acrocephalus* + -ine] In *ornith.*, resembling a bird of the genus *Acrocephalus* in the character of the bill. Said of certain warblers. *Henry Seebohm*.

Acrocephalus (ak-rō-sef'a-lus), *n.* [*NL*, < *Gr* ἀκρον, here used in the mere sense of point, in ref. to the bill of these birds, + κεφαλή, head.] In *ornith.*, a genus of birds founded by Naumann in 1811 to embrace old-world warblers of the subfamily *Sylviinae*, the reed-warblers. It is a well marked group of 12 or 15 species, distinguished by a comparatively large bill, depressed at base and acute at tip, with moderately developed rictal bristles, a very small spurious first primary, a rounded tail and more or less uniform brownish plumage. It is related to *Phylloscopus*, *Locustella*, *Hypodidae* etc. A typical species is the aquatic reed warbler, *A. aquaticus*. Most of the species of this genus are migratory, and their molt is double. See *Calamodytes* and *reed-warbler*.

acrocephaly (ak-rō-sef'a-li), *n.* [*Gr* ἀκρον, the highest point, peak, + κεφαλή, head see *cephalic*] A form of the human skull in which the vault is lofty or pyramidal.

Acrocera (ak-rōs'e-rā), *n.* [*NL*, < *Gr* ἀκρον, at the top or end, + κέρα, a horn] A genus of flies, founded by Meigen, having the antennae on the summit of the forehead, the type of the family *Acroceridae* (which see).

Acroceranion (ak-rō-sē-ra'nion), *a*. [*L.* *Acroceranion*, < *Gr* Ἀκροκερανίον, *n. pl.*, < ἀκρον, peak, summit, + κεραιον, thunder-smitten, < κερταίω, thunder and lightning] An epithet applied to certain mountains in the north of Epirus in Greece, projecting into the strait of Otranto.

The thunder hills of fear.

The *Acroceranion* mountains of old name. *Byron*.

Acroceridae (ak-rō-sē-rā'idē), *n. pl.* [*NL*, < *Acro-cera* + -idae] A family of dipterous insects, belonging to the section or suborder *Thachycera*, having antennae with few joints, and to the *Tetachata*, the division of the *Brachycera* in which the number of pieces composing the haustellum is four. It was established by Leach in 1819, and is typified by the genus *Acrocera* (which see).

acrochirismus (ak-rō-kī-tis'mus), *n.* [*Gr.* ἀκροχίρισμος, wrestling with the hands, < ἀκροχίρην, wrestle with the hands, seize with the hands, < ἀκρόχειρ, later form for ἀκρα χείρ, the (terminal) hand, ἀκρα, fem. of ἀκρος, at the end, terminal, extreme, χείρ, hand.] In *Gr.* antiqu., a kind of wrestling in which the antagonists held each other by the wrists. Also spelled *acrochirismus*.

acrochord (ak-rō-kord), *n.* [*Gr* *Acrochordus*, *q* v.] A snake of the genus *Acrochordus*.

acrochordid (ak-rō-kor'did), *a*. A snake of the family *Acrochordidae*, a wart-snake.

Acrochordidae (ak-rō-kor'di-dē), *n. pl.* [*NL*, < *Acrochordus* + -idae] A family of viviparous ophidian reptiles of the aglyphodont or colubrine division, which contains ordinary innocuous serpents. The typical genus is *Acrochordus*, containing 4 species, a large stout bodied, and very short tailed serpent of Java, some 8 feet long, the entire body of which is covered with small granular or tubercular scales, not imbricated as is usual in the order. With its swollen eyes and swollen jaws it presents a very savage appearance. The family contains two other genera of wart snakes, *Chromadus* and *Amadromus*.

acrochordon (ak-rō-kor'don), *n. pl.* *acrochordones* (-dō-nēz). [*L.* < *Gr* ἀκροχρόνιον, a wart with a thin neck, < ἀκρον, top, end, + χρόνις, a string see *chord*] A small histriomorph fibromatous outgrowth of the skin, often becoming bulbous at the end, a hanging wart.

Acrochordus (ak-rō-kōr'dus), *n.* [*NL*, < *Gr* ἀκρον, top, end, + χρόνις, a string see *acrochordon*] A genus of wart-snakes typifying the family *Acrochordidae* (which see). *Honstedt*. Also written *Acrochordus*. *Shaw*.

Acrocinus (ak-rō-sī'nus), *n.* [*NL*, < *Gr* ἀκρον, end, extremity, + κίνη, move] A genus of longicorn beetles, of the family *Cerambycidae*, so called by Illiger from having a movable spine on each side of the thorax. *A. longimanus*, the bark-beetle of South America is the type. It is 2½ inches long, with antennae 5 and fore legs alone 4 inches in length.

Acroclinium (ak-rō-klīn'ium), *n.* [*NL*, (with ref. to the acutely conical receptacle), < *Gr* ἀκρον, top, peak, + κλίνη, couch] A generic name retained by florists for a composite plant from the Cape of Good Hope, more properly classed as *Helipterum* *roseum*. It has immortelle-like flowers, with scarious colored bracts.

Acrocomia (ak-rō-kō'mi-a), *n.* [*NL*, < *Gr* ἀκρόκομος, with leaves at the top, tufted with leaves, < ἀκρον, at the top, + κόμη, a tuft, hair see *coma*] A genus of tropical American palms, allied to the cocopalms, with a tall prickly trunk, sometimes swollen in the middle, bearing a tuft of very large pinnate leaves. *A. acrocomia* is widely distributed through South America and yields a small round fruit with thin sweetish pulp and an edible kernel. The young leaves are eaten as a vegetable and a sweet, fragrant oil is extracted from the nuts which is used as an emollient and in the manufacture of toilet soaps. See *macaranga*.

acrocomist (ak-rō-kōm'ist), *n.* [*Gr* ἀκρον, at the top, + κόστις, bladder, bag, pouch see *cyst*] In *zool.*, an external sac which in some hydroids is formed upon the summit of the gonangium, where it constitutes a receptacle in which the ova pass through some of the earlier stages of their development. *Alman*.

acroactylum (ak-rō-dak'ti-lum), *n.*, *pl.* *acroactyla* (-lā). [*NL*, < *Gr* ἀκρον, at the top, + δάκτυλος, a digit see *dactyl*] In *ornith.*, the upper surface of a bird's toe. [*Little used.*]

acropodium (ak-rō-pō'di-um), *n*, *pl* **acropodia** (-ā) [*<*Gr *ἀκροι*, at the top, + *πόδιον*, dim of *πούς* (πόδ-)=*E foot*] 1 In *zool*, the upper surface of the whole foot **Brande**—2 In *ornith*, sometimes used as synonymous with *ac-*

rodactylum. [Little used in either of these two senses] — 3. In art, an elevated pedestal bearing a statue, particularly if raised from the substructure on supports or feet; the plinth of a statue or other work of art, if resting on feet. *Ed. Guillaume*

acropolis (a-krop'ō-lis), *n*. [L, < Gr. ἀκρόπολις, the upper city, < ἀκρος, highest, upper, + πόλις, a city see *polis*] The citadel of a Grecian city, usually the site of the original settlement, and situated on an eminence commanding the

surrounding country. When the city spread beyond its earlier limits, the acropolis was generally cleared of its inhabitants and held sacred to the divinities of the state, whose temples were upon it. The acropolis of Athens contained the most splendid productions of Greek art, the Parthenon, the Erechtheum, and the Propylaea.

acrosarcum (ak-rō-sār'kum), *n*, pl *acrosarcia* (-ka). [NL, < Gr. ἀκρος, at the end, + σαρξ (σαρκ-), flesh] A name given by Desvaux to a berry resulting from an ovary with adnate calyx, as in the currant and cranberry.

acrosaurus (ak-rō-sā'rūs), *n*, pl *acrosauri* (-rī). [NL, < Gr. ἀκρος, extreme, + σαῦρος, a lizard see *Saurus*] An extraordinary fossil reptile, with 30 or 40 teeth and a broad cheekbone process, occurring in the Triassic sandstones of southern Africa.

Acrosoma (ak-rō-sō'ma), *n*. [NL, < Gr. ἀκρον, top, peak, extremity, + σῶμα, body] A genus of orbicular spiders of the family *Epeiridae* (or *Gastacanthidae*), having the sides of the abdomen prolonged into immense horns, whence the name. It is a tropical genus with many species.

acrospire (ak'rō-spi), *n*. [Formerly *aker-*, *ackerspire*, < Gr. ἀκρος, at the top, + σπειρα, a coil, spire, > *L. spira*, > *E. spire*, *q v*] The first leaf which rises above the ground in the germination of grain, also the rudimentary stem or first leaf which appears in malted grain, the developed plumule of the seed.

acrospire (ak'rō-spi), *v*. *tr*: pret and pp *acrospired*, ppr. *acrospiring*. [Formerly *aker-*, *ackerspire*, from the noun] To throw out the first leaf, sprout.

acrospired (ak'rō-spi), *p a*. Having or exhibiting the acrospire especially, in malt-making, applied to the grains of barley which have sprouted so far as to exhibit the blade or plumule-end, together with the root or radicle.

acrospore (ak'rō-spōr), *n*. [< Gr. ἀκρος, at the end, + σπορα, seed see *spore*] In bot., a form of fruit in *Peronospora*, a genus of microscopic fungi, borne at the ends of erect simple or branching filaments of the mycelium. The term is also applied generally to the reproductive organs of fungi when they are developed at the apex of the mother cell or sporophore.

acroporous (a-kros'pō-rus), *a*. Having spores naked and produced at the tips of cells applied to one of the two modes in which fruit is formed in fungi. For the other method see *ascigerous*.

across (a-kros'), *prep. phr* as *adv* and *prep*. [late ME *acros* (also in *cross*, and in *maner of a cross*), < *as* + *cross*] *I. adv* 1 From side to side; in a crossing or crossed manner, crosswise.

Who calls me villain? breaks my pate across?

Shak., Hamlet, II. 2.

With arms across,
He stood reflecting on his country's loss. Dryden.

[In the exclamation, "Good faith, across!" Shak., All's Well, II. 1, the allusion is to striking an adversary crosswise with the spear in tilting instead of by thrusting, the former being considered disgraceful.]

2. From one side to another, transversely, in a transverse line as, what is the distance across? I came across in a steamer.

At a descent into it [cavern of Vaucluse] of thirty or forty feet from the brink where we stood was a pool of water, perhaps thirty feet across.

C. D. Warner. Roundabout Journey.

3. Adversely, contrarily, as, "things go across," *Mn for Maqs*, p. 344. To break across in tilting to allow one's path to be broken across the body of one's adversary instead of by the push of the point.

2 A state of real existence, as opposed to a possibility, power, or being in germ merely, actuality, actualization, actuality. [Translation of the Greek *energeia* and *entelechia*] The soul according to the Aristotelians is the act that is, the entelechy or perfect development of the body. So God is said to be pure act for Aristotle says: "There must be a principle whose essence it is to be actual (*es oia energeia*), and this is by many writers understood to mean 'whose essence is to be active.' In the phrase *in act*, therefore, *act*, though properly meaning actuality, is often used to mean activity.

The seeds of plants are not at first *in act*, but in potentiality what they afterwards grow to be. *Hooker*

3 A part or division of a play performed consecutively or without a fall of the curtain, in which a definite and coherent portion of the plot is represented generally subdivided into smaller portions, called *scenes*.—4 The result of public deliberation, or the decision of a prime, legislative body, council, court of justice, or magistrate, a decree, edict, law, statute, judgment, resolve, or award as, an *act* of Parliament or of Congress, also, in plural, proceedings, the formal record of legislative resolves or of the doings of individuals. Acts are of two kinds: (1) *general or public*, which are of general application and (2) *private*, which relate to particular persons or concerns. A law or statute proposed in a legislative body, then called a *bill*, becomes an *act* after having been passed by both branches and signed by the chief executive officer, but in a few of the United States the governor's signature is not necessary. British acts are usually referred to by mentioning them simply by the regnal year and number of chapter as *act of 7 and 8 Vict c 82*. American acts, particularly acts of Congress are often referred to simply by date as, *act of May 6 1882*.

5. In universities, a public disputation or lecture required of a candidate for a degree of master. The performer is said to "keep the act." Hence at Cambridge the thesis and examination for the degree of doctor at Oxford the occasion of the completion of degrees. See *act holding, act test*. The candidate who keeps the act is also himself called the act. In medical and sometimes in modern schoolwork, any public defence of a thesis by way of disputation is called an act.

6. In law, an instrument or deed in writing, serving to prove the truth of some bargain or transaction as, I deliver this as my *act* and deed. The term is used to show the connection between the instrument and the party who has given it validity by his signature or by his legal assent. When thus perfected, the instrument becomes the *act* of the parties who have signed it or assented to it in a form required by law. *Edw Livingston*

Acts having a legal validity are everywhere reduced to certain forms. A certain number of witnesses is required to prove them. A certain magistrate to authenticate them. *Woodsen* Intro to Inter Law, § 70

7. In *theol*, something done at once and once for all, as distinguished from a *work*. Thus justification is said to be an *act* of God's free grace. Actenobranthii (ak-ten-ō-brang'ki-i), *n* *pl* [NL, < Gr *aktē* + *branthii* (krēv), a comb, + *βραγχία*, gills] In Macleay's ichthyological system, one of five primary groups of fishes, characterized solely by the branchiæ not being pectinated like those of most fishes. It is a very

artificial group, composed of the *Lophobranchii* and *Cyprinodonts* or *Marrubiobranchii*.

Actian (ak'shi-an), *a* [L. *Actus* (poet.), also *Actiacus*, a, < *Actium*, Gr *ἄκτιον*, lit a headland, < *akti*, a headland. Cf *Acteron*] Relating to Actium, a town and promontory of Acarnania in Greece—**Actian games**, games held from remote antiquity at Actium in honor of Apollo, and reorganized and developed by Augustus to celebrate his naval victory over Antony near that town Sept. 2, 31 B.C. As remodeled by the Romans they were celebrated every four years and became the fifth in importance of the great Greek festivals. Hence *Actian year*, years reckoned from the era of the new Actian games. Games also called *Actian* were celebrated, by senatorial decree, every four years at Rome.

actinal (ak'ti-nal), *a* [Gr *aktis* (akti-), a ray, + *-al*] In *zool* (a) Pertaining to the side of a radiate animal which contains the mouth equivalent to *oral*, since the pole, surface, or aspect of the body whose parts radiate is also that in which the mouth is situated the opposite of *abactinal* or *aboral*. The actual side or surface may be the upper one, in the usual attitude of the animal as in the case of a sea anemone which is fixed by its abactinal or aboral pole and grows upward, or it may be the lower one, as in the case of a starfish which creeps upon its actinal or oral surface. In a sea urchin of more or less globular shape nearly the whole superficies is *actinal*.

The so called mouth is always placed at one end of these poles and from it radiate the most prominent organs, in consequence of which I have called this side of the body the oral or *actinal* area, and the opposite side the aboral or *abactinal* area.

Agassiz, contrib. Nat. Hist. N. A. IV 376.

The mouth (of sea urchins) is always situated at one end of these poles and from it radiate the most prominent organs, in consequence of which I have called this side of the body the oral or *actinal* area, and the opposite side the aboral or *abactinal* area.

Stand. Nat. Hist., I 101.

(b) In general, having tentacles or rays.

The upper extremity (of members of the genus *Actinia*) is called the *actinal* end, since it bears the tentacles or rays. *Dana*, Corals, p. 22.

Actinellida (ak-ti-nel'idā), *n* *pl* [NL, < Gr *aktis* (akti-), ray, + *-idē* (idē-), a family] A family name of radiolarians, synonymous with *Actinophutida* (which see).

Actinellidae (ak-ti-nel'idē), *n* *pl* [NL, < *Actinella* (not used) + *-ida*] A family of acanthometrous acantharians with the skeleton composed of a varying number of spicules, which are not distributed according to J. Muller's law.

actinenchyma (ak-ti-neng'ki-mā), *n* [Gr *aktis* (akti-), ray, + *ἐνχύμα*, infusion, < *ἐν*, pour in] In *bot*, a name that has been given to a system or tissue of stellate cells.

acting (ak'ting), *p* *a* Performing duty, service, or functions, specifically, performing the functions of an office or employment temporarily as, an *acting* governor or mayor, an *acting* colonel or superintendent. In the United States there is generally some officer of lower grade legally entitled to become the acting incumbent of an important executive office during a temporary vacancy from absence or disability of the elected incumbent. Temporary vacancies in military, judicial and minor executive offices are usually filled by assignment or appointment.

Actinia (ak-tin'idā), *n* [NL, < Gr *aktis* (akti-), ray] 1 A genus of zoophytes, belonging to the *Radiata* of Cuvier, regarded as the type of the order *Malacostrermata*, sub class *Zoantharia*, class *Actinozoa*, subkingdom *Cakenterata*, in modern classification. The body is cylindrical, and is attached by one extremity the mouth occupying the middle of the upper or free extremity. The mouth is surrounded by concentric circles of tentacles, which when spread resemble the petals of a flower whence the popular name *animal flowers* and *sea anemones* (which see). They are not perfectly radial in symmetry, the common polyp of the sea shore *A. mesembryanthemum*, having the oral aperture slightly elliptical, the long axis being marked by a tubercle at either end, the animal thus presents a faint but well marked indication of bilateral symmetry. They move by alternately contracting and expanding their bases, and by their tentacles. The species are often of brilliant colors, many of them are used as food. See *Actinozoa*.

2 [L. C.] An animal of the genus *Actina* or family *Actinidae*. *n* *pl* See *Actinidae*.

Actiniaria (ak-tin'idā-ri-ā), *n* *pl* [NL, < *Actina* + *-aria*] One of the divisions of the class *Actinozoa*, containing the sea-anemones, and nearly equivalent to the order *Malacostrermata*.

actinic (ak-tin'ik), *a* [Gr *aktis* (akti-), a ray, + *-ic*] Pertaining to actinism, having the property of actinism.

The so called *actinic* rays which were discovered by their special activity in connection with the earlier photographic processes, but which can now be changed into visible rays, are merely vibrations too rapid to affect the eyes.

Actinic process, a generic name for any photographic process, specifically, any photo engraving process.

actinically (ak-tin'ik-ā), *adv* As regards the chemical action of the sun's rays.

The light which finally emerges, however much corrected, becomes more and more *actinically* weak.

Silver Sunbeam, p. 35.

Actinidae (ak-tin'idē), *n* *pl*. Same as *Actinidae*. *J. D. Dana*, 1846.

actiniform (ak-tin'idōrm or ak'tin'idōrm), *a* [Gr *aktis* (akti-), ray, + *-formis*, < *forma*, form] Having a radiated form; resembling an actinism.

Actinidae, **Actiniidae** (ak-tin'idē, -idē), *n* *pl* [NL, < *Actina* + *-ida*, *-ada*] The sea-anemones or animal-flowers proper, regarded as a family, having as type the genus *Actina*, and belonging to the order *Helianthoida* or *Malacostrermata*, of the class *Actinozoa*. It contains numerous genera and species. See *Actinozoa*. Also written *Actinida*.

actinochrome (ak-tin'idō-krom), *n* [Gr *aktis* (akti-), ray, + *-chrom*] 1 The radiation of heat or light, or that branch of natural philosophy which treats of the radiation of heat and light.—2 That property of light which, as may be seen in photography, produces chemical combinations and decompositions. A pencil of rays, when decomposed by refraction through a prism, is found to possess three properties, viz the heating, the luminous, and the chemical or actinic. It was formerly supposed that the actinic property belonged peculiarly to the more refrangible part of the spectrum, beginning with the violet and extending far beyond the visible spectrum. It is now known, however, that the different rays differ essentially only in their wave lengths, and that the phenomena of heat, light, or chemical action observed depend upon the surface on which the rays respectively fall. The violet end of the spectrum acts especially on the sensitive silver salts, but the chemical decomposition of the carbon dioxide (CO₂) in the atmosphere involved in the growth of vegetation takes place most actively under the action of the yellow rays, and under proper conditions a photograph of even the ultra red rays at the opposite end of the spectrum may be obtained on a gelatin plate sensitized with silver bromide.

actinium (ak-tin'id-um), *n* [NL, < Gr *aktis* (akti-), ray] A supposed chemical element found associated with zinc. Its chemical and physical properties have not been fully investigated.

actino- [NL, etc., < Gr *aktis* (akti-), ray see *actinism*] An element in scientific compounds of Greek origin, meaning ray. In chemical compounds it represents specifically *actinism*.

Actinocheiri, *n* See *Actinochiri*.

actino-chemistry (ak'ti-nō-kem'is-tri), *n*. [*actinism* + *chemistry*] Chemistry in its relation to actinism. See *actinism*.

Actinochiri (ak'ti-nō-ki'ri), *n* [NL, < Gr *aktis* (akti-), ray, + *χίρ*, hand] An order of fishes having six unpaired and one pair of basilar bones supporting the pectoral fin, and all articulating with the scapula. Its only known representative forms the extinct family *Pelecanodidae*, of the Upper Cretaceous formation. *Cope*, 1876. Also spelled *Actinochiri*.

Actinocrinidae (ak'ti-nō-krin'idē), *n* *pl* [NL, < *Actinocrinus* + *-ida*] A family of encrinurids, or fossil crinoids, exemplified by the genus *Actinocrinus*.

actinocrinite (ak'ti-nō-krin'idē), *n* [*Actinocrinus* + *-ite*] An encrinurid, or fossil crinoid, of the genus *Actinocrinus*. [By error sometimes spelled *actinocrith*.]

Actinocrinus (ak'ti-nō-krin'idē), *n* [NL, < Gr *aktis* (akti-), ray, + *κρίν*, hily, see *crinoid*] A genus of encrinurids, or fossil crinoids, referred to the family *Encrinuridae*, or made type of the family *Actinocrinidae*. *Agassiz*, 1844.

actino-electricity (ak'ti-nō-ē-lek-tris'idē), *n* [*actinism* + *electricity*] Electricity produced in a body (e. g., rock-crystal) by direct heat-radiation. *Hankel*.

Actinogastra (ak'ti-nō-gus'trā), *n* *pl* [NL, < Gr *aktis* (akti-), ray, + *γαστήρ*, belly] In Haeckel's classification, a sub class of *Asterida*, containing those starfishes or sea-stars which have the gastric cavity radiated, whence the name.

actinograph (ak-tin'idō-graf), *n* [Gr *aktis* (akti-), ray + *γράφω*, write. Cf Gr *ακτινογράφος*, a treatise on radiation, of same formation] An instrument for measuring and registering the variations of actinic or chemical influence in the solar rays. The intensity of this influence bears no direct relation to the quantity of light, but varies at different periods of the day and of the year. There are several forms of actinograph, all of them using the same test, namely the depth of the blackening effect of chemical rays allowed to fall on a sensitive piece of paper for a given time.

actinoid (ak'ti-noid), *a* [Gr *ακτινοειδής*, < *ακτις* (akti-), ray, + *εἶδος*, form see *-oid*] Having the form of rays, resembling a starfish, conspicuously radiate as, the *actinoid* type of echinoderms.

What dangerous action, stood it next to death,
Would I not undergo for one calm look!

Shak, T G of V, v 4

An action is the perfection and publication of thought
Emerson, Nature

The word action is properly applied to those exertions which are consequent on volition, whether the exertion be made on external objects, or be confined to our mental operations
D Stewart, Works, VI 121

3 An exertion of power or force; the real relation of a cause to its effect, causality, influence; agency; operation; impulse as, the action of wind upon a ship's sails

The action which given electrical masses exert on the exterior of any closed surface is the same as that of a layer of the same mass spread on this surface according to a certain law
Atkinson, tr of Mascart and Joubert, I 44

4 Manner of moving, kind of motion or physical performance as, this horse has fine action, the action of a machine

Imitate the action of the tiger
Shak, Hen V III 1

5 In rhet, gesture or gesticulation, the deportment of the speaker, or the accommodation of his attitude, voice, gestures, and countenance to the subject, or to the thoughts and feelings expressed

Suit the action to the word, the word to the action
Shak, Hamlet, III 2

Whilst the true brood of actors, that alone
Keep natural, unstrain'd action in her throne,
Behold their benches bare
Carrie, To Davenant

6 In poetry and the drama, the connected series of events on which the interest of the piece depends; the main subject or story, as distinguished from an incidental action or episode
Unity of action is one of the dramatic unities

This action should have three qualifications first, it should be one action, secondly, it should be an entire action, and thirdly, it should be a great action
Addison, Spectator, No 207

7 In physiol (a) Any one of the active processes going on in an organized body, some manifestation of vital activity, the performance of a function as, the action of the stomach or the gastric juice on the food, a morbid action of the liver (b) A more or less complex muscular effort It may be voluntary, as the contractions of the voluntary muscles in response to the will, involuntary, as those of the heart, mixed, as those of respiration, deglutition, etc., or reflex as most involuntary actions, and also those performed by voluntary muscles under the influence of stimuli without involving conscious volition

8 In law (a) A proceeding instituted in court by one or more parties against another or others to enforce a right, or punish or redress a wrong distinguished from judicial proceedings which are not controversial in form, as the probate of a will (b) Such a proceeding under the forms of the common law, as distinguished from a chancery suit and a criminal prosecution But since the merger of law and equity, the remedy formerly had by suit in chancery is had by an equitable action In the wider sense an action is civil or criminal It is criminal when instituted by the sovereign for the punishment of a crime (see criminal), civil when instituted by the sovereign power in its capacity as an owner or contracting party or by a subject or citizen A criminal action is frequently spoken of as an indictment, which, however, is only one kind of formal complaint by which such a proceeding may be commenced or presented for trial A common law action is real personal, or mixed real when it claims title to real estate, personal when it demands a chattel, a debt damages for an injury, or a statutory penalty, and mixed when it demands both real estate and damages for a wrong Actions are in personam or in rem in personam when the party defendant is a natural person or a corporation, in rem when it is a thing the ownership of which it is sought to change or affect, as when it is sought to make damages for a collision at sea a lien on the guilty ship, or to confiscate smuggled property Actions where, the defendant being out of the reach of the court, a judgment against him will bind only his property previously attached, and actions merely to determine the status of the parties, as for divorce, are also sometimes properly called actions in rem, for the property attached and the status, respectively, are in one sense the subjects of the action and it is their presence which enables the court to exercise its jurisdiction as against persons absent See also in personam, in rem (c) The right of bringing an action as, the law gives an action for every claim (The following French phrases are common in Canadian law Action en déclaration d'hypothèque, action by a creditor having a hypothec, against a third person in possession of the real property, to have it declared subject to the hypothec Action en interruption (de prescription), an action brought to interrupt the running of the time fixed in a statute of limitations as a bar to an action Action en revendication, action in replevin, an action by the alleged owner of property to recover possession Action hypothécaire, an action brought by the hypothecary creditor against a third person holding the property subject to the hypothec, the object being to have the property or its value applied to pay the debt Action négatoire, an action by the owner of real property against any person exercising an alleged right of servitude or easement on the property praying that such alleged right be declared unfounded and that such person be perpetually barred from its exercise Action populaire, a qui tam action, an action in the interest of the public)

9. In the fine arts (a) The appearance of animation, movement, or passion given to figures by their attitude, position, or expression, either singly or concurrently (b) The event or episode represented or illustrated by a work of art — 10 A military fight, a minor engagement between armed bodies of men, whether on land or water of less importance than a battle See battle

How many gentlemen have you lost in this action?
Shak, Much Ado I 1

A general action now ensued, which, after the loss of several killed and wounded terminated in the retreat of the British party towards the centre of the town
Everett, Quakers p 90

11 In mach (a) The mechanism of a breech-loading gun by which it is opened to receive the charge (b) That part of the mechanism of a pianoforte, an organ, or other similar instrument by which the action of the fingers upon the keys is transmitted to the strings, reeds, etc In a harp the action is a mechanism, controlled by pedals, by which the key is changed by a half or whole step

12 [A French usage] A share in the capital stock of a company, in the plural, stocks, or shares of stock — Abandonment of an action See abandonment — Accessory action. See accessory Action of account — Action of a moving system. In mech, twice the time integral of the kinetic energy, which is equal to the sum of the average momentums for the spaces described by the parts of the system from any era each multiplied by the length of its path — Action of ejection and intrusion. See ejection Action of ejection See ejection and causal — Action of foreclosure See foreclosure — Action of mesne profits See mesne — Action on the case See case — Amicable action See amicable — Angle of action. See angle — Back action. (a) In marine engines action in which the cylinder is between the cross head or cross tail and the crank In this arrangement, which is sometimes used where a saving of longitudinal space is desired parallel slide bars connect the cross head of the piston rod with a cross tail and from this connecting rod extends to the shaft at the same end of the cylinder as the cross head The opposite of direct action (see below) (b) In firearms when the locks are bedded into the stock alone F H Knight — Cause of action. See cause — Chemical action, action within a molecule, or between molecules of matter, by which atoms are added, removed, or rearranged It is often attended with evolution of heat and light See chemical — Chose in action. See chose — Circuity of action See circuit — Concurrence of actions See concurrence — Concurrence of actions See concurrence — Consolidation of actions See consolidation — Currents of action. See current — Declaratory action. See declarator — Direct action, in a steam engine, action in which the piston rod or cross head is directly connected by a rod with the crank — Double action, in mach, action as of a piston, in which work is done at every stroke or reciprocal movement — Drift action. See drift — Equivocal action, one in which the effect is of a different species from the agent as the action of a blow upon a drum, causing it to sound — Form of action See form — Gift of an action See gift — Immanent action, one whose effect is within the agent or cause — Transient action, one whose effect is an object other than its cause

In the action immanent the agent and the patient are the same, in the transient different in the thing itself
Burgerschneer tr by a Gentleman, I 8

In action, in a condition or state of activity, in active operation — Law of action and reaction, Newton's third law of motion It is as follows To every action there is always an equal and contrary reaction or the mutual actions of two bodies are always equal and oppositely directed By action here is to be understood the force, or sometimes (according to Newton) the product of its effective component into the velocity of its point of application While the first two laws of motion determine how forces of every conceivable kind affect bodies, and what motions they produce, the third is more positive, in that it begins the description of the forces that are actually found in nature by enunciating the proposition that the algebraic sum of all the forces that are called into play on each occasion is zero The following passage gives Newton's comments on this law, in the language of Thomson and Tait, except that the original word action is restored in place of the word activity which those authors substitute for it in order to avoid confusion with the action of a moving system, as defined above "If one body presses or draws another, it is pressed or drawn by this other with an equal force in the opposite direction If one body presses a stone with his finger his finger is pressed with the same force in the opposite direction by the stone A horse towing a boat on a canal is dragged backwards by a force equal to that which he impresses on the towing rope forwards By whatever amount, and in whatever direction one body has its motion changed by impact upon another this other body has its motion changed by the same amount in the opposite direction, for at each instant during the impact the force between them was equal and opposite on the two When neither of the two bodies has any rotation, whether before or after the impact the changes of velocity which they experience are proportional to their masses When one body attracts another from a distance this other attracts it with an equal and opposite force If the action of an agent be measured by its amount and velocity conjointly, and if similarly the reaction of the resistance be measured by the velocities of its several parts and their several amounts conjointly, whether these arise from friction cohesion, weight, or acceleration action and reaction, in all combinations of machines, will be equal and opposite — Local action (in a voltaic cell) See amalgamate, v — Perforant action, that action which changes the thing acted upon without destroying it, corrupting

action, that which destroys it — Principle of least action, of Maupertuis, the principle that, of all the different sets of paths along which a conservative system may be guided from one configuration to another, with its total energy constant, that one for which the action is the least is such that the system will require only to be started with the proper velocities to move along it unguided — Single action, in mach, action, as of a piston or plunger, in which work is performed on only one of two or more strokes as, a single action pump, one in which the water is raised on every alternate stroke, or the upward lift of the pump rod — To take action, to take steps in regard to anything, specifically to institute legal proceedings — Univocal action, that by which an agent produces an effect of the same species as itself, thus, the action of heat in heating a body by conduction is univocal

Wave-action, in gun, abnormally high pressure in a gun from very large charges — Syn Action Act Deed In many cases these words are synonymous but action (in the singular) denotes more particularly the operation, act and deed the accomplished result Only action may be used to signify the doing, or the method of doing, it is also the word for ordinary activity, act signifying that which is more notable or dignified An action may include many acts while act is generally individual An exception to this is in the use of the word act to indicate a section of a play which is a survival of old usage yet action is in this connection broader than act, covering the movement of the plot through all the acts as, in Macbeth the action is highly tragic A course of action his action was continued repeated acts of humanity his acts were inconspicuous Deed in old usage had a very general application, but in modern usage it is applied chiefly to acts which are for any reason especially not worthy It is a more formal word than action or act The Acts of the Apostles, the action of a watch, the acts of a prince, the actions of the driven, an act of mercy, a deed of valor, a base deed or act For comparison with heat, etc see fact

Fundamentally there is no such thing as private action All actions are public in themselves or their consequences
Boyer, Summaries of Thought

Our acts our angels are, or good or ill,
Our fatal shadows that walk by us still
J Fletcher, Honest Man's Fortune, I 87

Who doth right deeds
Is twice born and who doth ill deeds
Edwin Arnold, Light of Asia, VI 78

action (ak'shon), v t [*< action, n*] To bring a legal action against [Rare]

actionable (ak'shon-a-bl), a [*< ML actionabilis, < L actio(n)-, action see action*] Furnishing sufficient ground for an action at law as, to call a man a thief is actionable

Many things which have been said in such papers are equally actionable
The American, VIII 6

actionably (ak'shon-a-bl), adv In an actionable manner, in a manner that may subject to legal process

actional (ak'shon-al), a Of or pertaining to action or actions (Rare)

actionary (ak'shon-a-ri), n, pl actionaries (-riz) [= F *actionnaire, < ML actionarius, < L actio(n)-, action see action*] A shareholder in a joint-stock company, one who owns actions (see action, 12) or shares of stock Also called actionist [Chiefly used of French subjects]

actioner (ak'shon-er), n The workman who makes or adapts the action of an instrument, as of a piano, etc

actionist (ak'shon-ist), n [*< action + -ist*] Same as actionary

actionize (ak'shon-iz), v t [*< action + -ize*] To bring a legal action against [Rare] N E D

actionless (ak'shon-less), a [*< action + -less*] Without action, inoperative

action-sermon (ak'shon-ser'mon), n In the Presbyterian churches of Scotland, the sermon preached before the celebration of the communion

action-taking (ak'shon-ta'king), a Litigious, accustomed to seek redress by law instead of by the sword an epithet of contempt

A hily liver it, action taking
Shak, Lear, II 2

actionist (ak'shon), a [*< action + -ous*] Cf factious Active, full of activity, full of energy

He knows you to be eager men, martial men, men of good stomachs, very hot shots, very actions for valour
Decker and Webster (2), Sir Thomas Wyatt, p 44

actitation (ak-ti-ta'shon), n [*< L actio + -ation*] Cf actitate (-u-), actitate, act or plead frequently, used only of lawsuits and dramas, double frequency of act, act, do Frequent action, specifically, the debating of lawsuits [Rare]

activator (ak-ti-vat), v t [*< active + -ate*] To make active, intensify

Snow and ice especially bring help on and their cold activated by nitric acid will turn water to ice, and that in a few hours
Bacon, Nat Hist, § 83

active (ak'tiv), a [*< ME actif, < OF actif, F actif, -ive, < L actus, < agere, do, act see act, n*] 1 Having the power or property of acting, tending to cause change or communicate action or motion, capable of exerting influence, opposed to passive as, attraction is an active power

When the mind has a passive sensibility, but no active strength
Hawthorne, Twice Told Tales, II 83

I find I can excite ideas in my mind at pleasure, and vary and shift the scene as often as I think fit. This making and unmaking of ideas doth very properly denominate the mind *active*.

Berkeley, Principles of Human Knowledge, I § 18
Power, thus considered, is twofold—viz as able to make, or able to receive any change: the one may be called *active* and the other *passive* power. Locke
[This distinction is taken from Aristotle.]

Specifically—2 In *med*, acting quickly, producing immediate effects as, *active* remedies or treatment—3 Having the power of quick motion, or disposition to move with speed, nimble, lively, brisk, agile as, an *active* animal—4 Busy, constantly engaged in action, acting with vigor and assiduity opposed to *dull*, *slow*, or *indolent* as, an *active* officer, also to *sedentary* as, an *active* life

Malaga possessed a brave and numerous garrison, and the common people were *active*, hardy, and resolute. Irving, Granada, p. 248

5 In a state of action, marked by movement or operation, in actual progress or motion, not quiescent, dormant, or suspended as, to take *active* proceedings against an offender, to engage in *active* hostilities

The world hath had in these men fresh experience how dangerous such *active* errors are. Hooker

Fanaticism on, to call it by its milder name, enthusiasm, is only powerful and *active* so long as it is aggressive. Lowell, Among my Books, 1st ser., p. 232

Hence—6 In *com*, marked by quickness or frequency; brisk, lively, coming or moving freely or abundantly as, an *active* trade or demand for goods, *active* freights or stocks—7 Requiring action or exertion, practical, operative, producing real effects opposed to *speculative* as, the *active* duties of life, the *active* powers of the mind

The division of the faculties of the human mind into understanding and will is very ancient and has been generally adopted, the former comprehending all our speculative, the latter all our *active*, powers. Reid
[This use of *active* for *practical*, in philosophy, is rightly condemned by Hamilton.]

8. In *gram*, signifying the performance and not the endurance of an action opposed to *passive*. Said of a verb or verb form, and used especially in the case of languages which, like Latin, have a nearly complete passive conjugation of the verb, or else like Greek and Sanskrit, a partial one—but also, less properly of those which, like English and French, have a system of verb phrases with passive meaning, made with an auxiliary. Some grammarians (quite improperly) use *active* as equivalent to *transitive*—*Active apperception*, that apperception which chooses out among a number of ideas that present themselves—*Active bonds*, bonds which bear a deduction of interest payable in full from the date of issue, as distinguished from *passive bonds* on which no interest is paid, but which entitle the holder to some future benefit or claim—*Active capital or wealth*, money, or property that may readily be converted into money, used in commerce or other employment—*Active cause*. See *causa*. *Active commerce*, the commerce in which a nation carries its own and foreign commodities in its own ships, or which is prosecuted by its own citizens, as contrasted with *passive commerce*, in which the productions of one country are transported by the people of another—*Active debt*. See *debt*—*Active or living force*, in *phys*, same as *vis viva* (which see)—*Active fund*. See *fund*—*Active instrument*, one which upon being set into action goes on of itself, as fire—*Active list*, the list of officers in the army or navy liable to be called upon for active service, as distinguished from the *retired list*—*Active power*. See quotation from Locke under def. 1. Reid uses the term to denote the will, appetites, affections etc.—but that use has been generally condemned—*Active service* (*milit*) (a) The performance of duty against an enemy, or operations carried on in his presence

It was evident, from the warlike character of El Zagal, that there would be abundance of *active service* and hard fighting. Irving, Granada, p. 437

(b) The state of having a place on the active list, under full pay, used in contradistinction to being on the retired list, under reduced pay—*Active symptoms*, in *pathol*, symptoms of excitement—*Optically active substance*, in *phys*, one which has the power of rotating the plane of polarization of a ray of light transmitted through it—*Syn Active Busy Officers*, lively, agile, stirring vigorous, industrious, indefatigable. (See *busy*) *Active* regards either mind or body, there is no sinister sense of the word. The *active*, may be merely for its own sake. *Active* is opposed to *lazy inert or quiescent*, an *active* mind life, person. *Busy* is active about something that is supposed to be useful. As applied to disposition, the word has acquired a bad sense, that of middlemoresome, a *busybody* he is too busy about other's affairs. An *officious* person is one whose efforts to be active or busy for others' benefit come, through his lack of judgment, to be regarded as annoying or intrusive. See *importunate*

Whom very laughter is a punishment
Heavier than active souls can feel or guess.

Aubrey de Vere, Song of Faith

Rest is not quitting the busy career.
John Dwight, True Rest

I will be hang'd if some eternal villain,
Some busy and insinuating rogue,
Some cogging cozening slave, to get some office,
Have not devis'd this slander. Shak., Othello, iv. 2.

You are too officious
In her behalf that scorns your services.
Shak., M. N. D., ii. 2

actively (ak'tiv-ly), *adv.* 1. In an active manner, by action or movement; hence, briskly or energetically as, to engage *actively* in business, to work *actively*

To flaming youth let virtue be as wax,
Since frost itself as *actively* doth burn.
Shak., Hamlet, iii. 4

2 In an active sense, by active application or attention, in a way involving or implying action opposed to *passively* as, to employ a verb *actively*, to study *actively*.

The student is to read history *actively* and not *passively*, to *act* on his own life the text and books the community.
Ferguson, History

activeness (ak'tiv-ment), *n* [Irreg. < *active* + -ment.] Business; employment. Bp. Reynolds

Virgil has, indeed, admitted Fame as an actress in the Æneid. Addison

Specifically, a woman who represents or acts a part in a play. Actresses were not introduced in England till after the Restoration, though they seem to have been employed in some parts of Europe much earlier. Thomas Coryat, the traveler, mentions them in his "Cruities," published in 1611. "Here [Venice] I saw women act, a thing that I never saw before, though I have heard that it hath been used in London." In Shakspeare's time female parts were performed by boys, as is still the custom in China and some other countries. "The king, one night, was impatient to have the play begin." "Sire," said Dame, "they are shaving the queen." *Memoirs of Count de Gramont*. In the epilogue to "As you like it" Rosalind says: "If I were a woman, I would kiss as many of you as had beards that pleased me, etc." In 1602 the employment of actresses was sanctioned by Charles II. "Whereas the women's parts in plays have hitherto been acted by men, in the habits of women, at which some have taken great offence, we do permit and give leave, for the time to come, that all women's parts be acted by women." *Extract from license* in 1602 to a London theater

actual (ak'tū-al), *a* [*ME actual*, *actuel*, active, < *OF*, and *F actual*, < *LL actualis*, active, practical, < *L actus* (*actu-*), act, action, performance. See *act*, *n*.] 1† Active, practical

A man may deny *actuality* to the Mahometan idea of God, and yet be no atheist.
Theodor Parker, Speculative Atheism

George Sand says neatly, that "Art is not a study of positive reality" (*actuality* were the fitter word), "but a seeking after ideal truth." Lowell, Study Windows, p. 208

2 That in which anything is realized

Nature and religion are the bands of friendship, excellency and usefulness are its great endowments, society and neighborhood, that is, the possibilities and the circumstances of converse, are the determinations and actualities of it.
Jer Taylor, Friendship

actualization (ak'tū-al-i-zā-shon), *n* A making real or actual; the reducing of an idea to a

state of actuality or existence; the state of being made actual. Also spelled *actualisation*.

It [the idea of peace] is expounded, illustrated, defined, with different degrees of clearness, and its actualization, or the measures it should inspire, predicted according to the light of each seer. Emerson, War

acuto-nodose (a-küt-ti-nō-dōs), *a* [*L. acutus*, sharp, + *nodosus*, knotted see *nodose*] Acutely nodose. *Dana* (*N. E. D.*)

acuyari-wood (a-ku-yā-rī-wud), *n* The aromatic wood of the tree *Bursera (Iscua) albisima* of Guiana.

-acy. (1) Directly, or through *ME* and *OF* -*aci*, < *ML* -*acia*, < *LL* -*acia*, forming nouns of quality, state, or condition from nouns in -*a* (t)-s, as in *abb-acy*, < *LL* *abb-at-ia*, < *abb-a* (t)-s, abbot, *prim-acy*, < *F* *prim-ati*, < *LL* *prim-at-ia*, < *prim-a* (t)-s, primate, etc. (2) < *LL* -*acia*, forming nouns of state from nouns in -*atus*, as in *advoc-acy*, < *LL* *advoc-at-ia*, < *LL* *advoc-at-us*, advocate, etc. (3) < *L* -*acia*, forming nouns of quality from adjectives in -*aci* (-*aci*), as in *jall-acy*, < *L* *jall-aci-a*, < *jall-ax* (-*aci*), deceptive, etc. These three sources of -*acy* were more or less confused, and the suffix has been extended to form many nouns which have no corresponding form in *L*, as in *cur-acy*, *accur-acy*, etc. Analogy has extended -*acy*, < *L* -*acia*, to some words of *Gr* origin. (4) < *L* -*acia*, < *Gr* -*areia*, as in *pracy*, < *LL* -*pr-acia*, < *Gr* *πειραία*, < *πειράτης*,

pirate, similarly in -*oracy*, *q. v*. Hence the short form -*cy*, esp in designations of office, as in *captain-cy*, *ensign-cy*, *cornet-cy*, etc. A suffix of Latin or Greek origin, forming nouns of quality, state, condition, office, etc., from nouns in -*ate* (which becomes -*aci*, the suffix being -*ate* changed to -*aci*, + *y*), as in *primacy*, *curacy*, *advocacy*, *piracy*, etc., or from adjectives in -*aci*, as in *fallacy*.

acyanoblepsy (a-si'ā-nō-blep'si), *n* [*Gr* *ἀ-priv* + *κυανος*, a blue substance, blue (see *cyanide*), + *-βλεψια*, < *βλέπω*, see, look on.] A defect of vision, in consequence of which the color blue cannot be distinguished.

acyclic (a-sik'lik), *a* [*Gr* *ἀ-priv* + *κυκλικός*, circular see *a-18* and *cyclic*.] In *bot*, not cyclic, not arranged in whorls. Applied by Braun to flowers that have a spiral arrangement of parts, when the spiral turns made by each class of organs are not all complete, in distinction from *hemicyclic*, where all are complete.

Braun has termed such flowers *acyclic*, when the transition from one floral structure to another, as from calyx to corolla or from corolla to stamens, does not coincide with a definite number of turns of the spiral (as *Nymphaea* and *Helleborus odoratus*) hemicyclic when it does so coincide. *Sachs*, *Botany* (trans), p. 523.

acyprioid (a-sip'ri-oid), *a* [*Gr* *ἀ-priv* (a-18) + *cyprinoid*] In *zoogeog*, characterized by the absence of cyprinoid fishes applied to one of the fresh-water divisions of the equatorial zone, embracing the tropical American and tropical Pacific regions. *Günther*.

ad-. [*L* *ad-*, prefix, *ad*, prep, to, unto, toward, upon, for, etc., = *AS* *at*, *E* *at*, *q. v*. In later *L* *ad-* before *b*, *c*, *f*, *g*, *h*, *n*, *p*, *q*, *r*, *s*, *t*, was assimilated, as *ab-*, *ac-*, *af-*, *ag-*, *al-*, *an-*, *ap-*, *ar-*, *as-*, *at-* (see *ab-bruiat*, *ac-cuse*, *af-foot*, *ag-gravate*, *al-lude*, *an-nu-x*, *ap-plaud*, *ac-quesce*, *ar-rogate*, *as-sist*, *at-trait*). Before *sc-*, *sp-*, *st-*, it was reduced to *a-* (see *a-scend*, *a-spire*, *a-stringent*, and *a-12*). Before *d*, *h*, *j*, *m*, before vowels, and often in other cases, it remained unchanged. In *OF*, *ad-* with all its variants was reduced to *a-*, and was so adopted into *ME*. But in the 14th and 15th centuries a fashion of "restoring" the *L* spelling (*ad-*, *ac-*, *af-*, etc.) began to prevail, and soon became the rule in both *F* and *E*, though *F* still retains many, and *E* a few, of the old forms (see *ac-company*, *ad-dress*, *af-front*, *ag-grave*, *al-lay*, *al-low*, *an-nounce*, *ap-pent*, *ar-rest*, *at-tend*, etc.). By confusion of the *ME* *a-*, for *ad-*, *af-*, etc., with *ME* *a-* of other origin (< *L* *ab-*, *OF* *en-*, *es-*, *AS* *a-*, *q. v*, *on-*, etc.), the latter *a-* has been in some cases erroneously "restored" to *ad-*, *ac-*, *af-*, etc., as in *ad-vance*, *ac-cloy*, *ac-course*, *ac-knowledge*, *af-ford*, *af-fray*, *ad-miral*, etc.] 1 A prefix of Latin origin, with primary sense "to," and hence also "toward, upon, for," etc., expressing in Latin, and so in English, etc., motion or direction to, reduction or change into, addition, adherence, intensification, etc., in English often without perceptible force. According to the following consonant, it is variously assimilated *ab-*, *ac-*, *af-*, etc., or reduced to *a-*. See etymology — 2 A prefix of various other origin, erroneously put for other prefixes, as in *ad-vance*, etc. See etymology.

-ad1. [*L* -*as* (-*ad*), < *Gr* -*as* (-*ad*), fem suffix equiv to -*is* (-*is*) see *-is2*] A suffix of Greek origin appended to nouns. It is used in forming— (1) collective numerals, as *monad*, *dyad*, *triad*, *tetrad*, etc., terms used in classifying chemical elements or radicals according to the number of their combining units, (2) feminine patronymics (— *is*), as in *dyad*, *Pléiades*, etc. (see *ada*, *idee*), hence used in *Lucas* (*Lucas*), *Had*, and in the titles of poems named in imitation of it, as *Dunrad*, *Columbad* compare *Fureit*, *Therad*, (3) by Lindley, family names of plants akin to a genus, as *thiad*, *triliad*, etc., on words ending in *a* or after a vowel, otherwise *is*, as in *orchid*.

-ad2. [*F* -*ade* see *-ad1*] A suffix in *ballad* and *salad* (formerly *balade* and *salade*), usually represented by -*ade*. See *-ad1*.

-ad3. [A mod use of *L* *ad*, to.] In *anat*, a suffix denoting relation, situation, or direction, having the same force as the English suffix -*ward*, or the word *toward*. Thus, *dorsad*, backward, toward the dorsum or back, *cead*, downward, toward the exterior, *intad*, inward, toward the interior. So, also, *cephalad*, headward, forward, *destrad*, to the right, on the right hand of, etc. It is used almost at will, with either Greek or Latin words. Its use is advantageous as restricting the idea of direction to the body of the animal itself, without considering the position in which that body may be with relation to externals, since, for example, what is *backward* in the anatomy of man when in the erect posture is *upward* in that of a quadruped when in the comparatively natural horizontal attitude, while in both it is equally *dorsad*.

ad. An abbreviation of *advertisement*. **A. D.** An abbreviation of the Latin phrase *anno Domini*, in the year of the Lord. as, *A. D.* 1887.

-ada. [Sp Pg -ada = It -ata = F. -ée, < L. -āta, fem of -ātus see -ade-, -ate-] A suffix of Latin origin, the Spanish feminine form of -ade-, -ate-, as in *amada* in English sometimes, erroneously, -ado, as in *bastinado*, Spanish *bastinado*.

Adacna (a-dak'na), *n* [NL, < Gr *a-* priv + *daknē*, bite] The typical genus of the family *Adacnidae* (which see) *Eichenwald*, 18'38

adacnid (a-dak'nid), *n* A bivalve mollusk, of the family *Adacnidae*.

Adacnidae (a-dak'nī-de), *n pl* [NL, < *Adacna* + *-ida*] A family of dimyarian bivalve mollusks, typified by the genus *Adacna*. The animals which compose this family have elongated, nearly united siphons, and a compressed foot. The shell, which opens behind, has a sinuated pallial line and a nearly toothless hinge, or the teeth merely rudimentary. The species are chiefly inhabitants of the Aral, Caspian, and Black seas and neighboring waters.

Adalia (a-dā'li-a), *n* [NL (Mulsant, 1851), an invented name] A genus of beetles, of the family *Coccinellidae*. The commonest species is *A. bipunctata*, the two spotted lady bird, having a black head with two yellow spots on each side, the prothorax black and marked with yellow, the scutellum black, and the elytra yellowish with a central round black spot on each. The insect is useful in destroying plant life.

Adam (ad'am), *n* [L *Adam* (and *Adamus*), < Gr *Ἀδάμ* (and *Ἀδάμ*), < Heb *ādām*, a human being, male or female, perhaps, according to Gesenius, < *ādām*, be red] 1 The name of the first man, the progenitor of the human race, according to the account of creation in Genesis.—2 The evil inherent in human nature, regarded as inherited from Adam in consequence of the fall.

Consideration like an angel came,
And whipp'd the offending Adam out of him.
Shak, *Hen V*, l 1

3† A serjeant or bailiff. This sense rests chiefly on the following quotation, and is explained by the commentators as a reference to the fact that the buff worn by the bailiff resembled the native "buff" of our first parent.

Not that Adam that kept the paradise, but that Adam that keeps the prison.
Shak, *C of E*, l 1

Adam and Eve, the popular name in the United States for a certain terrestrial orchid, *Aphelandra humilis*.—**Adam's ale**, **Adam's wine**, water as being the only beverage in Adam's time. Some times called *Adam*. [Colloq.]

And drink of Adam's ale.
Prior, *Wandering Pilgrim*

A cup of cold Adam from the next putting spring.
Tom Brown, *Work*, IV 11

Adam's apple (a) *Pomum Adam* the prominence on the front part of the throat formed by the anterior part of the thyroid cartilage of the larynx, so called from the notion that a piece of the forbidden fruit stuck in Adam's throat. The protuberance is especially noticeable in the male sex after puberty as the larynx enlarges in boys at the time when the change in the voice occurs. (b) A variety of the lime *Citrus medica* with a depression which is fancifully regarded in Italy as the mark of Adam's teeth. See *Citrus*. (c) A name sometimes given to the plantain the fruit of *Musa paradisiaca*.—**Adam's flannel**, the common mullein *Verbascum thapsus*.—**Adam's needle and thread**, a common name of *Yucca filamentosa*.

adamant (ad'mant), *n* [ME *adamant*, *adamant*, *ademaunt*, *adamaunt*, also *athamant*, *athamant*, etc (after AS *athamans*), and *admont*, < OF *adamant*, *adamaunt*, in popular form *amant* = Pr *adamant*, *aziman*, *ayman* = Sp Pg *man*, < ML **adamas* (**admant*), L *adamas* (*adamant*), < Gr *ἀδάμας* (*adapav*), lit un conquerable (< *a-* priv + *δύωμαι*, conquer, = L *domare* = E *tame*, *q v*), first used (by Homer) as a personal epithet, later (in Hesiod and subsequent writers) as the name of a very hard metal such as was used in armor—prob steel, but endowed by imaginative writers with supernatural powers of resistance, in Plato, also of a metal resembling gold, in Theophrastus, of a gem, prob a diamond, in Pliny, of the diamond, under which he includes also, perhaps, corundum, in Ovid, of the magnet, in later writers regarded as an anti-magnet. The name has thus always been of indefinite and fluctuating sense. From the same source, through the perverted ML forms *damaus*, *damauntum*, comes E *diamant*, *diamond*, *q v*] 1 A name applied with more or less indefiniteness to various real or imaginary metals or minerals characterized by extreme hardness as (1) the diamond, (2) the natural opposite of the diamond, (3) a lodestone or magnet, and (4) an anti-magnet.

The garnet and diamond or adamant
Sullivan, *Views of Nature*, I 488 (V F D)

The adamant cannot draw yron, if the diamond lye by it.
Loph, I uphuc, sig K, p 10 (V F D)

The grace of God's spirit, like the true lodestone on adamant, draws up the iron heart of man to it.
By Hall, *Occas Med*, p 52

The adamant is such in enemy to the magnet
Leonardus, *Miri Stones*, p 61 (V F D)

2. In general, any substance of impenetrable or surpassing hardness, that which is impenetrable to any force. [It is chiefly a rhetorical or poetical word.]

As an adamant harder than flint have I made thy forehead.
Lack, III 9

But who would force the soul, tilts with a straw
Against a champion cased in adamant.
Wordsworth, *Poems*, l 1

adamanteant (ad'a-man-tō'an), *a* [L *adamantus*, < Gr *ἀδάμαντος*, < *adapav* see *adamant*] 1 Made of adamant, having the qualities of adamant, impenetrable.

Adamite (ad'a-mit), *n* [L *Adam* + *-ite*] 1 One of mankind, one of the human race considered as descended from Adam.—2 One of that section of mankind more particularly regarded as the offspring of Adam, in contradistinction to a supposed older race, called *Pre-Adamites*.

Prof Winchell's pamphlet on *Adamites* and *Pre-Adamites*. *Pop Sci Mo*, XIII 500

3 [LL *Adamita*, pl] One of a sect which originated in the north of Africa in the second century, and pretended to have attained to the primitive innocence of Adam. Its members accordingly rejected marriage as an effect and clothing as a sign of sin and appeared in their assemblies, called *parades* naked. This heresy reappeared in the fourteenth century in Savoy, and again in the fifteenth century among the Brethren and Sisters of the Free Spirit in Germany, Bohemia, and Moravia. It was suppressed in 1423 on account of the crimes and immorality of its votaries. (See *Picard* and *Peart*.) When toleration was proclaimed by Joseph II. in 1781 the sect revived, but was promptly proscribed. Its latest appearance was during the insurrection of 1815-16.

The truth is, I confess, though a Sans culottist is no *Adamite*, and much perhaps as he might wish to go forth before this degenerate age as a sign would he wish to do it, as those old *Adamites* did in a state of nakedness. *Carlyle*, *Sartor Resartus*, p 40

4 [L] [After the French mineralogist M. Adam + *-ite*] A mineral occurring in small yellow or green crystals and in mammillary groups, a hydrous arsenate of zinc, isomorphous with olivine. Found in Chili, and also at Laurium in Greece. Also called *adamine*.

Adamitic (ad-a-mit'ik), *a* [L *Adamite* + *-ic*] 1 Of or pertaining to the descendants of Adam, pertaining to mankind, human.

He [Mr Webster] was there in his *Adamite* capacity, as if he alone of all men did not disappoint the eye and the ear, but was a fit figure in the landscape. *Emerson*, *English Slave Law*

2 Of, pertaining to, or resembling the sect of the *Adamites*.

Nor is it other than rustic or *Adamite* impudence to confine nature to itself.

Tr Taylor (?) *Artif Handsomeness*, p 164

See *baobab*. *A. gerrardii*, the only other species is the cream of tartar tree of northern Australia. See *cream of tartar tree*, under *cream*.

Adapidae (a-dap'i-de), *n pl* [NL, < *Adaptes* + *-ida*] A family of extinct lemuriform mammals, of which the genus *Adaptes* is the type.

Adapis (ad'a-pis), *n* [NL, a name applied by Gesner, about 1550, to the common rabbit. Etym unknown, referred doubtfully to Gr *a-* intensive + *apis*, a rug, carpet.] A genus of extinct mammals of the Eocene or Lower Tertiary age, described from portions of three

skulls found by Cuvier in the gypsum-quarries of Montmartre, Paris, and by him referred to his order *Pachydermata*, and considered as related in some respects to *Inoplotherium*. The animal was of about the size of a rabbit. Subsequent investigations based upon additional material have shown *Adapis* to be the type of a family (*Adapidae*) representing a generalized form of the Lemniscatae (*Lemniscata* Killip) of the order *Primate*.

adapt (a-dap't), *v. t.* [*F. adapter* = *It. adattare*, < *L. adaptare*, fit to, < *ad*, to, + *aptare*, make fit, < *aptus*, fit see *apt*] 1 To make suitable, make to correspond, fit or suit, proportion

A good poet will adapt the very sounds, as well as words to the things he treats of. Pope, Letters

The form and structure of nests, that vary so much, and are so wonderfully adapted to the wants and habits of each species. L. B. Wallace, Nat. Sel., p. 216

Two errors are in common vogue in regard to instinct, first, that it never errs, secondly, that it never adapts itself to changed circumstances. Mandeville, Duty and Will, § 5

2 To fit by alteration, modify or remodel for a different purpose as, to adapt a story or a foreign play for the stage, to adapt an old machine to a new manufacture — 3 To make by altering or fitting something else, produce by change of form or character as, to bring out a play adapted from the French, a word of an adapted form = *Syn* 1 To adjust, accommodate (conform — 2 To arrange

adapt (a-dap't), *a.* [Short for *adapted*, prob suggested by *apt*] Adapted, fit, suitable

If we take this definition of happiness, and examine it with reference to the senses, it will be acknowledged wonderfully adapt. Swift, Tale of a Tub, ix

[Providence] gave him able arms and back

To wield a shield and carry sack,

And in all stations active be,

Adapt to prudent husbandry. D. D. Collier, Collier's Walk, i

adaptability (a-dap'ta-bil'i-ti), *n.*, pl. *adaptabilities* (-ties) [*Adaptability* see *ability*] 1 The quality of being adaptable, a quality that renders adaptable

No wonder that with such ready adaptabilities they [Norwegians] made the best of emigrants. Louche, Sketches, p. 7

2 Specifically, in *biol.*, variability in respect to, or under the influence of, external conditions, susceptibility of an organism to that variation whereby it becomes suited to or fitted for its conditions of environment, the capacity of an organism to be modified by circumstances

adaptable (a-dap'ta-bl), *a.* [*< adapt + -able*] Capable of being adapted, susceptible of adaptation

Yet, after all, this speculative Jonathan is more like the Englishman of two centuries ago than John Bull himself. He has lost somewhat in solidity, has become fluent and adaptable, but more of the original ground work of character remains. Lowell, Intro. to Biglow Papers, 1st ser.

adaptableness (a-dap'ta-bl-ness), *n.* Adaptability

adaptation (ad-ap'ta'shon), *n.* [*< F. adaptation*, < *ML. adaptatio(n)*, < *L. adaptare* see *adapt*, *r*] 1 The act of adapting or adjusting, the state of being adapted or fitted, adjustment to circumstances or relations

Government, in a just sense, is, if one may say so, the science of adaptations, variable in its elements dependent upon circumstances, and incapable of a rigid mathematical demonstration. Story, Misc. Writings, p. 616

Must we not expect that with a government also, special adaptation to one end implies non-adaptation to other ends? H. Spencer, Social Statistics, p. 305

2 That which is adapted, the result of altering for a different use. Specifically a play translated or constructed from a foreign language or a novel, and rendered suitable for representation as this comedy is a free adaptation from a French author

3 In *biol.*, advantageous variation in animals or plants under changed conditions, the result of adaptability to, and variability under, external conditions, the operation of external influences upon a variable organism, or a character acquired by the organism as the result of such operation. It is regarded as one of two principal factors in the evolution of organic forms inducing those changes which it is the tendency of the opposite factor, heredity, to counteract, the result in any given case being the balance between adaptation and heredity, or the diagonal of the parallelogram of forces which adaptation and heredity may be respectively considered to represent

Adaptation is commenced by a change in the functions of organs, so that the physiological relations of organs play the most important part in it. Since adaptation is merely the material expression of this change of function, the modification of the function as much as its expression is to be regarded as a gradual process. As a rule, therefore, adaptation can be perceived by its results only in a

long series of generations, while transmission (i. e., heredity) can be recognized in every generation.

Gegenbaur, Comp. Anat. (trans.), p. 9

adaptational (ad-ap'ta'shon-al), *a.* Relating or pertaining to adaptation, or the adjustment of one thing to another, adaptive in *biol.*, applied to physiological or functional modifications of parts or organs, as distinguished from morphological or structural changes

adaptative (a-dap'ta-tiv), *a.* [*< L. adaptatus*, pp of *adaptare*, adapt (see *adapt*, *r*), + *-ive*] Of or pertaining to adaptation, adaptive [Rare]

adaptativeness (a-dap'ta-tiv-ness), *n.* Adaptability

adaptedness (a-dap'ted-ness), *n.* The state of being adapted, suitableness, fitness

The *adaptedness* of the Christian faith to all such [the poor and oppressed], which was made a reproach against it by superficial antagonists, constitutes one of its chief glories. G. P. Fisher, Begin of Christianity, p. 45

adapter (a-dap'ter), *n.* 1 One who adapts, or makes an adaptation, specifically, one who translates, remodels, or rearranges a composition or work, rendering it fit to be represented on the stage, as a play from a foreign tongue or from a novel

And, if these imaginary adapters of Homer modernized his whole diction, how could they preserve his metrical effects? De Quincey, Homer, iii

2 That which adapts, anything that serves the purpose of adapting or adjusting one thing to another. Specifically — 3 In *chem.*, a receiver with two necks diametrically opposite, one of which admits the neck of a retort, while the other is joined to a second receiver. It is used in distillations to give more space to elastic vapors or to increase the length of the neck of a retort

4 In *optics* (a) A metal ring uniting two lengths of a telescope. (b) An attachment to a microscope for centering the illuminating apparatus or throwing it out of center. E. H. Knight (c) A means for enabling object-glasses made by different makers, and having different screws, to be fitted to a body not specifically adapted to receive them. E. H. Knight — 5 A glass or rubber tube, with ends differing in size, used to connect two other tubes or two pieces of apparatus

adaption (a-dap'shon), *n.* [*< adapt + -ion* (cf *adoption*, *adapt*)] Adaptation, the act of fitting [Rare]

Wise contrivances and prudent adaptations. Chaucer

adaptonal (a-dap'shon-al), *a.* Relating or pertaining to adaptation, or the action of adapting in *biol.*, applied to the process by which an organism is fitted or adapted to its environment as, *adaptonal* swellings

adaptitude (a-dap'ti-tüd), *n.* [*< adapt + -itude*, after *aptitude*] Adaptedness, special aptitude [Rare]

adaptive (a-dap'tiv), *a.* [*< adapt + -ive* (cf *adaptative*)] Of pertaining to, or characterized by adaptation, making or made fit or suitable, susceptible of or undergoing accordant change. Much used in biology with reference to functional or physiological changes occasioned by variations of external conditions or environment as opposed to *homological* see *adaptation* 1

The adaptive power, that is, the faculty of adapting means to proximate ends. Coleridge, Aids to Reflection, p. 178

The function of selective discrimination with the complementary power of *adaptive* response is regarded as the root principle of mind. Science, IV, 17

In the greater number of Mammals, the bones assume a very modified and *adaptive* position. H. Flower, Osteology, p. 242

These resemblances, though so intimately connected with the whole life of the being, are ranked as merely *adaptive* or analogical characters. Darwin, Origin of Species, p. 64

adaptively (a-dap'tiv-ly), *adv.* In an adaptive manner, with adaptation, in an adjusted or fitting manner, with fitness as, "*adaptively* modified structures," Owen, Class of Mammalia

adaptiveness (a-dap'tiv-ness), *n.* The quality of being adaptive, capability of making or becoming fit or suitable

adaptly (a-dap'tl), *adv.* In a suitable or convenient manner, aptly, fitly

For active horsemanship *adaptly* fit. Prior, Collins's Hist., iii, 3

adaptness (a-dap't-ness), *n.* The state of being fitted, adaptation, aptness as, "*adaptness* of the sound to the sense," Bp Newton, Milton

adaptorial (ad-ap'tō-ri-al), *a.* [*< adapt + -ory* + *-al*] Tending to adapt or fit, adaptive. [Rare]

adar (ā'dār), *n.* [Heb *adār*, etym. uncertain] A Hebrew month, being the sixth of the civil and the twelfth of the ecclesiastical year, corresponding to the latter part of February and the first part of March

adarce (a-dar'sē), *n.* [*L.*, also *adarcia*, < *Gr. adarkē* or *adarkos*, also *adarkos*, a word of foreign origin] A saltish concretion on rocks and grass in marshy grounds, noted especially in ancient Galatia, Asia Minor. It is soft and porous, and has been used to cleanse the skin in leprosy, fetters, and other diseases

adarguet, *n.* [OSp., of Ar. origin] An Arabic weapon like a broad dagger

adarkon (a-dar'kon), *n.* [Heb., deriv. uncertain, by some writers connected with the name *Darius* see *daric*] A gold coin (also called *darkemon*) mentioned in the original text of the book of Ezra, etc., as in use among the Jews, and translated *dram* in the authorized version. It was a foreign coin, probably the Persian *daric* (which see), and is so rendered in the revised version

adarme (a-där'mü), *n.* [Sp. *adarme*, a dram, a- perhaps represents the Ar. art *al*, the, and -*darme* the L. *drachma* see *drachma* and *dram*] A Spanish weight, a drachm, the 16th part of an ounce, or the 256th part of a pound, equal (in Castile) to 1½ avoirdupois drachms. Another form is *adarme*. In their origin avoirdupois weight and the Spanish system were identical

adarticulation (ad-är'tik-u-lä'shon), *n.* [*< ad + articulation*] Same as *arthrodis*

adatit (ad'a-ti), *n.* [Also written *adaty*, pl. *adatis*, *adaties*, etc., of E. Ind. origin. Cf Beng. *adat* (cerebral *d*) or *mat*, a warehouse, a general store] A kind of piece-goods exported from Bengal

adaunt (a-däunt'), *v. t.* [*ME. adawten*, < *OF. adanter*, *adonter*, later *adawnter*, < *a-* + *danter*, *donter*, *daunt* see *a-11* and *daunt*] To subdue

2 On or in the day or time only in the compound phrase *nowadays* (which see)

adaze (a-däz'), *v. t.* [*< ME. adasen*, < *a-* + *dazen*, *daze* see *daze*] To dazele. *Sir T. More.*

ad capt. An abbreviation of *ad captandum*

ad captandum (ad kap-tan'dum) [L. *ad*, to, for, *captandum*, gerund of *capere*, catch, seize, < *capere*, take see *captive*.] For the purpose of catching, as in the phrase *ad captandum vulgus*, to catch the rabble often applied adjectively to claptrap or meretricious attempts to catch popular favor or applause as, *ad captandum oratoris*.

adcorporare (ad-kôr-pô-râ), *v. t.* [See *incorporate*.] To unite, as one body with another, incorporate.

add (ad), *v. t.* [*ME* *adden*, < *L* *addere*, < *ad*, to, + *de* for **dare*, put, place see *do*] *I trans* 1 To join or unite into one sum or aggregate. Specifically, in *math*, to find the measure of the sum of two or more quantities or a combination of them into which each enters with its full effect and independently of the others, so that an increase of any one of the added quantities produces an equal increase of the sum used with *together* or *up* as, to add numbers to *gether*, to add or add up a column of figures.

2 To unite, join, attach, annex, or subjoin as an augmentation or accretion, bring into corporate union or relation with to before the subject of addition, and sometimes without an expressed object when this is implied by the subject as, add another stone, or another stone to the pile, he continually added [goods or possessions] to his store, to add to one's grief.

3 I shall not add [anything] unto the word which I command you. Deut. iv. 2

And, to add greater honours to his age
Than man could give him, he did fear God
Shak., Hen VIII, iv. 2

[I] add thy name,
O sun, to tell thee how I hate thy beams
Milton, P. I, iv. 36

They added ridge to valley, brook to pond,
And sighed for all that bounded their domain
Emerson, Hamaireya

3† To put into the possession of, give or grant additionally, as to a person.

The Lord shall add to me another son. Gen. xxx. 24
For length of days, and long life, and peace, shall they add to thee. Prov. iii. 2

Added money, in *sporting*, money added by a jockey club to wagers. — **Added sixth**, in *music*. See *seventh*. — **Add in**, to include. — **Add up**, to find the sum of. — **Syn** *Add*, *Attach*, *Affix*, *Annex*, *adduce* adjoint. The first four words agree in denoting the increasing of a thing, by something additional. *Add* is the most general term but it may denote an intimate union of the things combined, the formation of a whole in which the parts lose their individuality as, to add water to a decoction to add one sum to another. This idea is not expressed by any of the others. *Attach* (as also *affix* and *annex*) denotes a more external combination, it implies the possibility of detaching that which is attached as to *attach* a locomotive to a train. Hence we do not *attach* but *add* one fluid to another. It generally retains its original notion of a strong connection, physical, moral or other as, to *attach* a condition to a gift, a tag to a hat, or one person to another. *Affix* may be used either of that which is essential to the value or completeness of the whole or of something that is wholly extrinsic or unrelated as, to *affix* a signature or seal to an instrument, to *affix* a notice to a post. To *annex* sometimes brings the parts into vital relation as, to *annex* territory, a codicil to a will or a penalty to a prohibition.

Care to our coffin adds a nail, no doubt

Dr. John Wolcott, Expost. Odes, xv

Their names cling to those of the greater persons to whom some chance association attached them.

Mrs. Oliphant, Hist. of 16th Cent., III. 150

F. A. Freeman, Race and Language, p. 111

II. intrans 1. To be or serve as an addition, be added with to as, the consciousness of folly often adds to one's regret. [Really transitive in this use, with the object implied or understood. See I, 2.] — 2 To perform the arithmetical operation of addition.

adda (ad'ä), *n.* [Egypt.] A small species of Egyptian lizard, *Scincus officinalis*, the skink. It is called "official" on account of the reputation which it has been held by Eastern physicians for its alleged efficacy in the cure of elephantiasis, leprosy, and certain other diseases common in the East. See *skink* and *Scincus*.

adda (ad'ä), *n.* [Telugu *adda* (cerebral *d*)] A measure used in India, equal to 84 pints.

addability (ad-a-bil'i-ti), *n.* [*addable* see *ability*] The quality of being addable. Also written *addibility*.

addable (ad'a-bl), *a.* [*add* + *-able*] Capable of being added. Also written *addible*.

addax (ad'aks), *n.* [L. *in* acc. *addacem*, occurring in Pliny, who treats of the animal under the name of *strepsaceros*, i. e., the twisted-horn, a north African name, still used, it is said, in the forms *addas*, and *akas*, *akesh*.] 1 The

native name of a species of African antelope, a ruminant, hoofed, antidactyl quadruped, of the subfamily *Antelopina*, family *Bovidae*, the *Antelope addax* of Lichtenstein, *Oryx addax* of some, *Oryx nasomaculatus* of others, now *Addax nasomaculatus*, the word *addax* thus becoming technically a generic name, after having been a vernacular appellation. The addax is about 6 feet long, and about 3 feet high at the shoulder, stout in the body, like the ass, and with horns not 4 feet long, slender, ringed, spirally twisted into two or three turns

Addax of Eastern Africa (*Oryx nasomaculatus*)

and present in both sexes. The ears and tail are long, the latter terminated by a switch of hair. There are tufts of hair upon the throat, forehead and tail, the hoofs are large and semicircular adapted for treading upon the shifting sands of the desert. The general color of the animal is whitish, with a reddish brown head and neck, black hoofs, and a white blaze on the face whence the name *nasomaculatus*. The addax is related to the oryx, but is generally as well as specifically distinct. The identity of this animal with that mentioned by Pliny (see *Cynology*) though known to Gesner, was overlooked by subsequent naturalists until rediscovered by the travelers Ruppell, Hemphill, and Thunberg, who found the animal known to the natives under a name like that ascribed to the striped cross by Pliny.

2 [*cap*] A genus of antelopes of the subfamily *Orygina*, of which the addax, *Oryx nasomaculatus*, is the only species.

addetted, *a.* [See *addit*, at first *additit*, *additit*, for earlier *additit* see *additit*.] Indebted. — **addicimate** (ad-des'i-mat), *v. t.* [*L* *addicimatus*, pp. of *addicimare*, < *ad*, to, + *decimare*, take the tenth see *decimate*.] To take or ascertain the tithe or tenth part of. tithe, decimate. [Cockerham]

addoom (a-dēm'), *v. t.* [*ad* + *deem* (cf. *ad-deem*)] 1 To award, adjudge, sentence.

Unto him they did addoom the price
Spenser, I. Q. V. iii. 1.

2 To deem, judge, esteem, account.

She seems to be addoomed so worthless base.

addendum (a-dē-n'dum), *n.*, pl. *addenda* (-dā) [L. gerund of *addere*, add see *add*] A thing to be added, an addition, an appendix to a work. — **Addendum-circle** (of a gear), in *mach*, a circle which touches the points of the teeth. — **Addendum of a tooth**, in *mach*, that part of the tooth of a gear which lies between the pitch circle and the point.

adder (ad'er), *n.* [*ME* *adder*, *adder*, *adder*, *adder*, *adder*, etc., forms interchanging with the more correct *nadder*, *nadder*, *nadder*, *nadder*, *nadder*, *nadder*, etc. (through confusion of a *nadder* with an *adder*, cf. *apron*, *anger*, *orange*, *umpire*, which have lost their initial *n* in the same way), < AS *nadic*, *nadder* = OS *nadra* = D *adder* = OLG *natura*, *natra*, MHG *nater*, *nater*, G *natter* = Icel *nathra*, f, *nathi*, m, = Goth *nadr* = Ir *nathair* = W *nadr*, a snake, a serpent. The L *natrix*, a water-snake, is a different word, prop. a swimmer, < *nare*, swim. The word has no connection with *adder*, poison, q. v.] 1 The popular English name of the viper, *Vipera communis*, now *Pelias berus*, a common venomous serpent of Europe (and the only poisonous British reptile), belonging to the family *Viperidae*, of the suborder *Solenoglyphia*, of the order *Ophidia*. It grows to a length

Adder or Viper (*Pelias berus*)

of about 2 feet, of which the tail constitutes one eighth, the head is oval, with a blunt snout, the color varies from brown or olive to brownish yellow, variegated with a row of large confluent rhombic spots along the middle line of the back, and a row of small black or blackish spots on each side. Though the adder is venomous, its bite is not certainly known to be fatal.

2 A name loosely applied to various snakes more or less resembling the viper, *Pelias berus*.

adder's-flower (ad'er-flou'er), *n.* The red campion, *Lychnis diurna*.

adder's-meat (ad'er-mēt), *n.* A name sometimes given (a) to the English wake-rob, *Arum maculatum* (see *cut* under *Arum*), and (b) to a chickweed, *Stellaria Holostea*.

adder's-mouth (ad'er-mūth), *n.* A delicate orchid, *Microstylis ophioglossoides*, found in cool damp woods in North America, with a raceme of minute greenish flowers, and a single leaf shaped somewhat like the head of a snake.

adder-spit (ad'er-spit), *n.* [*adder* + *spit*] A name of the common brake, *Pteris aquilina*.

adder's-spear (ad'er-sper), *n.* Same as *adder's-tongue*.

adder-stone (ad'er-stōn), *n.* [*adder* + *stone*]

The name given in different parts of Great Britain to certain rounded perforated stones or glass beads found occasionally, and popularly supposed to have a supernatural efficacy in curing the bites of adders. They are believed by suchologists to have been anciently used as spindle whorls, that is, small fly wheels intended to keep up the rotary motion of the spindle. Some stones or beads of this or a similar kind were by one superstitious tradition said to have been produced by a number of adders putting their heads together and hissing till the foam became consolidated into beads supposed to be powerful charms against disease. Also called *orum aquinum*, *serpent stone*, *adder bead*, *adder gem*, and in Wales *glain neder* and *diwdrad bead*. The last name is given upon the supposition that these objects were used as charms or amulets by the Druids.

And the potent adder stone,

Yours entirely *addicted* to mudman. [Johnson Cynthia's Ravels IV 3]

The land about exceeding is *addicted* to wood. [Lynn, Diary, April 18, 1680]

Specifically—3 In *Rom law*, to deliver over formally by the sentence of a judge, as a debtor to the service of his creditor.—**Syn** 1 *Addict* *Devote* *Apply* *Custom* These words, which they approach in meaning, are most used reflexively. *Addict* and *devote* are often used in the passive. *Addict* has quite lost the idea of dedication. It is the yielding to impulse, and generally a bad one. *Devote* retains much of the idea of service or loyalty by vow, hence it is rarely used of that which is evil. *Addicted* to every form of folly, *devoted* to hunting, astronomy, philosophy. *Apply* is neutral morally and implies industry or assiduity, as he *applied* himself to his task, to learning.

The Courtiers were all much *addicted* to Play. [Baconham, Ingoldsbay Legends, II 7]

We should reflect that the earliest intellectual exercise to which a young nation *devotes* itself is the study of its laws. [Maurice, Village Communities, p 80]

That we may *apply* our hearts unto wisdom. [Ps xc 12]

see *add*] 1. The act or process of adding or uniting, especially so that the parts remain independent of one another opposed to *subtraction* or *diminution* as, a sum is increased by *addition*, to increase a heap by the *addition* of more. Specifically in *arith* the uniting of two or more numbers in one sum, also that branch of arithmetic which treats of such combinations. *Simple addition* is the adding of numbers irrespective of the things denoted by them or the adding of sums of the same denomination as pounds to pounds ounces to ounces, etc. *Compound addition* is the adding of sums of different denominations, as pounds shillings and pence to pounds shillings and pence like being added to like. The addition of all kinds of multiple quantities is performed according to the principle of compound addition, thus the addition of two imaginary quantities is effected by adding the real parts together to get the new real part and the imaginary parts together to get the new imaginary part. *Logical addition* is a mode of combination of terms, propositions, or arguments resulting in a compound (the sum) true if any of the elements are true and false only if all are false.

2 The result of adding, anything added, whether material or immaterial

II, *n* **1** A person who adheres, one who follows or upholds a leader, party, cause, opinion, or the like, a follower, partizan, or supporter

Rip's sole domestic *adherent* was his dog Wolf, who was as much heaped up as his master Irving Rip Van Winkle

2 Anything outwardly belonging to a person, an appendage

His humour, his carriage, and his extrinsic *adherents* Gov of Tongue

=**Syn** **1** Disciple, pupil, upholder, supporter, dependant **adherently** (ad-hēr'ent-ly), *adv* In an adherent manner

adherer (ad-hēr'er), *n* One who adheres, an adherent [Rare]

adherescence (ad-hēr-es'ens), *n* The state of being so closely connected with or attached to anything as to form with it a quasi-compound or unit [Rare]

adherescent (ad-hēr-es'ent), *a* [*< L adherescens (-t-), pp of adherere*, *adhere* see *adhere* and *-escent*] Tending to adhere or become adherent, adhering [Rare]

adhesion (ad-hēr'zhon), *n* [*< F adhesion, < L adhaerere (-t-), < adhaerere, pp of adherere* see *adhere*] **1** The act or state of adhering, or of being united and attached, close connection or association as, the *adhesion* of parts united by growth, cement, etc., inflammatory *adhesion* of surfaces in disease

One mendicant whom I know and who always sits upon the steps of a certain bridge succeeds, I believe, as the season advances, in heating the marble beneath him by firm and unswerving *adhesion* Howells, Ven Life, II

2 Steady attachment of the mind or feelings; firmness in opinion; adherence as, an *adhesion* to vice

Obstinate *adhesion* to false rules of belief Whitlock, Manners of the English, p 216

The council assigned as motives for its decrees an *adhesion* of heart on the part of the victims to the cause of the insurgents Motley, Dutch Republic, II 404

3 Assent, concurrence

To that treaty Spain and England gave in their *adhesion* Macaulay, Hist Lang, xiv

4 That which adheres, accretion

Casting off all foreign, especially all noxious, *adhesions* Carlyle Misc, I 14

5 In *phys*, molecular attraction exerted between the surfaces of bodies in contact, as between two solids, a solid and a liquid, or a solid and a gas See *extract*, and *cohesion*

Adhesion, a term used to denote the physical force in virtue of which one body or substance remains attached to the surface of another with which it has been brought into contact It is to be distinguished from *cohesion* which is the mutual attraction that the particles of the same body exert on each other Fruey Brit, I 153

6 In *bot*, the union of parts normally separate—**7** In *pathol*, especially in the plural, the adventitious bands or fibers by which inflamed parts have adhered, or are held together—**8** In *anatomy*, the union of divided parts by a particular kind of inflammation, called the *adhesive*

9 In *mech*, often used as synonymous with *friction* (which see)—**Adhesion-car**, a railroad car provided with means for increasing the adhesive or tractive power beyond that due merely to the weight imposed upon the rails This is usually effected by a center rail gripped horizontally by a pair of friction wheels placed on the opposite sides, or by a cogged wheel working into a rack laid parallel with the road bed In some cases the treads of the driving wheels are grooved and the face of the rails flanged to correspond to them—**Adhesion of wheels to rails**, the friction between the surfaces in contact acting to prevent slipping, in amount dependent upon the condition of those surfaces and the pressure for driving wheels as of locomotives it is a fraction of the weight borne by them, ranging from about one twentieth when the rails are "grassy" to one fifth when they are clean and dry =**Syn** *Adhesion, Adherence* See *adhere*

adhesive (ad-hēs'siv), *a* [*< F adhésif, -ive, < L as in "adhesivus, < adhaerere, pp of adherere* see *adhere*] **1** Sticky, tenacious, as glutinous substances

She trusts a place unsound, And deeply plunges in the *adhesive* ground Crabbe Parish Register

2 Figuratively, cleaving or clinging, adhering, remaining attached, not deviating from

If slow, yet sure, *adhesive* to the track Thomson, Autumn

Both were slow and tenacious (that is *adhesive*) in their feelings De Quincey, Secret Societies, II

3 Gunned, fitted for adhesion as, *adhesive* envelopes—**Adhesive felt**, a felt manufactured in Great Britain for use in sheathing wooden ships—**Adhesive inflammation**, in *med* and *surg*, a term applied to the union of the lips of an incised wound without suppuration also to inflammations leading to adhesion between normally free surfaces as between the intestine and the body wall

Adhesive knowledge, in *metaph*, knowledge which implies adhesion or assent, as well as apprehension See *apprehension*—**Adhesive plaster**, in *surg*, a plaster made of litharge plaster, wax, and resin—**Adhesive slate**, a variety of slaty clay which adheres strongly to the tongue, and rapidly absorbs water

adhesively (ad-hēs'siv-ly), *adv* In an adhesive manner

adhesiveness (ad-hēs'siv-ness), *n* **1** The state or quality of being adhesive, or of sticking or adhering, stickiness, tenacity—**2** In *phys*, a mental faculty manifested in attachment to objects, animate or inanimate, lasting friendships, love of social intercourse, etc., supposed to be located in a special part of the brain It is said to be strongest in women See *physiology*

adhibit (ad-jīb'it), *v* [*< L adhibere, pp of adhibere*, hold toward, bring to, apply, *< ad*, to, + *habere*, hold, have see *habit*] **1** To use or apply, specifically, to administer as a remedy, exhibit medicinally

Wine also that is dilute may safely and properly be *adhibited* T Whitaker, Blood of the Grape, p 33

2 To attach as, he *adhibited* his name to the address

The greatest loads *adhibited* faith to his words Hall, Chronicle, Hen VII, an 7

3 To take or let in, admit [Rare in all uses] **adhibition** (ad-hīb'ish-on), *n* [*< L adhibere (-t-), application, < adhibere* see *adhibit*] Application; use, specifically, use as a remedy [Rare]

The *adhibition* of dilute wine T Whitaker, Blood of the Grape, p 55

ad hoc (ad hok) [*L* *ad*, to, *hoc*, acc neut of *hic*, this see *hic*] To this, with respect to this (subject or thing), in particular

ad hominem (ad hom'i-nem) [*L* *ad*, to, *hominem*, acc of *homo*, man. see *Homo*] To the man, to the interests or passions of the person—**Argumentum ad hominem**, an argument drawn from premises which, whether true or not, ought to be admitted by the person to whom they are addressed, either on account of his peculiar beliefs or experience, or because they are necessary to justify his conduct or are otherwise conducive to his interests Aristotle (I op. a, vii, 11) remarks that it is sometimes necessary to refute the disputant rather than his position and some medieval logicians taught that refutation was of two kinds, *solutio recta* and *solutio ad hominem* the latter being imperfect or fallacious refutation Times, Blundeville says "Confutation of person is done either by taunting, railing, railing checks for checks, or by scolding" and Wilson says "Fisher was purpose by disputation to answer fully to the matter or else send only (if power want to compass that) we seek some other means to satisfy the man

My design being not a particular victory over such a sort of men but an absolute establishing of the truth I shall lay down no grounds that are merely *argumenta ad hominem* Dr H More, Immortal of Soul, II 1

adhort (ad-hōrt'), *v* [*< L adhortari*, encourage, urge to, *< ad*, to, + *hortari*, urge, incite see *exhort*] To exhort, advise

That eight times martyred mother in the Macabees, who she would *adhort* her son to a passive fortitude, desires him to look upon the heavens, the earth, all in them contained Petham

adhortation (ad-hōrt-tā'shon), *n* [*< L adhortatio(-n-), encouragement, < adhortari* see *adhort*] Advice, exhortation; encouragement

adhortatory (ad-hōrt-tā-lō-rī), *a* [*< L* as in **adhortatorius, < adhortari*, encourage, advise, *< adhortari* see *adhort*] Advisory, conveying counsel, warning, or encouragement App Potter

adiabatic (ad'i-a-bat'ik), *a* and *n* [*< Gr* *adiabatos*, not to be passed over, *< a-* priv, not, + *diabatos*, verbal adj of *diabainein*, pass over see *diabatical*] **1** *a* Without transference, used in *thermodynamics* of a change in volume, whether by expansion or contraction, unaccompanied by a gain or loss of heat—**Adiabatic curve or line**, a line exhibiting the relation between the pressure and the volume of a fluid, upon the assumption that it expands and contracts without either receiving or giving out heat The curves are drawn upon a rectangular system of coordinates, the abscissa representing the volume of the substance and the ordinates the pressure upon it the curves thus being the loci of points representing different possible states of the body which passes through different states represented by different points on the same curve without imparting heat to other bodies or receiving heat from them The adiabatic lines are steeper than the isothermal lines, as shown in the figure, where the curves *a* are adiabatics

If a series of *adiabatic lines* be drawn so that the points at which they cut one of the isothermal lines correspond to successive equal additions of heat to the substance at that temperature, then this series of *adiabatic lines* will cut off areas of equal areas from the strip bounded by any two isothermal lines Clerk Maxwell, Theory of Heat p 166

II, *n* An adiabatic line

Mr W Peck gave a communication on the isothermals and *adiabatics* of water near the maximum density point Nature, XXX 403

adiabatically (ad'i-a-bat'ik-al-ly), *adv* In an adiabatic manner

adiabolist (ad-i-ab'ō-list), *n* [*< Gr* *a-* priv + *diabolos*, devil, + *-ist*] A disbeliever in the existence of the devil [Rare]

adiactinic (ad'i-ak-tin'ik), *a* [*< Gr* *a-* priv + *diactine*] Impervious to the actinic or chemical rays of light

Adiantum (ad-i-an'tum), *n* [*L*, *< Gr* *adiantos*, maidenhair, prop adj, unwitting (in reference to the resistance which the fronds offer to wetting), *< a-* priv + *diavros*, capable of being wetted, verbal adj of *diavros*, wet] A large genus of ferns, widely distributed, and great favorites in hothouses on account of their beautiful forms It includes the common maidenhair ferns, *A. Capillus Veneris* and *A. pedatum*, the latter peculiar to North America They have been used in the preparation of capillaries

adiaphora, *n* Plural of *adiaphoron*

adiaphoracy (ad-i-af'ō-rā-si), *n* [Improp for *adiaphory* see *-acy*] Indifference

adiaphoresis (ad-i-af'ō-rō-sis), *n* [NL, *< Gr* *a-* priv + *diaporesis*, throw off by perspiration, lit carry off or away, *< diá*, apart, + *pherein* = *E bear* 1 see *a-18* and *diaphoresis*] In *pathol*, deficiency of perspiration Also written *adiaphorosis*

adiaphorism (ad-i-af'ō-rizm), *n* [*< adia-phorous + -ism*] Religious tolerance or moderation in regard to indifferent or non-essential matters; hence, latitudinarianism, indifferentism

The English Thirty nine Articles on the whole are elevated by the same lofty *adiaphorism* as that which penetrated the Westminster Confession of Faith Dean Stanley, in Macmillan's Mag, XLIV 291

adiaphorist (ad-i-af'ō-ris-t), *n.* [*< adiaphorous + -ist*] A person characterized by indifference or moderation, especially in religious matters. Specifically [*cap.*], a follower or supporter of Melancthon in the controversy which arose in the reformed church in the sixteenth century regarding certain doctrines and rites publicly admitted by Melancthon and his party, in the document known as the *Interim*, to be matters of indifference. See *interim*. Also called *adiaphorite*.

He [Lord Burleigh] may have been of the same mind with those German Protestants who were called *Adiaphorists*, and who considered the popish rites as matters indifferent. *Macaulay*, Burleigh.

adiaphoristic (ad-i-af-ō-ris'tik), *a* 1 Pertaining to things which are morally indifferent, *adiaphorous* — 2. Relating to the *adiaphorists*. See *adiaphorist*.

adiaphorite (ad-i-af'ō-ris-t), *n.* [*< adiaphorous + -ite*] Same as *adiaphorist*.

adiaphoron (ad-i-af'ō-rōn), *n.*; pl. *adiaphora* (-rā) [*< Gr. ἀδιάφορον*, neut. of *ἀδιάφορος*, indifferent see *adiaphorous*] In *theol.* and *ethics*, a thing indifferent, a tenet or practice which may be considered non-essential.

Life and death are among the *adiaphora* — things indifferent, which may be chosen or rejected according to circumstances. *G. P. Fisher*, *Begin of Christianity*, p. 176.

He [Luther] classed images in the temples as among the *adiaphora*, and condemned only their cultus. *Encyc. Brit.*, XII 714.

adiaphorosis (ad-i-af-ō-rō-sis), *n.* [*< Gr. ἀδιάφορος*, assimilated to term *-osis*, *q. v.*] Same as *adiaphorist*.

adiaphorous (ad-i-af'ō-rus), *a* [*< Gr. ἀδιάφορος*, not different, indifferent, *< a-* priv + *διαφορός*, different, *< διαφέρω* (= *to differ*, *> E. differ*), *< δια* = *L. di-*, apart, + *φέρω* = *L. ferre* = *E. bear*] 1 Indifferent, neutral, morally neither right nor wrong.

Why does the Church of Rome charge upon others the shame of novelty for leaving of some rites and ceremonies which by her own practice we are taught to have no obligation in them, but to be *adiaphorous*? *Jer. Taylor*, *Liberty of Prophesying*, § 5.

Hence — 2. Applied by Boyle to a spirit neither acid nor alkaline — 3. In *med.*, doing neither good nor harm, as a medicament.

adiaphory (ad-i-af'ō-rī), *n.* [*< Gr. ἀδιάφορος*, indifference, *< ἀδιάφορος* see *adiaphorous*] Neutrality, indifference.

adiapneustia (ad-i-af-nūs'ti-ā), *n.* [*< Gr. ἀδιαπνευστία*, *< a-* priv + *διαπνέω* = *breath*, breathe through, perspire, *< δια*, through, + *πνέω*, breathe] In *pathol.*, defective perspiration, *adiapneustic*. *Bunglow*.

adiathermanous (a-di-a-thēr'ma-nus), *a* [*< Gr. ἀ-priv* (a-18) + *diathermanous*, *q. v.* Cf. *adiathermic*] Same as *adiathermic*.

A body impervious to light is opaque, impervious to dark heat it is *adiathermanous*.

A. Danall, *Prin. of Physics*, p. 448.

adiathermic (a-di-a-thēr'mik), *a* [*< Gr. ἀ-priv* (a-18) + *diathermic*] Impervious to radiant heat.

adicity (a-dis'i-ti), *n.* [*< -adī* (1) + *-icity*, as in *adumbracy*, *periochicity*] In *chem.*, combining capacity, according as an element or a compound is a monad, dyad, etc., same as *valency*. *N. F. D.*

adieu (a-dū', *F.* pron a-dyō'), *interj.* [Early mod. *E. adieu*, *adieu*, *adu*, *< ME. adieu*, *adewe*, *< OF. a Dieu*, a *Dieu*, mod. *F. adieu*, to which the mod. *E.* conforms in spelling, = *It. addio* = *Sp. adios* or *a Dios* = *I'g. adios* or *a Dios*, *< L. ad Deum*, ad, to; *Deum*, acc. of *Deus*, God see *deity*. Cf. *good-by*, orig. *God be with you*] Laterally, to God, an ellipsis for *I commend you to God* — an expression of kind wishes at the parting of friends, equivalent to *farewell*, hence, a parting salutation in general as, *adieu* to my hopes.

Adieu, and *adieu*, *bliss!*

Tentament of Love, II 292

Adieu, *adieu* my native shore

Fades o'er the waters blue

Byron, *Child Harold*, I 13

Delightful summer then *adieu*

Hood, *Summer*

= *Syn. Adieu*, *Farewell*, *Good by* These words have completely lost their original meanings. In use the difference between them is only one of formality, *good by* being the most common, and *adieu* the most formal. By the Society of Friends (and perhaps some other sects) *farewell* is preferred, as not involving the careless mention of the name of God. In strict propriety, *farewell* is a parting salutation to persons going away.

adieu (a-dū', *F.* pron a-dyō'), *n.*, pl. *adieux* or (*in French spelling*) *adieux* (a-duz', a-dyō') A farewell or commendation to the care of God as, an everlasting *adieu*, to make one's *adieux*.

We took our last *adieu*

And up the snowy Splügen drew

adios (a-dī'os), *interj.* [*Sp.* = *Pg. adios* = *It. addio* = *F. adieu* see *adieu*] Adieu, good-by. [*Southwestern U. S.*]

adipate (ad-i-pāt'), *n.* [*< L. adipis* (*adip-*), fat, + *-ate* see *adipic* Cf. *L. adipatus*, supplied with fat] A salt of adipic acid.

adipescence (ad-i-pēs'sent), *a* [*< L. adipis* (*adip-*), fat, + *-escere*] Becoming fatty.

adipic (a-dip'ik), *a* [*< L. adipis* (*adip-*), fat, + *-ic* see *adipis*] Of or belonging to fat — **Adipic acid**, *C₆H₈O₄*, an acid obtained by treating oilic acid or fatty bodies with nitric acid. It forms soft, white nodular crusts, which seem to be aggregates of small crystals.

adipocerate (ad-i-pō'sē-rāt'), *v. t.*, *pret.* and *pp.* *adipocerated*, *pp. adipocerating* [*< adipocere* + *-ate*] To convert into adipocere (*trans.*).

adipoceration (ad-i-pō'sē-rā'shon), *n.* The act of changing or the state of being changed into adipocere (*trans.*).

adipocere (ad-i-pō'sēr'), *n.* [= *F. adipocere*, *< L. adipis* (*adip-*), fat, + *cera*, wax] A soft unctuous or waxy substance, of a light-brown color, produced by the decomposition of animal matter when protected from the air, and under certain conditions of temperature and humidity. It consists chiefly of ammonium marguerate, with an admixture of the margarates of potassium and calcium. — **Adipocere mineral**, a fatty matter found in some peat mosses and in the arillaceous iron ore of Morthy (Ivry), Wales. *Adipocerate*, it is odorless when cold but when heated it emits a slightly bituminous odor. Also called *adipoceric* and *hachettin*.

adipoceriform (ad-i-pō'sēr'i-form), *a* [*< adipocere* + *L. -formis*, *< forma*, form] Having the appearance or form of adipocere.

adipoceric (ad-i-pō'sēr'it), *n.* [*< adipocere* + *-ic*] Adipocere mineral. See *adipocere*.

adipoceros (ad-i-pō'sēr-us), *a* Relating to adipocere, containing adipocere.

adipocure (ad-i-pō'sēr'), *n.* [*see adipocere*] Same as *adipocere*.

adipo-fibroma (ad-i-pō-fi-brō'ma), *n.* Same as *lipofibroma*.

adipoma (ad-i-pō'ma), *n.* Same as *lipoma*.

adipose (ad-i-pōs), *a* and *n.* [= *F. adipeux*, *Sp. adiposo*, etc., *< NL. adiposus*, *< L. adipis* (*adip-*), fat see *adeps*] 1. *a* Fatty, consisting of, resembling, or having relation to fat. **Adipose arteries**, the branches of the diaphragmatic, capsular, and renal arteries which nourish the fat around the kidneys.

Adipose body, in *entom.*, a peculiar fatty substance occupying a considerable portion of the interior of the body and especially abundant in the full grown larvae of insects consisting of a yellowish lobulated mass lining the walls of the body cavity and filling up the spaces between the viscera. **Adipose fin**, a posterior dorsal appendage generally saciform or pedunculated and more or less fat like, but sometimes cariniform, developed in certain fishes especially the salmonid and silurids. **Adipose membrane**, the cell wall of a fat cell the extremely delicate structureless membrane which surrounds a fat globule or vesicle of fat. **Adipose sac**, a fat cell or fat vesicle whose limiting cell wall consists of an adipose membrane, and whose contents are a globule of fat.

Adipose tissue, a connective tissue of loose structure containing masses of fat cells, that is, cells in which the protoplasm has been largely replaced by fat. **Adipose tissue** underlies the skin, invests the kidneys, etc. — **Adipose tumor**, a *lipoma*.

II. n. Fat in general, specifically, the fat on the kidneys.

adiposis (ad-i-pō'sis), *n.* [*< NL. < L. adeps* (*adip-*), fat, + *-osis*] 1 General corpulency — 2 The accumulation of fat in or upon a single organ.

adiposity (ad-i-pō'si-ti), *n.* [*< NL. as if *adipositus*, *< adiposus* see *adipose* and *-ity*] Fatness, adiposis.

adipous (ad-i-pus), *n.* [*< L. adeps* (*adip-*), fat, + *-ous* Cf. *adipose*] Fat, of the nature of fat, adipose.

adipsia (a-dip'si-ā), *n.* [*< Gr. ἀδύψα*, not thirsty see *adip-sous*] In *med.*, absence of thirst. Also called *adipsy*.

adipsous (a-dip'sus), *a* [*< Gr. ἀδύψος*, not thirsty, *< a-* priv + *δύψω*, thirst see *adipsia*] Tending to quench thirst, as certain fruits.

adipsy (ad-i-pis), *n.* Same as *adipsia*.

adit (ad'it), *n.* [*< L. aditus*, an approach, *< adire*, pp. *aditus*, approach, *< ad*, to, + *ire*, go see *itinerant* Cf. *cut*] 1 An entrance or a passage, specifically, in *mining*, a nearly horizontal excavation, or drift (which see), specially used to conduct from the interior to the surface the water which either comes into the workings from above or is pumped up from below. The word *tunnel* is in general use in the United States and especially in the western mining regions for *adit* but the former properly signifies an excavation open at both ends such as is used in railroads. When there are two or more *adits*, the lowest is called the *deep adit*. *Adits* are occasionally several miles in length. The so-called Sutro tunnel, draining the Comstock lode at Virginia City, Nevada, is the most extensive work of this kind yet constructed in the United States. It is about 20,000 feet in length, and intersects the lode at a depth of about 2000 feet. Also called *adit level*. See *cut* under *level*.

2 *Milit.*, a passage under ground by which miners approach the part they intend to sap. *Hilhelm*, *Mil. Diet.* — 3 Admission, access, approach. [Rare]

Yourself and yours shall have
Free *adit* *Temperance*, *Friendship*, &c.

adition (a-dish'on), *n.* [*< L. aditio* (n-), approach, *< adire* see *adit*] The act of approaching.

adit-level (ad'it-lev'el), *n.* Same as *adit*, 1.

adive (a-div'), *n.* [Appur a native name] Same as *consoak*.

adj. An abbreviation of *adjacent*.

adjacence (a-jā'sens), *n.* [*< ML. adjacentia*, *< L. adiacen* (t-), see *adjacent*] The state of being adjacent, adjacency.

adjacency (a-jā'sen-si), *n.*, pl. *adjacencies* (-sīz) 1 The state of being adjacent, or of lying close or contiguous, proximity or near neighborhood as, the adjacency of lands or buildings — 2 That which is adjacent. [Rare]

Distracted by the vicinity of *adjacencies*.

ing to the family *Ciconiidae*. It is the *Ardea dubia* of Gmelin, the *A. argala* of Latham, the *Ciconia marabout* of Temminck, and the argala of the native Indians. Great confusion has been occasioned by the transference by Temminck of the native name argala, to a related but distinct African species. The name *marabout* has likewise been given to both species, since both furnish the ornamental plumes so named in commerce. The African species should be distinguished as the marabout, the Indian species being left to bear its native name argala. The name adjutant, or adjutant bird, is a nickname bestowed upon the bird from some fancied likeness of its bearing to the stiff martinet of the military functionary known as an adjutant. The bird is a gigantic stork, 6 or often 8 feet high, and its expanded wings measure 14 feet from tip to tip. It has an enormous bill, nearly bare head and neck, and a sausage like pouch hanging from the under part of the neck. It is one of the most voracious carnivorous birds known, and in India from its devouring all sorts of carrion and noxious animals is protected by law. Also called *adjutant crane*, *adjutant stork*, and *pouched stork*. The name is sometimes extended to a related species, *L. javanicus*, known as the lesser adjutant or adjutant bird

Conduct, control, superintendence, regulation, execution.

administrational (ad-min-is-trā'shon-al), *a.* Pertaining or relating to administration.

The administrational merits of Darius are so great that they have obscured his military glories.

G. Rowlandson, *Five Great Monarchs*, III. 429.

administrative (ad-min'is-trā-tiv), *a.* [*< L.* *administrativus*, practical, *< administrare*, *pp.* *administratus* see *administer*, *t.*] Pertaining to administration, executive, administering.

The production and distribution of wealth, the growth and effect of administrative machinery, the education of the race, these are cases of general laws which constitute the science of sociology.
H. K. Chubb, *Text* II. 84.

Sometimes the term *executive*, which strictly means an authority which puts the laws in force, is opposed to the term *administrative*, which implies the performance of every other sort of mundane Governmental act, such as collecting taxes, organizing and directing the Army, Navy, and Police, supervising trade, locomotion, postal communication, and carrying out in detail legislative measures for promoting public health, education, morality, and general contentment.
S. Ames, *Sci. of Pol.* p. 99.

administratively (ad-min'is-trā-tiv-ly), *adv.* In an administrative manner, in relation to administration, from an administrative point of view, as regards administration.

The English country gentleman, who was lord of the manor, was administratively a person of great authority and influence.

admirable (ad'mi-ra-bl), *a.* [*< F.* *admirable*, *< L.* *admirabilis*, *< admirare*, *admire* see *admire*.] *1.* Fitted to excite wonder, marvelous, strange, surprising.

It seems equally admirable to me that holy king Edward the Sixth should do any wrong, or harsh Edward the Fourth do any right to the Muses.
Fuller.

In man there is nothing admirable, but his ignorance and weakness.
Jos. Taylor, *Diss. from Popery* II. 1: 87.

2. Worthy of admiration, having qualities to excite wonder, with approbation, esteem, reverence, or affection, very excellent, used of persons or things.

What a piece of work is a man! How noble in reason! how infinite in faculty! in form and moving, how express and admirable!
Shak. *Hamlet*, II. 2.

admirableness (ad'mi-ra-bl-ness), *n.* The quality of being admirable, the power of exciting admiration.

admirably (ad'mi-ra-bl-ly), *adv.* In an admirable manner, in a manner to excite wonder, approbation, and esteem, excellently.

mirandus, *ammiratus*, etc., and prop. *amiratus* (the forms in *adm-*, *alm-* being due to popular etymology, which associated the word with *L.* *admirare*, *admire*, *admirabilis*, *admirable*, or with *Sp.* *Ar.* *al-*, the, and the termination being variously accommodated), *< Ar.* *amir*, *emir*, a ruler, commander (see *amir* and *emir*), the *-al* being due to the *Ar.* article *al*, present in all the Arabic and Turkish titles containing the word, as *amir-al-umara*, ruler of rulers, *amir-al-bahr*, commander of the sea, *amir-al-mumun*, commander of the faithful. The present sense of *admiral* is due to *Ar.* *amir-al-bahr* Latinized as *admiratus maris* and Englished under Edward III as "amiral of the sea" or "admyrall of the navy," afterward simply *admiral*. [*N. E. D.*]

1. *n.* *1.* An emir or prince under the Sultan, any Saracen ruler or commander. [The common Middle English and Old French sense.]—*2.* A naval officer of the highest rank, a commander-in-chief of a fleet.

In the United States navy, as in most foreign services, there are three degrees of this rank, viz. *admiral*, *vice admiral*, and *rear admiral*. These titles did not exist in the United States till the grade of rear admiral was created in 1862, that of vice admiral in 1864, and that of admiral in 1898. The last was held by Farragut and Porter, and by law, ceased to exist on the death of the latter in 1891. The office of vice admiral, which also was held by these officers and by Admiral Rowan, was abolished in 1890 on the death of the last named incumbent. An admiral displays his distinguishing flag at the mainmast, a vice admiral at the foremast and a rear admiral at the mizzenmast. In the British navy, admirals were formerly divided into three classes, named after the colors of their respective flags: admirals of the red, of the white, and of the blue, with vice admirals and rear admirals of each flag, but in 1864 this distinction was abolished, and all British men of war now display the white ensign.

3. The recognized chief commander or director of a mercantile fleet, as one of fishing-vessels off Newfoundland or in the North Sea. A royal proclamation in 1708 ordered that the master of the first vessel that entered a harbor or creek in Newfoundland for the fishing season should be admiral thereof, the second vice admiral, and the third rear admiral.

4. The ship which carries the admiral, hence, the most considerable ship of any fleet, as of merchantmen or of fishing-vessels.

His spear, to equal which the tallest pine,
Hewn on Norwegian hills to be the mast
Of some great admiral, were but a wand,
He walk'd with to support unsteady steps
Over the burning main.
Milton, *P. L.* I. 294.

5. A collector's name for butterflies of the family *Papilionidae*, especially the *Ipanthis camilla*, distinguished as *white admiral*, and the *Vanessa atalanta*, or *red admiral*.—*6.* A name given by collectors of shells to a univalve shell, the admiral-shell (which see). *Admiral of the fleet*, a title of distinction conferred on a few admirals in the British service, corresponding to that of field marshal in the army. *Lord high admiral*, in Great Britain, the officer at the head of the naval administration when as has been rarely the case since 1612 the office is held by a single person. See *admiralty*.—*Yellow admiral*, a name applied in the British navy to a rear admiral who is retired without having served abroad after his promotion.

II. *a.* Carrying an admiral, chief in a fleet. The admiral galleys struck upon a rock.
Kneller, *Hist. Turks*.

admiral-shell (ad'mi-ral-she-l), *n.* A shell of the genus *Cornus*, the *Cornus ammiratus*, a species formerly esteemed as much for its rarity as for its beauty.

admiralship (ad'mi-ral-ship), *n.* [*< admiral* + *-ship*.] The office or position of an admiral. [Rare.]

admiralty (ad'mi-ral-ti), *n.* [Early mod. *E.* *admiraltie*, *amiraltie*, *amiraltie*, *< ME.* *amiraltie*, *amiraltie*, *amiraltie*, *< OF.* *admiraltie*, *amiraltie* see *admiral* and *-ty*.] *1.* In Great Britain (*a.*) The office and jurisdiction of the lords commissioners appointed to take the general management of maritime affairs, and of all matters relating to the royal navy, with the government of its various departments. (*b.*) The body of officers appointed to execute the office of lord high admiral, a board of commissioners, called lords (or, in full, lords commissioners) of the admiralty, for the administration of naval affairs. (*c.*) [*cap.*] The building in which the lords of the admiralty transact business, and in which the clerks and other officials connected with this department are employed.—*2.* That branch of law which deals with maritime cases and offenses.

The power [of the judges of the Supreme Court of the United States] extends to all cases of admiralty and marine jurisdiction.
Calhoun, *Works*, I. 913.

Admiralty court, or **court of admiralty**, a tribunal having jurisdiction over maritime causes whether of a civil or criminal nature. In England it was formerly held before the lord high admiral, and afterward before his deputy or the deputy of the lords commissioners, but now it forms a branch of the probate, divorce, and admiralty di-

vision of the High Court of Justice, the judge in it being appointed by the crown as one of the judges of the High Court. The English court of admiralty is twofold, the *instance court* and the *prize court*. The civil jurisdiction of the instance court extends generally to such contracts as are made upon the sea and are founded in maritime service or consideration. It also regulates many other points of maritime law as disputes between part owners of vessels, and questions relating to salvage. It has likewise power to inquire into certain wrongs or injuries committed on the high seas, as in cases of collision. In criminal matters the court of admiralty has partly by common law and partly by a variety of statutes cognizance of piracy and all other indictable offenses committed either upon the sea or on the coasts when beyond the limits of any English county. The prize court is the only tribunal for deciding what is and what is not lawful prize, and for adjudicating upon all matters civil and criminal, relating to prize, of every acquisition made by the law of war which is either itself of a maritime character or is made, whether at sea or by land, by a naval force. In Scotland the cases formerly brought before this court, which has been abolished, are now prosecuted in the Court of Session or in the sheriff court. In the same way as ordinary civil causes in the United States the admiralty powers are exclusively vested in the federal courts. They extend over the great lakes and navigable rivers. **Droits of admiralty** See *droit*. **High Court of Admiralty**, an ancient English court held before the lord high admiral of England or his deputy (styled judge of the admiralty), with cognizance of all crimes and offenses committed either upon the sea or upon the coasts out of the body or extent of any English county. It proceeded without jury, a method contrary to the genius of the law of England. **Stephens**

2 *Exiles*, public or private reproof to reclaim an offender the first step in church discipline, followed, when unheeded, by suspension or excommunication = *Syn*. *Admonition* *Reprehension*, *Reproof*, *Monition*, *Censure* *Approach* *Rebuke*, *Reprimand* *remonstrance*, *exhortation*, *warning*, *suggestion*, *hint*, *intimation* In the primary and almost invariably sense *admonition*, *reprehension*, and *reproof* are bestowed upon conduct which is morally defective. *Censure* and *reprehension* may or may not be addressed directly to the person blamed, the utterances expressed by the other words are always so addressed. *Admonition* is caution or warning with reference to future conduct, it is often based upon past failures as, *admonition* not to repeat a fault. It is often an official act, as of the authorities of a church school, or college. *Monition* is a softer word, and is mostly confined to subjective promptings or warnings as, the *monitions* of conscience or of reason. The other words are wholly retrospective. *Reprehension* may be the mild est of them, or may be strengthened by an adjective as, the severe *reprehension*. It is unofficial, and may denote the act of an equal. *Reproof* is the act of a superior or elder, an authoritative and personal censure. *Censure* is unfavorable judgment, generally severe, possibly official. *Reproof* is censure with opprobrium. It is used chiefly as a relief to excited feelings, and is intended to humiliate rather than correct. *Rebuke* is energetic and summary, like stopping one's mouth, it implies feeling, like *reproof*, but more self control. *Reprimand* is the act of a superior, is severe, and is often official and public as a form of penalty as, sentenced to receive a *reprimand* from his commanding officer in the presence of the regiment (See the discrimination of corresponding verbs under *censure*, *v*)

A man that is an heretic, after the first and second *admonition*, reject. *Tit III 10*

The *admonitions*, fraternal or parental, of his fellow Christians, or the governors of the church, then more public *reprehensions*. *Hammond*

Those best can bear *reproof* who merit praise.
Pope, Essay on Criticism, I 583

Divine *monition* Nature yields
That not by bread alone we live.
Wordsworth, Devotional Incitements

The pain of a little *censure*, even when it is unfounded, is more acute than the pleasure of much praise.
Jefferson, Correspondence, II 410

Dread of *reproof*, both by the king and warrior in battle and by restraining misbehavior in social life, has tended to public and private advantage.
H. Spencer, Prin of Psychol, § 526

My caution was more pertinent
Than the *rebuke* you giv'd it. *Shak, Cor*, II 2

The knight inquires how such an one's wife or mother, or son or father doeth, whom he does not see at church which is understood as a secret *reprimand* to the person absent. *Addison, Spectator*

Oh How does he love me?

With adoration with futile tears
With groans that thunder love, with sighs of fire
Shak, T N, I 5

3 In *art* and *archaeol* (a) A representation of the adoration of the infant Jesus by the magi or the shepherds (b) A representation of the worship of an ancient divinity, of the deified dead, or of a king or an emperor

In Latin, *adoratio*. Such representations are common in Greek vase paintings and funeral sculptures, and in Roman reliefs and medals. The ancient adoration is usually characterized by the gesture of raising the right hand particularly with the thumb laid on the first finger, though it is sometimes exhibited, chiefly in Oriental examples, in a prostrate position

4 A method of electing a pope See extract

The third way of creating Popes is by *Adoration*, which is performed in this manner. That Cardinal who desires to favour any other Cardinal puts himself before him in the Chappel, and makes him a low Reverence, and when it falls out that two thirds of the Cardinals do the same, the Pope is then understood to be created
G H, *tr of Hist Cardinals*, III 286 (N E D)

Adoration of the blessed sacrament, in the *Rom Cath Ch*, supreme worship (*latría*) paid to the eucharist. Catholics pay to the eucharist wherever it may be present that supreme worship which is due to God alone
Cath Diet (1884), p 321. Religious communities of women for the perpetual adoration of the blessed sacrament have been founded at various times, the first by Anne of Austria, mother of Louis XIV. — Adoration of the cross, in the *Rom Cath Ch*, that part of the service on Good Friday, following the prayers, in which the cross is exposed to view and adored by clergy and people. — Adoration of the host, in the celebration of the mass, the silent worship paid by the congregation, kneeling, at the elevation of the host. = *Syn Adore, Worship, Revere, Venerate, Revere, Idolize*, doily pay homage to Adore and worship when not applied exclusively to God or gods are manifestly hyperbolic as he worshipped the ground she trod on. The others seem literal when applied to men, places, or things. Adore and worship are applied primarily to acts and words of homage the others are not. Some of them primarily includes the idea of intercessory prayer. Adore is the noblest of the words. To worship is to pay homage by outward forms or in customary places. A man of Ethiopia had come to Jerusalem for to worship. Acts VIII 27 In the Bible worship is used to express also extreme manifestations of respect paid to men. 'As Peter was coming in Cornelius met him, and fell down at his feet, and worshipped him. Acts X 25. Reverence is upon a plane a little different from that of venerate there being sometimes more fear suggested by the former and more sacredness by the latter. We should reverence position ability, and character we should venerate old age. Reverence differs from reverence chiefly in suggesting rather less solemnity or awe.

It [worship] is also an act of the will, whereby the soul adores and reverences his majesty. We must worship God understandingly, it is not like a reasonable archaic Charmack Attributes

-*Syn Adorn Ornament, Decorate, Embellish, Beautify, Deck, Array, grace, garnish, bedeck, set off* (See *decorate*) The italicized words except *deck* and *array*, are expressive of the attempt to add to the thing beauty. Adorn has the most nobleness and spirituality. It is the least external treatment that adorn a woman seem a part of her personality and bring out her comeliness, many virtues adorn his character. The hall was adorned with the portraits of their ancestors. In these examples, no other word in the list is high enough or so enough to take the place of *adorn Ornament* and *decorate* express the addition of something external, which still preserves its separate character and may perhaps be easily removed. Ornament, as kindred to *adorn* is nearer to its meaning, *decorate* expresses that which is more showy, ornamented with pictures the bare walls were decorated for the occasion with flags and wreaths. Both express the adding of beauty to that which was deficient in it before. Embellish implies previous beauty, to which luster or brilliancy is added by something which perhaps becomes a part of the original, as a book embellished with plates, a style embellished with figures of speech. The word is sometimes used of over ornamentation. Beauty is the most direct in its expression of the general idea. Of the first five words, *decorate* is the least often used figuratively. Decorated speech is speech in which the ornaments have no vital connection or harmony with the thought so that they seem merely ornamental. Deck is to cover and hence to cover in a way to please the eye as, decked with flowers. Array is used especially of covering, with splendid dress, the meaning being, extended from persons to animals, etc the fields were arrayed in green.

= **Syn** 1 *Adventurous, enterprising, rash, reckless, foolhardy, venturesome, venturous.* The *adventurous* man incurs risks from love of the novel, the arduous, and the bold, trusting to escape through the use of his bodily and mental powers, he would measure himself against difficult things. When this spirit does not go so far as to deserve the name of *rashness* or *foolhardiness*, it is considered a manly trait. The *enterprising* man is alert to undertake new and large things, not necessarily involving risk, he is constantly breaking out of routine. The *rash* man hastens to do a thing with little thought of the consequences, and generally in the heat of feeling. With the *foolhardy* man the risks are so great and the absence of thought is so entire that he seems to have the hardihood of the fool. The *reckless* man has the impetuosity of the *rash* man, but he is more careless of consequences. The *rash* man is too precipitate, the *reckless* man shows temerity, the *foolhardy* man is careless or defiant even when he undertakes the impossible.

(*concrete*) is unexpectedly confident and serene, alert, *adventurous*, and unwearied *Thorau, Walden, p. 130*

The most distinct adverbial phrases consist of a preposition and a noun or a word used as a noun, with or without adjuncts, as *on the whole, in very deed, by the way, by chance, of course*. In this dictionary many such phrases in common use are defined under their principal words. The *adversaries* may consult as to a fresh deal (in whist) *American Hoyle, p. 2*

= **Syn** 1 and 3 *Adversary, Antagonist, Opponent, Enemy, Foe*. These words vary in strength according as they express spirit, action, or relation. A *foe* has most of the spirit of enmity, or is actively hostile. The word is most used in poetry than in prose. *Enemy*, as denoting an opponent in war, or a member of an opposing party, does not necessarily imply personal hostility. *Opponent* and *adversary* are less severe in their position, and need have no animosity. *Opponent* is often a passive word, *adversary* is always active and personal. A man may be our *opponent* in an argument or a lawsuit, our *adversary* in a game, as chess, our *antagonist* in a wrestling or boxing match, or other occasion of strenuous exertion. The choice between the three words depends chiefly upon the measure of activity involved. In the Bible, *adversary* covers the meaning of all five words

I will be *an adversary* to thine *adversaries* *Ex. xlii. 22*

He that wrestles with us strengthens our nerves and sharpens our skill. Our *antagonist* is our helper *Burke, Rev. in France*

In the Socratic way of dispute you agree to everything your *opponent* advances *Addison, Spectator, No. 239*

If they are spared by the humanity of the *enemy* and carried from the field, it is but a prolongation of torment *R. Hall, Mod. Infidelity*

Those who are national or political enemies are often private friends *Crabb*

No man's defects sought they to know,
So never made themselves a *foe* *Prior, Epitaph*

adviser (ad-vi'zër), *n*. [*< advise + -er*] Cf *ML. advisor*] One who gives advice or admonition; also, in a bad sense, one who instigates or persuades. Specifically, in *politics*, one of the counselors or ministers about a ruler, who may or may not be legally responsible for their superior's official acts. In the United States government the official advisers of the President are the heads of the various departments, collectively called the Cabinet. He requests their opinions in accordance with custom, but not through any provision of the Constitution. In England, until the middle of the seventeenth century, the Privy Council formed the King's executive advisers. This body, greatly enlarged, is now summoned in full only upon extraordinary occasions, and the ordinary advisers of the crown are those members of the ministry who constitute the Cabinet, which is in effect a committee of the Privy Council. The responsibility rests with the ministry, and not with the sovereign. See *cabinet*, and *privy council*, under *council*.

That cause seems commonly the better that has the better *advocate*. Sir W Temple, Miscellanies.

This is the mode of the *advocate* rather than of the critic. Whipple, Ess. and Rev, II 188.

Advocate of the church (*ML. advocatus ecclesiae*), a person, usually a layman, appointed, according to a custom originating in the fifth century to protect the property of a church or an abbey, to plead its causes in the civil courts, and to manage its temporal affairs — **Devil's advocate** (*ML. advocatus diaboli*) (a) In the *Rom Cath Ch*, a name commonly applied to the promoter of the faith, one of the college of consistorial advocates in the papal court, from his office of urging the objections against the virtues, miracles, etc., of a person proposed for canonization. Hence — (b) One given to bringing forward accusations against personal character — **Faculty of Advocates**, in Scotland, a society consisting of the whole body of lawyers who practice in the highest courts and who are admitted members after following a certain course of study, undergoing the prescribed examinations, and paying the requisite fees. It consists of about 400 members, and from this body vacancies on the bench are supplied — **God's advocate** (*ML. advocatus Dei*), in the *Rom Cath Ch*, the procurator of the cause in a canonization, regularly one of the same order or country as the person to be canonized. See *devil's advocate*, above — **Judge-advocate**, a person, generally a military officer, detailed by the authority appointing a court martial or military commission to prosecute cases before it and to act as its legal adviser. It is, in general, the duty of the judge advocate to see that the court conforms to the law and to military custom, to secure for the accused his rights before the court, to summon witnesses, and to administer oaths — **Judge-advocate general** (a) In the United States army, a staff officer with the rank of brigadier general, who is also chief of the bureau of military justice, and whose duty it is to receive, revise, and record the proceedings of all courts martial, courts of inquiry, and military commissions. (b) In England, formerly, an official who prosecuted in all criminal cases falling under military law which concerned the crown, now, a subordinate member of the government who acts as the legal adviser of the crown in all matters of military law — **Lord advocate**, in Scotland, the principal crown counsel in civil causes, the chief public prosecutor of crimes, and an important political functionary in the management of Scottish affairs. His tenure of office coincides with that of the administration with which he is connected. He is assisted in the discharge of his duties by the solicitor general and four advocates depute, appointed by himself. The lord advocate has usually a seat in Parliament, and before the union he had *ex officio* a seat in the Scots Parliament. He is also called *crown advocate*, *queen's* (or *king's*) *advocate*.

Æcidiumycetes (ë-sid'-i-ô-mi-sëf' tēz), *n* pl [NL, < *Æcidium* + Gr *μυκήτες*, pl of *μύκης*, a mushroom, fungus] A group of minute parasitic fungi, each species of which exists in at least two forms, usually very unlike. To this group belong many rusts, blights, and mildews which in fact cultivated plants.

agragrus (ô-gag'rus), *n*, pl. **agagrus** (-ri). [L, < Gr. *aiyapros*, the wild goat, < *ai* (aiy-), goat, + *apros*, field, *aypros*, wild] A wild goat, supposed to be the species now known to inhabit the

mountains of the Caucasus, Persia, etc., the paseng or pasing of the Persians, and the wild stock of most if not all of the breeds of the domestic goat. It is the *Capra hircus* of Linnaeus, *C. agagrus* of Gmelin and Pallas, *C. caucasica* of H. Smith, and

Wild Goat (*Capra agagrus*)

Hircus agagrus of J. E. Gray. J. F. Brandt asserts that this is incontestably and exclusively the source of the domestic goat. In fact, the name *agagrus* may have been applied sometimes to goats run wild, and the *Capra agagrus* of both G. and F. Cuvier, the bezoar goat, ascribed to Persia and the Alps, is said to have been merely the domestic goat run wild. The celebrated Angora goat may have been derived from a different species or variety, *Capra falconeri*, originating in central Asia. The goat or *agagrus* in all its varieties is closely related to the ibex, *Capra ibex*, which, however, is a distinct species. In the stomach and intestines of the goat, as in those of other artiodactyls, are found the concretions called bezoar-stones. Also written *agagrus*.

Whether the *Capra agagrus* or the *Capra ibex* should be regarded as the stock of the domesticated goat of Europe has long been a question among naturalists; the weighty arguments which may be drawn from the character of the wild species which was contemporary with the *Bos primigenius* [are] shown to be in favor of *Capra agagrus*. egeriid (ē-jē-ri-id), n. A moth of the family *Ageriidae*, a clearwing.

Egeriidae (ē-jē-ri-ī-dē), n. pl. [*NL.*, < *Ageria* + *-idae*]. In *entom.*, a family of *Lepidoptera*, section *Heterocera*, comprising a number of interesting moths related to the sphinxes, hawk-moths, or *Phingulidae*, and commonly called clearwings, from the transparency of their wings. The larvae live in the interior of the branches and roots of trees. Some attack the apple, and one, the *Ageria tyndariformis*, or currant-clearwing, feeds upon the plith of currant-bushes. Also written *Egeridae*, *Egeriada*, and with initial *E* instead of *A*. Also sometimes called *Senaidae*.

Egialites (ē-jī-a-lī-tēs), n. [*NL.*, < Gr. *αἰγυλιός*, the sea-shore, beach (that over which the sea rushes) < *αἰσέω*, rush, + *αἰλ*, (the sea), + *-ites*]. 1 In *ornith.*, a genus of *Lamicolae*, of the family *Charadriidae*, or plovers, chiefly distinguished from *Charadrius* by color, having the upper parts not speckled, the lower never extensively black, and bars or rings upon the head, neck, or breast. The tarsus is comparatively short, with large scutella arranged in two or three special rows. The sexes are usually distinguishable, though similar. The genus contains the numerous species of small plovers known as ring plovers, inhabiting all parts of the world. The killdeer (*E. vociferus*), the ring neck (*E. semipalmatus*), and the piping plover (*E. melodus*) are characteristic species of the United States. Also written *Egialitis*. 2 In *entom.*, the typical genus of the family *Egialitidae*. *Eschscholtz*, 1833.

egialitid (ē-jī-a-lī-t'id), n. A beetle of the family *Egialitidae*.

Ringed Plover (*Egialites hutchinsii*)

Egialitidae (ē-jī-a-lī-t'id), n. pl. [*NL.*, < *Egialites*, 2, + *-idae*]. A family of heteromorous coleopterous insects, having the anterior coxal cavities closed behind, the tarsal claws simple, and six ventral segments, the last two being closely united and the first two connate. *J. L. Le Conte*, 1862.

Egiceras (ē-jis'e-ras), n. [*NL.*, < Gr. *αἶξ* (*ai-*), a goat, + *κερας*, a horn, see *Cerastes*]. A genus of plants consisting of a single species, *E. majus*, belonging to the natural order *Myrtaceae*. It is a shrub or small tree, found on the swampy shores of the East Indies and Australia. Its seeds germinate while still on the tree, and send down perpendicular roots into the mud, thus forming impenetrable thickets, which constitute the only vegetation for miles along some coasts, particularly of Sumatra.

egid (ē-jid), n. An isopod of the family *Egidae*.
Egidae (ē-jī-dē), n. pl. [*NL.*, < *Egia* + *-idae*]. A family of isopod crustaceans, typified by the genus *Egia*, having all the segments beyond the head distinct, and no operculum closing the branchial chamber.

egilopic, egilopic (ē-jī-lop'ik), a. 1 Pertaining to or of the nature of *egilops*. — 2 Affected with *egilops*.

egilopical, egilopical (ē-jī-lop'ī-kal), a. Same as *egilopic*.

egilops, egilops (ē-jī-lops), n. [*NL.*, < Gr. *αἰγυλιώψ* (*-ωψ*), an ulcer in the eye, also, a kind of wild oats, and a kind of oak with sweet fruit. Cf. *αἰγυλιός*, an herb of which goats were said to be fond, appar. < *αἶξ* (*ai-*), **αἰγυλι-*, a goat, + *ὄψ*, eye, cf. *ὤψ*, face, appearance]. 1 In *pathol.*, goat-eye; a tumor, abscess, or other affection of the inner angle (canthus) of the eye, sometimes, a fistula lacrymalis or other affection of the lacrymal duct. In a mild form, it is simply a swelling of the lacrymal papilla, and is very common. — 2 [*cap*]. In *bot.*, a genus of grasses allied to *Triticum*, or wheat-grass, growing wild in the south of Europe and parts of Asia. It is believed by many botanists to be the origin of cultivated wheat. — 3 A species of oak, *Quercus Egilops*, the valonia-oak of the Levant. — 4 [*cap*]. A genus of lamellibranchs. *James E. Hall*, 1850.

Egina (ē-jī-nā), n. [*NL.*, < *L. Ægina*, < Gr. *Αἴγνα*, an island in the Saronic gulf, also, in myth, a nymph of Argolis, beloved by Zeus]. 1 The typical genus of the family *Aginidae*. *Eschscholtz*, 1829. — 2 A genus of crustaceans. **Eginetan** (ē-jī-nē-tan), a and n [*L. Ægina*, < Gr. *Αἴγνη*, an inhabitant of *Αἴγνα* see *Ægina*]. 1. A relating or pertaining to the island of *Ægina* or its inhabitants. — *Eginetan* sculptures, or *Ægina marbles*, a collection of an

cient sculptures discovered in 1811 on the island of *Ægina*, which originally decorated the temple of Athena. They date from about 475 B.C., and, although in general true to nature, their faces bear that forced smile which characterizes the portrayal of the human subject in all early Greek art. These sculptures are now the most notable ornament of the Glyptothek at Munich.

II. n. An inhabitant of *Ægina*.
Eginetic (ē-jī-nē'tik), a [*Gr. Αἰγιντικός*, pertaining to *Αἴγνα*, *Ægina*]. *Æginetan*, resembling *Æginetan* work.

The coinage of *Loxris*, *Phocis*, and *Boeotia* is entirely on the *Æginetic* standard. *Ænem. Brit.*, XVII 642.

Eginidae (ē-jī-nī-dē), n. pl. [*NL.*, < *Ægina*, 1, + *-idae*]. A family of *Trachymedusa*, typified by the genus *Ægina*, containing eusapedate aculeophs with a hard discoidal umbrella, pouch-like enlargements of the digestive cavity, and the circular vessel usually reduced to a row of cells related to *Geryonidae* and *Trachynemidae*. The order to which the *Æginidae* pertain is called *Hydro-medusa*, *Haptonemertea*, and by other names, it is that in which there is no hydriiform trophosome, the medusae developing directly from the ovum.

Eglothus (ē-jī-o-thus), n. [*NL.*, < Gr. *αἰγλόθος*, also *αἰγλόθης*, and later *αἰγλόθος*, a bird, perhaps the hedge-sparrow]. The redpolls or redpoll linnets, a notable genus of *Fringillidae*, founded by Cabanis in 1851. There are several species, of Europe, Asia, and North America, the common redpoll is *E. linaria*, the mealy redpoll is *E. caesia*. They are small finches, chiefly boreal in distribution, streaked with dusky and flaxen brown and white, the males with crimson poll and rosy breast. See *cut under redpoll*.

Egipan (ē-jī-pan), n. [*L.*, < Gr. *Αἰγίπας*, < *αἶξ* (*ai-*), goat, + *Πάν*, Pan]. 1 An epithet of the god Pan, having reference to his goat-like lower limbs, short horns, and upright pointed ears, the other portions of his body being like those of a man. See *Diopan*, and also *satyr* and *faun*. — 2 In *entom.*, a genus of orthopterous insects, of the family *Locustidae*. *Suadder*, 1877.

egirine (ē-jī-rin), n. Same as *egirite*.

egirite (ē-jī-rit), n. [*Ægi*, the Icel god of the sea (or *Ægirus*), + *-ite*]. A mineral occurring in greenish-black prismatic crystals, isomorphous with pyroxene. It is a bisulfate of iron sesquioxide, iron protoxide, lime, and soda, found in Norway, and also at Hot Springs, Arkansas. Also written *egirite* and *egirine*.

Egirus (ē-jī-rus), n. [*NL.*, < (f) Gr. *Αἰγίρος*, a city of Lesbos. Cf. *αἰγίρος*, the black poplar].

Agrius punctulatus, dorsal view

A genus of nudibranchiate gastropods, of the family *Polyceridae*, having large tubercles on the convex back. Three species are known from the European seas. Also written *Agrius*. *Loewen*, 1844.

egis (ē-jis), n. [*L. ægis*, < Gr. *αἶψα*, the ægis, also a rushing storm, hurricane, appar. < *αἰσέω*, shoot, dart, glance, popularly identified with *αἶψα*, a goat-skin, < *αἶξ* (*ai-*), a goat. See *Aix*].

1 In *Gr myth*, originally the storm-cloud enveloping the thunderbolt, the especial weapon of Zeus, afterward considered as the skin of the goat Amalthea, the foster-mother of Zeus, which the latter took for defensive armor in his war with the Titans. According to another conception, it was a terrible and immortal arm wrought by Hephaestus after the fashion of a thunder cloud fringed with lightning. It was entrusted by Zeus to Apollo and to Athena, and became a characteristic attribute of the latter. 2 In *art*, a representation of the ægis as a sort of mantle fringed with serpents, much more ample in archaic examples than later, generally worn covering the breast, but sometimes held extended over the left arm, or thrown over the arm to serve as a shield. The ægis of Athena, except in the most primitive representations, bears in the midst the head of the Gorgon Medusa, and is usually covered with scales like those of a serpent. Hence, figuratively. — 3 Any influence or power which protects, as, under the imperial ægis.

Also spelled *egis*.

Egithaline (ē-jith-a-lī-nē), n. pl. [*NL.*, < *Ægithalus* + *-inae*]. A subfamily of titmice,

Ægis — V. Irwin's Statue of Athena

family *Paridae*, typified by the genus *Egithalus*. It was named by Reichenbach in 1850, and by Gray is made to include *Parus* and a number of other genera of tits of Europe, Asia, and Africa.

Egithalus (ē-jith'a-lus), *n* [NL, < Gr *αἰθήλας*, the tit, *L. parus*] The typical genus of *Egithalins*, based upon *Parus pendulinus*, one of the European bottle-tits. The name is also used for another genus of tits, more commonly called *Aceredula* (which see), of which *A. caudata* is the type. Also written *Egithalos*.

Egithognathus (ē-jithog'nā-thē), *n pl* [NL, < Gr *αἰθήρ*, also *αἰθήλορ*, the hedge-sparrow, or perhaps the bunting, + *γναθός*, jaw] In Huxley's classification of birds, a suborder of *Corvinata*, having the bones of the palate disposed as in the sparrow and other passerine birds, and embracing the passerines, swifts, and woodpeckers. See *egithognathism*.

egithognathism (ē-jithog'nā-thism), *n* The quality or condition of being egithognathous, that structure of the bony palate of birds which consists in the union of the vomer with the alveolar walls and turbinates, and is characteristic of the suborder *Egithognatha*. Parker distinguishes four styles: (a) *incomplete*, very curiously exhibited by the low *Turdus*, which is closely related to gallinaceous birds; (b, c) *complete*, as it is presented under two varieties, one typified by the crow, an oscine passerine, the other by the clamaratorial passerines *Pachyrhamphus* and *Pipra*; (d) *compound*, that is, mixed with a kind of demognathism.

Egithognathism is exhibited almost unexceptionally by the great group of passerine birds. It is also nearly coincident with Passeres, though a few other birds, notably the swifts, also exhibit it. *Cones*, N. A. Birds, p. 172.

egithognathous (ē-jithog'nā-thus), *a* [As *Egithognatha* + *-ous*] Of, pertaining to, or having the characteristics of the *Egithognatha* having the vomer united with the alveolar walls and turbinates. See *egithognathism*.

Egle (ē-glē), *n* [L, < Gr *αἰγλή*, splendor, a female name in Greek mythology] 1 A genus of plants of tropical India, allied to and resembling the orange-tree, but with trifoliate leaves. 2 *Marmelos*, the Bengal quince, golden apple, or bel, has an aromatic fruit, somewhat like an orange. A perfume and a yellow dye are obtained from the rind, and the dried fruit is a popular remedy in diarrhea and dysentery.

3 A genus of brachyurous decapodous crustaceans, or crabs, of which a species, *Egle rufopunctata*, is found in Mauritius and the Philippine islands. 4 A genus of mollusks (*Oen*, 1815). See *Pneumodermon*. 5 A genus of lepidopterous insects. *Hübner*, 1810.

egobronchophony (ē-gō-brong-kof'ō-ni), *n* [< Gr *αἰ* (ai-), goat, + *βρόγχια*, the bronchial tubes, + *φωνή*, voice] In *pathol*, a combination of two sounds, egophony and bronchophony, heard by auscultation in pleuro-pneumonia. See *egophony* and *bronchophony*.

egocerine (ē-gos'e-rin), *a* Pertaining to or characteristic of the genus *Egocerus* as, an egocerine goat or antelope; *egocerine* horns. Also written *agocerin*.

Egocerus (ē-gos'e-rus), *n* [NL, < Gr *αἰ* (ai-), goat, + *κερας*, a horn] 1 A genus of wild goats, related to the ibexes, of the subfamily *Caprinae*. P. S. Pallas, 1811, J. E. Gray. 2 A genus of antelopes with long spiral horns, related to the oryx and the addax, of the subfamily *Antelopinae*, equal to *Hippotragus* (Sundevall). Hamilton Smith, 1827, H. A. Turner, 1849.

Also written *Agocerus*, *Agoceros*.

egophonic (ē-gō-fon'ik), *a* Of or pertaining to egophony. Sometimes written *egophon*.

egophony (ē-gōf'ō-ni), *n* [< Gr *αἰ* (ai-), a goat, + *φωνή*, voice, sound] In *pathol*, a form of vocal resonance, broken and tremulous heard in auscultation, and suggesting the bleating of a goat. It is best heard in hydrothorax at the level of the fluid. Sometimes written *egophony*.

egophile (ē-grō-pil), *n* Same as *agapophile*.

egrotans (ē-grō-tanz), *n, pl* *egrotantes* (ē-grō-tan'tēz) [L, *ppr* of *egrotare*, be sick; see *egrotat*] In English universities, one who is sick, one who holds an *egrotat* (which see).

egrotantes, *n* Plural of *egrotans*.

egrotat (ē-grō'tat), *n* [L, he is sick, 3d pers sing pres ind of *egrotare*, be sick, < *egrotus*, sick, < *ager*, sick] In English universities, a medical certificate given to a student showing that he has been prevented by sickness from attending to his duties. Also called *ager*.

I sent my servant to the apothecary for a thing called an *egrotat*, which I understood meant a certificate that I was indisposed.

Babbage, Pass. from Life of a Phil. (1864), p. 37.

Reading egrotat, in some universities, leave taken, commonly in December, in order to get time to read for one's degree.

egyrite, *n* See *egirite*.

elurid (ē-lū'rid), *n* A carnivorous mammal of the family *Eluridae*.

Eluridae (ē-lū'ri-dē), *n pl* [NL, < *Elurus* + *-idae*] A family of carnivorous quadrupeds, of the order *Ferae*, suborder *Fissipedia*, and series *Arctodea*, closely related to the *Ursidae* (bears). It is based upon a single genus and species, *Elurus fulgens*, the panda, resembling a raccoon in some respects. The taxinical characters of the family are found chiefly in the details of the skull and teeth, as compared with those of either bears or raccoons. The tail is well developed (rudimentary in *Ursidae*), the teeth are 36 in number (40 in *Procyonidae*), there are only 2 true molars on each side of (either) jaw, with 8 premolars, 1 canine, and 4 incisors. The allaphenoid canal is well developed, the auditory bulla is very small, and is separated from the long trigonal paroccipital process. Also written *Aluridae*.

eluroid (ē-lū'roid), *a* and *n* [< Gr *αἰλουρός*, a cat (see *Elurus*), + *-ειδός*, form] 1. *a* Feline, cat-like, specifically, of or pertaining to the *Eluroidea*.

2. *n* A member of the *Eluroidea*.

Eluroidea (ē-lū-roi'dē-a), *n pl* [NL see *aluroid*] A superfamily section of feline fissioned (carnivorous mammals, typified by the cat family, *Felidae*, and containing also the families *Cryptoproctidae*, *Proctidae*, *Hyamidae*, *Lacertidae*, and *Eupleridae* (but not the family *Eluridae*) distinguished as a series from the *Cynoida* or canine series, and the *Arctodea* or ursine series (to which the family *Eluridae* belongs). The carotid (anal) is not well developed, the glenoid foramen is minute or wanting, the foramen lacrimale posticus and the condyloid foramen debouch together, Cowper's glands are present, and the os penis is rudimentary, except in *Cryptoprocta*. *Eluroidea typica* are the true felines or cats, of the families *Felidae* and *Cryptoproctidae*. *Eluroidea hyemiformis* are the hyenas of the families *Hyemidae* and *Proctidae*. *Eluroidea lacertiformis* are the lizards, ichneumonids, etc., of the families *Lacertidae* and *Eupleridae*. Elurus, Gill. Also written *Aluroidea*.

It is unfortunate that the two names *Eluroidea* and *Aluroidea* should clash, as not belonging to the same sections (of the Carnivora). *Paseo*, Zool. Class., p. 258.

Eluropoda (ē-lū-rop'ō-dū), *n pl* [NL, neut. pl of *aluropus* (-pod-), ad] see *aluropodous*] A name given by J. E. Gray to the typical viverrine division of the family *Viverridae*, the species of which division are eluropodous (which see). The name is contrasted with *Cynopoda*.

eluropodous (ē-lū-rop'ō-dus), *a* [< NL *aluropus* (-pod-), ad, cat-footed; see *Eluropus*] Cat-footed, having feet like a cat, that is, with sharp, retractile claws, opposed to *cynopodous*, or dog-footed, and specifically applied to the typical viverrine division of the family *Viverridae*.

Eluropus (ē-lū'rō-pus), *n* [NL, < *Elurus*, *q* v, + Gr *πούς* (pod-) = *E foot*] A remarkable

Eluropus melanoleucus

genus of carnivorous quadrupeds of the arctoid series of the order *Ferae*, connecting the true bears with *Elurus* and other genera. In the upper jaw they have 3 incisors, 1 canine, 4 premolars, and 2 molar teeth, and in the lower 3 incisors, 1 canine, 3 premolars, and 3 molars. The skull has a short facial portion, the bony palate not extending back of the teeth, an allaphenoid canal, an enormous sagittal crest, and zygomatic arches. The tail is very short, and the feet are less plantigrade and the soles more hairy than in the true bears. *E. melanoleucus*, of Tibet, the type and only species, is of the size of a small brown bear, of a whitish color, with black limbs, shoulders, ears, and eye ring. Also written *Aluropus*.

Elurus (ē-lū'rus), *n* [NL, < Gr *αἰλουρός*, a cat, perhaps < *αἰλος*, quick-moving, + *ουρά*, tail] The early history of the domestic cat being involved in doubt (see *cat*), some identify the Gr *αἰλουρός* with the ferret or polecat, *Futorius furo*, and others with the genet or civet-cat, a species of *Fiverra*. The typical genus of the family

Eluridae (which see), containing the wah or panda, *Elurus fulgens*, of India. Also written *Alurus*.

Eolian¹ (ē-ō'li-an), *a*. [< L *Eolius*, < Gr. *Αἰόλιος*, *Eolian*, < *Αἰόλος*, *Eolus*, the god of the winds. see *Eolus*] 1. Pertaining to *Eolus*, the god of the winds in Greek mythology, and hence sometimes (with or without a capital) to the wind in general as, the *Eolian Isles* (now the Lipari islands, north of Sicily), the fabled home of the god. Also written *Eohan* and *Aiolian*.

The breezes blur the fountain's glass,
And wake *Eolian* melodies.
T. B. Aldrich, Pampinea

2. [c] Due to atmospheric action, wind-blown as, an *eolian* deposit. applied, in *geol*, to accumulations of detrital material, especially fine sand and loam, which have been carried to their present position by the wind. By far the most important deposit of this kind is the loess of north western China (see *loess*), and it was to designate this peculiar and most remarkable formation that the term *eolian* was applied in geology in place of *subaerial* (which see). Also written *ehlan*. — **Eolian attachment**, a contrivance attached to a pianoforte, by which a stream of air can be thrown upon the wires, prolonging their vibration and greatly increasing the volume of sound. — **Eolian harp** or *lyre*, a stringed instrument that is caused to sound by the impulse of air. A common form is that of a box of thin fibrous wood, to which are attached a number of fine catgut strings, sometimes as many as fifteen of equal length and tuned in unison, stretched on low bridges at each end. Its length is made to correspond with the size of the window or aperture in which it is intended to be placed. When the wind blows athwart the strings it produces the effect of an orchestra when heard at a distance, sweetly mingling all the harmonies, and swelling or diminishing the sounds according to the strength of the blast. — **Eolian rocks**. See above, 2.

Eolian² (ē-ō'li-an), *a* and *n* [< L *Eolius*, < Gr. *Αἰόλιος*, < *Αἰόλος*, *Eolus*, the mythical founder of the *Eolians*, one of the sons of Hellen, reputed ancestor of all the Hellenes, > Gr. *Αἰολεύς*, an *Eolian*, pl. *Αἰολεῖς*, *Aiolēi*, > L. *Eolus*, the *Eolians*. See *Eolian*¹] 1. *a* Pertaining to the branch of the Greek race named from *Eolus*, son of Hellen, or to *Eolia* or *Eolis*, a district of Asia Minor north of Ionia colonized by and named from them. — **Eolian mode** (*n*) In *Greek music*, a diatonic scale consisting of two steps + a half step + two steps + a half step + a step. It is correctly represented by the natural notes of the staff beginning with A and counting downward. Usually and more properly

called the *hypodorian*, sometimes the *Locrian mode* (b) The ninth of the Gregorian church modes or scales. It was the fifth of the authentic modes, and consisted of a step + a half step + two steps + a half step + two steps,

represented by the natural notes of the staff beginning with A and counting upward.

2. *n* A member of one of the three great divisions of the ancient Greek race, the two other divisions being the Dorian and the Ionian. The inhabitants of *Eolis* of part of Thessaly, of Boeotia and much of central Greece, of Arcadia, and other districts not Dorian or Ionian, were commonly accounted *Eolians*. The Achaean, when spoken of as a distinct race of Greeks, were also included among the *Eolians*.

Also written *Eohan* and *Aiolian*.

Eolic (ē-ol'ik), *a* and *n* [< L *Eolicus*, < Gr. *Αἰολικός*, of or pertaining to *Eolis* or the *Eolians*. see *Eolian*²] 1. *a* Pertaining to *Eolis* or *Eolia*, to the *Eolians*, or to *Eolus*, their mythical ancestor, *Eolian* as, *Eolic* towns, the *Eolic* branch of the Greek race.

That Diarrachus was correct is proved by an examination of the peculiar position occupied by the traces of *Aiolus* influence in Homer. *Amer. Jour. Philol.*, VII 232.

Eolic dialect, one of the three great dialects or groups of subdialects of ancient Greek, the others being the Doric and Ionic. It was spoken in *Eolis* and many other Greek countries and is important as the dialect used by the Lesbian poets Sappho, Alcaeus, etc.

2. *n* The language of the *Eolians*; the *Eolian* dialect of Greek.

Also written *Eolic* and *Aiolic*.

solid, **solidid** (ē-ō'lid, ē-ō'li-did), *n* A member of the *Eolidae* or *Eolididae*.

Eolidae (ē-ō'li-dē), *n pl*. Same as *Eolididae*.

Eolididae (ē-ō'li-dē), *n pl* [NL, < *Eolis* (-id-) + *-idae*] A family of nudibranchiate gastropodous mollusks, with diversiform gills placed on the sides of the back, and the tentacles retractile. They are active, and swim freely on their backs. In the genus *Eolis* (which see) the gills consist of an immense number of finger-like processes, forming tufts on each side of the body, some of which receive caecal prolongations of the stomach and liver. Their papillae pos-

sens the power of discharging, when the animal is irritated, a milky fluid, which, however, is harmless to the human skin. Also written *Eolididae*, *Eolidæ*, *Eolidæ*.

Eolis coronata dorsal view

Eolidinae (ē'ō-lī-dī-nē), *n pl* [NL, < *Eolis* (-id-) + -inae] A group of mollusks. See *Eolididae*. Also written *Eolidina*.

solina (ē'ō-lī-nā), *n*. [CL *Eolis*, < Gr *Αἰολος*, the god of the winds see *Eolis*] A small free-reed musical instrument, the precursor of the accordion and concertina (which see), invented by Wheatstone about 1829.

solipile (ē'ō-lī-pīl or ē-ol'ī-pīl), *n*. [CL *solipila*, pl, < *Eolis*, god of the winds (see *Eolis*), + *pila*, a ball] An instrument illustrating the expansive force of steam generated in a closed vessel, and escaping by a narrow aperture, said to have been invented by Hero of Alexandria in the second century B C. It consisted of a hollow ball containing water and two arms bent in opposite directions, from the narrow apertures of which steam issued with such force that the air, reacting on it, caused a circular or rotary motion of the ball. Several attempts have been made to apply the principle of the solipile to rotating machinery. Ely's solipile is used for rotating a toy. It consists of a boiler, with an arm through which the steam is permitted to escape, placed upon a central up-right pivot, and connected by a band with the drum of the toy to be rotated. Also spelled *solipile* and (by mistake) *solipyle*.

Ely's Solipile

Eolis (ē'ō-lis), *n* [NL (like L *Eolis*, Gr *Αἰολός* (-id-), name of a country), < *αἰολος*, quick-moving, nimble, rapid, changeable] The typical genus of the family *Eolididae* (which see). Also spelled *Eolis*, as originally by Cuvier, 1798.

Eolism (ē'ō-lizm), *n*. [CL *Αἰολισμός*, < *Αἰολός*, imitate the Eolians see *Eolis* and -ism] A peculiarity of the Eolic dialect, or such peculiarities collectively. Sometimes written *Aiolism*.

First must be eliminated from the so called *Eolians* all phenomena which, so far from deserving the name of *Eolians*, do not so much as occur in *Eolis*.

Amer Jour of Philol, V 521

Eolist (ē'ō-list), *n*. [CL *Eolis*, the god of the winds, + -ist] A pretender to inspiration so called humorously by Swift ("Tale of a Tub," viii) as deriving all things from wind (that is, the breath of inspiration).

solotropic (ē'ō-lō-trop'ik), *a* and *n*. [CL *solotropia* + -ic] *I, a* In *phys*, not having the same properties in all directions, non-isotropic, anisotropic. said of a body with reference to elasticity or the action upon it of light, heat, etc.

An individual body, or the substance of a homogeneous solid, may be isotropic in one quality or class of qualities, but *solotropic* in others.

Thomson and Tait, Nat Phil, I § 677

II, n A non-isotropic substance, or one having different properties in different directions, as a biaxial crystal.

solotropy (ē'ō-lōt'rop-ī), *n*. [CL *αἰολος*, changeable, + -τροπία, < *τρέπειν*, turn] In *phys*, the state or quality of being *solotropic*; the opposite of *isotropy* (which see); anisotropy.

In the case of a sphere, the tendency to set in a uniform [magnetic] field is wholly dependent on the *solotropy* of the sphere.

Encyc Brit, XV 245

Eolis (ē'ō-lis), *n*. [L, < Gr. *Αἰολος*, the god of the winds, lit the rapid or the changeable, < *αἰολος*, quick-moving, rapid, glancing, changing, changeable] 1 In classical myth, the god and ruler of the winds, which at his will he set free or held prisoners in a hollow mountain. — 2 [C] An apparatus for renewing the air in rooms. — 3 A genus of coleopterous insects. *Eschscholtz*, 1829.

eon, eonian, etc. See *eon*, *eonian*, etc.

Epyrus (ē'pus), *n*. Same as *Epyrus*.

Epyornis (ē-pi-ōr'nīs), *n* [NL, < Gr. *αἰπός*, high, + *ὄρνις*, a bird] A genus of gigantic fossil birds found in Madagascar. The species is named *Epyornis maximus*. It was 3 toed like *Dinornis*, of similar enormous stature, and is one of the largest known birds. The egg was some 12 or 14 inches long, and

of the capacity of 6 ostrich-eggs or about 12 dozen hen eggs. The remains are found in very recent deposits, and the bird was probably contemporary with the moa. *Epyornis* is the type of a family *Epyornithidae*, related to the *Dinornithidae*, of the subclass *Insulæ*. Sometimes spelled *Epyornis*, and even *Epyornis*, the latter is wholly inadmissible.

Epyornithes (ē-pi-ōr'nī-thēs), *n pl* [NL, pl of *Epyornis* (-nith-)] A superfamily group, made an order by Newton, of gigantic extinct ratite birds, based upon the *Epyornithidae* (which see).

Epyornithidae (ē-pi-ōr'nī-thī-dē), *n pl* [NL, < *Epyornis* (-nith-) + -idae] A family of birds represented by the genus *Epyornis* (which see).

Epyrrymnus (ē-pi-prīm'nus), *n* [NL, < Gr *αἰπός*, high, steep, + *πυρρυνος*, stern] A notable genus of kangaroo-rats of comparatively large size, and otherwise resembling the hare-kangaroos, *Lagorchestes*. The type is *E. rufescens*, the red potoro of New South Wales. A H Garrod, 1875.

Epyrs (ē'pus), *n* [NL, < Gr *αἰπός*, also *αἰπός*, high, steep] A genus of adelphagous beetles, of the family *Carabidae*, the larvae of which have but one claw on each foot. Also written *Epyrs*.

sequiliflorous, *a*. See *qualiflorous*.

sequisonance, *sequisonant*. See *equisonance*, *equisonant*.

Equivalvia (ē-kwī-val'vī-ū), *n pl* [NL, < L *aequus*, equal, + *valva*, door (valve)] 1 In Lamarck's classification, 1801, one of two divisions of his conchiferous *Acephalaea*, containing the equivalent bivalves opposed to *Inaequivalvia*. — 2 In Latreille's classification, 1825, one of two divisions of pedunculate *Brachopoda* (the other being *Inaequivalvia*), represented by the genus *Lingula*. See cut under *Lingulidae*.

Equorea (ē-kwō-rē-ū), *n* [NL, fem of L *aequoreus*, of the sea see *aequoreus*] A genus of medusae, constituting the family *Equoreidae* (which see). *E. cyanea* is an example.

aequoreal (ē-kwō-rē-ū), *a*. [CL *aequoreus*, of the sea, < *aequor*, level, even surface, esp a calm, smooth sea, < *aequus*, even, equal see *equal*] Of or pertaining to the sea, marine, oceanic specifically used in the name of a fish, the *aequoreal* pipefish, *Syngnathus aequoreus* *Tarrell*.

Equoreidae, **Equoridae** (ē-kwō-rē-ū-dē, ē-kwō-rī-dē), *n pl* [NL, < *Equorea* + -idae] A family of *Hydromedusae*, represented by the genus *Equorea*, with numerous radial vessels and marginal tentacles. The family is related to the campanularians and actinarians, and pertains to an order *Calyptoblastea*, or to a suborder *Campanularia* of *Hydro-medusae*. They attain a large size, being a foot or more in diameter. The family was founded by Eschscholtz in 1829.

aër (ā'ēr), *n* [L, < Gr *αἴρ*, air see *air* 1] 1 (a) Ordinary air of the atmosphere. (b) Some kind of air, as a gas. [Formerly a common term in chemistry and physics, now rare or obsolete.] — 2 In the Hellenic branch of the Eastern Church, the third or outermost of the veils placed over the sacrament. See *air* 1, n, 7. — **Aër perfractilis** (L, air blowing through), open air.

Open air, which they call *aër perfractilis* *Havon*, Nat Hist, § 331

aëra, *n*. See *cra*.

aërian, *n*. Plural of *ararium*.

ararian (ē-ā-rī-an), *a* and *n*. [CL *ararius*, monetary, fiscal, *ararius*, n (see *census*), an ararian, < *ar* (-r-), bronze, money see *as*] *I, a* In *Rom hist*, of or pertaining to the ararian or Roman treasury, fiscal as, the ararian prefects.

II, n One of the lowest class of Roman citizens, who paid only a poll-tax and had no right to vote. To this class the censors could degrade citizens of any higher rank who had committed heinous crimes.

ararium (ē-rā-rī-um), *n*, pl. *araria* (-ā) [L, neut of *ararius*, of or pertaining to money see *ararian*] Among the Romans, a place where public money was deposited, the public treasury.

aërate (ā'ō-rāt), *v. t*; pret and pp *aërated*, ppr *aërating*. [CL *aër*, air (see *air* 1), + -ate 2]

1 To expose to the free action of the air. — 2 To cause to mix with carbonic-acid or other gas. — 3. In *physiol*, to change the circulating fluids of, as animals, by the agency of the air, arterialize. — **Aërated bread**, bread baked from dough into which carbonic acid gas has been forced mechanically, instead of being set free within its substance by fermentation of yeast or decomposition of baking powder. — **Aërated waters**, a term applied to a variety of acidulous and alkaline beverages, more or less impregnated with carbonic acid gas, which renders them sparkling and effervescent. The most common, carbonic acid water (usually called *soda water*, because it was formerly an official preparation and contained sodium carbonate), is made

on a large scale by pouring dilute sulphuric acid on carbonate of lime, marble, or chalk. Carbonic acid gas is evolved, which is either forced into water at once by its own tension as it is evolved, or received in a reservoir and afterward forced into water by a pump. A small quantity of ginger or capsaicum-extract and sugar, placed in bottles before filling with this water, converts the solution into gingerale or ginger ale, while essence of lemon, citric acid, and sugar mixed in the same way form lemonade. All water from natural springs is aerated, and the flat, mawkish taste of freshly boiled water is due to the absence of air and carbonic acid. — **Aërating filter**, a water filter in which the water as it descends falls into a closed chamber, displacing the contained air, which, passing upward through the filtering material, aerates the water in its passage.

aëration (ā'ō-rā-shon), *n* [CL *aërate*] 1 The act of aëring or of exposing to the action of the air as, the aëration of soil by plowing, harrowing, etc. — 2. The act or operation of mixing or saturating with a gas, as carbonic-acid gas or common air. — 3. In *physiol*, the arterialization of the venous blood by respiration in the higher animals, and by corresponding processes in the lower animals.

The taking in of food by a polype is at intervals now short, now very long, as circumstances determine, while such aeration as is effected is similarly without a trace of rhythm. H Spencer, Data of Ethics, § 23

aëerator (ā'ō-rā-tor), *n*. [CL *aërate*, as if L *aëra-tor*] 1. A blower, a contrivance for fumigating wheat and other grain, to bleach it and destroy fungi and insects. — 2. An apparatus for forcing an or carbonic-acid gas into water or other liquids. The most simple form is a mechanical device for pumping air into water, or a spray for bringing water into contact with air. More complicated forms employ chemical means to secure the formation of carbonic acid gas in water or liquors, or elaborate machinery for forcing the gas into vessels containing the liquid, and for producing the proper mixture by agitating the latter in presence of the gas under pressure.

Aërial acid, an old name for carbonic acid gas, from a belief that it entered into the composition of atmospheric air. — **Aërial birds** (*Aere aëriae*), birds which habitually move chiefly by flight, as distinguished from walking, wading, and swimming birds. — **Aërial car**, a car used for travelling in the air, specifically, the basket of a balloon, or a car designed for an aërial railway. — **Aërial figures**, figures by which painters seek to represent the fanciful inhabitants of the air, as demons, gnomes, etc. — **Aërial gills**, the wings of insects. — **Aërial image**, an image caused by the convergence of rays of light reflected or refracted from objects through strata of air of different densities, the image appearing suspended in the air, as the different kinds of mirage; also, an image perceived by looking into or toward a concave mirror. See *mirage*. — **Aërial mammals**, the bats. — **Aërial navigation**. See *navigation*. — **Aërial perspective**. See *perspective*. — **Aërial photography**, photography by means of cameras supported at a considerable height above the ground by kites or balloons. — **Aërial poison**. Same as *manduca*. — **Aërial railway**. (a) A proposed system of wires for guiding balloons. (b) A name sometimes applied to systems of transportation by cars suspended from a tall or rope above them. — **Aërial rocks**. Same as *column rocks*. See *Poland*, 2. — **Aërial telegraphy**, a method of telegraphing by means of kites. — **Aërial tints**, in painting, tints or modifications of color by which the expression of distance is attained. — **Syn. Aery, Aerial**. See *aery*.

aëriality (ā-ē-rī-āl'itē), *n* [*aerial* + *-ity*] Unsubstantiality, airiness

The mere *aeriality* of the entire speculation
De Quincey, Murder, Postscript.

aërially (ā-ē-rī-āl'itē), *adv* In an aërial manner, so as to resemble air or the atmosphere, ethereally

Your eyes
Touch'd with a somewhat darker hue,
And less aërially blue
Tennyson, Margaret

aërianness (ā-ē-rī-āl-nēs), *n* The quality of being aërial or airy

aërian¹ (ā-ē-rī-an), *a* [*L. aerius* see *aerial*] Aërial; of or belonging to the air, produced or existing in the atmosphere

In the flasks which are altered by these aërial spots, there rarely is perceived that nauseating and sickly odor of intense putrefaction
Singer, III 620

Aërian² (ā-ē-rī-an), *n* [*LL. Aërianus*, pl., *< Aerius*, a proper name] A member of a reforming sect of the fourth century, so called from their leader Aerius, a presbyter of Sebastia in Pontus, who separated from the church about A. D. 360. They maintained that a presbyter or elder does not differ from a bishop in authority, repudiated prayers for the dead, and rejected church fasts.

Aërides (ā-ē-rī-dēz), *n* [*NL, < L. aer, an, + -ides*] A genus of epiphytial plants, natural order *Orchidaceae*. These plants have distichous leaves, and large, bright colored, sweet scented flowers. The year natives of the warmer parts of Asia, and are extensively cultivated in hothouses.

aerie¹, *a* See *aery*¹

aerie², *n* and *v* See *aery*²

aëriation (ā-ē-rī-fak'shon), *n* [*aerify* see *-faction*] The action of aerifying, aëriification. *N E D*

aëriiferous (ā-ē-rī-fō-rus), *a* [*L. aer, air, + ferro = E bear*] Conveying air, as the tracheæ and bronchial tubes of air-breathing vertebrates or the tracheæ of insects.

aëriification (ā-ē-rī-fī-kā'shon), *n* [*aerify* see *-fication*] 1 The act of combining anything with air, the state of being filled with air. — 2 The act of becoming air, or of changing into an aëriiform state, as substances which are converted from a liquid or solid form into gas or an elastic vapor, the state of being aëriiform.

aëriiform (ā-ē-rī-fōrm), *a* [*L. aer, air, + -formus, < forma, form*] 1 Having the form or nature of air, or of an elastic invisible fluid, gaseous. The gases are aëriiform fluids. — 2. Figuratively, unsubstantial, unreal. *Carlyle*

aëriify (ā-ē-rī-fī), *v t*, pret and pp *aëriified*, ppr *aëriifying* [*L. aer, air, + -ficare, < facere, make see -fy*] 1 To infuse air into, fill with air, or combine air with. — 2 To change into an aëriiform state.

aëro- [*NL, etc., < Gr. aëro- (aëro-), combining form of aëro, L. aer, an see air*] The first element in many compound words of Greek origin, meaning air, the air, atmosphere.

aërobate (ā-ē-rō-bāt), *v t* [*Gr. aërobatēv, < aëro (aëro-), air, + batēv, tread*] To walk (as if) on the air. [*Rare*] *N E D*

aërohe (ā-ē-rōh), *n* One of the aërobia.

aërobia (ā-ē-rō-bi-ā), *n pl* [*NL, neut pl of aërobius, < Gr. aëro (aëro-), air, + bios, life*] A name given by Pasteur (in the French form, *aërobies*) to those bacteria which are able to live in contact with the air, and which absorb oxygen from it opposed to *anaërobia*.

aërobian (ā-ē-rō-bi-an), *a* Relating to or characteristic of aërobia (which see), dependent

upon air for life. An equivalent form is *aërobious*.

aërobic (ā-ē-rō-bik), *a* Same as *aërobian*.

aërobiosis (ā-ē-rō-bi-ō'sis), *n* [*NL, < Gr. aëro (aëro-), air, + bios, way of life, < biōv, live, < bios, life*] Life in and by means of an atmosphere containing oxygen.

aërobiotic (ā-ē-rō-bi-ō'tik), *a* [*Gr. aëro (aëro-), air, + biōtikos, pertaining to life, < biōv, live, see aërobiosis*] Of or pertaining to aërobiosis, living on atmospheric oxygen as, aërobiotic forms in fermentation.

aërobious (ā-ē-rō-bi-ūs), *a* [*NL aërobios see aërobia*] Same as *aërobian*. Pasteur, Fermentation (trans), p 210

Aërobranchia (ā-ē-rō-brang'ki-ā), *n pl* [*NL, < Gr. aëro (aëro-), air, + brānchia, gills*] A subclass or "grade" of *Arachnida*, composed of *Scorpionina*, *Pedipalpi*, and *Araneida*, or true scorpions, whip-scorpions, and spiders, one of three groups, the other two being *Hematobranchia* and *Lapobanchia*. *E R Lankester*, 1881

aërobranchiate (ā-ē-rō-brang'ki-āt), *a* Pertaining to the *Aërobranchia*.

aëroclinoscope (ā-ē-rō-klī'nō-skōp), *n* [*Gr. aëro (aëro-), air, + klīnev, bend, incline, + skopeiv, view, examine*] The name given to a kind of weather-signal. It consists of an elevated vertical axis with movable arms, either of which may be raised or depressed according to the increase or decrease of the barometrical pressure in the quarter to which it points, thus showing the direction of the wind and state of the weather to be expected. It has been much used in Europe.

aërocyst (ā-ē-rō-sist), *n* [*Gr. aëro (aëro-), air, + cystic, bladder see cyst*] In bot, the air-vessel or bladder by means of which many algae, as *Fucus vesiculosus*, are supported in the water, and oceanic species, as the gulfweed, float on the surface. See cut under *air-cell*.

aërodynamic (ā-ē-rō-di-nam'ik), *a* [*Gr. aëro (aëro-), air, + dynamic, q v*] Relating or pertaining to the force of air and gases in motion.

aërodynamics (ā-ē-rō-di-nam'iks), *n* [*Pl of aërodynamic see dynamics*] The science which treats of the motion of the air and other gases, or of their properties and mechanical effects when in motion.

aërognosy (ā-ē-rō-gnō-si), *n* [*Gr. aëro (aëro-), air, + gnosiv, knowledge*] Same as *aerology*. [*Rare*]

aërographer (ā-ē-rō-grā-fēr), *n* One who describes the atmosphere.

aërographic (ā-ē-rō-grāf'ik), *a* Pertaining to aerography.

aërographical (ā-ē-rō-grāf'ik-al), *a* Same as *aerographic*.

aërography (ā-ē-rō-grā-fī), *n* [*Gr. aëro (aëro-), air, + -γραφία, < γράφειν, write, describe*] Description of the air or atmosphere.

aërohydrodynamic (ā-ē-rō-hī'drō-di-nam'ik), *a* [*Gr. aëro (aëro-), air, + hydrodynamic*] Acting by the power of air in water. — **Aërohydrodynamic wheel**, an apparatus for transmitting power to a distance, proposed by M. Calce, a Belgian engineer. The operation consists in conducting condensed air through a tube, and discharging it into the curved buckets of a cogged wheel submerged in water in such a manner as to turn the wheel by its ascensional force.

aërohydrous (ā-ē-rō-hī'drus), *a* [*Gr. aëro (aëro-), air, + udor (udor-), water, + -ous*] Composed of or containing air and water specifically applied to minerals which contain water in their cavities. [*Rare*]

aërolite (ā-ē-rō-lit), *n* [The more common form of *aërolith* see *-lite* and *-lith*] A body falling through the atmosphere to the earth from outer space, a meteorite, properly, a meteoric stone. See *meteorite*.

aërolith (ā-ē-rō-lith), *n* [*Gr. aëro (aëro-), air, + lith, stone*] Same as *aërolite*.

aërolithology (ā-ē-rō-lith-ō-lō-jī), *n* [*aërolith & Gr. -λογία, < λγειν, speak see -ology*] That department of science which treats of aërolites.

aërolitic (ā-ē-rō-lit'ik), *a* Relating to aërolites.

aërologic, aërological (ā-ē-rō-loj'ik, -i-kal), *a* Pertaining to aerology.

aërologist (ā-ē-rō-lō-jist), *n* One who is versed in aerology.

aërology (ā-ē-rō-lō-jī), *n* [*Gr. aëro (aëro-), air, + -λογία, < λγειν, speak see -ology*] That branch of physics which treats of the air, its properties and phenomena. Also called *aerology*.

aëromancer (ā-ē-rō-man'sér), *n* [*ME aëromancer, < aëromancy + -er*] One who practices aëromancy.

aëromancy (ā-ē-rō-man'si), *n* [*ME. aëromancy, aëromance, < OF. *aëromancie, aëromantie (Cotgrave), mod. F. aëromancie, < LL. aeromantia, < LGr. aëropanteia (Harper's Lat. Diet.), < Gr. aëro, air, + manteia, divination, < manteia, divine, prophecy, < manteia, prophet.*] Divination by means of the air and winds or atmospheric phenomena. now sometimes used to denote the practice of forecasting changes in the weather.

aëromantic (ā-ē-rō-man'tik), *a* Pertaining to or of the nature of aëromancy.

aërometer (ā-ē-rōm'e-tēr), *n* [*NL aerometrum, < Gr. aëro (aëro-), air, + metron, measure*] Cf. *Gr. aërometron*, measure the air. An instrument for weighing air, or for ascertaining the density of air and other gases. — **Barometrical aërometer**, an instrument consisting of a vertical U tube with open ends and mounted upon a stand, used in measuring the relative specific gravities of liquids. Thus, if water is poured into one branch of the tube and oil into the other, and if it is found that 9 inches of water balance 10 inches of oil, it indicates that their relative specific gravities are as 10 to 9.

aërometric (ā-ē-rō-met'rik), *a* Of or pertaining to aërometry.

aërometry (ā-ē-rōm'e-trī), *n* [= *F. aërométrie, < NL aerometria, < aerometrum* see *aerometer*] The science of measuring the weight or density of air and other gases, and of determining the doctrine of their pressure, elasticity, rarefaction, and condensation.

aëronaut (ā-ē-rō-nāt), *n* [*F. aëronaute, < Gr. aëro (aëro-), air, + ναυτης (= L. navita), sailor, < ναῦς = L. navis, ship see nautical*] One who sails or floats in the air, an aerial navigator, a balloonist.

aëronautic, aëronautical (ā-ē-rō-nā'tik, -ti-kal), *a* Pertaining to aëronautics or aërial sailing.

aëronautics (ā-ē-rō-nā'tiks), *n* [*Pl of aëronautic see -ics*] The doctrine, science, or art of floating in the air, or of aerial navigation, as by means of a balloon.

aëronautism (ā-ē-rō-nā'tizm), *n* [*< aëronaut + -ism*] The practice of ascending and floating in the atmosphere, as in balloons.

aërophane (ā-ē-rō-fān), *n* [*Gr. aëro (aëro-), air, + φανής, appearing, < φαίνειν, show*] A light gauze or imitation of crape. *E H Knight*

aërophobia (ā-ē-rō-fō-bi-ā), *n* [*NL, < Gr. aëro-phōbos, afraid of air, < aëro (aëro-), air, + -φόβος, fearing see -phobia*] A dread of air, that is, of a current of air. a symptom common in hydrophobia, and occasionally observed in hysteria and other diseases.

aërophoby (ā-ē-rō-fō-bi), *n* Aërophobia.

aërophone (ā-ē-rō-phōn), *n* [*Gr. aëro (aëro-), air, + φωνή, voice, sound*] An apparatus invented by Edison for increasing the intensity (amplitude) of sound-waves, as those from spoken words.

aërophore (ā-ē-rō-fōr), *n* [*Gr. aëro (aëro-), air, + -φόρος, < φέρειν = E bear*] A respirator in the form of a tank, into which the air exhaled from the lungs passes, and which contains chemicals designed to revive it and fit it to be breathed again. It is carried on the back like a knapsack, and was contrived for the use of men in entering burning buildings. *See respirator*.

aërophyte (ā-ē-rō-fīt), *n* [*Gr. aëro (aëro-), air, + φυτόν, a plant, < φέρειν, produce*] A plant which lives exclusively in air, absorbing all its nourishment from it alone, as some orchids and many *Bromeliaceae*, an air-plant. See *epiphyte*.

aëroplane¹ (ā-ē-rō-plān), *n* [*Gr. aëro (aëro-), air, + planē, q v*] A light framework, either plane or somewhat concave, covered on its under side with a fabric, used in flying-machines and aerostatical experiments. When the machine is driven through the air, the aëroplane, set at an angle of about 7° above the horizontal, tends to support it by its lifting power. See *flying machine*.

aëroplane² (ā-ē-rō-plān), *n* [= *F. aëroplane, < Gr. αερόπλανος, wandering in air, < αέρο (aëro-), air, + πλάνος, wandering see planet*] A flying-machine invented by Victor Tatin and successfully tried at the French experiment-station of Chalais-Meudon in 1879. It consists of a cylindrical receiver for compressed air used to drive two air propellers, two laterally extended wings, and a tail for steering. The velocity obtained was 8 meters per second.

aëroscopy (ā-ē-rō-skēp'si), *n* [*Gr. aëro (aëro-), air, + σκέψις, a viewing, perception, < σκεπτεσθαι, look at, watch see sceptic, skeptic*] In zoöl, ability to perceive the state of the atmosphere; such susceptibility to atmospheric conditions as various animals (insects and snails, for example) are supposed to possess; the sense of aëroscopy, the faculty of exercising aëroscopy in-

Tennison, Adelina

II. *n* A medical man, a physician generally in a humorous sense
Also spelled *Esculapian*

esculin, esculine. See *esculin, esculine*.
Esculus (es'kū-lus), *n.* [*L.*, the Italian oak: see *esculin*, etc.] A genus of trees and shrubs, natural order *Sapindaceae*, chiefly North American, with broad digitate leaves and showy flowers in large panicles. The seeds are large, of the shape and color of chestnuts, but too bitter to be eaten. The timber is of little value. The horse chestnut, *A. Hippocastanum*, supposed to be originally from northern India, is very extensively cultivated as an ornamental shade tree, and the fruits are used in southern Europe for feeding sheep and horses. The American species, growing in the western and southern United States, have the popular name *buckeye* (which see).

Esculus Hippocastanum
a flower, b seed, c, seed cut longitudinally

American species, growing in the western and southern United States, have the popular name *buckeye* (which see).

Esna (esh'na), *n.* See *Eschna*.
Esir (ā'sēr, leel pron ā'sir, mod ī'sir), *n. pl.* [leel, nom pl of *ās*, a god see *As*]. The collective name for the gods of Scandinavian mythology. There were twelve gods and twenty six goddesses, dwellers in Asgard. See *Asgard*.

esnecey, *n.* See *esnecey*.
Esopian (ē-sō'pi-an), *a*. [*L.* *Esopius*, < *Esopus*, Gr. *Ἄσωπος*, *Esop*]. Pertaining to *Esop*, an ancient Greek writer of fables, of whom little or nothing is certainly known, composed by him or in his manner as, a fable in the *Esopian* style. Also spelled *Esopian*.

estates (es-tā'tēz), *n. pl.* [*L.*, freckles, pl of *estus*(-t)s, summer, summer heat see *estival*]. In *med*, heat-spots, freckles, sunburnt patches.

esthematology, *n.* See *esthematology*.
esthesia (es-thē'si-ā), *n.* [*NL.*, < Gr *αἰσθησις*, perception by the senses, < *αἰσθάνεσθαι*, perceive by the senses]. Perception; feeling, sensation, sensibility the opposite of *anesthesia* (which see). Also written *esthesis*, *asthesis*, *esthesis*.

esthesiogen, **esthesiogenic**, etc. See *esthesiogen*, etc.
esthesiology, **esthesiometer**, etc. See *esthesiology*, etc.

esthesis (es-thē'si-ā), *n.* Same as *esthesia*. Also spelled *esthesis*.

esthesodic, **esthete**, etc. See *esthesodic*, etc.
estiferous, **estival**, etc. See *estiferous*, etc.

Estrelata, *n.* See *Estrelata*.
estuaner (es'tū-ān), *n.* [*L.* *estuan*(-t)s, ppr of *estuar*, burn, glow see *estuate*]. Heat, warmth as, "regulated estuaner from wine," Sir T. Browne. Also spelled *estuaner*.

estuary (es'tū-ā-ri), *n.*, *pl.* *estuaries* (-riz) [*L.* *estuarium*, a vent-hole for vapors, also an estuary, < *estuari*, rage, burn, be warm see *estuary*]. 1 A vapor-bath, or any other means for conveying heat to the body. 2 See *estuary*.
estuate (es'tū-āt), *v.* < [*L.* *estuat*, ppr of *estuar*, burn, glow, rage, boil up, < *estus*, a burning, glow, fire, surge, etc. see *estuary*, *estival*]. To boil, swell and rage, be agitated. Also spelled *estuat*.

estuation (es-tū-ā'shon), *n.* [*L.* *estuat*(-n), < *estuar* see *estuate*]. A boiling, agitation, commotion of a fluid, hence, violent mental commotion, excitement as, "estuations of joys and fears," Montaigne. Also spelled *estuation*.
esture (es'tūr), *n.* [Irreg < *L.* *estuar*, be in commotion, boil, rage, etc. as if for *estus*, surge, billows see *estuate*]. Violence, commotion. Also spelled *esture*.

The seas retain
Not only their outrageous esture there
Chapman, *Odyssey*, xii. 111

et., estat. [Abbrev of *L.* *etatus*, gen of *etatus*(-t)s, age see *age* and *eternal*]. Of the age, aged chiefly used in classic or scholarly epitaphs or obituaries, whether composed in English or in Latin as, *Ob* 1880, *et. (or etat)* 70 in full Latin, *obit (anno Domini)* MDCCCLXXX, [anno] *etatus* (sue) LXX, that is, he (or she) died in (the year of the Lord) 1880, in the seventieth year of his (or her) age (but usually taken as "70 [full] years of age," "aged 70").

Etea (ē-tā's), *n.* [*NL.*; origin not obvious.] The typical genus of *Eteidae*. *E. anguinea* is known as snake-coralline. Also written *Etea*.
Eteidae (ē-tā'ī-dē), *n. pl.* [*NL.*, < *Etea* + *-idae*]. A family of chelostomatous polyzoons, typified by *Etea*, erect and free or decumbent and adherent, uniserial, with subterminal membranous area and tubular zoecia. Also written *Eteide*.

Ethallum (ē-thā'lūm), *n.* [*NL.*, < Gr *αἰθαλος*, smoke, soot; with ref to the abundant dust-like spores. Cf *Fuligo*, an allied genus, < *L.* *fuligo*, soot]. 1. A genus of *Myxomycetes*, or slime-molds, forming thick cake-like receptacles covered by a brittle cortex, and closely adherent to the surface on which they grow. They are often found in hothouses where spent tan is used for heating purposes and then are sometimes called *flower* of tan. 2. [*c*] A similar receptacle in any genus with a plural, *athalia* (-ā).

etheling, *n.* See *atheling*.
ætheogam (ā-ē'thō-gam), *n.* [*Gr* *αἰθῆρ*, unusual (< *a-* priv + *ἠῆρ*, custom see *ethic*), + *γάμος*, marriage]. In De Candolle's system of classification, a plant belonging to a group of cryptogams which were the only ones of the order then known to have sexual organs, including the *Equisetaceae*, *Filices*, *Musci*, higher *Hepaticæ*, etc.

ætheogamous (ā-ē'thō-gō'a-mus), *a*. Belonging to the ætheogams.

ether, *n.* See *ether*.
Etheria (ē-thē'rī-ā), *n.* [*NL.*, appar named from the brilliancy of the interior surface, < *L.* *atherius*, < Gr *αἰθῆρ*, of the ether or upper air, heavenly, ethereal see *ethereal*]. A genus of bivalve mollusks, of the family *Unionida*, found in the rivers of Africa and Madagascar, river-oysters. The exterior is rugged, but the interior of the valves is pearly, of a vivid green color, and raised in small blisters. The natives of Nubia adorn their tombs with them. Also spelled *Etheria*, as originally by Lamarck, 1805.

etheriid (ē-thē'rī-d), *n.* A bivalve mollusk of the family *Etheriidae*.

Etheriidae (ē-thē'rī-dē), *n. pl.* [*NL.*, < *Etheria* + *-idae*]. A family of mollusks, of which *Etheria* is the typical genus. Also written *Etheriunda*, *Etheridae*, *Etheruda*, and *Etherida*.

Ethiop, **Ethiopian**. See *Ethiop*, *Ethiopian*.
Ethiops (ē'thi-ops), *n.* [*NL.*, after *L.* *Ethiops*, Ethiopian see *Ethiop*]. An old pharmaceutical term applied to several mineral preparations of a black or nearly black color. Also spelled *ethiops*. — **Ethiops martial** [*L.* *martialis*, of Mars, i. e., of iron], black oxide of iron. — **Ethiops mineral**, black sulphid of mercury, prepared in the laboratory.

ethol (ē'thō-jen), *n.* [*Gr* *αἶθρ*, a burning heat (see *ether*), + *-γενής*, taken as 'producing' see *-gen*]. Nitrid of boron, a white, amorphous, tasteless, inodorous powder, insoluble in water, infusible, and non-volatile. Heated in an alcohol flame fed with oxygen, it burns rapidly with a faint greenish white flame. *Watts*.

Ethroscope (ē'th-rī-skōp), *n.* [*Gr* *αἶθρ*, the open sky (< *αἰθρ*, clear, fair, in the open air, < *αἶθρ*, the open sky, < *αἶθρ*, the sky, the upper air, > *E. ether*), + *σκοπεῖν*, observe, look at]. An instrument for measuring the minute variations of temperature due to different conditions of the sky. It consists of a differential thermometer (which see, under the *thermometer*), both bulbs of which are within a cup shaped mirror, one of them in its focus, so as to be especially affected on being exposed to the sky. The cup is kept covered with a lid when the instrument is not in use. Its delicacy is so great that it is affected by every passing cloud.

Ethusa (ē-thū'sā), *n.* [*NL.*, < Gr *αἶθρ*, fem of *αἶθρ*, ppr of *αἶθρ*, burn, blaze. see *ether*]. 1 In bot, a genus of umbelliferous plants, of a single species, *E. Cynaprium*, introduced into America from Europe, and known as fool's-parley. It is an annual garden weed, of nauseous and deleterious properties, and is sometimes mistaken for parsley, whence its common name. 2 In *zool*, a genus of decapod crustaceans, of the family *Dorippidae*.

Ætian (ā-ē'shi-an), *n.* [*LL.* *Aetius*, Gr *Ἄετιος*, a personal name, < **artios*, *artēos*, *aitēos*, of the eagle, < *αἰετός*, *aiē-tōs*, eagle]. One of a sect of strict Arians of the fourth century, named from their leader *Ætius*, called the *Ætist* (died in Constantinople, A. D. 387). See *Eunomian* and *Anomæan*.

Etide (ē'tī-dē), *n. pl.* Same as *Eteidae*.
etiological, etiologically (ē'tī-ō-lō-jī-kal-i), *a.* [*Gr.* *αιτιολογικός*, inquiring into causes: see *etiology*]. Of or pertaining to *etiology*; connected with or dependent upon the doctrine of efficient or physical causes, as distinguished from teleological or final causes.

The practical results of *etiological* studies, so far as the prevention and cure of disease are concerned, are likely to be much greater than those which have been gained by the pathologists. *G. M. Sternberg*, *Bacteria*, p. 236

etiological, etiologically (ē'tī-ō-lō-jī-kal-i), *adv.* In an *etiological* manner; with regard to cause, or the assignment of a cause. as, an *etiological* obscure failure of nutrition.
etilogist, etiologist (ē'tī-ō-lō-jist), *n.* One who is versed in *etiology*; one who investigates physical causes, or inquires into the relations of such causes to effects in physics or biology often used as the opposite of *teleologist*.

etiology, etiology (ē'tī-ō-lō-jī), *n.* [*LL.* *ætiologia*, < Gr *αιτιολογία*, statement of the cause (cf *αιτιολογέειν*, inquire into the cause, account for), < *aitia*, cause, + *-λογία*, < *λέγειν*, speak see *-ology*]. 1 An inquiry into or a theory of the physical causes of any class of phenomena.

Morphology, distribution, and physiology investigate and determine the facts of biology. *Etiology* has for its object the ascertainment of the causes of these facts, and the explanation of biological phenomena, by showing that they constitute particular cases of general physical laws. It is hardly needful to say that *etiology*, as thus conceived, is in its infancy. *Huxley*, *Anat. Invert.*, p. 37.

2. Specifically, in *med*, an inquiry into or account of the origin or causes of disease, or of a particular kind or case of disease.

Sometimes written *ætiology*.

afferent (af'e-ment), *a.* [L *afferent* (-t-), *ppr* of *affere*, *adferre*, carry to, < *ad*, to, + *ferre*, carry, bear] Bringing, carrying to or toward, conveying inward. Used in *physiol* as the opposite of *efferent*, and said (a) of vessels which convey blood from the periphery to the physiological center of the blood circulation, (b) of those lymphatic vessels which enter a lymphatic gland, as opposed to those which leave it, and chiefly (c) of those nerves which have a sensory or efferent function, conveying an impulse from the periphery to a ganglionic center of the nervous system. In the case of nerves, *afferent* is nearly synonymous with *sensory*, as opposed to *motor*. The term is also applied to the function of these nerves, and to that which they convey as, an *afferent* impulse

Having arrived at this notion of an impulse travelling along a nerve, we readily pass to the conception of a sensory nerve as a nerve which, when active, brings an impulse to a central organ, or is *afferent* and of a motor nerve, as a nerve which carries away an impulse from the organ, or is *efferent*. It is very convenient to use these terms to denote the two great classes of nerves, for there are *afferent* nerves which are not sensory, while there may be in man, and certainly are in animals, efferent nerves which are not motor, in the sense of inducing muscular contraction *Huxley*, *Physiol*, p. 289

In the Jewish, Roman, and canon laws, affinity by marriage or adoption is a bar to marriage within certain degrees, equally with consanguinity and on this ground rests the prohibition of marriage with a deceased wife's sister in Great Britain. The canon law treats unlawful sexual intercourse as creating the same affinity with marriage. The relationship of godparents and godchildren, called *spiritual affinity*, is not now considered a bar to marriage, as it was before the Council of Trent, which made no provision on the subject

Solomon made *affinity* with Pharaoh king of Egypt, and took Pharaoh's daughter *1 Ki* iii. 1

The afflicted voice of the country, in its hour of danger, has charmed down with a sweet persuasion the angry passions of the day
Everett, Orations, I 379

=*Syn.* Afflict, Distress, Trouble, Harass, Torment try, pain, hurt, plague, persecute Of these words, afflict im-plies the most spiritual effect, the greatest depth and con-tinuation of sorrow To distress is a more outward act, bringing one into straitsness of circumstances or feeling, so that there is more anxiety for the future, while perhaps the afflicted person knows the full measure of his loss and is wholly occupied with the past To trouble is a lighter act, involving perhaps confusion or uncertainty of mind, and especially embarrassment Harass, as applied to mind or body, suggests the infliction of the weariness that comes from the continuance or repetition of trying experiences, so that there is not time for rest Torment implies the infliction of acute pain, physical or mental, and is fre-quently used in the sense of harassing by frequent return The use of afflicted otherwise than of persons severally or collectively is highly figurative or poetic as, my afflicted fortunes, the other words have freer figurative use See affliction

O ye afflicted ones who lie
Steeped to the lips in misery
Longfellow, Goblet of Life

I come to visit the afflicted spirits
Here in the prison
Shak, M for M, II 3

Myself distress'd, an exile, and unknown,

=*Syn.* 1 Affliction, Grief, Sorrow, Sadness, Distress, Mis-ery, Wretchedness, pain Affliction is acute, continued suffering caused by loss or its consequences That is an affliction which is a severe deprivation or loss, as of health limbs, faculties, friends, or the property necessary to one's support, not temporary ailments, nor losses easily borne or repaired Grief is mental suffering too violent to be long continued, and therefore subsiding into sorrow or sadness, it is always in view of something recently past Affliction is a personal matter, grief may be over another's work Sorrow, though more quiet, may be long continued or permanent (as, a lifelong sorrow), and may be in view of the past, present, or future, it may be active penitence for wrong doing, as sorrow for sin, or it may be wholly sympathetic Sadness is a feeling of dejection or inability to be cheerful, the cause being not always a matter of consciousness, it is primarily personal, and is of various degrees of depth and permanence Distress is extreme adversity, and, subjectively, the corresponding state of mind, it is the agitation appropriate to cir-cumstances well nigh desperate It may be wholly syn-pa-thetic, as the distress caused by calamity to another and it may imply a struggle The first five words may be freely used for either cause or effect, misery and wretched-ness denote generally only the effect, that is the state of feeling Misery is great and unrelenting pain of body or mind, unhappiness that crushes the spirit Wretchedness is sometimes almost identical with misery, and sometimes goes beyond it, even to abjectness See calamity

The furnace of affliction refines us from earthly drossi-ness, and softens us for the impression of God's own stamp
Boyle

Indeed the violence and impression of an excessive
grief must of necessity astonish the soul, and wholly de-prive her of her ordinary functions

= *Syn.* 2 Affront, Insult, Indignity, Outrage, provocation, impertinence, offense, rudeness. These words express disrespect shown in a way that is, or is meant to be, galling. An affront is generally open and to the face. An insult is stronger, perhaps accompanied by more insolence of manner, it is a deeper disgrace and a greater injury to the feelings of its object. An indignity is, specifically, treatment that is unworthy — an affront, insult, injury, or outrage from which one's condition or character should have saved one as, Zenobia was subjected to the indignity of being led in chains at Aurelian's triumph. An outrage, primarily involving the idea of violence to the person, is a wanton transgression of law or propriety in any way, the perpetration of that which is shamefully contrary to the dictates of humanity or even decency, toward a person it is a combination of insult with indignity, hence it often stands for extreme abusiveness of language. It has freedom of use sufficient to make proper such expressions as, an outrage to his feelings, an outrage to all decency

To call God to witness truth, or a lie perhaps, or to appeal to him on every trivial occasion, in common discourse, is one of the highest indignities and affronts that can be offered him *Ray*

Agamists and wilful rejecters of matrimony.
Foer, *Book of Martyrs*.

agamogenesis (ag'a-mō-jen'e-sis), *n.* [*Gr* *ἀγαμος*, unmarried (see *agamous*), + *γένεσις*, production] Non-sexual reproduction. (a) In *zool.*, the production of young without the congress of the sexes, one of the phenomena of alternate generation, *parthenogenesis* opposed to *gamogenesis*.

Agamogenesis is of frequent occurrence among insects, and occurs under two extreme forms. In the one, the parent is a perfect female, while the germs have all the morphological characters of eggs, and to this the term *parthenogenesis* ought to be restricted. In the other, the parent has incomplete female genitalia, and the germs have not the ordinary characters of insect eggs.
Huxley, *Anat. Invert.*, p. 383.

(b) In *bot.*, natural reproduction by buds, offshoots, cell-division, etc.

agamogenetic (ag'a-mō-jē-net'ik), *a.* [*Gr* *ἀγαμος*, unmarried (see *agamous*), + *γενεσις*, production] Of or pertaining to *agamogenesis*, produced without the congress of the sexes.

All known *agamogenetic* processes end in a complete return to the primitive stock.
Huxley, *Lay Sermons*, p. 312.

agamogenetically (ag'a-mō-jē-net'ik-kal-i), *adv.* In an *agamogenetic* manner, by or with asexual generation.

In most *Discophora*, the embryo becomes a fixed actinula, multiplies *agamogenetically* by budding and gives rise to permanent colonies of Hydriform polyps.
Huxley, *Anat. Invert.*, p. 133.

agamoid (ag'a-mōid), *a* and *n.* [*Gr* *ἀγαμή* + *-oid*, *q. v.*] 1. *a.* In *zool.*, pertaining to or resembling the *Agamidae* or *Agamodea*.

II. *n.* A lizard of the family *Agamidae* or superfamily *Agamodea*.

Agami or Trumpeter (*Psophodes crepitans*)

Agamoidea (ag-a-moi'dē-ū), *n. pl.* [NL, < *Agama* + *-oidea*] A superfamily of eriglossate lacertilians, having concavo-convex vertebræ, clavicles not dilated proximally, and no post-orbital or postfrontal squamosal arches. The group comprises the families *Agamidae*, *Iguanidae*, *Xenosauridae*, *Phrynosomatidae*, and *Anolis*. See cuts under *Agamidae* and *Iguanidae*.

agamous (ag'a-mus), *a* [NL *agamus*, < Gr *ἀγαμος*, without marriage, unmarried, < *a-* priv + *γamos*, marriage.] 1 In bot., same as *agamie*. — 2. In zool., having no distinguishable sexual organs. See *agamie*, 1. [Rare]

The molluscan race are divided into two branches, the phanerogamous and the agamous or cryptogamic.

Johnston, *Introduct. to Conchology*.

agamy (ag'a-mī), *n* [Gr *ἀγάμη*, < *ἀγαμος*: see *agamous*] Non-marriage; abstention from marriage, or rejection or non-recognition of the requirement of marriage in the relation of the sexes.

The species are perennial herbs from southern Africa, with strap-shaped radical leaves and large umbels of bright blue flowers. They have been long in cultivation.

agape (a-gap' or a-gāp'), *prep. phr.* as *adv.* or *a* [Gr *ἀγάπη*, love] With the mouth wide open, in an attitude of wonder, expectation, or eager attention.

Dazzles the crowd, and sets them all *agape*.
Milton, *l. l.*, v. 357.

A fledgling puffed,
Beginning life with callow beak
Agape for luck. *Browning*, *King and Book*, l. 61.

agape (ag'a-pē), *n*, *pl.* *agapa* (-pē) [L, < Gr *ἀγάπη*, love, charity in the abstract sense, *ἀγαπᾶν*, to love, to treat with affection] 1 A meal.

Agape or Love feast (From Roller's "Catacombs de Rome")

partaken of in common by the primitive Christians, originally in connection with the Lord's supper. It was made the occasion of offerings for the poor, and closed with devotional exercises including the kiss of love. According to late usage, *agape* were also associated with weddings, funerals, anniversaries of martyrdoms, and the dedication of churches. The loss of their original character and the growth of abuses led to the prohibition of them in church buildings, and in the fourth century to their separation from the Lord's supper and their gradual discontinuance. Vestiges of the practice, however, remained as late as the Council of Basle in the fifteenth century, and customs historically derived from it are still observed by some denominations. See *Love Feast*.

May God speed the universal pentecost and *agape* of his one Holy Catholic and Apostolic Church.
Schaff, *Christianity*, p. 20.

2 [cap] [NL] In zool., a genus of lepidopterous insects.

Agapemone (ag-a-pem'ō-nē), *n* [Irreg < Gr *ἀγαπή*, love (see *agape*), + *μονή*, a staying, a stopping-place, dwelling, < *μεινέω*, stay, remain, < *μεινέω*] Laterally, the abode of love, specifically, the name of an association of men and women established at Charlney, Somersetshire, England, in 1846, under the direction of the Rev. Henry James Prince, the members of which lived on a common fund.

Agapemonian, **Agapemonite** (ag'a-pe-mō-ni-an, ag-a-pem'ō-nit), *n* An inmate of the Agapemone (which see).

agapetæ (ag-a-pē'tē), *n. pl.* [LL, < Gr *ἀγαπῆται*, in *pl.* of *ἀγαπῶ*, beloved, verbal adj. of *ἀγαπᾶν*, to love] A title given in the early ages of the church to virgins who dwelt, in a state of so-called spiritual love, with monks and others professing celibacy. This intercourse occasioned scandal, and was condemned by the Lateran Council in 1139.

Agaphelinæ (a-gaf'e-lī-nē), *n. pl.* [NL, < *Agaphelus* + *-inæ*] A subfamily of finner whales, family *Balenopteridae*, having the skin of the throat not plicated and no dorsal fin.

Agaphelus (a-gaf'e-lus), *n.* [NL, < Gr *ἀγᾶν*, very, much, + *ἀφελος*, smooth. These whales lack the usual folds or plaits of the throat.] The typical genus of the subfamily *Agaphelinæ*. *A. gibbosus* is the scrag-whale. E. D. Cope, 1868.

agaphite (ag'a-fit), *n* [So named by Fischer in 1816, < *Agaphi*, a naturalist who visited the regions in Persia where the turquoise is found, + *-ite*] A name sometimes given to the turquoise, more especially to the fine blue variety.

Agapornis (ag-a-pōr'nīs), *n* [NL, < Gr *ἀγαπῶν*, love (see *agape*), + *ορνίς*, a bird] A genus of

Love birds (*Agapornis cana*)

small African parrots, including the love-birds, sometimes made the type of a subfamily *Agapornithinae*. P. J. Selby, 1836. See *Love-bird*.

agari, *n* Same as *acker*, 2. See *T. Brown*.

agar-agar (a-gar-a-gur), *n* The native name of Ceylon moss or Bengal isinglass, consisting of dried seaweed of several species, such as *Gracilaria lemaneiformis*, *Eucheuma spinosum*, etc. It is much used in the East for soups and jellies. Also called *agar-agar*. See *Agarose*.

agaric (ag'a-rik or a-gar'ik), *n* and *a* [L. *agaricum*, < Gr *ἀγάρικον*, a sort of tree-fungus used as tinder, named, according to Dioscorides, from the country of the *Agari*, in Sarmatia, where this fungus abounded.] 1 *n* A fungus of the genus *Agaricus*. Among the old herbalists the name had a wider range, including the corky fungus growing on trunks of trees, like the *Cantharellus*, *Polyporus officinalis*, to which the word was originally applied, and which is still known as *agaric* in the material medica. See *Agaricus*, *Boletus*, and *Polyporus*. — **Agaric-gnat**, a dipterous insect of the family *Mycetophilidae* (which see).

2 *a* Of or pertaining to *agaricus*, fungoid. — **Agaric mineral**, a very soft and light variety of calcite or calcium carbonate. It is generally pure white, found chiefly in the clefts of rocks and at the bottom of some lakes in a loose or semi-indurated form resembling a fungus. The name is also applied to a stone of loose consistency found in Tuscany, of which bricks may be made so light as to float in water, and of which the ancients are supposed to have made their floating bricks. It is a hydrated silicate of magnesium mixed with lime, alumina and a small quantity of iron. Also called *mountain milk* and *mountain meal*.

Agaricia (ag-a-ris'i-ā), *n* [NL, < *Agaricus*, *q. v.*] A genus of aporose sclerodermatous stromatolites, of the family *Fungidae*, or mushroom-corals. Lamarck, 1801.

agariciform (a-gar'i-si-fōrm), *a* [NL *Agaricus*, *agaric*, + L. *-formis*, < *forma*, form.] Mushroom-shaped.

agaricin (a-gar'i-sin), *n* [Gr *ἀγάρικον* + *-in*] A white crystalline substance obtained from the white agaric, *Polyporus officinalis*.

Agaricini (a-gar'i-si-ni), *n. pl.* [NL, < *Agaricus*] An order of fungi having the fruit-bearing surface arranged in radiating gills, as in the mushrooms and toadstools.

agaricoid (a-gar'i-koid), *a*. Of the nature of an agaric, mushroom-like.

Agaricus (a-gar'i-kus), *n* [NL, masc., < L. *agaricum*, prop. neut. adj. see *agaric*] A large

Common Mushroom (*Agaricus campestris*)

and important genus of fungi, characterized by having a fleshy cap or pileus, and a number of radiating plates or gills on which are produced the naked spores. The majority of the species are furnished with stems, but some are attached by their pilei to the object on which they grow. Over a thousand species are known, which are arranged in five sections according to the color of their spores: white, pink, brown, purple, or black. Many of the species are edible, like the common mushroom, *A. campestris*, while others are deleterious and even poisonous. See *mushroom*.

Agarista (ag-a-ris'ta), *n* [NL] The typical genus of the family *Agaristidae*.

Agaristidae (ag-a-ris'ti-dē), *n. pl.* [NL, < *Agarista* + *-idae*] A family of heterocerous lepidopterous insects, or moths, typified by the genus *Agarista*.

agasti, *t. t.* [ME. *agasten*, pp. *agast* see *aghost*, *ghost*] 1 To frighten, terrify usually in past participle *agast*, now written *aghost* (which see).

On other gaily thing that him *agast*.
Spenser, *F. Q.*, I. ix. 21.

2 Reflexively, to be terrified.

The tyngers on the temple dore that honged,
And cack the dore's clatterden ful faate,
Of which Arctia somewhat hum *agaste*.
Chaucer, *Knight's Tale*, l. 2424.

Agastrom (a-gas'trō-m), *n. pl.* [NL, see *Agastria*] A term proposed in 1874 by Huxley as a provisional designation of one of two divisions of metazoic animals (the other being *Gastrea*), by which the orders *Cestoda* and *Acanthocephala*, which have no alimentary canal or proper digestive cavity, are contrasted with all other *Metazoa*. *Journ. Linn. Soc.*, XII. 226.

Some alterations in this scheme have since been made, the *Agastria* are relegated to the *Cestoda* and *Tricladida* and *Acanthocephala* to the *Nematoda*.
Pawson, *Zool. Class.*, p. 4.

Agastria (a-gas'tri-ā), *n. pl.* [NL, < Gr *a-* priv + *γαστήρ*, stomach] A term of no exact significance in modern biology, but formerly employed to designate certain low organisms which have no proper digestive cavity. Also called *Agastrea*.

agastric (a-gas'trik), *a* [Gr *a-* priv + *γαστήρ*, stomach, see *agastria*] Without a stomach or proper intestinal canal, as the tapeworm.

Agastrica (a-gas'tri-kā), *n. pl.* Same as *Agastria*.

agate (a-gat'), *prep. phr.* as *adv.* [ME. *on gate*, on, E. *at*, on, *gate*, *l. gate*, way, see *gate* and *gate*] On the way, going, agoing, in motion, as, "set him *agate* again," *Lantern*, m. 6, "set the bells *agate*," *Colquhoun* [Old and prov. Eng. and Scotch].

agate (ag'at), *n* [Early mod. E. *agat*, *agget*, *agot*, *agotol*, *agat*, *agot*, *agath* (= D. *agat* = Sw. *Dun agat*), < OF. *agate*, later "agate," an *agate*"] (Colgrave), mod. F. *agate* = Pr. *agate*, *achates* = Sp. *Agate*. It *agate* = MHG *G. achat*, < L. *achates*, < Gr *ἀχάτης*, an *agate* so called, according to Pliny, because first found near the river *Ἀχάτης*, in Sicily.]

Agate, polished showing banded structure

1. A variety of quartz which is peculiar in consisting of bands or layers of various colors blended together. It is essentially a variegated chalcedony, but some of the bands may consist of other varieties of quartz, for the most part cryptocrystalline. The varied manner in which these materials are arranged causes the agate when polished to assume characteristic differences of appearance, and thus certain varieties are distinguished as ribbon agate, fortification agate, zone agate, star agate, moss agate, clouded agate, etc. See also cut under *concentric*. Agate is found chiefly in trap rocks and serpentine, often in the form of nodules, called *geodes*. It is esteemed the least valuable of the precious stones. Agates are cut and polished in large quantities at Thuringia in Oldenburg, Germany, where also artificial means are used to produce striking varieties of color in these stones. In Scotland also they are cut and polished, under the name of *Scotch pebbles*. They are used for rings, seals, cups, beads, boxes, handles of small utensils, butchers' pebbles and mortars, and in delicate mechanism as bearing surfaces, pivots, and the knife edges of weighing apparatus. In Shakspeare's *agat* is a symbol of little mass or smallness from the little figures cut in these stones when set in rings.

I was never maimed with an *agate* till now.
Shak. *2 Hen. IV.*, i. 2.

2 A draw-plate used by gold wire drawers, named from the piece of agate through which the eye is drilled. — 3 In printing, type of a size between pearl and nonpareil, giving about 160

lines to the foot. It is used chiefly in newspapers. In Great Britain it is known as *ruby*.

This line is printed in agate

4 An instrument used by bookbinders for polishing, a burnisher. *McElrath, Com Dict* — 5 A child's playing-marble made of agate, or of glass in imitation of agate

agate-glass (ag'-at-glas), *n* A variegated glass made by melting together waste pieces of colored glass

agate-shell (ag'-at-she), *n* A popular name of certain large shells of the genus *Achatina* (which see)

agate-snail (ag'-at-snal), *n* A species of the genus *Achatina* (which see)

agate-ware (ag'-at-war), *n* 1 Pottery mottled and veined in imitation of agate — 2 A variety of enameled iron or steel household ware

Agathis (ag'-a-this), *n* [NL, < Gr *agathis*, a ball of thread] 1 In bot, the older and now accepted name for the genus of *Coniferæ* commonly known as *Dammara* (which see) — 2 In zool, a genus of ichneumon-flies, of the family *Phaenocarpa* Latreille, 1804

agathism (ag'-a-thizm), *n* [< Gr *agathos*, good, + *-ism*] The doctrine that all things tend toward ultimate good

agathist (ag'-a-thist), *n* [< Gr *agathos*, good, + *-ist*] One who holds the doctrine of agathism

agathocacological (ag'-a-tho-kak'-o-jol'-i-kal), *a* [< Gr *agathos*, good, + *kakos*, bad, + *-ology* (-λογία), < *-logia*, speak see *-ology*] Composed of good and evil, pertaining to both good and evil. *Southery, Doctor*, I 120

agathodæmon (ag'-a-tho-dē-mon), *n* [< Gr *agathodaimon*, prop. written separately *agathos daimon*, good, *daimon*, spirit, demon see *demon*] A good genius or spirit, a male divinity corresponding to the female *Agathe Tyche*, or Good Fortune. At Athens, and elsewhere in ancient Greece, it was customary at the end of a meal to pour out in his honor a libation of pure wine

agathodæmonic (ag'-a-tho-dē-mon'-ik), *a* [< Gr *agathodaimon* see *agathodæmon* and *dæmonic*] Relating to or of the nature of an agathodæmon, pertaining to an agathodæmon

agathopoietic (ag'-a-tho-poi-et'-ik), *a* [Prop. *agathopoietic* or *-poietic*, < Gr. *agathopoietis*, do good, < *agathos*, good, + *poietis*, do see *poietic*] Intended to do good, benevolent. *Bentham* [Rare]

Agathosma (ag'-a-thoz'-mh), *n*. [< Gr *agathos*, good, + *osma*, earlier *osmē*, smell, akin to *L odor* see *odor*] A large genus of plants, natural order *Rutaceæ*, natives of the Cape of Good Hope. The Hottentots mix the dried and powdered leaves of *A pulchella* with the grease with which they smear their bodies, giving them a small intolerable to Europeans. Several species are cultivated for their flowers

agatiferos (ag'-a-tif'-e-rus), *a* [< *agathos* + *-i-ferous*, < *L ferre* = *E bear*!] Containing or producing agates. *Craig*

agatiform (ag'-a-ti-fōrm), *a* [< *agathos* + *-i-form*, < *L forma*, form] Having the form of an agate, resembling an agate in appearance

agatine (ag'-a-tin), *a* [< *agathos* + *-ine*!] Pertaining to or resembling agate

agatized (ag'-a-tiz), *v t*, pret and pp *agatized*, *ppr agatizing* [< *agathos* + *-ize*] To change into agate. Also spelled *agative*. *Agatized wood*, alkali wood in the form of agate

agaty (ag'-a-ti), *a*. [< *agathos* + *-y*] Of the nature of or resembling agate. as, "an *agaty* flint." *Woodward*

Agave (a-gā'-vē), *n* [NL, < Gr *agavē*, noble, used also as a proper name, *Ἀγавή*, *L Agave*, *Agave*, fem of *αγανός*, noble illustrious, akin to *gavē*, be proud, rejoice, and to *L gaudium*, joy] A large North American genus of plants, of the natural order *Amayllidaceæ*, chiefly Mexican. They are acaulescent or nearly so, of slow growth, often large, consisting of a dense cluster of rigid fleshy leaves, which are spine tipped and usually spinosely toothed. The best known species is the century plant, or American aloe, *A Americana*, first introduced from Mexico into Europe in 1561, and now frequently cultivated for ornament, as are also various other species. It lives many years, 10 to 50 or more, before flowering, whence the name *century plant*. At maturity it

Century Plant (*Agave Americana*)

throws up rapidly from its center a tall scape bearing a large compound inflorescence, and dies after perfecting its fruit. It is extensively cultivated in Mexico under the name of *maguey*, and is put to many uses. The sap, obtained in abundance from the plant when the flowering stem is just ready to burst forth, produces when fermented a beverage resembling cider, called by the Mexicans *pulque*. An extract of the leaves is used as a substitute for soap, and the flower stem, when withered, is cut up into slices to form razor strops. The leaves of nearly all the species yield a more or less valuable fiber, which is made into thread and ropes and has been used in the manufacture of paper. Sisal hemp, or henequen, is the product of *A latifolia* and is exported in large quantities from Yucatan. A West Indian species, *A Keratto*, closely resembling *A Americana*, yields the keratto fiber. *A Virginica*, of the southern United States, known as false aloë, belongs to a group of species with less rigid leaves and with the solitary flower in a simple spike

agaze (a-gāz'), *prep* *phr* as *adv* or *a* [< ME *a gaze*, *a, E as, gaze, E gaze*] On the gaze, in a gazing attitude

3 A period of human life usually marked by a certain stage of physical or mental development, especially, a degree of development, approximately or presumptively measured by years from birth, which involves responsibility to law and capacity to act with legal effect as, the *age* of discretion or of maturity (the former technically occurring some years prior to the latter, about the age of fourteen). More specifically, of *age*, full *age* or *legal age* designates the attainment of majority at that period when the general disabilities of infancy cease. It is fixed by the law of England and of most of the United States at 21 (in some States at 18 for females), but in Germany and some other European States at 24 or 25. At common law one is of full age the first instant of the beginning of the day before the 21st anniversary of one's birth. Other periods are fixed for special purposes, thus, the *age of consent* for marriage was fixed by the common law at 14 for males and 12 for females, not as being a *marriageable age* in the ordinary sense of being a suitable age for marriage, but as being the age after which one contracting marriage could not justly repudiate its obligations on the mere ground of youth. For the purposes of consent which will preclude charges of abduction and the like, the *age of consent* has been fixed in some jurisdictions at 16. Up to the age of 7 a child is conclusively presumed to be incapable of criminal intent, from 7 to 14 (in some jurisdictions 12) it is presumed to be incapable of such intent, but the contrary may be proved, over that age it is presumed to be capable of such intent. At 12 the capacity to take the oath of allegiance begins. The *age of discretion*, in the sense in which the term is used in the law of infancy, is 14, after which the child wishes as to the choice of a guardian are consulted (sometimes called the *age of election*), and the entire period before the age of 14 is called the *age of nurture*. The age at which testamentary capacity begins in most of the United States is 21, with exceptions, many al

13 In *poker*, the eldest hand, or the first player to the left of the dealer who bets — *Age of acrogens* See *acrogen* — *Age of the moon*, the time elapsed since her last conjunction with the sun — *Ages in mythology and history*, particular periods in the life of mankind distinguished by bearing specific names. The most important of these periods are (a) The poetic division of human existence into the golden, silver, heroic (generally omitted), brazen, and iron *ages*, ascribed to Hesiod (about the eighth century B C) who regarded the people of the different ages as constituting distinct races successively replacing each other. See *extract*. The terms are still in use, especially *golden age* which is applied to the culminating or most brilliant epoch of any portion of history or department of activity as, the seventeenth century was the *golden age* of the drama, the nineteenth century is the *golden age* of invention, the *golden age* of a country's power or prosperity

The *golden age* (of Hesiod), synchronous with the reign of Saturn, was a period of patriarchal simplicity, when the earth yielded its fruits spontaneously and spring was eternal, the *silver age*, governed by Jupiter, was a lawless time, in which the seasons were first divided, agriculture took its rise, and man began to hold property in land, the *brazen age*, or reign of Neptune, was an epoch of war and violence, in the *heroic age* (omitted by Hesiod) the world began to aspire toward better things, and in the *iron* or *Plutonian age*, in which Hesiod believed himself to be living, justice and piety had disappeared from the earth

Am Cyc, I 185

(b) The *dark ages*, a period of European history, beginning with or shortly before the fall of the Roman Empire of the West (A D 476), marked by a general decline of learning and civilization. It was introduced by the great influx of barbarians into western Europe in the fourth and fifth centuries known as the wandering of the nations, and is reckoned by Hallam as extending to the eleventh century, when a general revival of wealth, manners, taste, and learning began, and by others to the time

of Dante in the thirteenth century, or later. (c) The *middle ages*, a period of about a thousand years, between the close of what is technically considered ancient history and the first definite movements in Europe of the distinctively modern spirit of freedom and enterprise. Its beginning is synchronous with that of the dark ages, and it is variously reckoned as extending to the fall of Constantinople (1453), the invention of printing, the Renaissance, or the discovery of America, in the fifteenth century, or to the Reformation, in the early part of the sixteenth. (d) The *feudal ages*, a portion of the middle ages, marked by the prevalence of feudal institutions and of the spirit of chivalry, extending from their nearly universal establishment in the tenth century to their decline in the sixteenth. — **Archaeological ages or periods**, the stone age, the bronze age, and the iron age, these names

Implements of the Stone Age

1 saw edged flint knife, 2, crescent shaped flint knife, 3 stone axe, 4 flint flake knife, 5 harpoon head of flint, 6 flint knife

being given in accordance with the materials employed for weapons, implements, etc., during the particular period. The stone age has been subdivided into two, the paleolithic and neolithic. (See these words.) The word *age* in this sense is improperly used (by an unfortunate transfer from the Scandinavian archaeology) since it has no reference to chronology, but simply denotes the stage at which a people has arrived in its progress toward civilization. There are tribes yet in their stone age. Neither do the more primitive implements necessarily disappear wholly on the appearance of those of a more advanced stage. The phrase *stone age* or *stage*, therefore, merely marks the most primitive period, and *bronze age* (chiefly in antiquity) that before the employment of iron, among any specified people or tribe. — **Canonical age**. (a) In the *Rom Cath Ch*, that age fixed by the church at which her subjects incur, or become capable of assuming, special obligations, states of life, etc., or of enjoying special privileges and dignities. Thus, the obligation of fasting begins at twenty-one, profession by religious vows is made only after the age of sixteen, and to become a bishop one should have completed his thirtieth year. The age of reason is that at which a child becomes morally responsible, supposed, in the majority of cases, to be about seven. (b) In *Anglican churches*, the age at which a man may be ordained to any one of the three grades of the ministry. — **Dark ages**. See above. — **Fabulous age**. See *fabulous*. — **Geological ages**. See above. — **Middle ages**. See above. — **The age of a horse**, in racing and trotting rules is reckoned from January 1st of the year of foaling. Other dates, as May day, were formerly used. — **Syn.** *Fra, Period*, etc. (see *epoch*), *date*, *years*, *con, cycle*.

The effects of aggregate combinations are classified as *aggregate paths* and *aggregate velocities* (which see below)

Aggregate flower, one formed of several flowers closely gathered upon a common receptacle, but not collected as in *compounds* — **Aggregate fruit**, a fruit formed of many distinct carpels belonging to a single flower, as crowded upon the common receptacle, becoming separate or disjunct, and sometimes more or less collected as in the blackberry and the fruit of the magnolia. Also sometimes used as synonym with *multiple* or *compound* fruit (which see, under *fruit*) See cut under *Rubus* — **Aggregate glands**, so called — **Aggregate path**, in *mech.*, that path through which a part of a machine is moved, which is the resultant of the aggregate combination of the other parts which operate it. Thus, in so called parallel motion, a movement of one part in a right line is effected by the combined and counteracting movements of other parts moving in circular arcs — **Aggregate velocity**, the resultant velocity imparted by forces moving with different or with varying velocities, as the velocity imparted by systems of pulleys through trains of gearing, or by so called differential motions — **Corporation aggregate**, in *law* See *corporation*

II. *n* 1 A sum, mass, or assemblage of particulars, a total or gross amount, any combined whole considered with reference to its constituent parts. An aggregate is essentially a sum, as, for example a heap of sand, whose parts are loosely or accidentally associated. When the relation between the parts is more intimate — either chemical as in a molecule or a crystal, or organic as in a living body or for the realization of a design as in a house — the sum ceases to be a mere aggregate, and becomes a *compound* — **Aggregate combination**, an *organism*, etc. But in a general way anything consisting of distinguishable elements may be called an aggregate of those elements as, man is an aggregate of structure and organs — a mineral or volcanic aggregate (that is a compound rock)

Looking to the aggregate of all the interests of the commonwealth

Phillimore's Reports, II, 135

I do not think there is ever shown, among Italians either the aggressive pride or the abject meanness which marks the intercourse of people and nobles elsewhere in Europe

Havelock, *Venetian Life*, xxi

Syn. Aggressive, Offensive. *Offensive* is the direct opposite to defensive. *Offensive* warfare is that in which one is quick to give battle, as opportunity offers or can be made, and presses upon the enemy. *Aggressive* warfare is only secondarily of this sort, primarily it is a warfare prompted by the spirit of encroachment, the desire of conquest, plunder, etc. A war that is thus aggressive is naturally offensive at first, but may lose that character by the vigor of the resistance made. It then comes to be thought of as aggressive. Hence *aggressive* has come to be often synonymous with *offensive*

(d) The act of arousing public attention to a political or social question by speeches, etc. - *Syn. (b) Agitation, Trepidation, Tremor* Emotion excitement, flutter Tremor is, in its literal use, wholly physical, it may be in a part of the body or the whole. It is generally less violent than *trepidation*. *Trepidation* and *agitation* are more often used of the mind than of the body. But all three words may express states either of the body or the mind, or of both at once, through reflex influence. *Trepidation* is generally the result of fear. It is the excited anticipation of speedy disaster, penalty, etc. *Agitation* may be retrospective and or confused by that which is pleasant. It includes the meaning of *trepidation* and a part of that of *emotion*. *Emotion* is used only of the mind. It is the broadest and highest of these words, covering all movements of feeling, whether of pleasure or pain from *agitation* to the pleasant that the mind may take in abstract truth

What lengths of far famed ages billowed high
With human *agitation*, roll along
In unsubstantial images of air!

Young, Night Thoughts

I can recall vividly the *trepidation* which I carried to that meeting

D. G. Mitchell, Bound Together, I

They proceeded from those elective tribunals called *agitators*, who had been established in every regiment to superintend the interests of the army

Hallam, Const. Hist., II 210

It has been supposed that in this sense the proper spelling of the word is *adulator*, meaning not one who agitates, but one who assists. But Dr J. A. H. Murray says "Careful investigation satisfies me that *Agitator* was the actual title, and *Adulator* originally only a bad spelling of soldiers familiar with *Adjutants* and the *Adjutors* of 1642."

A French gold coin bearing a figure of the paschal lamb, first issued by Louis IX, and not struck after Charles IX. Its original weight was from 62.5 to 64.04 grains, but after the reign of John II it gradually fell to about 48.7 grains.

agni, n. Plural of *agnus*.

agnition (ag-'nish-on), n. [*cf.* L. *agnitio* (n-), < *agnitus*, pp. of *agnoscere*, also *agnoscere*, *adnoscere*, know as having seen before, recognize, acknowledge, < *ad*, to, + *gnosce*, *nosce*, know, see *know* (cf. *agnomen*)]. Acknowledgment.

agnize (ag-'nīz'), v. t. [*cf.* L. *agnoscere*, in imitation of *cognize*, ult. (through F.) < L. *cognoscere*, see *agnition*]. To acknowledge, own, recognize. [Rare.]

I do *agnize*.
A natural and prompt alacrity
I find in hardness. *Shak.* Othello, I. 3.
Doubtless you have already set me down in your mind as a votary of the desk; a notched and crooked veteran — one that such as his must name, as certain sick people are said to do through a quill. Well, I do *agnize* some thing of the sort. *Tamb.* I, II, 1.

agnosce (ag-'nō-ē), n. [NL, < Gr. *ἀγνοω*, want of perception, ignorance, < *α-* priv + *γινωσκω*, contr. *gnō*, perception, mind, akin to E. *know*. See *nous* and *know*]. In *pathol.*, the state of a patient who does not recognize persons or things.

Agnostes (ag-'nō-ē-tō), n. pl. [ML, also improp. *Agnosta*, < (Gr. *ἀγνοω*, here it is so named, < *α-* priv + *γινωσκω*, contr. *gnō*, not knowing, see *agnate*]. 1 A Christian sect of the fourth century, which denied the omniscience of the Supreme Being, maintaining that God knows the past only by memory, and the future only by inference from the present. 2 A sect of the sixth century, followers of Theodotus, deacon of Alexandria, who, on the authority of Mark viii 32 ("But of that day and that hour knoweth no man, neither the Son, but the Father"), held that Christ, as man, was ignorant of many things, and specifically of the time of the day of judgment.

Other forms are *Agnostae* and *Agnostes*. **Agnostes**, **Agnoste** (ag-'nō-ē-t, -it), n. One of the *Agnostes*.

agnosticism (ag-'nō-ē-tizm), n. [*cf.* *Agnostae* + *-ism*]. The doctrinal system of the *Agnostes*.

agniology (ag-'nō-i-ol-ō-jī), n. [Better **agnecology*, < (Gr. *αγνοια*, ignorance (see *agnate*), + *-λογία*, < *λέγω*, speak of, see *-ology*]. In *metaph.*, the doctrine or theory of ignorance, which seeks to determine what we are necessarily ignorant of.

We must examine and fix what ignorance is — what we are, and can be, ignorant of. And thus we are thrown upon an entirely new research, constituting an intermedial section of philosophy, which we term the *agnecology*, the theory of true ignorance.

Ferri, Inst. of Metaphysics, p. 61.

Agnote, n. See *Agnote*.

agnomen (ag-'nō-men), n. pl. *agnomina* (-nom-i-nā). [L, also *adnomen* (min-), < *ad*, to, + *gnomen*, *nomen*, name (= E. name), < **gnosce*, *nosce*, know, = E. *know*]. An additional name given by the Romans to an individual in allusion to some quality, circumstance, or achievement by which he was distinguished, as *Africanius* added to the name of P. Cornelius Scipio, hence, in modern use, any additional name or epithet conferred on a person.

agnomical (ag-'nō-mi-kal), a. [*cf.* Gr. *ἀγνομία*, thought, purpose. See *gnome*, *gnomic*]. Of or pertaining to the absence of set purpose or intention. N E D.

agnomina, n. Plural of *agnomen*.

agnominal (ag-'nō-mi-nal), a. [*cf.* *agnomen* (ag-'nō-men) + *-al*]. Of or pertaining to an *agnomen*. **agnominat** (ag-'nō-mi-nāt), v. t. [*cf.* L. **agnominatus*, pp. of **agnominare*, implied in *agnominatio*, see *agnomination*]. To name.

The flowing current a silver stream
Shall be *agnominated* by our name. *Loerne*, III 2.

agnomination (ag-'nō-mi-nā-'shon), n. [*cf.* L. *agnominatio* (n-), *agnominatio* (n-), paronomasia, < **agnominare*, < *ad*, to, + **gnominare*, *nominare*, name]. 1 An additional name or title, a name added to another, as expressive of some act, achievement, etc.; a surname. 2 Resemblance in sound between one word and another, especially by alliteration, also, the practice of using in close proximity to one another words which resemble each other in sound (see *an-nomination*) as, "Scot of Scotstarvet's Staggering State of Scots Statesmen."

Our bards hold *agnominations* and enforcing of consonant words or syllables one upon the other to be the great act of elegance. So have I seen divers old rhymes in Italian running so. "In solva salvo a me. Plu caro tuon." *Howell*, Letters, I. 40.

agnostic (ag-'nos-tik), n. and a. [*cf.* Gr. *ἀγνοω*, unknowing, unknown, unknowable, < *a-* priv, not, + *γινωσκω*, later form of *γινωσκω*, known, to be known (cf. *γινωσκός*, good at knowing), verbal adj. of *γινωσκω*, know, = L. **gnosce*, *nosce*, know, = E. *know*. See *a-*18 and *gnostic*]. The word *agnostic* was "suggested by Prof. Huxley" in 1869. He took it from St. Paul's mention of the altar to "the Unknown God" [*ἀγνώστου θεού*, Acts xvii 23]. R. II Hutton, in letter, 1881 "N E D." I. n. One of a class of thinkers who disclaim any knowledge of God or of the ultimate nature of things. They hold that human knowledge is limited to experience, and that since the absolute and unconditional, if it exists at all, cannot fall within experience, we have no right to assert anything whatever with regard to it.

I only said I invented the word *agnostic*. *Huxley*, London Academy, Nov. 24, 1888.

While the old Atheist sheltered his vice behind a rampart of unbelief where no appeals could reach him, the new *agnostic* honestly maintains that his opinions are the very best foundations of virtue.

F. P. Cobbe, Peak in Darkn, p. 3.

II. a. Pertaining to the agnostics or their doctrines, expressing ignorance or unknowability.

That bold thinker in the third century, Clement of Alexandria, declares that the process of theology is, with regard to its doctrine of God, *agnostic* and *agnostic*, always "setting forth what God is not, rather than what he is." *Pop. Sci. Mo.*, LXXV 79.

agnostically (ag-'nos-ti-kal-i), adv. In an agnostic manner, from an agnostic point of view; with a tendency or inclination to agnosticism; as an agnostic.

agnosticism (ag-'nos-ti-sizm), n. [*cf.* *agnostic* + *-ism*]. 1 The doctrines of the agnostics, the doctrine that the ultimate cause and the essential nature of things are unknowable, or at least unknown.

By *Agnosticism* I understand a theory of things which abstains from either affirming or denying the existence of God. It thus presents, with regard to Theism, a state of suspended judgment, and all it undertakes to affirm is, that, upon a strict view, the being of God is unknown. But the term *Agnosticism* is frequently used in a widely different sense, as implying belief that the being of God is not merely now unknown, but must always remain unknowable. *G. J. Romanus*, Contemporary Rev., L 59.

2 Belief in the doctrines of the agnostics.

Agnostus (ag-'nos-tus), n. [NL, < Gr. *ἀγνοω*, unknown. See *agnostic*]. A genus of trilobites of the Lower Silurian rocks, so called because of the uncertainty attaching to its true affinities. They are of small size and somewhat semicircular form, and it has been supposed that they may be the larval form of some other animal.

Agnotherium (ag-'nō-thē-ri-um), n. [NL, short for **agnostotherium*, < Gr. *ἀγνοω*, unknown (see *agnostic*), + *θηρίον*, a wild beast, < *θηρ*, a wild beast]. A genus of extinct mammals of uncertain affinities. It is identified by some with the *amphicyon* (which see). *Kaup*.

agora (ag'ō-rā), *n* [*< Gk a-gōra*, assembly, market-place, *< a-gōra*, call together, assemble] In ancient Greece (a) A popular political assembly, any meeting of the people, especially for the promulgation or discussion of laws or public measures. Hence — (b) The chief public square and market-place of a town, in which such meetings were originally held, corresponding to the Roman forum. The agora usually occupied the site about the original public fountain or well of a settlement, which was the natural place of reunion for the inhabitants. It was often surrounded by colonnades and public buildings, sometimes public buildings and temples stood within it. In some instances a large open space was reserved for public meetings, and the remainder was variously subdivided for purposes of traffic. It was customary to erect in the agora altars to the gods and statues of heroes and others and sometimes as at Athens it was adorned with alleys of trees.

agoranome (ag'ō-rā-nōm'), *n* [*< L agoranomus*, *< Gk a-gōra-nōm*, clerk of the market, *< a-gōra*, market, + *nōm*, manning, rule] One of those magistrates in a Greek city who had charge of the inspection of the markets, of weights and measures, and of public health. Their functions corresponded to those of the Roman aediles.

Agouti (Solenodon paradoxus)

agouta (a-gō'ū), *n* [Native name.] An insectivorous mammal peculiar to Haiti, the type-member of the genus *Solenodon* and of the

family *Solenodontidae*. It is so puzzling to naturalists that it has received the name of *S. paradoxus*. It has the fur, ears, and tail of the opossum, but the teeth and elongated nose of the shrew. Its feet terminate in five toes and the long claws are curved and evidently adapted for scapling in the earth. The dentition is unique the grooving of the second incisor of the lower jaw distinguishing this genus from all others whose dental system is known. It is of the size of a rat, and not unlike one in general appearance. See *abniqui* and *Solenodon*.

Agouti (Dasyprocta agouti)

The American name of several species of rodent mammals of the genus *Dasyprocta* and family *Dasyproctidae*. The common agouti, or yellow rumped cavy *D. agouti* is of the size of a rabbit. The upper part of the body is brownish, with a mixture of red and black, the belly yellowish. Three varieties are mentioned, all peculiar to South America and the West Indies. It burrows in the ground or in hollow trees, lives on vegetables doing much injury to the sugar cane, is as voracious as a pig and makes a similar grunting noise. It holds its food in its fore paws like a squirrel. When scared or angry its hair becomes erect, and it strikes the ground with its hind feet. Its flesh is white and of agreeable taste and the animal is pursued as game in Brazil. Also spelled *aguti* and *acouti*. See *acouti* and *Dasyprocta*.

ailantic, ailanthic (â-lan'-tik, -thik), *a* [Cf. *Atlantus*, *Atlantus*, + *-ic*] Of or pertaining to *Atlantus* — **Ailantic acid**, an acid obtained from the bark of *Atlantus aculeata*.

ailantine (â-lan'-tin), *a* [Cf. *atlantus* + *-ine*] Relating or pertaining to the *ailantus*, or to the silkworms which feed upon its leaves.

Ailantus (â-lan'-tus), *n* [NL; also erroneously *Atlantus* (simulating Gr *αἰών*, flower), < *ailanto*, the Malacca name of one species, said to mean 'tree of heaven'] 1 A genus of trees, natural order *Simarubaceae*. The only commonly known species is the tree of heaven or Chinese mimosa, *A. glandulosa* native of Mongolia and Japan frequently planted as a shade tree. It is of rapid growth with very long pinnate leaves and throws up abundant root suckers, by which it is usually propagated. The flowers are polygamous or nearly dioecious, and are very ill-scented. *Bombus* (*Philosamia*) *cytherea*, a species of silkworm, feeds on its leaves. In Japan the produce of silkworms fed on this tree is very large, and the material, though wanting the fineness and gloss of mulberry silk, is produced at far less cost and is more durable.

2 [C] A tree of the genus *Ailantus*, or the genus collectively as, the *ailantus*, when once established, is difficult to eradicate.

aillet, *n* 1 The older and more correct spelling of *aisle* — 2 [F see *aislette*] *Milit*, a wing or flank of an army or a fortification.

aileron (â-le'-ron), *n* [F, dim of *aile*, wing: see *aislette*] Same as *aislette*.

aislette (â-le'-t'), *n* [F, dim of *aile*, a wing, < L *ala*, wing: see *ala* and *aisle*] A plate of iron worn over the mail to protect the shoulders of a man-at-arms, before the introduction of plate-armor for the body. *Aislettes* were sometimes charged with heraldic bearings. Also *aislette* and *aileron*.

ailing (â'-ling), *n* [Verbal *n* of *ail*, *v*] Sickness, indisposition.

ailing (â'-ling), *p* *a* Not well; indisposed.

But there is a sort of puny sickly reputation that is always *ailing* yet will outlive the volubility of a hundred prodigies. *Sheridan*, School for Scandal, I, 1.

My mother had long been *ailing*, and not able to eat much. *R. D. Blackmore*, *Lorna Doone*, p. 41.

= Syn *Unwell*, etc. See *sick*.

ailment (âl'-ment), *n* [Cf. *ail*, *v*, + *-ment*] Disease, indisposition, morbid affection of the body not ordinarily applied to acute diseases = Syn *Sickness*, etc. (see *ailness*), indisposition, disorder, complaint.

Ailse-cock (âl'-za-kok), *n* A local name for the puffin, *Fratercula arctica* from its breeding about Ailse Craig, in the Frith of Clyde, Scotland. See *ent* under *puffin*.

Ailuride (â-lû'-rî-dê), *n* pl Same as *Fluride*.

Ailuroidea (â-lû'-rî-dê-â), *n* pl Same as *Eluroidea*.

Ailuropus (â-lû'-rî-pus), *n* Same as *Eluropus*.

Ailurus (â-lû'-rus), *n* Same as *Flurus*.

ailweed (âl'-wêd), *n* [Cf. *ail* (f) + *weed*] The clover-dodder, *Cuscuta trifoli*.

aim (âm), *n* [ME *aymen*, *amen*, *cymen*, < OF *amr* (Pr *amr*), *esmer* (= Pr *esmer*, < L *astmare*), and with prefix, *asmer*, *asmer*, *asmer*, < ML *adastmare*, < L *ad*, to, + *astmare*, estimate: see *astmate*] 1. *trans* 1† To esteem, consider — 2† To estimate, guess, conjecture. *Wyclif* — 3† To calculate, devise, intend.

My speech should fall into such vile success Which my thoughts *aimed* not. *Shak*, Othello, iii, 3.

4 To direct or point at something, level as, to *aim* the fist or a blow, to *aim* a satire or a reflection at some person or vice.

Bulls *aim* their horns, and asses lift their heads.

Pope, Im. of Horace, Sat. I, 8.

5 To give a certain direction and elevation to (a gun, cannon, arrow, etc.), for the purpose of causing the projectile, when the weapon is discharged, to hit the object intended to be struck as, to *aim* a gun.

II. intrans 1† To estimate, guess, conjecture.

Rom. In sadness, cousin, I do love a woman.

Ben. I *aim* do so, when I suppose you love.

Shak, R. and J., I, 1.

2 To direct one's intention, purpose, or action, as to the attainment or accomplishment of something, intend, endeavor as, a man *aims* at distinction, *aim* to be just in all you do.

The short-sighted policy which *aimed* at making a nation of saints has made a nation of scoffers.

Macaulay, Leigh Hunt.

3 To direct or point anything, as a weapon or missile, toward an object.

[In all senses *aim* is used with *at* or an infinitive before the object to be reached.]

To *aim* *aim*, in archery, to encourage the archers by crying out "Aim!" when they were about to shoot. Hence it came to mean to applaud or encourage in a general sense.

It ill becomes this presence to cry *aim*. To these ill-tuned repetitions. *Shak*, K. John II, 1.

aim (âm), *n* [ME *ayme*, *ame*, < OI *esme*, from the verb] 1† Conjecture, guess. He that seeth no mark must shoot by *aim*.

Bp. Jewel, Reply to Harding, p. 11.

It is impossible by *aim* to tell it.

Spenser, State of Ireland.

What you would work me to I have some *aim*.

Shak, I, i, 1, 2.

2 Course, direction in particular, the direction in which a missile is pointed, the line of shot. And when the cross blue lightning seemed to open The breast of heaven, I did present myself Even in the *aim* and very flash of it. *Shak*, I, i, 1, 3.

3 The act of aiming or directing anything (as a weapon, a blow, a discourse, or a remark) at or toward a particular point or object with the intention of striking or affecting it, the pointing or directing of a missile.

I *aim* at the head.

Milton, P. L., II, 712.

4 The point intended to be hit, or object intended to be affected, the mark or target. To be the *aim* of every dangerous shot.

Shak, Rich. III., iv, 4.

5 A purpose, intention, design, scheme as, men are often disappointed of their *aim*.

The *aim* if reached or not makes great the life.

Try to be Shakespeare, leave the rest to fate.

Browning, Bishop Blomfield's Apology.

The *aim* of scientific thought, then, is to apply past experiences to new circumstances.

W. A. Clifford, Lectures, I, 171.

To give *aim*, in archery, to stand near the butt to tell the archer where the arrows have hit. The compass wide on the shaft (right) hand wide on the bow (left) hand, "short" — go on the distance being measured by bow lengths. See *bow hand*. — Syn 5. End, scope, drift, goal, intent, ambition.

aim-crier (âm'-kri'-er), *n* 1 One who encouraged an archer by crying "Aim!" when he was about to shoot. Hence — 2 An encourager generally, an approving on-looker, an abettor.

Thou smiling, *aim-crier* at princes' fall.

G. Marston, The Arcadian.

aimer (â'-mer), *n* One who aims.

aim-frontlet (âm'-frunt'-let), *n* A piece of wood fitted to the muzzle of a cannon so as to make it level with the breech, formerly used by gunners to facilitate aiming.

aimful (âm'-ful), *a* [Cf. *aim* + *-ful*] Full of purpose.

aimfully (âm'-ful'-i), *adv* In an aimful manner, with fixed purpose.

aiming-drill (â'-ming-dril), *n* A military exercise designed to teach men the proper method of pointing and aiming firearms, a training preliminary to target-practice.

aiming-stand (â'-ming-stand), *n* *Milit*, a rest for a gun, used in teaching the theory of aiming.

aimless (âm'-less), *a* [Cf. *aim* + *-less*] Without aim, purposeless.

The Turks, half asleep, ran about in *aimless* confusion.

Drayton, Don Sebastian.

aimlessly (âm'-less-ly), *adv* Without aim, purposelessly.

aimlessness (âm'-less-ness), *n* The state or quality of being without aim or definite purpose. [Thornton's] whole life was a rebuke of the waste and *aimlessness* of our American luxury which is an abject enslavement to tawdry upholstery.

Lowell, Study Windows, p. 200.

ain (an), *a* [Also spelled *am*, = E *oun*] Own [Scotch].

-ain. [Cf. ME *-ain*, *-cin*, *-ayn*, *-eyn*, < OF *-ain*, *-cin*, < L *-anus* see *-an*] A suffix of Latin origin, occurring inflexibly in English nouns, as in *chaptain*, *captain*, *chaplain*, *carlain*, and, as originally, in adjectives, as in *certain*, etc. It is a Middle English and Old French form of *-an* (which see).

aince, aines (âns), *adv* [Cf. ME *ains*, north form of *ones* (pron. o'-nes), now corrupted to *once* (pron. wums)] Once [Scotch].

ainhum (ân'-hum), *n* [A negro term, said to mean orig. 'saw'] A disease peculiar to the negro race, consisting of the sloughing off of the little toes, unaccompanied by any other disorder of the system.

Aino (i'-nô), *a* and *n* [Ety. doubtful, supposed to be a corruption of Jap. *inu* (pron. é'-nô), a dog, applied contemptuously by the Japanese] 1 A Of or pertaining to the Ainos, certain aboriginal tribes in Japan now forming small tribal communities in the island of Yezo, the Kurile islands, and Saghalin or Karafuto. They are a hardy people, with Caucasian features and gentle manners, but in a low state of civilization.

II. *n* The language of the Ainos.

air-cane (är'kăn), *n* A walking-stick having an air-gun concealed within it.

air-carburetor (är'kär'bū-ret-ēr), *n*. An apparatus in which air is passed through or over the surface of liquid hydrocarbons, and thus becomes charged with inflammable vapor. See *gas-machine*.

air-casing (är'käs'ing), *n*. An air-tight casing of sheet-iron placed around a pipe to prevent undue transmission of heat or cold, specifically the casing placed around the base of the funnel or smoke-stack of a steamship, to prevent too great a transmission of heat to the deck.

air-castle (är'käs'el), *n*. A castle in the air, a day-dream, a visionary scheme. See *castle*.

Adventures, triumphs of strength and skill—these furnish subject matter for the talk of the uncivilized man and the air-castles of the youth.

H. Spencer, Prin. of Psychol., § 482

air-cavity (är'kav'it-i), *n*. A cavity containing air, specifically, such a cavity occurring in the body or bones of an animal, a large air-sac or pneumatocyst of a bird.

In the latter case, *air-cavities* take the place of the medulla, which disappears, and so diminish permanently the specific gravity of the animal.

Gegenbaur, Comp. Anat. (trans.), p. 573

air-cell (är'sel), *n*. 1 In bot., one of the cavities in the leaves, stems, or other parts of plants, containing air. They are well seen in the bladder of seaweeds and are found in other aquatic plants, which they serve to float.

2 In anat. and zool., a definite circumscribed cavity in the body, containing atmospheric air inhaled through air-passages which place it in direct communication with the outer air.

The term is used for any such cavity without reference to the technical meaning of cell (which see). An air cell is generally of small size. It is not microscopic, as one of those in lung tissue, but it sometimes forms a great space or inflatable inflated area, as the air cells of birds, and is then also called *air space*, *air receptacle*, or *pneumatocyst*. Specifically:—(a) One of the small hemispherical sacs which beset the walls of the alveolar passages and infundibula of the lungs. Also called *alveolus*. (b) One of the dilatations of the trachea or air tube in insects forming the respiratory apparatus. (c) In ornith., a pneumatocyst, any one of the extra pulmonary cavities of the body of a bird, containing air, which are continuous with one another and with one or more of the bronchial tubes. See *pneumatocyst*.

air-chamber (är'chäm'bēr), *n*. 1 A large cavity in an organic body containing air.

2. A compartment of a hydraulic engine or apparatus, as a pump, interposed between and connected with the supply- and delivery-passages, and containing air which by its elasticity equalizes the pressure and flow of the fluids. Thus, in a reciprocating force pump, the impulse given to the fluid by the delivery stroke compresses the air in the air chamber, and this compressed air reacts upon the outflowing fluid to continue its motion during the reverse stroke, or during those intervals when the force imparted falls below the average or normal amount. The pressure and flow are thus made practically uniform notwithstanding the intermittent or variable action of the force for some special forms, see *air pump*.

3 Any compartment or chamber designed to contain air, as, the *air-chamber* of a life-boat.

air-chambered (är'chäm'bērd), *a*. Furnished with an air-chamber or with air-chambers.

It [the life boat] was *air chambered* and buoyant. *Kau.*, See *Green Exp.*, I 49

air-cock (är'kok), *n*. A cock used to control the admission or outflow of air. See *cock*, 1.

air-compressor (är'kom-pres'or), *n*. A machine for condensing air, usually in the form of a force-pump. See *compressor*.

air-cone (är'kōn), *n*. A cone in a marine engine designed to receive air and steam from the hot-well, and carry them off through a pipe at the top.

air-cooler (är'kōl'er), *n*. Any appliance for lowering the temperature of the air, as in hospitals, dwellings, and theaters. A common form consists of chambers filled with ice or fitted with screens of light fabric kept constantly wet with cooling liquids, through which a current of air is forced. See *refrigerating chamber*, under *refrigerate*.

air-course (är'kōrs), *n*. A passage in a mine made or used for ventilating purposes, an air-way.

air-crossing (är'krōs'ing), *n*. A passageway or bridge constructed to carry one air-course over another, as in the ventilation of coal-mines.

air-cushion (är'küsh'on), *n*. 1. A bag made of an air-tight fabric used when inflated with air as a cushion for a seat. 2. Same as *air-bag*. 3. A ball or cylinder (usually of india-rubber) filled with air and placed in a water-pipe,

to act as a cushion for the water, or to receive the pressure or shock caused by a sudden stoppage of its flow, or by the expansion of the water in freezing. 4. Same as *air-spring* or *pneumatic spring*.

air-cylinder (är'sil'ind-ēr), *n*. In gun, a device consisting of a cylinder and piston, used for checking the recoil of heavy guns by means of the elasticity of atmospheric air confined within it, a pneumatic buffer.

air-dew (är'dū), *n*. Manua [Rare]

air-drain (är'drān), *n*. 1 An empty space left around the external foundation-walls of a building to prevent the earth from lying against them and thus causing dampness. 2 In molting, a large passage for the escape of gases from heavy castings while in the mold.

air-drawn (är'drān), *a*. Drawn or depicted in the air, as, "the *air-drawn dagger*," *Shak.*, Macbeth, iii 4

air-dried (är'drīd), *a*. Dried by or in the air applied to fruits and materials from which moisture has been removed by exposure to currents of air under natural atmospheric conditions.

air-drill (är'dril), *n*. A rock-drill driven by compressed air, as distinguished from a drill driven by steam. See *rock-drill*.

air-drum (är'drum), *n*. A drum-shaped chamber or reservoir for air; specifically in ornith., a large lateral cervical pneumatocyst.

The great *air drums* of our plumed grouse and cock of the plains. *Conch.*, Key to N. A. Birds, p. 280

air-duct (är'dukt), *n*. A duct or passage conveying air, specifically, in zool., the communication of the air bladder with the intestinal canal. It is persistent in physostomous, temporary in physoclistous, fishes.

aire¹, *n*. An old form of *air*.

aire² (i're, mod. pron. är), *n*. [Ir., pl. *airig*, *Ir. airach*, a noble, a privileged person.] In *Irish antiqu*, a freeman, a gentleman, one of the privileged classes. Answered to two classes: (a) the *flaith*, or those who possessed property in land, and (b) the *boiaich*, who possessed cows and other chattels. The king was elected by these two classes.

Chieftains who possessed twenty-one cows and upwards were *aire* (sing. *aire*), or, as we should say, had the franchise, and might fulfill the functions of bailiffs, etc. *Irish Ant.*, VIII 257

The upper classes were all *aires*. To be eligible to the *aire* grade, the freeman should possess besides a certain amount of wealth in cattle a prescribed assortment of agricultural implements and household goods. *Irish Ant.*, IV 252

air-endway (är'end'wa), *n*. A roadway or level driven into a coal-seam parallel with a main level, used chiefly for purposes of ventilation. *Gresley*, [Eng.]

air-engine (är'en'jin), *n*. A motor employing (a) the elastic force of air expanded by heat,

Ericsson's Hot Air Pumping engine

a beam, b air piston, c transfer piston, d cylinder, f air piston link, g bell crank, h side rock, i transfer piston rod, j pump, k air chamber, l vacuum-chamber, m gas furnace, n gas-burners, w gas-chamber, x, water jacket

or (b) air compressed by means of another and separate motor, called a *compressor*, which is generally a steam-engine. Machine drills in mining are generally run by compressed air engines, the compressor being located at the surface, and the air engines distributed underground, at the various points where their work is required.

air-equalizer (är'ē'kwāl-i-zēr), *n*. A device for distributing a current of air equally throughout its working-space.

airer (är'er), *n*. [*an*, *r*, + *-er*] 1 One who airs or exposes to the air. 2 A screen for drying clothes, etc.

air-escape (är'es-kap'), *n*. An air-trap for the escape of air which collects in the upper bends of water-pipes and in other hydraulic apparatus. The usual form is that of a ball cock (which see) inclosed in a chamber situated at the point at which the air is to be withdrawn and so adjusted that as the water level within is lowered by the pressure of the accumulated air the ball float descends, opens the valve, and permits the air to escape, the water then rising, buoys up the float and closes the valve.

air-exhauster (är'eg-zhās'tēr), *n*. 1 Same as *air-escape*. 2 Any apparatus, as an air-pump, exhaust-fan, suction-blower, or steam-jet, used for withdrawing air from an inclosed place, for ventilation or for the creation of a vacuum. See *air-pump*, *blower*, *fan*, and *exhaustor*.

air-faucet (är'fau-set), *n*. A stop-cock for letting an out or in.

air-filter (är'fil'tēr), *n*. An apparatus for extracting dust, smoke, microscopic germs, etc., from the air. It consists of screens or strainers of woven wire, fabrics, gun cotton, asbestos, slag wool, or other flocculent material through which the air is drawn, or of showers, sprays, or films of water or chemical solutions through or over which the air to be filtered passes. Air filters are used in the ventilation of buildings and railroad cars in physical research, in surgery, and in the recovery of by-products in manufactures.

air-flue (är'flo), *n*. A conduit for air. See *air-box*, *air-funnel*, and *air-pipe*.

air-fountain (är'foun'tēn), *n*. An apparatus for producing a jet of water by the elastic force of air compressed in a close vessel and made to act on the surface of the water to be raised.

air-funnel (är'fun'el), *n*. In ship-building, a flue formed by the omission of a timber in the upper works of a vessel and designed to promote the ventilation of the hold.

air-furnace (är'furnās), *n*. 1 A reverberatory furnace (which see, under *furnace*). 2

An air-heating furnace for warming apartments. Air is led into a space formed between an outer casing and the sides of a fire pot and combustion chamber, and after becoming heated by contact with the walls of the latter, flows to the apartments which are to be warmed. See *air stove*, *furnace*, and *heater*.

air-gage (är'gaj), *n*. An instrument for indicating the pressure of air or gases. It consists of a glass tube of uniform caliber, closed at the top and having its lower end dipped into a cup of mercury on the surface of which the air or gas pressure, thus forcing mercury into the tube and compressing the air within it to an amount directly proportional to the pressure. This pressure can be read from a scale attached to the tube, the zero of the scale being usually placed at the upper surface of the mercurial column when the instrument is exposed to the ordinary atmospheric pressure. Also called *air manometer*.

air-gas (är'gas), *n*. An inflammable illuminating gas made by charging ordinary atmospheric air with the vapors of petroleum, naphtha, or some similar substance, as the hydrocarbon called *gasolene*.

air-gate (är'gāt), *n*. 1 An underground roadway in a coal-mine, used chiefly for ventilation. [Eng. Midland coal-fields.] 2 In molting, an orifice through which the displaced air and the gases which are formed escape from the mold while the molten matter is filling it.

air-gossamer (är'gōs'am-ēr), *n*. Same as *air-thread*.

air-governor (är'gōv'nōr), *n*. A device, attached to pneumatic apparatus and machinery, for regulating the pressure or delivery of an

air-grating (är'grāt'ing), *n*. A grating protecting or forming a ventilating orifice in a wall or partition. See *air-brick*.

air-gun (är'gūn), *n*. A gun in which condensed air is used as the propelling agent. The bore of the barrel is connected with a reservoir inclosed within or attached without the stock, into which air is forced by a piston or plunger fitted to the bore, or by an independent

Air gun

condenser. When the trigger is pulled it operates a valve which permits the sudden escape of the whole or of a portion of the condensed air into the barrel at the rear of the ball or dart thus projecting the latter. In some forms the propelling agent is a compressed spring fired by the trigger. The reactive force of the spring compresses the air which interposes between it and the projectile, and the air acts upon and projects the ball.

air-heading (är'hēd'ing), *n*. An excavation in a mine through which air is made to pass for ventilation.

air-hoist (är'höist), *n* Hoisting machinery operated by compressed air, or by the creation of a partial vacuum. It consists of a cylinder fitted with a piston, which is connected by ropes passing over pulleys with the platform of the hoist. See *elevator* and *hoist*.

air-holder (är'höl'der), *n* 1 A vessel for holding air for any purpose, as for counteracting the pressure of a decreasing column of mercury, or for keeping up a moderate and steady current of air. See *airometer*, *air-vessel*, and *gas-holder*. — 2† A gasometer.

air-hole (är'höl), *n* 1 An opening to admit or discharge air. — 2 In *foundry*, a fault in a casting, caused by a bubble of air which passes from the core outward, and is retained in the metal. Also called *blow-hole*. — 3 A natural opening in the frozen surface of a river or pond, caused by currents or springs.

airie† (är'i), *a* An old spelling of *airy*†.

airie† (är'i), *n* An old spelling of *airy*†.

airified (är'i-fid), *a* [*< airily*, make airy (*< air* + *-id*)] Fashioned in an airy manner, characterized by the assumption of airs as, in *airied style* [*'outemptsious or slighting*].

airily (är'i-lī), *adv* [*< airy* + *-ly*] 1. In an airy or gay manner, gaily, jauntily.

Fanny bade her father good night, and whisked off airily. Dickens, Little Dorrit.

2 Lightly, delicately as, airily wrought details.

airiness (är'i-nēs), *n* 1 Exposure to a free current of air, openness to the air as, the *airiness* of a country-seat. — 2 Unsubstantiality, like that of air. — 3 Delicacy and lightness, ethereality. — 4 Sprightliness of motion or manner, gaily, jauntiness, vanity, affectation as, the *airiness* of young persons.

airing (är'ing), *n* [Verbal *n* of *air*, *v*] 1 An exposure to the air, or to a fire, for drying or warming. — 2 Exposure in or exposure to the open air, an excursion for the purpose of taking the air.

All the virtues seemed to have come out for an airing in one chariot. Motley, Dutch Republic, III 54.

airing-stage (är'ing-staj), *n* A stage or platform upon which materials are placed to be aired or dried as, the *airing-stage* upon which powder is dried.

air-injector (är'in-jek'tor), *n* A simple blowing device, used with a dental drill or employed for removing dust from the path of a fine saw.

airisad†, airisard†, n Same as *airisad*.

airish† (är'ish), *a* [ME *ayrwyche*, *ayrwysh*, etc., *< air* + *-ish*] 1 Of or belonging to the air, aerial.

And behold the *ayrwysh* beates
Chaucer, House of Fame, I 905.

2 Cool, fresh.

The morning was *ayrwysh*. Best, Farming, p 18 (N F D).

air-jacket (är'jak-et), *n* A jacket inflated with air, or to which bladders filled with air are fastened, to render the wearer buoyant in water.

airless (är'les), *a* [*< air* + *-less*] 1 Not open to a free current of air, wanting fresh air or communication with open air. — 2 Without air, devoid of atmosphere.

Desolate as the lifeless, *airless* moon.

Harpers Mag, LV 73.

air-level (är'lev-el), *n* A name sometimes given to a spirit level (which see).

air-line (är'lin), *n* and *a* I, *n* A line as direct as though drawn or stretched through the air, a *bee-line*.

II *a* Straight or direct as a line in the air, not deflected laterally as, an *air line* railroad.

airling† (är'ling), *n* [*< air* + *-ling*] A thoughtless, gay person.

Some more there be slight *airlings* will be won
With dogs and horses. B Jonson, Catiline, I 4.

air-lock (är'lok), *n* An air-tight chamber in a caisson in which operations are carried on under water, communicating by one door with the outer air and the main entrance-shaft of the caisson, and by another door with the chambers filled with condensed air in which the men are at work. Its purpose is to regulate the air pressure so that the change from ordinary air to condensed air may be made without injury. When a workman steps from the shaft into the air lock the door of ingress is closed and condensed air is admitted until the pressure is the same as that in the working chamber. The process is reversed when leaving the caisson.

air-locomotive (är'lō-kō-mō'tiv), *n* A locomotive driven by a compressed or heated air, usually the former.

air-logged (är'logd), *a* [*< air* + *logged*, after *water-logged*] In *muck*, impeded as motion, by the intrusion of air. Thus, a machine consisting

in part of a piston moving in a cylinder would become *air logged* if air should enter the cylinder and remain between the piston and the cylinder head, so as to prevent the piston from making its full stroke.

air-machine (är'ma-shēn'), *n* In *mining*, an apparatus by which pure air is forced into parts badly ventilated, and the foul air extracted.

air-manometer (är'ma-nom'e-tēr), *n* Same as *air-gage*. See *manometer*.

air-meter (är'mō'tēr), *n* An apparatus for measuring the quantity or rate of flow of air. Various devices are used, as bellows, cylinder and piston, and rotating buckets, in which capacities are constant, and fans and vanes, which measure the rapidity of flow through conduits of known sectional area, and therefore indicate the quantities passing in any given time.

airn (ärn), *n* Scotch form of *iron*.

airhydrogen (är'ō-hī'drō-jen), *a* [*< air*, after *aero-*, + *hydrogen*] Pertaining to a mixture of atmospheric air and hydrogen. — **Airhydrogen blowpipe** See *blowpipe*.

airrometer (är'om'e-tēr), *n* [*< air*, after *aero-*, + *ir* *μετρον*, measure Cf *airometer*] 1 An air-holder constructed upon the principle of the gasometer, whence the name. See *gasometer*. — 2 Same as *air-meter*.

The *airrometer* the invention of Mr Henry Hall, the Inspector, by means of a delicately constructed windmill, shows the rate of the current of air in the passages of the colliery. Ure, Dict, IV 890.

air-passage (är'pas'aj), *n* 1 In *anat*, one of the passages by which air is admitted to the lungs, as the nasal passages, the larynx, the trachea, and the bronchial tubes or their minute ramifications. — 2 In *bot*, a large intercellular space in the stems and leaves of aquatic plants, and in the stems of endogens.

air-pipe (är'pip), *n* A pipe used to draw foul air out of or conduct fresh air into close places. Specifically—(a) A pipe used to draw foul air from a ship's hold by means of a communication with the furnace and of the rarefaction of the air by the fire. (b) In *mining*, a pipe through which air passes, either for ventilation or for use in an air engine. (c) A small copper pipe leading from the top of the hot well of a marine engine through the side of the vessel for the discharge of the air and uncondensed vapor removed from the condenser by the air pump.

air-pit (är'pit), *n* A pit or shaft in a coal-mine, used for ventilation. Also called *air-shaft* [Eng].

air-plant (är'plant), *n* A plant unconnected with the ground and apparently living on an applied to epiphytes, but usually not to parasites. Many epiphytic orchids in cultivation are popularly so named.

air-poise (är'poiz), *n* An instrument used to measure the weight of the air.

air-port (är'pört), *n* In *ship-building* (a) A small aperture cut in the side of a vessel to admit light and air. One is generally placed in each state room and there are several on each side along the berth deck. They are usually fitted so as to close with a pane of thick glass, set in a brass frame, turning on a hinge, and secured when closed by a heavy thumb screw. (b) A large scuttle placed in a ship's bows for the admission of air. Also called *air-scuttle*.

air-proof (är'prof), *a* Impervious to air.

air-pump (är'pump), *n* An apparatus for the exhaustion, compression, or transmission of air. Air pumps are used for many purposes, and are made in a variety of forms, which differ according to the uses that they serve. In the more common forms the air is exhausted by means of a cylinder and piston, as in *Ritchie's* air pump (see cut), or by centrifugal action. Rotating buckets dipping into water, which forms a seal, are used for some special purposes as is also, for slight changes of pressure, a form consisting of a vessel closed at the top and sides but open at the bottom, and dipping to a certain extent into water or other fluid, which forms a seal and prevents the escape of the air. For the Sprengel air pump see *mercury air pump*, under *mercury*. The air pump of a condensing steam engine is used to maintain a vacuum within the condenser by withdrawing from it air and uncondensed vapor. See *air compressor*, *aspirator*, *exactor*, *pump*, *steam jet*.

Ritchie's Air Pump.

late the condensing water. — **Air-pump bucket**, an open piston with valves on the upper surface opening upward so as to admit air and water during the down stroke, and lift them with the up stroke, of the pump.

air-pyrometer (är'pī-rom'e-tēr), *n* An instrument used for measuring high temperatures.

It consists of a hollow globe made of platinum so that it may resist excessive heat, filled with air or gas, and connected with a bent glass tube, which holds at its bend water, mercury, or other liquid. The expansion by heat of the air within the globe exerts a pressure upon the liquid, causing it to rise in one leg of the tube to a height proportional to the expansion, and therefore to the heat which causes it. See *pyrometer*.

air-receptacle (är're-sep'ta-kl), *n*. In *ornith.*, a large air-cell, an air-space, air-sac, or pneumatocyst.

Continuous *air receptacles* throughout the body. Owen.

air-regulator (är'reg'u-lā-tor), *n* Any apparatus designed to govern the admission or flow of air, as a damper or register.

air-reservoir (är'rez'er-vwor), *n* See *air-holder* and *air-vessel*.

air-sac (är'sak), *n* 1 In *ornith*, a large air-cell, an air-space, an air-receptacle, or a pneumatocyst, one of the membranous bags or receptacles of air lodged in the hollow bones and the cavities of the body of birds, and communicating with the lungs. — 2 *pl* The elongated cavities forming the ultimate branches of the air-passages in the lungs of mammals. Also called *infundibula*.

air-scuttle (är'skut'el), *n* Same as *air-port*, (b).

air-setting (är'set'ing), *a* Setting or hardening on exposure to air, as common mortar.

air-shaft (är'shaft), *n* 1 Same as *air-pit*. — 2 Any ventilating shaft.

air-slaked (är'släkt), *a* Hydrated and disintegrated by exposure to atmospheric air as, *air-slaked lime*.

air-sollar (är'sol'ar), *n* A compartment, passageway, or brattice carried beneath the floor of a heading or an excavation in a coal-mine, for ventilation. See *sollar*.

air-space (är'spās), *n* 1 In *ornith*, an air-cell of large size, an air-receptacle or a pneumatocyst (which see). — 2 In *med* and *sanitary science*, the clear cubic contents of a room, as the ward of a hospital, with reference to the respirable air contained in it as, *air-space* per man, so many cubic feet. — 3 In *firearms*, a vacant space between the powder-charge and the projectile.

air-spring (är'spring), *n* Any device designed to resist a sudden pressure, as the recoil of a gun, the momentum of a railroad-car, or the thrust of the moving parts of a machine, by means of the elasticity of compressed air. The common form is that of a cylinder containing air which is compressed by a piston or plunger. Same as *pneumatic spring*. Also called *air cushion* or *air buffer*.

air-stack (är'stak), *n* A chimney used for ventilating a coal-mine. [Pennsylvania.]

air-stove (är'stov), *n* A stove provided with flues about the fire-box and chamber, the air in which when heated ascends through pipes to the apartments to be supplied with warmth. See *air-furnace* and *heater*.

air-strake (är'strāk), *n* In *ship-building*, an opening left for ventilating purposes between two planks of the inside ceiling of a ship.

art (ärt), *n* [Also spelled *arth*, *art*, *arth*, *< Gael and, and = Ir and*, a height, top, point, a promontory, a point of the compass, esp one of the four cardinal points, a quarter of the heavens.] Point of the compass, direction [Scotch].

Of a the *arts* the wind can blow,

I dearly love the west. Burns, Song.

art (ärt), *v t* [Also spelled *art*, *crt*, *< art*, *n*] To direct or point out the way as, can you *art* me to the school-house? [Scotch.]

air-thermometer (är'thēr-mom'e-tēr), *n* A thermometer in which air is used instead of mercury. It has the advantage of being more delicate and accurate and can be employed at any temperature, but it is difficult to use, and hence is employed only in physical experiments. It is useful as a standard with which the indications of ordinary thermometers may be compared. Leslie's differential thermometer is a kind of air thermometer. See *thermometer*.

air-thread (är'thred), *n* A spider's thread floating in the air. Also called *air-gossamer*.

air-tight (är'tit), *a*. So tight or close as to be impermeable to air as, an *air-tight vessel*. — **Airtight stove**, a kind of sheet iron stove in which wood is used as fuel so as not to cause, although not literally *air tight*, it is practically so in comparison with an open fireplace.

air-trap (är'trap), *n* 1 A contrivance for preventing the access, as to a room, of the effluvia arising from drains and sinks. — 2 A reservoir and escape-valve placed at the joints or higher points of a water-main or pipe-line to allow the escape of air which may accumulate in the pipes.

air-trunk (är'trunk), *n* A large conduit for supplying pure air to, or for removing foul or heated air from, theaters, etc.

air-tube (är'tüb), *n.* 1 In *zool.*, a name given to certain horny passages for air in the abdomen of some aquatic insects.—2 *Naut.*, a small iron tube filled with water and hung in a coal-box in the coal-bunkers of a steamship as a means of ascertaining the temperature of the coal. The temperature of the water is taken by means of a thermometer. Its use is a precaution against the spontaneous combustion of the coal.

3 The tube of an atmospheric railway, as the pneumatic tube (which see, under *tube*).

air-tumbler (är'tum'bler), *n.* That which tumbles through the air, specifically, a kind of pigeon.

Mr. Brent, however, had an *Air Tumbler* which had in both wings eleven primaries.

Darwin, *Var. of Animals and Plants*, p. 167.

air-valve (är'valv), *n.* In general, a valve designed to control the flow of air. Specifically—1 A valve placed upon a steam-boiler to admit air, and thus prevent the formation of a vacuum by the condensation of steam within when the boiler is cooling off, and the consequent tendency to collapse.—2 A valve placed at bends and summits of water-pipes, etc., for the outflow of air, as when the pipes are being filled, and for the ingress of air to prevent the formation of a vacuum when the water is drawn out.

air-vesicle (är'ves'ikl), *n.* 1 In *entom.*, a dilatation of the trachea of certain insects, which enables them to change their specific gravity by filling the trachea with or emptying it of air.—2 In *ichth.*, a vesicle containing air, connected with the swim-bladder and also with the ear-parts.

air-vessel (är'ves'el), *n.* 1 An air-chamber or air-holder, especially one which serves as a reservoir of air in certain machines, as in carbureters.—2 The air-chamber of certain pumps. In the feed-pumps of a steam boiler an air vessel is used which serves both to equalize the flow of the water and to collect from it the free air which is an active agent in the corrosion of boilers. In pumping engines working against considerable heads and into long rising mains, such air vessels are made of great size to insure steady flow.

3 In *anat.* and *zool.*, a cavity of the body receiving, containing, or conveying atmospheric air, an air-tube, air-cell, or air-chamber, especially, a respiratory passage, as the windpipe of a vertebrate or the trachea of an insect.

Also called *air-portion*.

airward, airwards (är'ward, -wards), *adv.* [*air* + *ward*, -wards.] Up into the air, up ward as, "soar airwards again," *Thackeray*, *Shabby-Gentle Story*, iv.

air-washings (är'wash'ingz), *n. pl.* Any fluid in which air has been washed, or the residue left after the evaporation of such fluid. The process of washing consists either in causing air to bubble slowly through the fluid, or in agitating a confined volume of air with the fluid. The air in either case gives up to the fluid the dust, spots, and other foreign substances suspended in it.

In several cases the *air washings* which were under examination gave a distinct, clear green coloration in place of the characteristic yellowish brown precipitate produced by ammonia.

Science, III, 463.

airway (är'wä), *n.* Any passage in a mine used for purposes of ventilation, an air-course. [In England, to fill up, obstruct, or damage an airway maliciously is a felony.]

air-wood (är'wud), *n.* Wood dried or seasoned by exposure to the air, and not artificially.

Have the veneers ready which must be *air wood*, not too dry.

Workshop Receipts, 1st ser., p. 414.

airy (är'i), *a.* [Early mod. E. *aire*, *airy*, *airy*, *airy* (sometimes, and still poet., *airy*, after *L. aerius*—see *airy*), < ME *airy*, < *air* (in sense 8, < *air*², ult. = *air*¹) + *-y*.] 1 Consisting of or having the character of air, immaterial, ethereal.

The thinner and more *airy* parts of bodies.

Bacon.

oft, as in *airy* rings they skim the heath,

The clamorous lipwings feel the leaden death.

Pope, *Windsor Forest*, l. 131.

2 Relating or belonging to the air, being in the air, aerial.

Her eye in heaven

Would through the *airy* region stream so bright.

Shak. R. and J., il. 2.

Airy navies grappling in the central blue

Tennyson, *Locksley Hall*.

3 Open to a free current of air, breezy, as, an *airy* situation.

And by the moon the reaper weary,

Piling sheaves in uplands *airy*.

Tennyson, *Lady of Shalott*.

4 Light as air, intangible, unsubstantial, empty, unreal, flimsy as, *airy* ghosts.

The poet's pen gives to *airy* nothing

A local habitation and a name.

Shak., *M. N. D.*, v. 1.

I hold ambition of so *airy* and light a quality, that it is but a shadow's shadow.

Shak., *Hamlet*, II, 2.

5 Visionary, speculative as, *airy* notions, an *airy* metaphysician.—6 Graceful, delicate.

En the slight hare bell raised its head,

Elastic from her *airy* tread.

Scott, l. of the L., l. 18.

Here delicate snow stars out of the cloud,

Come floating downward in *airy* play.

Brown, *Snow Shower*.

7 Light in manner or movement, sprightly, gay, lively.

It saddens the heart to see a man, from whom nature has withheld all perception of the tones and attitudes of humour, labouring, with all his might to be *airy* and playful.

Gifford, *Kord's Plays*, Int. p. xlv.

Chaucer works still in the solid material of his race, but with what *airy* lightness has he not infused it?

Lowell, *Study Windows*, p. 252.

8 Jaunty, full of airs, affectedly lofty, pretentious.—9 In *painting* showing that proper recession of all parts which expresses distance and atmosphere. *Syn.* *Aerial* acridiform. *Airy* is more open to figurative meanings than *aerial*. The latter is the most exact word in other respects. It applies to the air as atmospheric, as *aerial* navigation. *Airy* applies rather to air in motion and to that which has the qualities, literal or imagined, of air.

Behold no more an empty *airy* sound

But a fair nymph that weeps her lover drowned.

Denham, *Art of Poetry*, III, 608.

We have already discovered the art of coasting along the *aerial* shores of our planet, by means of balloons.

Trotter, *Kirk's Rocket*, p. 77.

airy² (är'i), *n.* An old and better spelling of *airy*¹.

airy¹ (är'i), *n.* A provincial form of *area*.

aisle (äl), *n.* [*<* ME *ch*, *hch*, *chle*, *chle*, *chle*, *chle*, *chle*, *chle*, whence in early mod. E. *isle*, and even *gland* (see *isle*², *isle*²), by confusion with ME *the*, *yle*, later corruptly *isle* (see *isle*¹, *isle*¹), < OF *ch*, *chle*, *chle*, later *chle*, *chle* (whence the mod. E. spelling *chle*, recently spelled with *s*, *aisle*, after *isle*², *isle*¹, as above), *aisle*, wing of a church, < L. *ala*, a wing wing of a building, upper end of the arm, a conf. of **aula*, **aula*, dim. (double dim. *aulula*—see *aula*) of *avis*—see *ala*, *aris*, *ale*. The *s* in *aisle*, *isle*² is thus unoriginal, the pronunciation has remained true to the proper historical spelling *äle*.] Properly, a lateral subdivision of a church, parallel to the nave, choir, or transept, from which it is divided by piers or columns, and often surmounted by a gallery. The term is also improperly applied to the central or main division, as the *aisled* church that is, a church with a nave and two aisles. It is also used to de-

South Aisle of Rouen Cathedral (13th century).

signate the alleys or divisions of other structures, such as mosques, Egyptian temples, theatres, public halls, etc. As popularly applied to churches in which the nave and aisles proper are filled with pews, and in general to modern places of assembly, *aisle* denotes merely a passage way, giving access to the seats. As the center aisle and side aisles. Sometimes written *side*. See figure showing ground plan of a cathedral under *cathedral*.

aisle (äl-lä'), *a.* [*<* F. *aisle*, *aisle*, pp. of *aisler*, *aisler*, give wings to, < *aisle*, *aisle*, a wing see *aisle*.] In her, winged or having wings.

aisled (äld), *a.* Furnished with aisles.

aisleless (il'les), *a.* [*<* *aisle* + *-less*.] Without aisles.

The so-called Christian basilica may have been a simple oblong *aisleless* room divided by a cross arch.

Edinburgh Rev., LXIII, 46.

aislet (i'let), *n.* Misspelling of *aisle*.

aislette, *n.* See *aislette*.

ait (ät), *n.* [Little used in literature, also spelled *ught*, *eyt*, *eyot*, *eyght*, < ME *eyt*, *eyt* (also in comp. *aitland* and *aitland*, an island),

earlier **eyet*, < AS **æget*, a prob. var. of *iget* (found once in the AS Charters), an ait, another form of the reg. (W. Saxon) *igoth*, also spelled *igoth*, *igoth*, *iggoth* (**igath* not found), an island, with suffix *-oth*, *-ath*, here appar. dim., < *ig*, var. *ig*, an island, found in mod. E. only as the first element of *island*, now spelled improp. *island*, and as the final element (*-y*, *-a*, *-y*) in certain place-names—see *island* and *ey*².] A small island in a river or lake.

Fog up the river, where it flows among green *aits* and meadows.

Dickens.

aitch (äch), *n.* A modern spelling of the name of the letter *H* formerly written *ache*. See *H*.

aitchbone (äch'bon), *n.* [Written and pronounced variously, *atch*, *H*, *ach*, *each*, *edge*, *ash*, *ische*, *ise*, *ice*, *ice-bone*, etc., all being corruptions or erroneous explanations of the misunderstood or not-understood original ME *nache-bone*, < *nache* (< OF *nache*, *naye*, the buttock, < ML **natica*, < L. *natus*, buttock) + *bone*.] The initial *n* was early lost, as in *adder*¹, hence the form *ach*, *hach-bone*, etc. The bone of the buttock or rump in cattle, the cut of beef which includes this bone.

Carve up the flesh that up to the *hach bone*.

Book of St. Albans (1486).

aitchpiece (äch'pes), *n.* [*<* *atch*, the name of the letter *H*, + *piece*.] A part of a plunger or force-pump by which the water is forced into the stand-pipe through the door-piece. Also *H-piece*.

ait (ät), *n.* Scotch form of *oath*.

aitiology (ä-ti-ol'ö-y), *n.* Another spelling, nearer the Greek, of *etiology*.

aits (äts), *n.* Scotch form of *outs*.

aiver (ä'ver), *n.* Scotch form of *avert*, a work horse.

Aix (aks), *n.* [NL, < Gr. *ax* (ay-), a water-bird, appar. of the goose kind, prop. a goat.] A genus of fresh-water ducks, of the family *Anatidae* and subfamily *Anatina*, noted for the elegance of their plumage. It includes the celebrated mandarin duck of China—*A. japonica*, and the beautiful wood duck of summer of North America, *A. sponsa*. Also written *ix*.

Aix beds. See *bed*.

aisle (ä'l or ä'l'), *n.* Scotch form of *isle*¹.

ajala, ajaja, n. See *ajaja*.

ajar¹ (ä-jär'), *prep.* *phi* as *ad* or *a* [*<* *aj* + *jar*, discord.] Out of harmony, jarring.

Any accident that puts an individual *ajar* with the world.

Heathorn, *Marble Faun*, I, 111.

ajar² (ä-jär'), *prep.* *phi* as *ad* or *a* [*<* ME *on char*, *ajar*, lit. on the turn, rare as applied to a door, but common in other senses *on*, *prep*, *on*, *char*, *charre*, etc., a turn, time, piece of work, etc. see *aj* and *jar*² = *char*².] The change of ME *ch* to *E* *j* is very rare, it appears also in *jowl* and *jau*, q. v.] On the turn, neither quite open nor shut, partly opened—said of a door.

Leave the door *ajar*.

3 A sudden fear or painful suspense excited by an apprehension of danger, apprehension, fright, as, there is nothing in his illness to cause alarm.

I shook her breast with vague alarms.
Tennyson, The Letters

4 A warning sound, a signal for attention, an urgent call, summons, or notification. Specifically (a) In *truncing*, an appeal or a challenge made by a step or stamp on the ground with the advancing foot. (b) In *truncation*, a knock at the door of the lodge to give warning as of the entrance of a candidate for initiation.

5 A self-acting contrivance of any kind used to call attention, rouse from sleep, warn of danger, etc. Such devices are made in a great variety of forms, as, for example, alarm clocks, fog bells, fog whistles and sounding or whistling buoys, bells to indicate changes in temperature, the opening or shutting of doors, gates or drawers, the arrival of a given hour on the condition of telephone and telegraph wires, signals to call attention to the escape of gas, steam, water, air, etc.

Low-water alarm, in a steam boiler an automatic device for giving a signal by sounding a whistle when the water falls below the point of safety. — **Still alarm**. *See still*. — **Syn.** 1 Alarm, tocsin. — 3 Alarm, Apprehension, Fright, Terror, Dread, Consternation, Panic, as, fright, agitation, flutter, perturbation. These words all express degrees of fear in view of possible or certain perhaps imminent danger. Apprehension is the lowest degree of fear — the mind takes hold of the idea of danger, and without alarm considers the best way of meeting it. Alarm is the next stage — by derivation it is the alarm or summons to arms. The feelings are agitated in view of sudden or just discovered danger to one's self or others. Generally its effect upon the mind is like that of apprehension — it excites rather than overpowers the mental faculties. Fright, terror, and dismay are higher and perhaps equal degrees of fear — their difference is in kind and in effect. Fright affects especially the nerves and senses, being generally the effect of sudden fear. Terror may be a later form of fright or independent and as sudden — it overpowers the understanding and unreasons one. Dismay appals or breaks down the courage and hope, and therefore, as suggested by its derivation, the disposition to do anything to ward off the peril, what *dismay* one may be the failure or loss of his chosen means of defense. Fright and terror are often the effect of undirected fears as in superstition and are especially used with reference to physical fear. Consternation overthrows the mental faculties by the suddenness or the utterly unexpected greatness of the danger. Panic is a peculiar form of fear — it is sudden, demoralizing, a temporary madness of fear altogether out of proportion to its cause — there may even be no cause discoverable. It is the fear of a mass of people, or, figuratively, of animals.

It was clear that great alarm would be excited through out Europe if either the Emperor or the Dauphin should become King of Spain.

Macaulay, Mahon's Succession in Spain
Rip now felt a vague apprehension stealing over him
He perceived a strange figure slowly toiling up the rocks.
Irving, Rip Van Winkle

To go to bed was to lie awake of cold, with an added shudder of fright who never a loose casement or a waving curtain chose to give you the geom. flash.
Lowell, Study Windows, p 30

Have struck more terror to the soul of Richard,
Than can the substance of ten thousand soldiers.
Shak., Rich III, v 3

Dismay seized our soldiers, the panic spread, increased by the belief that a fresh army had come up and was cutting the field.
W Ware Zenobia, II xiii

Conceive but for a moment the consternation which the approach of an invading army would impress on the peaceful villages in this neighbourhood.
R Hall, Reflections on War

Each [the child and the soldier] is liable to panic, which is, exactly, the terror of ignorance surrendered to the imagination.
Emerson, Courage

Woodlark (*Alauda arborea*)

Cf. *calanda* and *lark*.] A genus of birds, typical of the family *Alaudidae*, or larks. The genus was formerly extensive with the family but is now restricted to such species as the skylark, *A. arvensis*, and the woodlark *A. arborea*. The species of *Alauda* proper are natives of the old world, and inhabit chiefly its northern portions, they are small, plain colored spotted, and streaked birds, they nest on the ground, and are noted for singing as they soar aloft and for the delicacy of their flesh. See *Alaudidae* and *lark*.

Alaudidae (ā-lā'di-dē), *n pl*. [NL, < *Alauda* + *-idae*.] The lark family, a family of birds, of the order *Passeres* and suborder *Oscines*. They are notably distinguished from other oscine *Passeres* by having the tarsal scutellum behind, and are therefore referred to by some to a special class, *Oscines scutellariatae*, in distinction from most other *Oscines*, which are lamini plantar. By others, however, the *Alaudidae* have been ranked as a subfamily, *Alaudinae*, under *Fringillidae*. The hallux bears a lengthened straightened claw. There are many genera and species, mostly of the old world and especially of Africa, only one genus, *Eremophila* or *Otocorys*, the shore or horned lark is indigenous to America. The *Alaudidae* are mostly migratory, they inhabit open country, nest on the ground, lay colored eggs, and sing as they soar; some of the species are gregarious. See *Alauda* and *lark*.

Alaudine (ā-lā'di-nō), *n pl*. [NL, < *Alauda* + *-ine*.] A subfamily of larks. The term represents (a) A subfamily of *Fringillidae*, including all larks [Disputed]. (b) A subfamily of *Alaudidae*, including the typical larks, represented by the genus *Alauda* and its immediate allies.

albarium (al-bā'r-i-um), *n*. [L. (sc. *opus*, work), white stucco; neut. of *albarus*, pertaining to the whitening of walls. Cf. *albare*, whiten, < *albus*, white.] A stucco or white lime obtained from burnt marble. *McClath*, *Simmonds*.

albata (al-bā'tā), *n*. [NL, < L. *albata*, fem. of *albus*, clothed in white, made white, pp. of *albare*, make white, < *albus*, white.] An alloy consisting of a combination of nickel, zinc, and copper united in various proportions, often with antimony, iron, lead, tin, and silver. It is a white metal, resembling silver in appearance, and is made into spoons, forks, tapers, etc. Also called *British plate* and *German silver*.

It was not the genuine article, but a substitute, a kind of *albatra*. *G. A. Sala*, *Buddington Peerage*, II 232

Albati (al-bā'ti), *n pl*. [L., pl. of L. *albatrus*, clothed in white; see *albata*.] A body of fanatics who about 1400 appeared in Italy as penitents, clad in white garments. They were suppressed by the pope. Also called *White Brethren*.

albatross (al'ba-trōs), *n*. [Formerly *albatross*, *albatross*, also *alqatross* (cf. D. *albatros* = G. *albatross* (but D. usually *stormvogel*, G. *sturmvoegel*, 'storm-bird') = F. *albatros*, formerly *alqatros*, = It. *albatro* = Sp. *albatros* = Pg. *albatroz*, all prob. from or affected by the E. form), a modification (*al-*, *alg-* changed to *alb-*, prob. in allusion to L. *albus*, white) of Pg. *alcatraz*, a sea-fowl, cormorant, albatross, orig. a pelican; see *alcatraz*.] 1. A web-footed sea-bird of the petrel family, *Procellariidae*, and subfamily *Diomedinae*. About 12 species of albatross are known, all except the sooty albatross, *Phoebastria tuberculosa*, belonging to the genus *Diomedea*. They are distinguished as a group from other birds of the petrel family by having the hind toe rudimentary, and the tubular nostrils separated, one on each side of the base of the upper mandible. The bill is stout and hooked at the end; the wings are very long, the tail and feet short, and the stature is very great. Albatrosses inhabit the southern seas at large, and the whole Pacific ocean, but not the northern Atlantic. Some of them are the largest known sea birds, and all are noted for their powers of flight, sailing for hours, and in any di-

rection with reference to the wind, without visible movement of the wings. They nest on the ground and lay a single white egg. They are very voracious, may be caught with a hook and line baited with pork, and when taken on board a vessel are observed to walk with difficulty. One of the commonest and best known species is the wandering albatross, *D. exulans*, it is also the largest species, having a stretch of wings of about 12 feet—an assigned dimension of 17½ feet being, either a great exaggeration or highly exceptional. This bird is mostly white, with dark markings on the upper parts, flesh colored feet, and a yellow bill. The short-tailed albatross, *D. brevirostris*, is a related but smaller species. It goes far north in the Pacific ocean where it is also found the black-footed albatross, *D. nigripes* of Audubon. The yellow-nosed albatross is *D. chlororhynchos*, to which another species, *D. culminata*, is closely related; these, and *D. melanophrys*, are among the smaller species, and of about the size of the sooty albatross. The latter is wholly dark colored. From their habit of following ships for days together without resting, albatrosses are regarded with feelings of attachment and superstition by sailors, it being considered unlucky to kill one. Coleridge has availed himself of this feeling in his "Ancient Mariner." Also spelled *albatros*, and in New Latin form *albatrus*, as either a generic or a specific designation.

2. A thin untwisted woolen material used for women's dresses.

Albertist (al'bēr-tist), *n* [ML *Albertista*, pl, < *Albertus*, Albert] An adherent of the philosophy of Albertus Magnus, a German scholastic philosopher (1193-1280). The Albertists were only recognized as a distinct school in the university of Cologne in the fifteenth century. This school was an offshoot from that of the Thomists, from which it differed concerning many points of logic, physics, and theology. It was attached to the college of St. Lawrence. The differences which separated the Albertists from the Thomists were insignificant. Among other points the former held that logic is a speculative not a practical discipline, that universals in *re* and *post rem* are identical (see *universal*), and that the principle of individuation (which see) is matter

albertite (al'bēr-tīt), *n* [ML *albert*, name of a county in New Brunswick, where this mineral is found, + *-ite* 2] A hydrocarbon, pitch-like in appearance, and related to asphaltum, but not so fusible nor so soluble in benzene or ether. It fills a fissure in the lower carboniferous rocks at the Albert mine in New Brunswick. It is used in the manufacture of illuminating gas and of illuminating and lubricating oils. Also called *Albert coal*

albertype (al'bēr-tip), *n* [Joseph *Albert*, name of the inventor, + *type*] 1 A method of direct printing in ink from photographic plates. See *photolithography* — 2 A picture produced by this method

albescence (al-bes'ens), *n* [ML *albescere*] The act or state of growing white or whitish

albescent (al-bes'ent), *a* [L *albescens* (t)-s, ppr of *albescere*, become white, inceptive of *alberere*, be white, < *albus*, white] Becoming white or whitish, moderately white, of a pale, hoary aspect, bleached, blanched

albino (al-bī'nō), *n* [Pg *albino*, orig applied by the Portuguese to the white negroes they met with on the coast of Africa (= Sp It *albino*, > F *albinos*, < *albus*, now *albo*, = Sp It *albo*, < L *albus*, white] 1 A person of pale, milky complexion, with light hair and pink eyes. This abnormal condition appears to depend on an absence of the minute particles of coloring matter which ordinarily occur in the lowest and last deposited layers of the epidermis or outer skin. Albinos occasionally occur among all races of men

Hence—2 An animal characterized by the same peculiarity in physical constitution. A perfect albino is pure white, with pink eyes, but there may be every degree of departure from the normal coloration, exhibiting every variation in paleness of color or in spotting or mottling with white, such pallid or pied individuals being called *partial albinos*. An albino is always a sort of freak of nature, as when one of a brood of crows or blackbirds is snow white, but albinism tends to be come hereditary and thus established, as in the case of white mice, white rabbits, and white poultry. Any albino therefore, is to be distinguished from an animal that is naturally white, like the snowy heron or polar bear, or that periodically turns white in winter, like the arctic fox polar bear or ptarmigan. Some animals are more susceptible to albinism than others, but probably all are liable to the deficiency or total lack of pigment which constitutes this affection

albugo (al-bū'go), *n* [L, whiteness, a white spot, < *albus*, white] A disease of the eye, characterized by deep opacity of the cornea. Sometimes called *leucoma*.

Albula (al'bū-lā), *n* [NL, fem of L *albulus*, whitish, < *albus*, white see *albul* 2, *albul* 1] A genus of fishes distinguished by their whitish or silvery color, typical of the family *Albulidae*

albulid (al'bū-lid), *n* A fish of the family *Albulidae*, a bonefish, ladyfish, macabé, or French mullet

Albulidae (al-bū-lī-dē), *n* pl. [NL, < *Albula* + *-idae*] A family of abdominal fishes having an elongate body covered with silvery scales, conical head with produced overhanging snout, small mouth, and pavement-like teeth on the sphenoid and pterygoid bones. Only one species, *Albula vulpes*, is known. It is generally distributed in tropical seas, and is known in the West Indies and Florida as the *ladyfish* and *bonefish*. It is interesting from modifications of structure of the heart which suggest the ganoids. See cut under *ladyfish*

Albulina (al-bū-lī-nā), *n* pl [NL, < *Albula* + *-ina*] In Günther's classification of fishes, the fifth group of *Clupeidae*. The technical characters are — the mouth inferior, of moderate width and toothed, the upper jaw projecting beyond the lower, and the intermaxillary juxtaposed to the upper edge of the maxillary bones. The group corresponds to the family *Albulidae*. Preferably written *Albulina*, as a subfamily

album (al'būm), *n*. [L, prop neut of *albus*, white] 1. In *Rom antiq*, a white tablet, on which the names of public officers and records of public transactions were written, and which was put up in a public place — 2. A book consisting of blank leaves variously prepared for special purposes, as for the reception or preservation of autographs, photographs, verses, "sentiments," etc. — 3. A book expensively printed or bound, containing short selections of poetry or prose, usually illustrated, and intended as a gift or an ornament — 4. In *law*, white (silver) money paid as rent

albumen (al-bū'men), *n* [L, *albumen* ov, the white of an egg, lit, whiteness, < *albus*, white.] 1 The white of an egg; hence, an animal and vegetable principle which occurs in its purest

natural form in the white of an egg: in the latter sense more correctly called *albumin* (which see).—2. In bot., any form of nutritive matter, whatever its chemical constitution,

Seeds cut vertically showing their Embryos and Albumen

stored within the seed and about the embryo. It may be farinaceous, as in the cereals, oily and fleshy as in many nuts, horny, as in the coffee berry or bony, as in the vegetable ivory. Also called *endosperm*—*Albumen glue*. See *glue*.

albumenoid, *a* and *n*. See *albuminoid*.

album græcum (al'būm grē'kūm), [*L*; lit, Greek white] The dung of dogs, etc., which, from exposure to the air, has become white like chalk. It was formerly used as a medicine, and is still used by tanners to soften leather.

albumin (al-bū'min), *n* [*L*, *album(en)* + *-in*]

See *albumen*.] In chem., a substance named from the Latin for the white of an egg, in which it occurs in its purest natural state (see *albumen*).

It is a proximate principle composed of nitrogen, carbon, hydrogen, and oxygen, with a little sulphur, and enters generally into the composition of the animal and vegetable juices and solids. Animal albumin abounds in the serum of the blood, the vitreous and crystalline humors of the eye, the so-called coagulable lymph, the juices of flesh, etc. Vegetable albumin is found in most vegetable juices and in many seeds, in composition and properties it does not differ greatly from animal albumin. Albumin obtained from eggs or blood serum is used for giving a lustrous coating to photographic paper, and rarely in some other photographic processes, for fixing colors in painting, and for clarifying syrupy liquids. When heated with such liquids it coagulates and sinks to the bottom or else rises as a scum carrying with it the fine suspended particles which had made the liquid turbid. When albumin in solution is digested with a weak acid, it passes into a modification distinguished by the following properties: it is insoluble in water and weak saline solutions, soluble in weak acids or alkalis, and not coagulated by heat. This modification is called *acid albumin*. Similar treatment with a weak or strong alkali produces a substance having nearly the same properties as acid albumin, but called *alkali albumin*. Syntonin is not distinguishable from acid albumin. When a solution of either acid or alkali albumin is neutralized, a neutralization precipitate is obtained. This dissolved in acid, gives acid albumin, dissolved in alkali, it gives alkali albumin, though there is reason to believe that neither the acid nor the alkali combines chemically with the albumin. Albumin is found in commerce in a dry state, being prepared both from the white of eggs and from the serum of blood, 84 dozen eggs produce about 12 gallons of white, which yields 14 per cent of commercial albumin, while the blood of 5 oxen yields about 2 lbs. Pure albumin, entirely free from mineral matter, begins to coagulate at about 139, and becomes completely solidified at 167. Coagulated albumin is a white opaque substance, possessing the property of combining readily with a great many coloring materials, such as fuchsine, aniline violet, purpuramide, etc. It is employed extensively in the arts, as in alcatraz printing, in which it is used to fix pigments, especially ultramarine, chrome yellows, etc., upon the fibers of cotton cloth, serving both as a vehicle for the color and as a varnish. With aniline colors however, it forms a true mordant—*Albumin process*, a little used process of making photographic plates, in which albumin is used instead of collodion or gelatin.

albuminate (al-bū'mi-nāt), *n* [*L*, *albumen* (*albumin-*) + *-ate*]. One of a class of bodies in which albumin appears to be in weak combination with a base. Alkali albuminate is regarded by some as identical with casein.

albumin-beer (al-bū'min-bēr), *n*. A preserving bath which has been used for some early photographic emulsions, composed of albumin, ammonia, pyrogallie acid, beer, and water.

albuminiferous (al-bū'mi-nif'ē-rus), *a* [*L*, *albumen* (*-min-*) + *-ferre*, bear] Producing albumin. *W. L. Carpenter*.

albuminiform (al-bū'mi-mi-fōrm), *a* [*L*, *albumen* (*-min-*) + *-forme*, *forma*, form.] Formed like or resembling albumin.

albuminimeter (al-bū'mi-nim'ē-tēr), *n* [*L*, *albumen* (*-min-*) + *-metrum*, *Gr* μέτρον, measure.] An instrument for measuring the quantity of albumin contained in any liquid.

albumin (al-bū'mi-nin), *n*. [*L*, *albumen* (*-min-*) + *-in*]. The substance of the cells inclosing the white of birds' eggs. It contains no nitrogen, and dissolves in caustic potash. Also called *oonin*.

albuminiparous (al-bū'mi-nip'a-rus), *a* [*L*, *albumen* (*-min-*) + *-parus*, *Gr* παίρειν, produce] Same as *albuminiferous*.

Milton, a name to resound for ages

Tranquillo, *1 spec. in Quantity*, *Alcaica*

alcaid, **alcayde** (al-kā'id; Sp. pron. al-kā'idā), *n* [*Sp*, *Pg*, *alcade*, formerly *alcayde*, a governor, jailer, warder, < *Ar*, *al-qādī*, < *al*, the (see *al-2*), + *qādī*, leader, governor, prefect, < *qāda*, lead, govern] In Spain, Portugal, etc., a commander of a fortress, a military officer, also a jailer.

alcalde (al-kā'dē, Sp. pron. al-kā'idā), *n* [*Sp*, *alcald*, (*m* *Pg* *alcade* by confusion with *alcade*, *alcad*), < *Ar*, *al-qādī*, < *al*, the, + *qādī*, judge (< *Turk* *kādī*, > *E* *cadi*, *q v*), < *qadāy*, judge, decide] In Spain and Portugal, and in countries settled by Spaniards or governed by Spanish law, the mayor of a pueblo or town, who is the head of the municipal council, and is vested with judicial powers similar to those of a justice of the peace.

alcaldeship (al-kā'dē-ship), *n* The office of alcalde.

The heart of the Spanish local system is the *Alcaldeship* (*II* *Shinn*, *Mining Camps*, p. 84).

alcali, **alcalimeter**, **alcalizable**, etc. See *alkali*, etc.

alcamistret, **alcamy**, etc. See *alchemist*, *alchemy*, etc.

Alcanes (al-kā'nē), *n. pl* Same as *Alcana*.

alcanna (al-kā'nā), *n* [Also written *alcana*, < *Sp*, *alcana*, *alcana* (= *Pg* *alcanna*), < *Ar*, *al-kannā*, < *al*, the, + *kannā*, henna] Same as *henna*.

Alcantarine (al-kā'nā-tin), *n* [*L*, *Alcantara*, a city on the Tagus, lit. the Bridge, < *Ar*, *al*, the, + *qantarāh*, a bridge (< *Ar* *almucantar*)] A member of a branch of the Franciscans founded in 1555 by St. Peter of Alcantara (whence the name). See *Franciscan*.

alcarraza (al-kā-rā-zā, Sp. pron. al-kār-rā'ihā), *n* [*Sp*, < *Ar*, *al-karāz*, < *al*, the (see *al-2*), + *karāz*, an earthen vessel, pitcher] A vessel made of porous unglazed pottery, used in hot climates for cooling water by the evaporation of the moisture oozing through the substance of the vessel. The effectiveness of the process is greatly increased by exposure to a current of air. In the southwestern United States commonly called *olla*.

alcarsin, *n* See *alkarsin*.

alcatote, *n* [*E* dial, also *alkstote* (*Ermoor* *Cowship*), origin obscure] A silly elf or foolish out (*Gloss* *Ermoor Scolding*).

Why, you know I am an ignorant, unable trifle in such business, an out, a simple *alcatote*, an innocent.

Ford, *Fancies*, iv. 1.

alcatraz (al'ka-tras), *n* [*L*, *Sp*, *Pg*, *alcatraz*, a pelican, etc., prob. a modification of *Pg* *alcatraz* = *Sp* *arcada*, *aladuz*, the bucket of a noria or water-raising wheel, < *Ar*, *al*, the, + *qādūs*, bucket, < *Gr* *καδός*, a water-vessel; the term "bucket" being applied to the pelican for the same reason that the Arabs call it *saggā*, water-carrier, because it carries water in its pouch (Devic)] A Spanish and Portuguese name loosely applied to sundry large sea-birds.

as the pelican (*Pelecanus*), gannet (*Sula*), albatross (*Diomedea*, especially *D. fuliginosa*), frigate-bird (*Tachypetidae aquilus*), etc., but of no exact signification in ornithology.

alcavala (al-ka-vä'lä), *n.* [Sp. *alcavala*, *alcavala*, < Ar. *al-qabälä*, < *al*, the, + *qabälä*, tax, duty, < *qabala*, receive see *cabala*] A tax of one tenth formerly imposed in Spain upon public sales and exchanges, and paid by the seller. Also written *alcabala*.

alcayde, *n.* See *alcad*.

alcazar (al-ka-zär'), *n.* [Sp. *alcázar*, *alcázar*, < Ar. *al-qäzär*, < *al*, the, + *qäzär*, a fortified place, in pl. a castle.] 1 In Spain, a fortress, a castle, also, a royal palace, even when not fortified.

It was then conducted to the alcazar, and the keys of the fortress were put into his hand.

Priscott, Ferd and Isa, II 21

The blessed cross was planted in place of the standard of Mahomet and the banner of the sovereigns floated triumphantly above the Alcázar. *Irving, Granada*, p. 518

2 A name given to certain places of amusement in France and elsewhere, particularly when decorated in the Moorish style—3 *Naut*, the quarter-deck.

Alce (al'sē), *n.* [NL, < Gr. *ἄλκη*, *elk* see *elk*] A genus of ruminating mammals, comprising the European elk and the American moose synonymous with *Alces* (which see). See *elk*.

Alcedinidae (al-sed'in-dē), *n. pl.* Same as *Alcedinidae*.

alcedinid (al-sed'in-id), *n.* A bird of the family *Alcedinidae*, a kingfisher or halcyon.

Alcedinidae (al-sē-din'ä-dē), *n. pl.* [NL, < *Alcedo* (*Alcedin*) + *-idae*] A family of birds, the kingfishers, referred to the order *Pisces* when that group was in vogue, sometimes to a group known as *Syndactyl*, now to an order *Picaria*, which includes many families of non-passerine insectivorous birds. However, the *Alcedinidae* form a very natural family of birds, distinguished by the cohesion of the third and fourth toes, the non serrate tibia of the long, large, straight, and deeply cleft bill, the rudimentary or very small tongue, the small, weak feet, unfitted for progression, usually bare of feathers above the tibio tarsal joint, the long wings, of 10 primaries, and a short tail of 12 rectrices. The family includes a number of curious and aberrant forms, among them two genera (*Ceryle* and *Icthyophaga*) in which the inner front toe is defective. All the *Alcedinidae* nest in holes and lay white eggs. Their characteristic habit is to sit motionless on the watch for their prey, to dart after it, seize it, and return to their perch. There are about 120 species in various parts of the world, referable to about 20 genera. The family is divided into two subfamilies, *Alcedininae* and *Daceloninae*. Sometimes called *Halcyonidae*. Also *Alcedidae*.

Alcedininae (al'sē-din-nä), *n. pl.* [NL, < *Alcedo* (*Alcedin*) + *-inae*] A subfamily of *Alcedinidae*, embracing the piscivorous or fish-eating as distinguished from the insectivorous kingfishers, or *Daceloninae*. It consists of about 6 genera and some 60 species, one of the genera, *Ceryle*, includes all the kingfishers of America. The common kingfisher of Europe, *Alcedo vulgaris*, and the belted kingfisher of North America, *Ceryle alcyon*, are typical examples.

alcedinine (al-sed'in-nin), *a* [< *Alcedinina*] Having the characters of or pertaining to the *Alcedininae* applied to the piscivorous as distinguished from the halcyonine kingfishers.

Alcedinoides (al'sē-din-oi'dē), *n. pl.* [NL, < *Alcedo* (*Alcedin*) + *-oides*] A superfamily of birds, containing the families *Alcedinidae*, *Bucerotidae*, *Momotidae*, *Todidae*, and *Moropidae*.

Alcedo (al-sē-dō), *n.* [L, also improp. *halcedo*, a kingfisher, the same, with different suffix, as Gr. *ἄλκυον*, > L. *alcyon*, *halcyon*, a kingfisher see *halcyon*] A genus of kingfishers, of the family *Alcedinidae* and subfamily *Alcedininae*, giving name to these. *Ispida* is the common species of Europe. See *Alcedinidae* and *kingfisher*.

Alcelaphinae (al-sel-a-fī'nē), *n. pl.* [NL, < *Alcelaphus* + *-inae*] A subfamily of bovine antelopes, containing large species, such as those of the genera *Alcelaphus* and *Connochares*, or the bubaline antelopes of Africa—the hart-beests, blesboks, and gnus. See cut under *blesbok*.

Alcelaphus (al-sel'a-fus), *n.* [NL, < Gr. *ἄλκυον*, *elk*, + *ἔλαφος*, deer] The typical genus of the subfamily *Alcelaphinae*. The leading species are the bubaline antelope (*A. bubalus*) the hartbeest (*A. caama*), and the blesbok (*A. albyfrons*).

Alces (al'sēz), *n.* [L, *elk*, < Gr. *ἄλκη*, *elk*, = E. *elk*, q. v.] A genus of ruminant mammals of the deer family, *Cervidae*. They are of immense stature, and have a heavy, ungainly body very high at the withers, a short, thick neck with a beard at the throat, a tumid muzzle, broadly palmate horns in the male, long ears, coarse, brittle hair, and no metatarsal gland, but a small tarsal gland covered with reversed hair. The genus includes two species, or one species of two varieties, namely, the animal of northern Europe called the elk

and the corresponding animal of northern North America known as the moose. See *elk*, 2, and *moose*.

alchemic (al-kem'ik), *a* [Formerly *alchymic* = F. *alchimique*, < ML. *alchymicus*, < *alchymia*, alchemy. see *alchemy*, and of *chemic*] Relating to or produced by alchemy. Formerly also spelled *alchymic*.

At last lowered into the semi-conscious alchemic state wherein misery turns to habit.

L. Wallace, Ben Hur, p. 138

alchemical (al-kem'ik-al), *a* Same as *alchemic*. **alchemically** (al-kem'ik-al-i), *adv.* In an alchemic manner, by means of alchemy. Formerly also spelled *alchymically*.

Lull would prove it alchemically.

Camden, Remains, Money

alchemist (al'ke-mist), *n.* [Early mod. E. *alchymist*, *alchymist*, *alchymist*, *alchymiste* (also with added term -er, **alchemister*, *alchymister*, *alchymister*, < ME. *alcanister*, *alkamystere*, *alkamystre*, < OF. *alchemiste*, *alquemiste*, mod. F. *alchimiste* = Sp. *alquimista* = Pg. It. *alchimista*, < ML. *alchymista*, < *alchymia* see *alchemy* and -ist] One who practises or is versed in alchemy. Formerly also spelled *alchymist*.

You are an alchemist, make gold of that.

Shak. T. of A., I, 1

alchemister, *n.* Same as *alchemist*.

alchemistic (al-ke-mis'tik), *a* Relating to or practising alchemy.

Paracelsus informs us that the composition of his "triple panacea" can be described only in the language of alchemistic adverbs.

Pop. Sci. Mo., XX 61

alchemistical (al-ke-mis'ti-kal), *a* Same as *alchemistic*.

Irregular, secular ale, courageous, contagious and alchemistical also.

Dicker and Webster (?) *Weakest Good to the Wall*, I, 2

alchemy (al-kem'is-tri), *n.* [Early mod. E. *alchymy*, *alchymistry*, *alchymistrie*, *alchymistru* see *alchymist* and -ry. Cf. *chemistry*] Alchemy. Formerly also spelled *alchymistry*.

alchemize (al'ke-miz), *v. t.* [Early mod. E. *alchymize*, *alchymize*, -ise, < *alchymy* + -ize] To change by alchemy; transmute, as metals.

Lovelace [Rare] That which he does. Our ready minds to fellowship divine. A fellowship with essence, till we shine. Full alchemized and free of spirit.

Keats, Endymion, I, 781

alchemy (al'ke-mi), *n.* [Early mod. E. also *alchymy*, *alchymy*, *alchymy*, *alchymy*, *alchymy*, etc., < ME. *alkamy*, also *alkamye*, *alkamye*, *alkamye*, *alkamye*, and hence *alemonie*, *alemonie*, *alemonie*, *alemonie* (simulating *astronomy*), < OF. *alchymie*, also assimilated *alchemie* (mod. F. *alchymie*), also *arkemie*, *arquemie*, = Pr. *alkimia* = Sp. Pg. *alquimia* (Pg. also *alchymia*) = It. *alchimia*, < ML. *alchymia*, *alchymia*, < MGr. *αλχημία*, < Ar. *alkimia*, < al, the (see al-2), + *kimia*, < MGr. *χημία*, also *χημία*, alchemy, defined by Suidas as ἡ τοῦ ἀργύρου καὶ χρυσοῦ κατασκευή, i. e., the preparation of silver and gold. Joannes Antiochenus says that Dioctetian burned the books of the Egyptians περὶ χημίας ἀργύρου καὶ χρυσοῦ, i. e., concerning the transmutation of silver and gold, hence the name has been identified with *χημία*, the Gr. form of *Khmi*, the native name of Egypt, lit. 'black earth', but *χημία* is prob. for *χημία*, a mungling, an infusion, < *χημός*, juice, esp. juice of plants (> E. *chyme*, q. v.), < *χέω*, pour, akin to L. *fundere* = AS. *geotan*, pour, and to E. *quash*. Alchemy would thus be originally the art of extracting juices from plants for medicinal purposes.] 1 Medieval chemistry, the doctrines and processes of the early and medieval chemists, in particular, the supposed process, or the search for the process, by which it was hoped to transmute the baser metals into gold.

Alchemy was, we may say, the sickly but imaginative fancy through which modern chemistry had to pass before it attained its majority, or, in other words, became a positive science.

Encyc. Brit., I, 459

2 Any magical or mysterious power or process of transmuting or transforming.

Go laugh, transmuting lumps into angels by the alchemy of smiles.

Alcott, Tablets, p. 64

In the tiny cellulose sac by the vegetable protoplasm is wrought the very alchemy of life.

S. B. Herrick, Plant Life, p. 21

3 Formerly, a mixed metal used for utensils, a modification of brass so called because believed to have been originally formed by the art of alchemy, hence, an imitation, as alchemy was supposed to be of brass used figuratively by Milton for a trumpet.

Four speedy Cherubim Put to their mouths the sounding alchymy.

Milton, P. L., II, 517

Here be the tavern baskers, and here peep out the fine alchemy knaves, looking like most of our gallants, that seem what they are not.

Middleton, Your Five Gallants, II, 2.

Formerly also spelled *alchymy*. **alchochoden** (al-kō-kō'den), *n.* [Ar.] In *astrology*, the giver of life or years; the planet which is the disposer of hyleg and in aspect with that planet when a person is born, indicating by its position the length of his life.

alchymist, *n.* See *alchemist*, etc.

Alcidae (al'si-dē), *n. pl.* [NL, < *Alca* + *-idae*] The auks, a family of natatorial sea-birds having short wings and tail, palmate three-toed feet, and a bill shaped very variously in the different species. The body is stout and clumsy, and the legs are inserted far back and deeply buried in the common integument of the body, as in other birds of the order *Pyropodae*. The family is variously subdivided by different writers, the most obvious division being into the *Alcinae* proper, with stout, hooked bills, comprising the auks, puffins, etc., and the *Uriae*, or guillemots and murres, with long, slender, acute bills. The family contains some 25 species of about 12 genera. The *Alcidae* are all marine, and confined to the northern Atlantic, northern Pacific and Polar seas. Also written *Alcedae*. See cuts under *Alca*, *murre*, and *puffin*.

alcidine (al'si-din), *a*. [(< *Alcidae* + -ine)] In ornithology, pertaining to or resembling the auk family.

Alcinae (al-si-nē), *n. pl.* [NL, < *Alca* + -inae] A subfamily of birds, of the family *Alcidae*, embracing the auks proper and their immediate allies. The bill is variously shaped, but always hard and horny, stout, compressed, and more or less hooked. The leading species of *Alcinae* are the great auk, *Alca impennis*, the razor bill, *Alca or Uria lomvia*, the puffins, of the genera *Fratercula* and *Lunda*, and the horn billed auk, *Ceratorhynchus monoceratus*.

alcine (al'sin), *a*. [(< *Alces* + -ine)] Of or pertaining to the elk, noting the group of *Cervidae* to which the elk of Europe and the moose of America belong.

alcine (al'sin), *a*. [(< *Alca* + -ine)] Of or pertaining to the auk, *Alca*, or family *Alcidae*.

Alcippe (al-sip'ē), *n.* [NL, < Gr. *Ἀλκιππη*, in myth a daughter of Ares, < *ἄλκη*, strength, + *ἵππος*, a horse.]

1 A genus of cirriped crustaceans, of the order *Abdominaria*, having three pairs of abdominal limbs, no thoracic limbs, a segmented body, two eyes, extensible mouth, and the sexes distinct. It is the type and only member of a family *Alcippeidae*. A species, *A. lampas*, is found on the British coast, burrowing in shells of *Fusus* and *Buccinum* (white).

2 A genus of birds, of uncertain position, classed by G. R. Gray (1869) as one of the *Agathidae*. It was founded by E. Blyth in 1844, and contains 12 species inhabiting India, China, the Malay peninsula and Borneo. *A. cinerea* is the type.

alciptid (al-sip'id), *n.* [(< *Alcippeidae*)] An abdominal cirriped of the family *Alcippeidae*.

Alcippeidae (al-sip'id-ē), *n. pl.* [NL, < *Alcippe*, I, + *-idae*] A family of cirripeds of which *Alcippe* is the typical genus.

Alcmanian (alk-mā-ni-an), *a*. [(< L. *Alcmanus*, < Gr. *Ἀλκμαν*, Doric of *Ἀλκαίαν*)] Pertaining to Aleman, a Spartan lyric poet of the seventh century B. C., celebrated for his amatory verses—

Alcmanian verse or **line**, a dactylic tetrameter catalectic, or series of three dactyls or spondee (the third foot regularly a dactyl), followed by a spondee or trochee. A couplet consisting of a hexameter followed by such a line is called an *Alcmanian distich*, and this may be used single or double as an *Alcmanian strophe* or *stanza*.

alco (al'kō), *n.* [Native name] A variety of small dog, with a small head and large pendulous ears, found wild in Mexico and Peru, and now domesticated.

alcoate (al'kō-āt), *n.* A contracted form of *alcoholate*.

alcolene (al'kō-jēn), *n.* [(< *alcol* (hol) + -ene)] The vapor-cooler in a distilling apparatus.

alcolate (al'kō-hāt), *n.* A contracted form of *alcoholate*.

alcohol (al'kō-hol), *n.* [Formerly also spelled *alcolite*, *alcolol*, < F. *alcool*, now *alcool*, = Sp. alcohol (al'kō-hol), *n.* [Formerly also spelled *alcolite*, *alcolol*, < F. *alcool*, now *alcool*, = Sp. Pg. *alcohol* = It. *alcohol*, *alcol*, *alcoole*, < ML. *alcohol*, orig. in the sense of a fine, impalpable powder, the black sulphur of antimony, afterward extended to any fine powder produced by

trituration or sublimation, then to essence, quintessence, or spirit, esp. the rectified spirits of wine, and finally used as at present, < Ar *al-koh'l*, < al, the, + *koh'l*, the fine powder of antimony used in the East to paint the eyebrows, < *kahala*, stain, paint] 1 A liquid, ethyl hydrate, C_2H_5OH , formed by the fermentation of aqueous sugar-solutions, or by the destructive distillation of organic bodies, as wood. Absolute or pure alcohol is a colorless mobile liquid of a pleasant spirituous smell and burning taste, of sp. gr. 0.793 at 60° F. and boiling at 173° K. It is inflammable, and burns without smoke or residue, the products of combustion being carbon dioxide and water. At very low temperatures it becomes viscid, but does not congeal above -200°, and for this reason is used for filling thermometers to register low temperatures. It mixes with water in all proportions, is a general solvent for organic principles, bases, resins, oils, etc., and as such has extensive use in the arts and in medicine. Different grades of alcohol are sometimes designated in trade according to the source from which they are derived, as *grain alcohol*, prepared from maize or other grain, *root alcohol*, from potatoes and *heather moss alcohol*, which is made in large quantities from *Cladonia* moss and Iceland moss in Norway, Sweden, and Russia. Alcohol is a powerful stimulant and antiseptic, and in some dilute form is used as an intoxicating beverage among all races and conditions of people. Proof spirit contains 40% per cent by weight of pure alcohol, or 57.1 per cent by volume. Underproof and overproof are designations of weaker and stronger solutions. Distilled liquors or ardent spirits, whiskey, brandy, gin, etc., contain 40 to 50 per cent of absolute alcohol, wines from 7 or 8 to 20, alc. and port from 5 to 7, and beer from 2 to 10.

2 In popular usage, any liquor containing this spirit. — 3 In organic chem., the general name of a series of compounds which may be regarded as derived from the normal hydrocarbons by replacing hydrogen with the group OH, or hydroxyl, and which correspond to the hydroxides of the metals. Such compounds are classed as *primary*, *secondary* or *tertiary alcohols*, according to their constitution and the products of their decomposition. Primary alcohols are regarded as containing the group (H_2OH) , and by oxidation yield aldehyde and ultimately an acid of the same carbon series. Secondary alcohols are regarded as containing the group (HOH) , and by oxidation do not yield aldehyde, but a ketone, which on further oxidation breaks up into two acids of a lower carbon series. Tertiary alcohols are regarded as having the group (COH) , and break up at once on oxidation into two acids of a lower carbon series. — 4 An impalpable powder.

If the same salt shall be reduced into alcohol as the chymists speak, or an impalpable powder, the particles and intercepted spaces will be extremely lessened. Boyle. **Amylic alcohol** ($C_6H_{11}O$), also called *hydrate of amyli*, a general name applicable to eight isomeric alcohols having the formula given. The most common, *inactive amylic alcohol*, is a transparent colorless liquid, with a strong, offensive odor derived from the fermentation of starchy matters. It is the chief constituent of fusel oil, a product of fermentation in distilleries, which is contained in crude spirit, and whose presence, even in small quantity, injures the quality of the spirit. — **Anhydrous alcohol**, alcohol entirely free from water. — **Caustic alcohol**, sodium ethylate (C_2H_5Na), or sodium alcoholate, a product formed by adding sodium to absolute alcohol. It forms a white powder, which in contact with water or moist animal tissue decomposes into alcohol and caustic soda. It is used in medicine as a caustic. **Cresylic alcohol**. See *cresylic*. — **Methyl or methyl alcohol**, or **wood-alcohol**, alcohol obtained by the destructive distillation of wood. When pure it is a colorless mobile liquid (CH_3OH), with an odor and taste like ordinary alcohol (ethyl hydrate, C_2H_5OH , see above), though the commercial article has a strong pyroigneous smell. It is inflammable. It is a by-product in the manufacture of charcoal, and is used in the arts as a solvent for resins, also in the manufacture of aniline dyes. Also called *wood spirit*, *methyl*, and *hydrate of methyl*.

alcoholate (al'kō-hol-āt), *n* [*< alcohol + -ate*]. A compound in which a hydrogen atom of alcohol is replaced by an alkali metal, as potassium alcoholate, or ethylate, C_2H_5OK , formed, with evolution of hydrogen, when metallic potassium is dissolved in alcohol. Sometimes contracted to *alcoate*, *alcoate*.

alcoholature (al-kō-hol'ā-tūr), *n* [*< F alcoolature*, see *alcohol*]. An alcoholic tincture prepared with fresh plants. *N. E. D.*

alcohol-engine (al'kō-hol-en'jin), *n*. A motor employing the vapor of alcohol in place of steam. **alcoholic** (al-kō-hol'ik), *a*. 1 Pertaining to or of the nature of alcohol. — 2 Containing or using alcohol as, an *alcoholic thermometer*.

alcoholicity (al'kō-hol-is'it), *n* [*< alcoholic + -ity*]. Alcoholic quality.

Some brandy is added to the wine, by which its alcoholicity rises to about 20 per cent of proof spirit.

Ure, Dict., IV 950

alcoholisable, etc. See *alcoholizable, etc*.

alcoholism (al'kō-hol-izm), *n* [*< alcohol + -ism*]. In *pathol.*, the effects of excessive use of alcoholic drinks. They are distinguished as *acute*, resulting from the consumption of a large amount of alcoholic drink at once, or within a short period, and *chronic*, resulting from its habitual consumption in smaller quantities.

alcoholizable (al'kō-hol-i'zā-bl), *a* [*< alcoholize + -able*]. Capable of yielding or of being converted into alcohol. Also spelled *alcoholisable*.

alcoholization (al'kō-hol-i-zā'shon), *n*. 1. The act of rectifying spirit till it is wholly deprived of impurities. — 2 Saturation with alcohol, or exposure to its action. — 3 The act of reducing a substance to an impalpable powder. Phillips 1678. — 4 Same as *alcoholism*.

Also spelled *alcoholisation*.

alcoholize (al'kō-hol-iz), *v t*, pret and pp *alcoholized*, ppr *alcoholizing* [*< alcohol + -ize*]. 1 To convert into alcohol, rectify (spirit) till it is wholly purified. — 2 To saturate with alcohol, expose to the influence or subject to the effects of alcohol.

The gum will not penetrate any part which is still alcoholized. W. B. Carpenter, *Microsc.* 8 191

3† To reduce to an impalpable powder. Phillips, 1706, Johnson.

Also spelled *alcoholisize*.

alcoholometer (al'kō-hol-om'e-tēr), *n* [*< alcohol + Gr μέτρον, measure*]. An instrument for determining, by means of a graduated scale, the percentage, either by weight or by volume, of pure alcohol in a liquid. Sometimes contracted to *alcoholmeter* and *alcometer*. **alcoholometrical** (al'kō-hol-ō-met'ri-kal), *a*. Relating to the alcoholometer or to alcoholometry, as, *alcoholometrical tables*. Sometimes contracted to *alcometrical*.

alcoholometry (al'kō-hol-om'e-tī), *n* [*< alcoholometer*]. The process of estimating the percentage of pure or absolute alcohol in a spirituous liquid. Sometimes contracted to *alcometry*.

alcoholometer (al-kō-hom'e-tēr), *n*. See *alcoholometer*.

Alcoideæ (al-koi'de-o), *n pl* [NL, < *Alca* + *-ideæ*]. A superfamily of birds, composed of the *Alcidae* or auks and the *Urolophidae* or loons, and placed in the order *Columbiformes*.

alcoömeter (al-kō-om'e-tēr), *n*. See *alcoholometer*.

alcoömometrical (al'kō-ō-met'ri-kal), *a*. See *alcoholometrical*.

alcyon (al'si-on), *n* and *a* [L, < Gr *ἀλκυών*, the kingfisher, also written erroneously *ἀλκυών*, > I. *halcyon*, > E *halcyon*, the form now usual, see *halcyon*]. I. *n*. 1. An old or poetical name of the kingfisher. Commonly written *halcyon*. — 2 [cap.] A genus of kingfishers, same as *Halcyon*,

2—3. The specific name of the belted kingfisher of North America, *Ceryle alcyon*. — 4 A general name of the kingfishers of the genus *Halcyon* and others of the subfamily *Daceloninae*, the wood-alcyons, tree-alcyons, etc.

II. *a*. Same as *halcyon*.

Alcyonaria (al'si-ō-nā'ri-ā), *n pl* [NL, < *Alcyonium* + *-aria*]. An order of actinozoan corals, or, as some hold, a subclass of coralligenous *Actinozoa*, distinguished in this use from *Zoantharia*, the other subclass of *Actinozoa* (which contains the sea-anemones, etc.), by having minutely fringed instead of simple tentacles, arranged around the mouth like the rays of a starfish, whence the alternative name *Asteroida*. The tentacles of *Alcyonaria* are in one series of 8, instead of 6 or a multiple of 6, whence the alternative name *Octocorallia*, the sea anemones being known as *Hexacorallia*. For the same reason, the *Alcyonaria* are also termed *Octactinaria*. The corallum, when present, is external, spicular, or with a scleroblastic axis, but occasionally the cal or tubular. The polyps are connected by the mesosar, through which permeate prolongations of the body cavity of each, thus permitting a free circulation of fluids. There is some times an outer skeleton, either with or without a central scleroblastic axis. The corallum is rarely the cal, with a preventing trace of septa. (Pascoe.) The compound organisms are found only in deep water, and, except the sea pens, are fixed to some foreign body. The subclass or order is divided into several orders or suborders, of which are (a) the *Alcyonaceae*, or, having a leathery contractile ectoderm—a group including the so-

1 Sea fan (*Rhipidogorgia flabellum*), 2, Sea pen (*Pennatulid phosphorea*), 3, *Cornularia rigosa*.

called dead men's fingers, (b) the *Gorgonaceae*, or sea fans, which are branched, calcareous or horny corals, (c) the *Imbricaceae*, which are alternately calcareous and horny, (d) the *Tubiporaceae*, or organ pipe corals, which are tubular, and (e) the *Pennatulaceae*, or sea pens. See these words. Some species have the appearance of sponges, others resemble fans, feathers, stars, etc. Also called *Halcyonada*. **alcyonarian** (al'si-ō-nā'ri-an), *a* and *n* [*< Alcyonaria + -an*]. I. *a*. Relating or pertaining to the order or to a member of the order *Alcyonaria*. Equivalent terms are *halcyonoid* and *asteroidal*.

II. *n*. One of the *Alcyonaria* (which see).

Various forms of *alcyonarians*, a special group of corals, were found at considerable depths. Science, IV 171

Also written *halcyonarian*.

Alcyone (al-si-ō-nē), *n* [L, < Gr *Ἀλκυών*, in myth the daughter of Æolus and wife of Ceyx, a Thessalian king, she was changed into a kingfisher and her husband into a sea-bird. See *alcyon*]. 1. A greenish star of magnitude 3.0, the brightest of the Pleiades, η Tauri. See *cut under Pleiades*. — 2 In *ornith.*, a genus of kingfishers, of the family *Alcedinidae*, subfamily *Daceloninae*, related to the genus *Ceryx*, both being distinguished by the rudimentary condition of the inner front toe. Also written *Halcyone*. **Alcyonella** (al'si-ō-nel'ā), *n* [NL, as *Alcyonellum* + dim *-ella*]. A genus of fresh-water *Polysa*, or so-called aseridian zoöphytes, related to *Plumatella*, *Federella*, and *Cristatella*, of the family *Plumatellidae*. A stagnorum is of a greenish black color, and is found in stagnant water. The species were formerly regarded as plants. Also written *Halcyonella*.

Alcyoniaceæ (al'si-on-i-ā'sē-ē), *n pl* [NL, < *Alcyonium* + *-acea*]. An order of *Alcyonaria* (which see) considered as a subclass. It is characterized by having a leathery contractile ectoderm with calcareous spicules, but no scleroblastic axis. The polypary is attached to some foreign object and bears some resemblance to a sponge. The order consists of the families *Alcyonidae* and *Cornulariidae*, to which some authorities add *Teleastidae*. See *Alcyonidae*. Also written *Halcyonaceæ*.

alcyonic (al-si-on'ik), *a* [*< Alcyonium + -ic*]. Pertaining to the *Alcyonidae*. Also written *halcyonic*.

Alcyonididae (al'si-on-i-di'i-dē), *n pl* [NL, < *Alcyonidium* + *-idae*]. A family of *Polysa*, or so-called aseridian zoöphytes, belonging to the infundibulate order (*Gymnolermata*) of that class, the mouth having no epistome. The family forms with the *Venulariidae* a group or suborder which

has been called *Ctenomata*, the cell opening being closed with marginal warts, and there being no vitreous and no avicularia. *Alcyonium* is the leading or only genus. Also written *Alcyonada*, *Alcyonidae*, and *Alcyonididae*, not to be confounded with *Alcyonidae*.

Alcyonidium (al'si-ō-nid'i-um), *n* [NL, as *Alcyonium* + *-um*, dim *-idium*, < Gr *-idon*] A genus of *Polyspongia*, of the family *Alcyonididae*. A glutinous mass, one of the species is called ragged staff or mermaid's glove, and was formerly regarded as a plant. Also written *Halcyonidium*.

Alcyonididae (al'si-ō-ni'i-dē), *n* pl [NL, < *Alcyonium* + *-ida*] A family of alcyonarian polyps, of the order *Alcyonacea*. The leading genus is *Alcyonium* (which see). Representatives of the family are found in all seas and at various depths, some are called cork polyps. Also written *Alcyonidae* and *Halcyonidae*, not to be confounded with *Alcyonididae*.

alcyonite (al'si-ō-nit), *n* [*< Alcyonium* + *-ite*²] A fossil of or like the genus *Alcyonium*, one of the sponge-like fossils common in the chalk formation. Also written *halcyonite*.

Alcyonium (al'si-ō-ni-um), *n* [NL, < L *alcyonium*, also *alcyonum*, < Gr *αλκυών*, also *αλκυόνιον*, barnard sponge, a zoophyte, so called from its resemblance to the nest of the *αλκυών*, halcyon (see *alcyon*)] The leading genus of polyps of the family *Alcyonidae* (which see). A *dontatum*, the so-called dead man's fingers, dead man's toes, and cow's pups, is a common British species. It is a lobed, spongy looking body, pellucid when distended with water and covered with minute apertures for the polyps (*Pores*). *A. glomeratum* is another species. The name of the genus is synonymous with *Lobularia*. Also written *Halcyonium*.

alcyonoid (al'si-ō-noid), *n* [*< Alcyonium* + *-oid*] A member of the family *Alcyonidae* or of the order *Alcyonacea*. Also written *halcyonoid*.

aldehyde (al'dē-hīd), *n* [*< al* (alcohol) + NL *dehyd* (dehydratus), deprived of hydrogen, < L *de*, from, expressing deprivation, + *hydrogen*] 1 A transparent colorless liquid, (CH₃)₂CHOH, of pungent suffocating odor, produced by the oxidation of ordinary alcohol. When exposed to the air or to oxygen it is converted into acetic acid. Distinctly called *acetic aldehyde* and *ethanal*.

2. The general name of a class of compounds intermediate between alcohols and acids, derived from their corresponding primary alcohols by the oxidation and removal of two atoms of hydrogen, and converted into acids by the addition of an atom of oxygen. **Aldehyde resin**, a resinous body formed by heating aldehyde with potash in alcoholic solution. It is a bright orange colored powder, sparingly soluble in water, but readily soluble in alcohol.

aldehydic (al'dē-hī-dik), *a* Of, pertaining to, or containing aldehyde.

The common alder of Europe is *Alnus glutinosa*. In the eastern United States the common species are the smooth alder, *A. serrulata* and the speckled alder, *A. incana*. Both are also known as black alder. These are usually tall shrubs, rarely small trees. The alders of the Pacific coast *A. rhombifolia* and *A. rubra*, frequently grow to trees of medium size. The bark of the alder has been used in several parts of the world as one of the materials for dyeing black along with copperas or iron liquor, and also in obtaining other colors, as brownish yellow or orange. See *Alnus*.

2 A name of species of other widely different genera, from their resemblance to true alders. The black or berry bearing alder of Europe is the alder buckthorn *Rhamnus Frangula*. In southern Africa the name red alder is given to the *Cananora Capensis*, and white alder to *Platyphloeus trifolius* both saxifragaceous shrubs. In North America the *Ilex verticillata* is some-

times called black alder, the *Rhamnus alnifolia* dwarf alder, and the *Clethra alnifolia* white alder.

In the Anglo-Saxon period of English history, a title meaning at first simply chieftain or lord, but later used specifically to denote the chief magistrate of a county or group of counties. The office was both civil and military, and was tending to become a great hereditary benefice when it was replaced, under a name, by the earldom. After this the name was applied to any head man, as the head man of a guild.

If the earlier kingdoms were restored, the place of the king in each was taken by an *ealdorman*, who however independent and powerful he might be, was still named by the West Saxon sovereign, and could be deposed by that ruler and the national Witan.

J. R. Green, Conq. of Eng., p. 248

The *ealdormen* were nobles by birth, and generally the leaders in war. *Stille*, Stud. Med. Hist., p. 201

Hence—2 In modern usage, a magistrate of a city or borough, next in rank to the mayor. In England and Ireland, besides being a member of the common council, which manages the affairs of the municipality, he is vested with the powers of a police judge. The corresponding title in Scotland is *baillie*. Aldermen are usually chosen for three years but the twenty six aldermen of London are chosen for life. In most of the United States there is in each city an elected board of aldermen representing wards who constitute the municipal assembly or the upper branch of it where it consists of two bodies, and usually also possess some judicial powers. In Pennsylvania cities the title alderman is given to an officer having duties equivalent to those of a justice of the peace elsewhere.

3 In England, a half-crown, a meaning explained by Brewer as containing an allusion to the fact that an alderman is a sort of half-king [Slang]—4. A turkey. Alectoromorpha (a-lek'tō-rō-mōrf'fē), *n.* pl. [NL, < Gr *ἀλεκτωρ*, a cock, + *μορφή*, form] In Huxley's classification of birds, the fifth superfamily of the suborder *Schizognathae*, of the order *Carnivora*. It includes the families *Tyrannidae*, *Phasianidae*, *Pteroclididae*, *Megapodidae*, and *Cracidae*, or the fowls and fowl-like birds, and therefore corresponds to the old order *Gallinae* or *Ravines*, exclusive of the pigeons and tinamous. Since 1867, when the term was proposed, a stricter signification has been attached to it by exclusion of the *Tyrannidae* and *Pteroclididae*. In the restricted sense, it is divided into the two groups of *Alectoropodae* and *Peristeropodae*, the former containing the fowls proper (old family *Phasianidae*, etc.), the latter the mound birds (*Megapodidae*) and curassows (*Cracidae*).

alectoromorphous (a-lek'tō-rō-mōrf'fus), *a.* Having the character of or pertaining to the *Alectoromorpha*, gallinaceous or ratorial, in a strict sense.

Alectoropodes (a-lek-tō-rop'ō-dēr), *n.* pl. [NL, < Gr *ἀλεκτωρ*, a cock, + *πους*, pl. *πόδες*, = *E foot*] A subdivision of Huxley's superfamily *Alectoromorpha*, containing the true fowl and related to the domestic hen, as pheasants, turkeys, guinea-fowl, grouse, partridges, quail, etc. distinguished from those gallinaceous birds, as the *Megapodidae* and *Cracidae*, which have the feet more as in pigeons, and are therefore called *Peristeropodes*. See cuts under *Cupidonia*, *grouse*, *partridge*, and *quail*.

alectoropodous (a-lek-tō-rop'ō-dus), *a.* Having the character of or pertaining to the *Alectoropodes*.

The suborders [of *Alectoromorpha*] are called respectively the *Alectoropodous* and the *Peristeropodous*. *Stand Nat Hist*, IV, 197.

Alectrurus (a-lek-trō-rī'nē), *n.* pl. [NL, < *Alecturus* + -ina¹] A subfamily of clamatorial passerine birds, of the family *Tyrannidae*, an inexact synonym of *Fluvicolinae* and of *Tanymyrtinae*. See these words, and *Alecturus*.

Alexanders (al-eg-zan'dérz), *n.* [Also written *alsander*, *alsander*, *alsander*, *< ME alsau-dre*, *< OF alsau-dre*, *alsandra*, but in AS *alexandrie*, *alexandre*, from the ML name *Petroselinum Alexandrinum*, 1 *e*, Alexandrine parsley, equiv to *P. Macedonicum*, 1 *e*, Macedonian parsley] 1 The English name of an umbelliferous plant, *Smyrnum Olusatrum*. Of all the umbellifers used as vegetables, this was one of the commonest in gardens for nearly fifteen centuries, but it is now abandoned. The history of its use can be traced from beginning to end. Theophrastus mentions it as a medicinal plant, under the name *hypocistion* (horse parsley), but three centuries later Dioscorides says that either the root or the leaves might be eaten, which implies cultivation in Latin (Pliny, Columella, etc.) It was called *holus atrum*, later *olusatrum*, and corruptly *alsatrum*. Charlemagne commanded it to be sown in his farms. The Italians made great use of it, under the name *maerone*. At the end of the eighteenth century the tradition existed in England that it had been formerly cultivated, later English and French horticulturists do not mention it. *De Candolle*

2 In North America, a name sometimes given to the plant *Thapsium aureum*.

Alexandrian (al-eg-zan'dri-an), *a.* [*< L. Alexandria*, classical form *Alexandrea*, *< Gr. Ἀλεξάνδρεια*, name of the Egyptian city founded by Alexander the Great, *< Ἀλεξάνδρος*, *L. Alexander*, a man's name, prop adj, 'defending men,' *< ἀλέξω*, ward off, defend, + *άνθρωπος* (άνθρωπος), man]

Alexandrian Codex (*Codex Alexandrinus*), an important manuscript of the Scriptures, sent to Charles I of England by the Patriarch of Constantinople, now in the British Museum. It is written in Greek uncials on parchment, and contains the Septuagint version of the Old Testament complete, except parts of the Psalms, and almost all the New Testament. It is assigned to the fifth century.

Alexandrian Library, a celebrated library at Alexandria in Egypt, founded by Ptolemy Soter and Ptolemy Philadelphus (323-247 B. C.), and destroyed about 47 A. C.

A second or supplementary library in the Serapeum at Alexandria was entirely destroyed by a mob of fanatics under the Patriarch Theophilus A. D. 891, a popular account, however, assigns its destruction to the Arabs in 641 — **Alexandrian school.** (a) A school of literature, science, and philosophy flourishing at Alexandria under the Ptolemies during the three centuries preceding the Christian era, and continuing under the Roman empire, especially as a philosophical school in which Neoplatonism was the most important element, down to the final extinction of paganism in the fifth century after Christ (b) A school of Christian philosophy and theology at Alexandria during the first five centuries, especially, the catechetical school of Alexandria, existing in that city from the earliest times of Christianity down to about A. D. 400, for the purpose of instruction in the Christian faith, and distinguished for the high attainments of its instructors in pagan as well as in Christian philosophy and literature. Among its most famous directors were St. Clement and Origen. This school was remarkable for its attempt to accommodate Greek philosophy to Christianity and to make use of it in Christian teaching, thus antagonizing Judaizing views, according to which there was and could be nothing in common between the two. In some of its forms it tended on the one extreme to a philosophic rationalism, on the other to an idealizing mysticism. Alexandria continued to be the most important center of Christian theology down to the time of the Council of Chalcedon, A. D. 451.

Alexandrianism (al-eg-zan'dri-an-izm), *n.* The teachings of the Alexandrian school of theology, especially in its distinctive characteristics. See *Alexandrian*. Also written *Alexandrinism*.

II n 1 A foreigner, one born in or belonging to another country who has not acquired citizenship by naturalization; one who is not a denizen, or entitled to the privileges of a citizen. In France a child born of residents who are not citizens is an alien. In the United States, as in Great Britain, children born and remaining within the country, though born of alien parents, are, according to the better opinion, natural born citizens or subjects, and the children of (illegitimate) subjects, though born in other countries, are generally deemed natural born citizens or subjects, and if they become resident are entitled to the privileges of natural citizens, but they also may, when of full age, make declaration of allegiance. See *citizen*

When the Roman jurists applied their experience of Roman citizens to dealings between citizens and *aliens*, showing by the difference of their actions that they regarded the circumstances as essentially different they laid the foundations of that great structure which has guided the social progress of Europe

Alien Act (a) See *alien and sedition laws*, below. (b) An English statute of 1830 (3 and 7 Wm IV c 11) providing for the registration of aliens and one of 1844 (7 and 8 Vict c 66) allowing aliens from friendly nations to hold real and personal property for purposes of residence, and resident aliens to become naturalized. (c) An English statute of 1847 (10 and 11 Vict c 83) concerning naturalization.

Alien and sedition laws, a series of laws adopted by the United States government in 1798, during a controversy with France in regard to which the country was violently agitated. They included three alien acts, the second and most famous of which (1 Stat 570) conferred power on the President to order out of the country such aliens as he might reasonably suspect of secret machinations against the government or judge dangerous to its peace. It expired by limitation in two years. The sedition law was a stringent act against seditious conspiracy and libel chiefly aimed at obstructive opposition to the proceedings of government and libelous or seditious publications in regard to them. These laws had little effect besides that of overthrowing the Federal party, which was held responsible for them.

The *alinasal turbinal* of [the Yunx] has two turns, and that of *Geolus* one. *Fuyc* *Brit.* III 717

II. *n* A lateral cartilage of the nasal region of the skull of an embryonic bird, in which is situated the external nostril. *W A Parker*

alinea¹ (a-lin'), *prep* *phr* as *adv* [*a*³, *in*, + *line*²] In a straight line

Take thine a rule and draw a strike — *eune alyne* from the pyn unto the middel pikke. *Chaucer* *Astrolabe*, II § 38

aline² (a-lin'), *v* *t*, *pret* and *pp* *alined*, *ppr* *alining* [Also spelled *alline*, < ML as if **allineare* < L *ad*, to, + *lineare*, reduce to a straight line, ML draw a straight line, < *linea*, a line. The reg. E form is *align*, but *align*, after *F* *aligner*, is common.] To adjust to a line, lay out or regulate by a line, form in line, as troops. Equivalent forms are *align*, *alline*.

alineate (a-lin'-e-at), *v* *t*, *pret* and *pp* *alineated*, *ppr* *alineating* [Also spelled *allineate*, < ML as if **allineatus*, *pp* of **allineare* see *align*².] Same as *align*².

The intended base line must be *allineated* by placing a telescope a little beyond one of its proposed extremities, so as to command the line both.

Sir J. Herschel, *Pop. Lectures*, p. 184

alination (a-lin-o-a'-shon), *n* [Also spelled *allination*, < ML as if **allinatio(n)*], the drawing of a line, < **allineare* see *align*².] The act of bringing into line, a method of determining the position of a remote and not easily discernible object, by running an imaginary line through more easily recognizable intermediate objects, as the passing of a straight line through the pointers of the Great Bear to the pole-star.

alignment (a-lin'-ment), *n* [*a*³ *line*² + *-ment*, after *F* *alignement*, < ML *alincamentum*, **allincamentum*, < **allineare* see *align*².] 1 The act of aligning, the act of laying out or regulating by a line, an adjusting to a line — 2 The state of being so adjusted, the line of adjustment, especially, in *milit*, the state of being in line as, the *alignment* of a battalion; the *alignment* of a camp — 3 In *engin* (a) The ground-plan of a railway or other road, in distinction from the gradients or profile. (b) The ground-plan of a fort or field-work.

Also written *allincement*, *alignement*, *alignement*, *alignment*.

aliner (a-li'-ner), *n* One who alines or adjusts to a line. *Forlynn*

aliped (al'i-ped), *a* and *n* [*a*³ *L* *alipes* (-ped-), wing-footed, swift, < *ala*, wing, + *pes* (-ped-) = *E* *foot* see *pedal* and *foot*.] I. *a* 1 Wing-footed, having the toes connected by a membrane which serves as a wing, as the bats — 2 *n* Swift of foot.

II. *n* An animal whose toes are connected by a membrane serving for a wing, a chiropter, as the bat.

aliquant (al'i-kwant), *a* [*a*³ *L* *aliquantus*, some, somewhat, moderate, considerable, < *alius*, other (see *alien*), + *quantus*, how great see *quantity*]. Contained in another, but not dividing it evenly applied to a number which does not measure another without a remainder, thus, 5 is an *aliquant* part of 16, for 3 times 5 are 15, leaving a remainder 1.

aliquot (al'i-kwot), *a* and *n* [*a*³ *L* *aliquot*, some, several, a few, < *alius*, other, + *quot*, how many see *quotient*.] I. *a* Forming an exact measure of something applied to a part of a number or quantity which will measure it without a remainder, thus, 5 is an *aliquot* part of 15.

II. *n* That which forms an exact measure, an aliquot part, as, 4 is an *aliquot* of 12.

aliscander (al-i-san'-der), *n* An old form of *alexanders*.

alisseptal (al-i-sep'-tal), *a* and *n* [*a*³ *L* *ala*, wing, + *septum*, septum, septum.] I. *a* Appellative of a cartilage which forms a partition in the lateral part of the nasal passage of the skull of an embryonic bird, pertaining to or connected with this cartilage.

Behind the alinasal comes the *alisseptal* region. *W K Parker*

II. *n* The alisseptal cartilage.

alish (ā'lish), *a* [*a*³ *ale* + *-ish*¹] Like ale, having some quality of ale as, "the sweet *alish* taste [of yeast]," *Montmer*, *Husbandry*.

Alisma (a-li-'mh), *n* [*a*³ *L* *Alisma*, plantain.] A small genus of aquatic plants, natural order *Alismaceae*. The common water-plantain,

A. Plantago, is the principal species. See *water-plantain*.

Alismaceae (al-iz-mā'sē-ē), *n* *pl.* [*a*³ *Alisma* + *-aceae*] An endogenous order of aquatic or marsh herbs, mostly natives of the northern temperate zone. Apart from a few species of *Alisma* and *Sagittaria* furnishing edible tubers, the order is of little importance.

alismaceous (al-iz-mā'shius), *a* In *bot*, relating or belonging to the *Alismaceae*.

There is a third species of the new *Alismaceae* genus *Welancra*, hitherto known in India and Central Africa. *Journal of Botany, Brit and For*, 1883, p. 160

alismad (a-li-'mad), *n* [*a*³ *Alisma* + *-ad*¹] In *bot*, one of the *Alismaceae*.

alismal (a-li-'mal), *a* Relating or pertaining to the genus *Alisma* (which see).

alismoid (a-li-'moid), *a* [*a*³ *Alisma* + *-oid*¹] In *bot*, resembling an *alismad*, like plants of the genus *Alisma*.

alison, *n* See *alysson*.

alispheonoid (al-i-sfē-'noid), *a* and *n*. [*a*³ *L* *ala*, wing, + *sphenoid*, *q* v.] I. *a* Of or pertaining to the greater wing of the sphenoid bone — **Alispheonoid canal**, an osseous canal through which the external carotid artery runs for some distance at the base of the skull of the dog and sundry other carnivorous quadrupeds.

II. *n* One of the bones of the skull, forming by fusion with other cranial bones, in adult life, a great part of the compound sphenoid bone. In man the alispheonoid is the greater wing of the sphenoid minus the so called internal pterygoid process. See cuts under *Crocodylia* and *skull*.

alispheonoidal (al-i-sfē-'noid-al), *a*. [*a*³ *alispheonoid* + *-al*¹] Same as *alispheonoid*.

alisson, *n* See *alysson*.

alist (a-list'), *prep* *phr* as *adv* or *a* [*a*³ + *list*, inclination.] *Naut*, listed, or canted over to one side; inclined.

alitruk (al-i-'trungk), *n* [*a*³ *L* *ala*, wing, + *truncus*, trunk.] The segment of the posterior thorax of an insect to which the wings and two posterior pairs of legs are attached.

-ality [*a*³ *-al* + *-ity*¹] A compound suffix of Latin origin, also in reduced form *-alty*, as in *reality*, *reality*, *legality*, *loyalty*, etc. See *-al* and *-ity*, *-ty*.

aliunde (ā-li-un-'dē), *adv* [*L*, from another place, < *alius*, other, + *unde*, whence.] From another place. Evidence *aliunde*, evidence from another source as from without a will, to explain some ambiguity in it.

alive (a-liv'), *prep* *phr* as *a* or *adv* [Early mod. *E* also *alv*, on *lyce*, on *lyfe*, < ME *alve*, *alv*, *o* *live*, earlier on *live*, on *lyfe*, < AS *on lyfe*, in life *on*, in *lyfe*, dat *case* of *lyf*, life see *a*³ and *lyfe*. Hence abbrev. *lv*, *a*.] 1 In life, living, in the state in which the organs of the body perform their functions, opposed to *dead* as, the man is *alive*.

Nor well *aliv*, nor wholly dead they were,
But some faint signs of feeble life appear.
Druid, *Pal* and *Arc*, I. 161

2 In a state of action, in force or operation, unextinguished, undestroyed, unexpired as, keep the suit *alive*.

Sweet Liberty inspires
And keeps *alive* his fierce but noble fire.
Cowper *Table Talk*

3 Full of alacrity, active, sprightly, lively as, the company were all *alive* — 4 Enlivened, animated, strongly aroused.

This perpetual intercommunication keeps us all

alizari (al-i-zā'ri), *n*. [*F*, *Sp.*, etc.; also called *izari*, *azala*, prob. < Ar *al*, the, + *'aqarah*, juice pressed out, extract, < *'aqara*, press out, extract.] The commercial name of madder in the Levant.

alizaric (al-i-zar'ik), *a* In *chem*, of or pertaining to alizari, or madder. as, *alizaric acid*.

alizarin (al-i-zā'rin), *n*. [*F* *alizarine*, < *alizari* see *alizari*.] A peculiar red coloring matter (C₁₄H₈O₄) formerly obtained from madder, and extensively used as a dyestuff. It was discovered in 1824 by Robiquet and Collin, who obtained it by digesting madder root with alcohol and treating this with sulphuric acid, thus producing a black mass which they called *charbon de garance*. On heating, this yielded a sublimate of alizarin in long, brilliant, red, needle shaped crystals. It is now artificially prepared on a large scale from anthracene (C₁₄H₁₀), a product of the distillation of coal tar. It forms yellowish red crystals insoluble in water, difficultly soluble in alcohol, but readily soluble in alkalis, giving to the solution a purplish red color and beautiful fluorescence. It has acid properties and unites with bases — **Alizarin red**. See *red*, *n*.

alk¹ (alk), *n* [*E* dial, = *E* *auk*, < Icel *álka* = Sw *alka* = Dan *alk*, *auk*.] A provincial English name for the razor-billed auk, *Alca* or *Uria lomvia* *torda* *Montagu*. See *Alca*, *Alcedo*, and *auk*.

alk² (alk), *n* [*a*³ *Ar* 'ulk.] A resin obtained in northern Africa from the terebinth-tree, *Pistacia Terebinthus*. The best in quality is obtained from the terebinth, but in Arabia it is also derived from the *senauer* (juniper), the *arzel* (cedar), the *psatq* or *plataio* tree (*Pistacia vera*), the *arzu* (cypress), and the *genabul*. In liquid form it is the *Chio turpentine* of commerce.

alkahest (al'ka-hest), *n* [*F* *alkahest*, a word of Arabic appearance, but not traceable to that language, supposed to have been invented by Paracelsus in imitation of other alchemical terms.] The pretended universal solvent or menstruum of the alchemists. Also spelled *alcahest*.

alkahestic (al-ka-hes'tik), *a* Pertaining to the alkahest. Also spelled *alcahestic*.

alkahistical (al-ka-hes'ti-ka), *a* Same as *alkahestic*. Also spelled *alcahestical*.

alkalamide (al-ka-l'a-mid or -mid), *n* [*a*³ *alkal* + *-amide*¹] An amide which has resemblance to an amine, containing both acid and alcohol radicals. Also spelled *alkalmide*.

alkalescence (al-ka-les'-ens), *n* [*a*³ *alkalescent*.] The process of becoming alkaline, alkalescency.

alkalescency (al-ka-les'-on-si), *n* A tendency to become alkaline, the quality of being slightly alkaline, the state of a substance in which alkaline properties begin to be developed or to be predominant. *lvre*.

alkalescent (al-ka-les'-ont), *a* [*a*³ *alkal* + *-escent*¹] Becoming or tending to become alkaline.

alkali (al'ka-li or -li), *n*, *pl* *alkalis* or *alkalies* (-liz or -liz) [*a*³ ME. *alkaly*, *alkaly*, < OF *F* *alkali* = Pr *Sp* *Pg* *It* *alkali* = D *G* Sw *Dan* *alkali*, < Ar *al-qaliy*, < *al*, the, + *qaliy*, the ashes of saltwort and glasswort, which abound in soda, hence applied to the plant itself, < *qalay*, roast in a pan, fry.] 1 Originally, the soluble part of the ashes of plants, especially of seaweed, soda-ash. — 2 The plant saltwort, *Salsola kali*. Also called *kali*. — 3 Now, any one of various substances which have the following properties in common solubility in water, the power of neutralizing acids and forming salts with them, the property of combining with fats to form soaps; corrosive action on animal and vegetable tissue, the property of changing the tint of many vegetable coloring matters, as of litmus reddened by an acid to blue, or turmeric from yellow to brown. In its restricted and common sense the term is applied only to the hydrates of potassium, sodium, lithium, cesium, rubidium, and ammonium. In a more general sense it is applied to the hydrates of metals of the alkaline earths, barium, strontium, calcium, and magnesium, and to a large number of organic substances, both natural and artificial, described under *alkaloid*. Alkalies unite with saponifiable oils to form soap.

Sometimes spelled *alkali*.

Fixed alkalis, potash, soda, and lithia, in contradistinction to *ammonia*, which is called *volatile alkali*. See *ammonia*.

alkaliferous (al-ka-lif'-e-rus), *a* [*a*³ *alkali* + *-ferous*¹] Containing or producing alkalis, alkaline as, *alkaliferous* clays.

alkalifiable (al'ka-li-fi'-a-bl), *a* [*a*³ *alkalify* + *-able*¹] Capable of being alkalinized or converted into an alkali.

alkalify (al'ka-li-fi), *v*; *pret* and *pp* *alkalified*, *ppr* *alkalifying* [*a*³ *alkali* + *-fy*¹] I. *trans*. To form or convert into an alkali, alkalinize.

II. *intrans*. To become an alkali.

alkaligen (al'ka-li-jen), *n.* [**< alkali + -gen, = F. *alcaligène*] The name first proposed for nitrogen, as being a chief constituent of ammonia or volatile alkali. *N E D***

alkaligenous (al-ka-li-jen-us), *a* [**< alkali + -genous** see *-genous*] Producing or generating alkali

alkali-grass (al'ka-li-grās), *n* A name given to several species of grass growing in alkaline localities in the western portions of the United States, especially to *Dactylis maritima*

alkalimeter (al-ka-lim'e-tēr), *n.* [**< alkali + Gr μέτρον, measure**] An instrument used for ascertaining the strength of alkalis, or the quantity of alkali in caustic potash and soda. This is done by determining what quantity of dilute sulphuric acid of a known strength can be neutralized by a given weight of the alkali or of caustic potash or soda. Sometimes spelled *alcalimeter*

There are several forms of *alkalimeter*, but which ever of them is employed the process is the same. *Ure, Dict., I 74*

alkalimetric (al'ka-li-met'rik), *a.* [**< alkali + Gr μετρικός** Cf *alkalimeter*] Relating to alkalimetry. Sometimes spelled *alcalimetric*

alkalimetrically (al'ka-li-met'ri-kal-i), *adv* Same as *alkalimetric*

It is advisable, when *alkalimetric* assays have frequently to be made, to keep a stock of test acid. *Ure, Dict., I 75*

alkalimetrically (al'ka-li-met'ri-kal-i), *adv* As in alkalimetry, by means of an alkalimeter. Sometimes spelled *alcalimetrically*

The time in this process is estimated *alkalimetrically* by means of an acid. *Ure, Dict., III 927*

alkalimetry (al-ka-lim'e-tri), *n* [**< alkali + Gr μέτρον**] The process of determining the strength of an alkaline mixture or liquid. This may be done by volumetric analysis, that is, by estimating the amount of a standard acid solution which the alkaline mixture will saturate, or by gravimetric analysis, that is, by decomposing the substance and finding the weight of the alkali contained in it. Sometimes spelled *alcalimetry*

The principle on which *alkalimetry* is based consists in determining the amount of acid which a known weight of alkali can saturate or neutralize. *Ure, Dict., I 74*

alkalimide, *n* See *alkalamide*

alkaline (al'ka-lin or -lin), *a* [**< alkali + -ine**, = *F. *alcalin**] Pertaining to alkali, having the properties of an alkali. **Alkaline development**, in photog., the development of an exposed plate by a bath compounded with an alkali, such as ammonia. See *development*. —**Alkaline earths**, lime, magnesia, baryta, and strontia. See *alkali*

alkalinity (al-ka-lin'i-ti), *n* [**< alkaline + -ity**] The state of being alkaline; the quality which constitutes an alkali

alkalinize (al'ka-lin-iz), *v t*, pret and pp *alkalinized*, ppr *alkalinizing* [**< alkaline + -ize**] To render alkaline. *N E D*

alkalious (al-kā'li-us), *a* [**< alkali + -ous**] Having the properties of an alkali. Formerly spelled *alcalious*. [Rare]

alkalisable, *alkalizable*, etc See *alkalizable*, etc

alkali-stiff (al'ka-li-stif), *n* A stiffening matter much used in the manufacture of inferior hats. It is made of 9 pounds of shellac, dissolved with 18 ounces of sal soda in 3 gallons of water. *J Thom mon, Hats and Helling*

alkalizable (al'ka-li-za-bl), *a* [**< alkali + -able**] Capable of being alkalinized. Sometimes spelled *alcalizable*, *alkalizable*

alkalinate (al'ka-li-zāt), *v t*, pret and pp *alkalinized*, ppr *alkalinizing* [**< alkali + -ate**] To make alkaline. See *alkalize*. Also spelled *alcalinate*, *alkalitate*

alkalization (al'ka-li-zā'shon), *n* [**< alkali + -ize**] The act or process of rendering alkaline by impregnating with an alkali. Also spelled *alcalization*, *alkalsation*

alkalize (al'ka-liz), *v t*, pret and pp *alkalized*, ppr *alkalizing* [**< alkali + -ize**] To change into an alkali; communicate the properties of an alkali to; alkaliify. Also spelled *alkalise*

alkaloid (al'ka-loid), *n* and *a.* [**< alkali + -oid**] *I. n.* A body resembling an alkali in properties, one of a class of nitrogenous compounds which occur in plants in combination with organic acids, and are sometimes called the organic bases of plants, as morphine, nicotine, quinine, etc. They are intensely bitter, turn reddened litmus blue, are slightly soluble in water but readily soluble in alcohol, and have active medicinal or poisonous properties. Compounds having the general reactions and properties of alkaloids (ptomaines) are found in decaying animal matters, being products of the decomposition of the tissues

II. a. Relating to or containing alkali.

alkaloidal (al-ka-loi'dal), *a.* [**< alkaloid + -al**] Pertaining to the alkaloids, having the nature of an alkaloid

alkanet (al'ka-net), *n* [**< ME *alkanet*, < Sp *alcane*** (early mod E. also *orcanet*, *orcanet*, *orcanet*, < OF *orcanette*, *orcanette*, mod F *orcanète*, < Sp *orcaneta*, var of *alcane*), dim of *alcane*, *alcatha*, henna see *alcanna* and *henna*]

1 The root of a boraginaceous herb, *Alkanna* (*Anchusa*) *tinctoria*, yielding a red dye, for which the plant is cultivated in central and southern Europe. It is used in dyeing staining wood coloring adulterated wine, and in pharmacy to give a red color to salves, etc. It produces brilliant violet and gray colors with alum and iron mordants on linen, cotton, and silk but not on wool

2 The plant which yields the dye, *Alkanna* *tinctoria*. Also called *orcanet* and *Spanish bugloss*. — 3. A name of similar plants of other genera. The common alkanet of England is *Anchusa officinalis*, the evergreen alkanet, *A. sempervirens*, the bastard alkanet, *Lithospermum arvense*, and in America *L. canescens*

Alkanna (al-kan'a), *n* [See *alkanet*] A boraginaceous genus of perennial herbs, of about 40 species, natives of the Mediterranean region. It is distinguished from *Anchusa* (in which genus it was formerly included) mainly by the absence of appendages from the throat of the corolla. The principal species is *A. tinctoria*. See *alkanet*

alkarsin, **alkarsine** (al-kār'sin), *n* [**< alt (o-hol) + ars (me) + -in**] so called because it was at first considered to be an alkali in which oxygen was replaced by arsenic. A heavy, brown, fuming, and extremely poisonous liquid containing cacodyl and its oxidation products formerly known as *Cadet's fuming liquid*. It is characterized by an insupportable smell and by spontaneous ignition on exposure to the air. It has been proposed to use it in warfare to charge shells whose explosion would set a ship on fire and destroy the crew by the poisonous vapor. Also spelled *alkarsin*

alkekengi (al-ke-ken'i), *n* [Early mod E. also *alkeengi*, etc., < ME *alkekengi*, = *F. *alkekeng** = *It. *alkekengi** = *Sp. *alquequenge** = *Port. *alquequenge**, < ML *alkekengi*, < Ar *al-kān*, *al-kān*, < al, the, + Pers *kān*, a kind of resin from a tree growing in the mountains of Herat in Afghanistan.] The winter-cherry, a solanaceous plant, *Physalis Alkekengi*. The scarlet fruit, enclosed in a large red calyx, makes the plant very ornamental at the beginning of winter. It is also edible, and has a slightly acid taste

The whole quantity of, with reference to substance, extent, duration, amount, or degree with a noun in the singular, chiefly such nouns (proper names, names of substances, abstract nouns—any whole or any part regarded in itself as a whole) as from their meaning or particular use do not in such use admit of a plural as, *all Europe*, *all Homer*, *all flesh*, *all control*, *all history*

Quintano speaks an infinite deal of nothing, more than any man in *all Venice*. *Shak*, *M of V*, I 1

All hell shall stir for this. *Shak*, *Hen V*, v 1

No one will contend that all legislative power belongs to Congress all executive power to the President, or all judicial power to the courts of the United States. *D Webster, Speech, Senate, May 17, 1834*

2 The whole number of, with reference to individuals or particulars, taken collectively with a noun in the plural as, *all men*, *all nations*, *all metals*, *all hopes*, *all sciences*; *all days* [*All* in logic is the sign of a distributed term in an affirmative proposition as, *all men are mortal*. This use of *all*, in place of *every*, is a result of Boethius's use of *omnis* as a translation of the way of Aristotle]

All sins are in all men, but do not appear in each man. *He that hath one sin hath all*

Bushnell, Nat and the Supernat, p 388

3 Every chiefly with *kind*, *sort*, *manner*, and formerly with *thing*

Blessed are ye, when men shall revile you and shall say *all manner of evil against you falsely*. *Mat v 11*

4 Any, any whatever after a preposition or verb implying negation or exclusion as, beyond *all controversy*, out of *all question*, he was free from *all thought of danger*

Yes, without *all doubt*. *Shak*, *Hen VIII*, iv 1

5† Only; alone [Rare]

He was my son,
But I do wash his name out of my blood,
And thou art *all* my child.

Shak, *All's Well*, III 2

When joined to nouns accompanied by a definite (the definite article, a possessive or demonstrative pronoun, etc.), *all* precedes the latter whether with a singular or plural noun, or else follows the noun if it is plural, as, *all my labor*, *all his goods*, *all this time*, *all these things*, *all the men agreed to this*, or the men *all agreed to this*. In the phrases *all day*, *all night*, *all summer*, *all winter*, *all the year* *all the time*, etc., the noun is an adverbial accusative. In the first four the article is usually omitted

All the world's a stage
And all the men and women merely players.
Shak, *As you like it*, II 7

Sir, I will drink success to my friend, with *all* my heart.
Sherridan, *Duenna*, II 3

The clergyman walks from house to house *all day* *all* the year to give people the comfort of good talk.
Fine rom, (Lulu)

When joined to a personal or relative pronoun in the plural, *all* may precede, but now usually follows, the pronoun

All we like sheep have gone astray. *Isa* III 6

And *we all* do fade as a leaf. *Isa* XLIV 6

Be ye *all* of one mind. *1 Pet* III 8

That *they all* may be one. *John* XVII 21

The alternative construction is *all of us*, *all of them*, etc. (see II, 2), or the two constructions may stand together

We all of us complain of the shortness of time.
Addison, *Spectator*, No 94

The adjective *all* with a singular or plural noun, is often separated from its subject, especially by the verb *be* (expressed, or in the present participle often omitted), and, being thus apparently a part of the predicate, assumes a transitional position, and may equally well be regarded as an adverb, meaning *altogether*, *wholly*, as, the house was *all dark*, he was *all ears*, the poor horse was *all skin and bones*, the papers were *all in confusion*, it was *all a mis take*, it is *all gone*

He is *all* for fasting. *Burton*, *Anat of Mel*, p 245

She followed my poor father's body.

allantois (a-lan'tō-is), *n.* [NL, shorter form (appar. as sing. of assumed pl.) of *allantoides* see *allantoid*] A fetal appendage of most vertebrates, developing as a sac or diverticulum from the posterior portion of the intestinal cavity. It is one of the organs of the embryo of all amniotic vertebrates, or those which develop an amnion, but is wanting or is at most rudimentary in amphibians and fishes. In birds and reptiles it is large and performs a respiratory function, and in mammals contributes to form the umbilical cord and placenta. Its exterior primitively consists of mesoderm, its cavity receiving the secretion of the primordial kidneys (Wolffian bodies). So much of the sac as remains pervious within the body of the embryo becomes the urinary bladder, or, in some degree, a urinary passage. The umbilical arteries and veins course along the elongated stalk of the sac, which becomes the umbilical cord, and that part of these allantoin vessels within the body which does not remain pervious becomes the urachus and round ligament of the liver. The expanded extremity of the allantoin, in most mammals, unites with the chorion to form the placenta. In those vertebrates, as mammals, in which the umbilical vesicle has but a brief period of activity, the allantoin chiefly sustains the functions whereby the fetus is nourished by the blood of the mother, and has its own blood arterIALIZED. In parturition, so much of the allantoin as is outside the body of the fetus is cast off, the separation taking place at the navel. See cut under *amniotic*.

all-fired (ál'fírd'), a. [Said to be a euphemism for *hell-fired*, and hence defined as 'infernal,' but prob. to be taken at its face value < *all* + *fire* + *-ed*, all intensifying the merely rhetorical *fire*.] Tremendous, as, an all-fired noise, he was in an all-fired rage. [Colloq.]

all-fours (ál'fórz'), n. A game of cards played by from two to six persons with hands of six cards each, dealt from a full pack, the top one of the remaining cards being turned as the trump, and the cards ranking as in whist. It derives its name from the four chances of which it consists, for each of which a point is scored. These chances are the scoring of high, or the ace of trumps or next best trump out, of low or the ace of trumps or next lowest trump out, of jack, or the knave of trumps, of game, or tricks containing cards which will make the largest sum when added together, an ace being counted as four, a king as three, a queen as two, a jack as one and a ten spot as ten, the other cards not counting. The player who has all these is said to have all fours. Also called *old sledge*, *seven up*, and *high low jack*.

alliance (ál'háns), n. [*ME* *alliance*, *alliance*, < OF. *alliance*, < ML. *alligantia*, < *aligare* (OF. *alter*), ally, bind to see *ally*¹ and *-ance*.] 1. The state of being allied or connected, the relation between parties allied or connected. Spc. officially—(a) Marriage, or the relation or union brought about between families through marriage.

And great alliances but useless prove To one that counts himself from mighty love. *Dryden*, *Helon to Paris*, I, 55

(b) Connection by kindred. [Rare.]

For my father's sake, And for alliance sake. *Shak*, I Hen VI, II, 5

(c) Union between nations, contracted by compact, treaty, or league. Such alliance may be *defensive*, that is, an agreement to defend each other when attacked, or *offensive*, that is, an agreement to make a combined attack on another nation, or it may be both offensive and defensive.

An alliance was accordingly formed by Austria with England and Holland against France. *Fryer Brit.*, III, 120

(d) A joining of efforts or interests by persons, families, states, or organizations as, an alliance between church and state.

An intimate alliance was formed between the Arian kings and the Arian clergy. *Buckle*, *Civilization*, II, II

I ydgate had the conviction that the medical profession offered the most direct alliance between intellectual conquest and the social good. *George Eliot*, *Middlemarch*, I, 159

2 The compact or treaty which is the instrument of allying or confederating as, to draw up an alliance.—3 The aggregate of persons or parties allied.

Therefore, let our alliance be combin'd. *Shak*, J. C., IV, I

4 In *bot*, a grade intermediate between class and order: the equivalent in Lindley's classification of the more recent term *cohort*.—5 In *zool*, a natural group of related families, a subfamily or suborder. Arms of alliance, in *ke*, arms which are obtained through matrimonial alliances.—*Evangelical Alliance*. See *evangelical*.—*Holy Alliance*. See *holy*.—*Syn. Alliance*, *League*, *Confederacy*, *Coalition*, *relationship*, *allinity*, *combination*, *federation*, *copartnership*. The first four words have been used with out distinction to express the union or cooperation of two or more persons, organizations, or states. *Alliance* is the most general term. Often a *confederacy* and some times a *league* between states means a closer union than an *alliance*. *Alliance* is rarely used of a combination for war, but the other words are often so used. *Confederacy* having specifically such a meaning in law. *Alliance* alone is used of the union of families by marriage. *Coalition* is often used of the temporary cooperation of persons, parties, or states that are ordinarily opposed.

Alliances, at once offensive and defensive, have one of the usual and more important characteristics of confederations. *Woolsey*, *Introduct to Inter Law*, § 103.

We must resolve to incorporate into our plan those ingredients which may be considered as forming the characteristic difference between a league and a government, we must extend the authority of the union to the persons of the citizens—the only proper objects of government.

A Hamilton Federalist, No. 16.

I stood in the level

Of a full charged confederacy, and give thanks

To you that choked it. *Shak*, *Hen VIII*, 1. 2.

The utility of a confederacy, as well to suppress faction, and to guard the internal tranquillity of states, as to increase their external force and security, is in reality not a new idea. *A Hamilton Federalist*, No. 9.

The coalitions of nearly all Europe, which resisted and finally humbled the Grand Monarch, are among the most righteous examples of measures for preserving the balance of power which history records.

Woolsey, *Introduct to Inter Law*, § 44.

2 [*cap*] (NL) More specifically, a genus of large lizard-like or saurian reptiles, the type of the family *Alligatoridae*, order *Crocodylia*, formerly family *Crocodylidae*, order *Sauria*. See *Alligatoridae*, *Crocodylidae*. The type of the genus is *Alligator* or *A. mississippiensis* of the United States. The genus formerly included the cayman and the jacaré, which have been made types of the two genera *Caiman* and *Jacaré* (which see). A true American crocodile, *Crocodylus americanus*, long overlooked or confounded with the alligator, has lately been found in Florida and the West Indies. The alligators differ from the true crocodiles in having a shorter and flatter head, cavities or pits

in the upper jaw, into which the long teeth of the under jaw fit, and feet much less webbed. Their habits are less aquatic. They frequent swamps and marshes, and may be seen basking on the dry ground during the day in the heat of the sun. They are most active during the night. The largest of them attain the length of 17 or 18 feet. They live on fish, and sometimes catch hogs on the shore, or dogs which are swimming. In winter they burrow in the mud of swamps and marshes, lying torpid till spring. The female lays a great number of eggs, which are deposited in the sand, and left to be hatched by the heat of the sun. The alligators are distributed over tropical America, and some are old world, as the Chinese alligator, *A. sinensis*. Among

Alligator (*Alligator mississippiensis*)

the fossils of the south of England are remains of a true alligator *A. hantoniensis*, in the Tertiary beds of the Hampshire basin. Leather made from the skin of the alligator is widely used.

3 A local name of the little brown fence-lizard, *Sceloporus undulatus*, common in many parts of the United States.—*4* A machine for bringing the balls of iron from a puddling-furnace into compact form so that they can be handled, a squeezer.—*5* A peculiar form of rock-breaker.

alligator-apple (al'ī-gā-tor-ap'l), *n* The fruit of *Anona pulstris*, a West Indian tree.

alligator-fish (al'ī-gā-tor-fish), *n* *1* An agnoid fish, *Podotheus acipenserinus*, with a compressed tapering body, about 12 polygonal plates on the breast, 9 spines and 7 rays in the dorsal fins, gill-membranes united to the isthmus, and the lower jaw shutting within the upper. It is about a foot in length, and is common from Puget Sound northward.—*2* Any agnoid, a fish of the family *Agnoridae* (which see).

alligator-forceps (al'ī-gā-tor-for-sops), *n* A surgical forceps with short jaws, having teeth throughout their length, and one of them working by a double lever. It suggests an alligator.

alligatorid (al'ī-gā-tor'id), *n* One of the *Alligatoridae*. **Alligatoridae** (al'ī-gā-tor'id-ē), *n* *pl* (NL, *<* *Alligator* + *-ida*) A family of saurian reptiles, of the order *Crocodylia*, related to the family *Crocodylidae*, and with some authors forming only a subfamily (*Alligatorinae*) of the latter, by most naturalists now judged to be distinct. The typical genus of the family is *Alligator*; other genera are *Caiman* and *Jacaré* (which see). According to Huxley's

1 Skull of Alligator 2 Skull of American Crocodile
(Drawn from specimens in Am. Museum of Nat. Hist. New York.)

analysis the *Alligatoridae* have the head short and broad, the teeth very unequal, the first and fourth of the under jaw biting into pits in the upper jaw, the premaxillary suture straight or convex forward, the mandibular symphysis not extending beyond the fifth tooth, the splenial element not entering into it, and the cervical scutes distinct from the tergal. The *Crocodylidae* have the head longer, the teeth unequal, the first mandibular tooth biting into a fossa, the fourth into a groove, at the side of the upper jaw, the premaxillary suture straight or convex backward, the mandibular symphysis not extending beyond the eighth tooth, and not involving the splenial elements, the cervical scutes sometimes distinct from the tergal, some lines united with them. Most living *Alligatoridae* are confined to America. The *Crocodylidae* were supposed to be confined to the old world until the discovery of a true crocodile in America. In general appearance and economy the members of the two families are sufficiently similar to be confounded in popular language. Both families belong to the section of the order *Crocodylia* in which the nasal bones enter into the formation of the nasal aperture, the contrary being the case in the section which includes the Gangetic crocodile or gaviat, *Gavialis gangeticus*.

alligator-pear (al'ī-gā-tor-pār), *n* The fruit of the *Persea gratissima* of the West Indies, re-

The elongated tail of the animal is very characteristic, and has given rise to the popular name *alligator turtle*. *Stand Nat Hist*, III 452.

2 A similar fresh-water turtle, *Macrochelys lacertina*, of the family *Chelydridae*, with very long tail and neck. It is found in the United States from Florida to Texas, and up the Mississippi valley to Missouri, in muddy ponds, bayous, and laklets. It attains a weight of 50 or 60 pounds or more, is esteemed for the table, and is often seen in the markets of the country it inhabits.

Even the stereotyped similes of these fortunate alliterators (poets before Chaucer), like "weary as water in a well" or "glad as grass is of the rain," are new, like nature, at the thousandth repetition.

Lowell, *Study Windows*, p. 257.

alliteration (a-lit'e-rā'shon), *n* [= F *allitération*, ML *alliteratio* (*-n*), *<* **alliterare*, see *alliterate*, *v*] The repetition of the same letter or sound at the beginning of two or more words in close or immediate succession; the recurrence of the same initial sound in the first accented syllables of words, initial rime as, many men, many minds.

Apt alliteration is artful aid.

Churchill, *Prophecy of Famine*, l. 228.

Verse in which alliteration is essential, and other rime ornamental, is the prevailing form in Anglo Saxon, Icelandic, Old Saxon. Specimens are found in Old German. Alliteration in these languages even ran into prose.

F *March*, *A* *Gram*, § 506.

Though the word *alliteration* seems to have been invented by Pontanus in the fifteenth century, the Romans were certainly aware that the device was in use among themselves.

Trans Amer Philol Ass, XV 59.

Alliteration was a characteristic of old Teutonic poetry (Anglo Saxon and Middle English, Old Saxon, Icelandic, etc.), terminal rime, as a regular feature, being of later (Romance) introduction. The lines were divided into two sections the first having regularly two alliterating syllables, the second one, but by license or mere accident four or more alliterating syllables might occur, as in the last line of the extract from *Piers Plowman*. The alliterating syllable was always accented and was not necessarily initial, as written, it might follow an unaccented prefix, as *ar rays* in the extract. The vowels, being all

more or less open and easy of utterance, might alliterate with one another. In Churchill's line "Apt alliteration's artful aid," given above, the initial vowel-sounds are different (a, o or a, i, e), though spelled with the same letter. The following is an example of Middle English alliteration:

Hire robe was ful riche of red scarlet engreyned,
With ribanes of red gold and of rihe stones,
Hire arraye me rayashed such richesse saw I never,
I had wondre what she was and what cryf she were.
Piers Plowman (B), ll. 15

Chaucer's verse is cast on the Romance model with final rhyme, but he often uses alliteration as an additional ornament.

Ther schyveren schaftes upon scheeldes thikke,
He feelth thurgh the herte spon the pricke.
Up springen spores twenty foot on highte,
Out goon the swordes as the silver brighte.
The helmes to-hewen and to schrede
Out brest the blood, with sterne streames reede,
With mighty maye the bones thay to brest.
He thurgh the thikkeste of the throng gan threst (etc.)
Chaucer, Knight's Tale, l. 1747

Such alliteration is much affected by Spenser and his imitators, and occurs with more or less frequency in all modern poetry.

alliterative (a-lit'e-rā-tiv), *a* [*< alliterate + -ive*]. Pertaining to or consisting in alliteration, characterized by alliteration.

A few verses, like the pleasantly alliterative one in which he (Dryden) makes the spider, "from the silent ambush of his den," "feel far off the trembling of his thread," show that he was beginning to study the niceties of verse.

A pertaining to allodium or freehold, free of rent or service, held independently of a lord paramount opposed to *feudal*. In the United States all lands are deemed allodial in the owner of the fee, but subject in vertless, to the ultimate ownership or dominion of the state. In England there are no allodial lands, all being held of the crown.

The lands thus presented to these [Teutonic] warriors [as rewards for fidelity and courage] were called *allodial* that is their tenure involved no obligation of service whatever.
Stille, Stud Med Hist., p. 130

The allodial tenure, which is believed to have been originally the tenure of freemen, became in the Middle Ages the tenure of serfs.
Maine, Early Law and Custom, p. 341

In this view the similarity of *allodium* in form and sense to OHG *uodal* (= *ōdal*) = OS *ōdhl* = Icel *ōdhl*, a patrimonial estate, is accidental.] Freehold estate, land which is the absolute property of the owner, real estate held in absolute independence, without being subject to any rent, service, or acknowledgment to a superior. It is thus opposed to *feudal*. Some times used, in the Anglo-Saxon period, of land which was allodial and inheritable, even though held of a superior lord. Also written *allod*, *alod*.

The *allod* in some form or other is probably as old as the institution of individual landed property, and we may regard it as equivalent to or directly descended from the share which each man took in the appropriated portion of the domain of the group to which he belonged—tribe, joint family, village community, or manorial city.

Allotment certificate, or **letter of allotment**, a document issued to an applicant for shares in a company of public loan, announcing the number of shares allotted or assigned to such applicant and the amounts and due dates of the calls or different payments to be made on the same, etc. — **Allotment note**, or **allotment ticket**, a document signed by a seaman authorizing his employers to pay periodically a part of his wages while on a voyage to some other person, as to his wife or parents — **Allotment of goods**, in *com*, the division of a ship's cargo into several parts, which are to be purchased by different persons, each person a share being assigned by lot — **Allotment of land**, the assignment of portions of ground to claimants on the division and inclosure of commons and waste lands. **Allotment system**, a practice sometimes followed in England of dividing a field or fields into lots or garden plots to be let out to agricultural laborers and other cottagers for cultivation on their own account

allotriophagy (al-lot-ri-of'a-jī), *n* [= *F allotriophagie*, *< Gr ἄλλοτρίος*, belonging to another (see *allotrious*), + *φαγία*, *< φαγεῖν*, eat] In *pathol*, a depraved appetite for eating substances of a non-alimentary or noxious character, as in many anemic and hysterical persons. **allotrious** (al-lot'ri-us), *a* [*< Gr ἄλλοτρίος*, belonging to another, *< ἄλλος*, other see *allo-*] Belonging to another, alien — **Allotrious factor**, in *math*, in the algorithm of common measure of two algebraic expressions, the factor from which a remainder or quotient must be first found in order to make it an integral and tractable function

allotrope (al'o-trōp), *n* [*< Gr ἄλλότροπος*, in another manner see *allotropy*] One of the forms in which an element having the property of allotropy exists thus, the diamond is an *allotrope* of carbon

allotropic (al-o-trōp'ik), *a* Relating to or characterized by allotropy

Sulphur and phosphorus (both, in small proportions, essential constituents of organic matter) have *allotropic* modifications. *H. Spencer*, *Prin of Biol*, § 1

allotropical (al-o-trōp'ik-al), *a* Same as *allotropic*

allotropically (al-o-trōp'ik-al-i), *adv* In an allotropic manner, with change of physical properties, but without change of substance.

allotropicity (al'o-trōp'is'it-i), *n* [*< allotropic* + *-ity*] The quality or capacity of assuming different physical properties while remaining the same in substance. See *allotropy*

allotropism (al-lot'rō-pizm), *n* [As *allotropy* + *-ism*] Allotropic variation; allotropy.

Allotropism being interpretable as some change of molecular arrangement, this frequency of its occurrence among the components of organic matter is significant as implying a further kind of molecular mobility. *H. Spencer*, *Prin of Biol*, § 1

allotropize (al-lot'rō-piz), *v t*, pret and pp. *allotropized*, ppr *allotropizing* [As *allotropy* + *-ize*] To render allotropic

allotropy (al-lot'rō-pi), *n*. [= *F. allotropie*, *< Gr ἄλλοτροπία*, variety, *< ἄλλος*, other, + *τρόπος*, way, manner,

guise: see trope. The property which certain chemical elements have of existing in two or more distinct forms, each having certain characteristics peculiar to itself. The element carbon, for instance, exists nearly pure in three totally distinct forms—the diamond, graphite, and charcoal.

allotable (a-lot'-a-bl), *a.* [*< allot + -able.*] Capable of being allotted.

allottee (al-o-tē'), *n.* [*< allot + -ee.*] One to whom something is allotted, as a plot of ground, shares of stock, or the like.

The allotment of gardens, which yield a partial support to the allottee, is another means of cheap labor. *Mayhew*

allotter (a-lot'-er), *n.* One who allots or apportions. *N E D*

allottery (a-lot'-e-ri), *n.* [*< allot + -ery, after lottery, q v.*] Allotment; what is allotted or assigned to use.

Give me the poor allottery my father left me by testament. *Shak*, As you like it, I 1

all-over (âl-ô'-vèr), *n.* [See *all over*, under *all*, *adv*.] The trade-name of a gilt button washed or plated on both the upper and under sides, as distinguished from a *top*, which is plated or washed on the upper side only. *De Colange*

all-overish (âl-ô'-vèr-ish), *a.* [*< all over + -ish.*] Affecting the whole system, extending all over one as, an *all-overish* feeling of sickness. [Colloq.]

all-overishness (âl-ô'-vèr-ish-ness), *n.* A pervasive feeling of uneasiness produced by apprehension or indisposition, general discomfort, malaise. [Colloq.]

Our sense of *all overishness* when our friend approaches the edge of a precipice is clearly only a step or two removed from the apprehension of the actual representation of a fall. *Mind*, IX 421

= *Syn.* *Allow*, *Permit*, *Consent*, *Sanction*, *Suffer*, *Tolerate*. *Allow* and *permit* are often used synonymously, but *permit* strictly denotes a formal or implied assent, *allow*, the absence of an intent, or even only of an attempt, to

hinder. *Consent* is formally to permit that which one has the power and generally some disposition to prevent; it implies the assumption of responsibility for that which is thus allowed. *Sanction* has a secondary sense of permitting with expressed or implied approbation as, I can not *sanction* such a course. *Suffer* is still more passive or reluctant than *allow*, and may imply that one does not prevent something though it is contrary to one's feelings, judgment, or sense of right. *To tolerate* is to bear with something unpleasant as, I would not *tolerate* such impertinence. Many things are *tolerated*, or *suffered*, or even *allowed*, that are not *permitted*, and many are *permitted* that are not really *consented* to, much less *sanctioned*.

And when the Queen petitioned for his leave To see the hunt, *allow d* it easily. *Tennyson*, *Geraldine*

For crimes are but *permitted*, not decreed. *Dryden*, *Cym* and *Iph*, I 475

Custom had made it not only excusable but *allowable*. *By Sanderson*, *Sermons*, Ad. Mag., II 8 (N E D)

allowableness (a-lou'-a-bl-ness), *n.* The quality of being allowable, exemption from prohibition, freedom from impropriety, lawfulness.

I cannot think myself engaged to discourse of lots, as to their nature, use, and *allowableness*, and that not only in matters of moment and business, but also of recreation. *South*, *Sermons*, I VIII

allowably (a-lou'-a-bl), *adv.* In an allowable manner, with propriety.

allowance¹ (a-lou'-ans), *n.* [*< ME allowance, allowans, < OF alouance, < alouer see allow*¹ and -ance.] 1 Sanction; approval; tolerance as, the *allowance* of slavery.

See what *allowance* vice finds in the respectable and well conditioned class. *Emerson*, *Conduct of Life*.

2 Admission or acceptance, a conceding or granting as, the *allowance* of a claim.

Or what if I were to allow - would it not be a singular *allowance*?—that our furniture should be more complex than the Arab's in proportion as we are morally and intellectually his superior? *Thoreau*, *Walden*, p 40

3 Allotment, apportionment; a definite sum or quantity set apart or granted, such as alimony: as, an *allowance* by a husband to a wife, an *allowance* of grog or tobacco to a seaman, an *allowance* of pocket-money.

And his [Jehoiachin's] *allowance* was a continual *allowance* given him of the king, a daily rate for every day, all the days of his life. *2 Ki* XXV 10

4 Specifically, in law, an extra sum awarded besides regular costs to the successful party

in a difficult case.—5. A deduction: as, the *allowances* made in commerce for tare, breakages, etc.—6. An abatement or addition on account of some extenuating, qualifying, enhancing, or other circumstance as, to make *allowances* for a person's youth or inexperience; *allowance* for difference of time, *allowance* for shrinkage of values, etc.

But even these monstrosities are interesting and instructive, nay, many of them, if we can but make *allowance* for different ways of thought and language, contain germs of truth and rays of light.

Mac Muller, *India*, p 106.

The saints and demi gods whom history worships we are constrained to accept with a grain of *allowance*. *Emerson*, *Essays*, 1st ser., p 268.

7 In *minting*, a permissible deviation in the fineness and weight of coins, owing to the difficulty of securing exact conformity to the standard prescribed by law. In the United States the allowance for the fineness of gold coins is .001 and for weight a quarter of a grain to each one dollar piece. In silver coins the allowance for fineness is .003 and for weight 1/4 grains to each coin. In the gold coinage of France the allowance for both fineness and weight is .002, and of 1 ng land .002 for fineness and two grains in each sovereign for weight. Also called *remedy* and *tolerance* (which see).—**Barrack allowance** *See barrack*—**Compassionate allowance** *See compassionate*

allower (a-lou'-er), *n.* One who allows, permits, grants, or authorizes.

alloxan (a-lok'-san), *n.* [*< all(anton) + ox(alic) + -an* so named because it contains the elements of allantoin and oxalic acid.] One of the products (C₄H₂N₂O₄) of the decomposition of uric acid by nitric acid. When treated with alkalis it produces alloxanic acid. In contact with ammonia it produces purpurate of ammonia, identical with murexid, which with various mordants produces reds and purples on silk and wool. This was much used in 1855 and 1856, but was soon superseded by aniline colors.

alloxanate (a-lok'-sa-nât), *n.* [*< alloxanic + -ate*.] A salt formed by the union of alloxanic acid and a base.

alloxanic (al-ok-san'-ik), *a.* [*< alloxan + -ic.*] Pertaining to or produced from alloxan as, *alloxanic acid*—*Alloxanic acid*, a strong crystalline dibasic acid produced by the action of alkalis on alloxan. On boiling, its salts decompose into uric acid and mesoxalates.

alloxantin (al-ok-san'-tin), *n.* [*< alloxan(t) + -in*.] A white crystalline substance (C₈H₄N₄O₇ + 3H₂O) obtained when alloxan is brought into contact with reducing agents. Oxidizing agents reconvert it into alloxan. Also called *uroxin*.

alloy (a-loi'), *v.* [*< F alouer, earlier allayer, < OF alouer, aler, < L alligare, combine see alloy*² (of which *alloy* is the recent form, based on mod F) and *ally*¹. alloy (a-loi'), *n* [*F* *aloi*, earlier *aloy*, < *OF* *aloi*, *AF* *aloy*, *alay*, > *E* *allay*?, *n* The sense has been influenced by the erroneous etymology from *F* *a loi*, to law, as if 'that which is brought to the legal standard'] 1 An artificial compound of two or more metals combined while in a state of fusion, as of copper and tin, which form bronze, or of lead and antimony, which form type-metal. The alloys are numerous as the brasses, bronzes, solders type, gun and bell metals, etc., and are of great importance in the practical arts. There are many varieties of these alloys, the character of each being determined by the proportions of its constituents. An artificial metallic mixture containing quicksilver is termed an *amalgam* (which see)

2 An inferior metal mixed with one of greater value. The gold and silver coins of the United States are of the standard fineness of 900 parts of fine metal and 100 parts of copper alloy, or which in the case of gold not more than one fourth may be silver. In the case of silver coins the alloy is wholly of copper. Hence these coins are said to be 900 fine. See *allayage*

The British standard for gold coin is 22 parts pure gold and 2 parts alloy, and for silver, 222 parts pure silver to 18 parts of alloy
Ure, Dict., I 96

3† Standard, quality, fineness

My Lord of Northampton, whose education of his son, I hear, has been of another stroke and alloy than that we have mentioned
Peel, Letter to Edward Thurland

4 Figuratively, admixture, as of good with evil, a delicious mixture or element; taint as, no earthly happiness is without alloy

The friendship of high and sanctified spirits loses no thing by death but its alloy

D'Arcet's, Newton's, Rose's fusible alloy of bismuth. See *metal*. **Wood's fusible alloy**, an alloy composed of 16 parts of bismuth, 8 of lead, 4 of tin, 3 of cadmium. It has a brilliant luster, which does not tarnish readily, and melts between 160 and 160° F. *Work shop Dictionary*

allayage (a-loi'aj), *n* [*F* *alloy* + *-age*] The practice or process of alloying metals, specifically, in *minting*, the practice of adding to the precious metals a small proportion of a base metal, to harden them, with the object of producing a clear impression when the coins are struck, and of preventing or lessening abrasion while they are in circulation. See *alloy*, *n*, 2

alloy-balance (a-loi'bal'ans), *n* A balance for weighing metals which are to be combined in decimal proportions. In Robert's alloy balance the point of suspension is movable, and is adjusted to the point at which the arms of the balance bear to one another the proportion of the metals to be weighed, as for example 17 per cent of tin to 83 of copper. The beam of the balance is then brought to the position of equilibrium by means of a weight suspended from a continuation of the short arm of the balance. And when the balance is so adjusted any quantity of copper put in the short arm scale will be balanced by the requisite proportion of tin in the other scale, that is, in the supposed case, 17 per cent of the total weight of the two

allozoid (al-ō-zō'id), *n* [*Gr* *αλλος*, other, + *ζωον*, like an animal. See *zoo*] In *zoöl*, an animal bud or zoid separated by gemination from the organism by which it is produced, and differing from it in character. The opposite of *isozoid*

all-round (al'round), *a* [*F* *all*, *adv*, + *round*, *adv*] Able to do many things well, many-sided, capable of doing anything, versatile, not narrow, not too specialized

Let our aim be as hitherto to give a good *all round* education fitted to cope with as many exigencies of the day as possible
Lowell, Oration, Harvard, Nov 8, 1886

One of the usual *all round* men who considered that he could do most things, and vaunted his precise knowledge of the trails throughout the territory

= *syn* *Allure*, *Lure*, *Entice*, *Decoy*, *Seduce*, *attract*, *invite*, *coax*, *engage*, *prevail* on. The first five words imply the exercise of strong but subtle influences over the mind or senses. *Allure*, *lure*, to attract by a lure or bait, to draw by appealing to the hope of gain or the love of pleasure, differ but little, the former, however, seems to imply a more definite object than *lure*, which retains perhaps a little more of the original meaning, though it is less often used. *Entice* expresses most of skill, subtlety, flattery, or fair speech. *Decoy* is to lead into a snare by false appearances, this word is the one most commonly used in a physical sense. *Seduce*, to lead astray, generally from rectitude, but sometimes from interest or truth

As danger could not daunt, so neither could ambition allure him
Latimer, Sermons, Int, p xii

So beauty lures the full grown child.
Byron, Giaour

He doth not only show the way, but gueth so sweets a prospect into the way, as will induce any man to enter into it.
Sir P Sidney, Apol. for Poetrie

He sailed for England, taking with him five of the natives whom he had decoyed
Dancraft, Hist. U. S., I 91

It is not the knavery of the leaders so much as the honesty of the followers they may seduce, that gives them power for evil.
Lowell, Study Windows, p 169

There are two kinds, the sweet and the bitter. Sweet almonds are a favorite nut. They are the source of almond oil and an emulsion made from them is used in medicine. The best, from Malaga, are known as Jordan almonds. Bitter almonds are smaller, and yield, besides almond-oil and an azotized substance called *emulin* (found also in sweet almonds), a bitter crystalline principle called *amygdalin*, which when mixed with *emulin* is decomposed, producing hydrocyanic acid and bitter almond oil.

2 Anything shaped like an almond, an ornament in the shape of an almond, specifically, a piece of rock-crystal used in adorning branched candlesticks. — **African almonds**, the seeds of the proteaceous shrub *Brachium stellatiforme*, of southern Africa. — **Almond of the throat**, a tonsil or amygdala. — **Country almonds**, a name sometimes given to the fruit of the East Indian tree *Ternstroemia Catappa*. — **Java almonds**, the fruit of *Canarium commune*.

almond-cake (ā'mōnd-kāk), *n.* The cake left after expressing the oil from almonds. Its powder is used as soap in washing the hands.

almond-eyed (ā'mōnd-īd), *a.* Having almond-shaped eyes, as the Chinese and others of the Mongolian race.

almond-furnace (ā'mōnd-fēr'nās), *n.* [Prob for *Alman* or *Alman furnace*, < *Alman*, German (see *Alman*), + *furnace*] A furnace in which the slags of litharge left in refining silver are reduced to lead by being heated with charcoal.

almond-oil (ā'mōnd-oil), *n.* A bland, fixed oil obtained from almonds by pressure, and used in medicine as a demulcent. **Bitter-almond oil**, a volatile oil distilled from the residual cake of bitter almonds after the almond oil has been expressed, and due to decomposition of the amygdalin and emulin of the seeds.

almond-paste (ā'mōnd-pāst), *n.* A cosmetic composed of bitter almonds, white of egg, rose-water, and rectified spirit, used to soften the skin and prevent chapping.

The office of almoner was first instituted in monasteries and other religious houses, which were required to dispense part of their revenues in charity. Almoners, usually priests, and often acting also as chaplains, were afterward attached to the households of sovereigns, feudal lords, prelates, etc., and to public institutions of various kinds. In France the name early became synonymous with *chaplain* (see *aumoner*). The grand almoner of the realm was

regularly a cardinal or other high prelate, since the Revolution this post has been alternately restored and abolished. In England there is a *lord almoner*, or *lord high almoner*, an ecclesiastical officer, generally a bishop, who formerly had the forfeiture of all deadlands and the goods of all suicides, which he had to distribute to the poor. He now distributes twice a year the sovereign's bounty, which consists in giving a silver penny each to as many poor persons as the sovereign is years of age. There is also a *sub almoner*, and a hereditary *grand almoner*. The office of the latter is now almost a sinecure.

In *astron*, a small circle of the sphere parallel to the horizon, a circle or parallel of altitude. When two stars are on the same almucantar they have the same altitude.

2 An astronomical instrument (invented by S. C. Chandler) consisting of a telescope provided with horizontal wires and mounted upon a box floating upon mercury. The float is first turned round so as to point the telescope east of the mer-

ridian, and the time of rising of a star over the wires is noted, the telescope is then pointed to west of the meridian, and the time of descending of a star is noted. In this way, if the positions of the stars are known, the correction of a timepiece and the latitude may be determined, on the other hand, if these are known, either the right ascensions or the declinations of the stars may be determined. The instrument is of great value on account of its having fewer instrumental errors than a meridian circle.

almucantar-staff (al-mū-kan'tar-stāf), *n* An instrument having an arc of 15°, formerly used to take observations of the sun about the time of its rising or setting, to find its amplitude, and from this the variation of the compass.

In the earliest E (AS) use the reference is usually to the *agallochum*, but it is often difficult to tell which meaning is intended, and even in modern writers the difference is often ignored. The common name of the plants of the genus *Aloe*. They are natives of warm climates of the old world, and are especially abundant in the southern part of Africa. Among the Mohammedans the aloe is a symbolic plant, especially in Egypt, and every one who returns from a pilgrimage to Mecca hangs it over his street door, as a token that he has performed the journey. In Africa the leaves of some species of aloe are made into ropes, fishing lines, bow strings, and hammocks. Several species yield aloes, the well known bitter purgative medicine. The American aloe is the century plant, *Agave Americana*, and the false aloe is *4. Virginea*. See *Agave*. Many species are cultivated for ornament, growing readily on very dry soil. See *aloe*.

Aloë (al'ō-ē), *n* [NL see *aloe*.] A genus of lilaceous plants, including trees, shrubs, and a few perennial herbs, with thick fleshy leaves, usually spinosely toothed and rosette at the summit of the caudex. See *aloe*.

aloëdary (al'ō-ē-dā-ri), *n* [NL *aloedarium*, < Gr *αλοηδάριον*, < *αλόη*, aloe.] A compound purgative medicine of which aloe is a chief ingredient.

aloes (al'ōz), *n* sing or pl (pl of *aloe*, used also as sing). [See *aloe*.] 1 A drug, the inspissated juice of several species of aloe. It is obtained from the leaves, sometimes by cutting them across, when the resinous juice exudes and is evaporated into a firm consistence, sometimes by pressing the juice and muddling out together, and in other cases by dissolving the juice out of the cut leaves by boiling and then evaporating to a proper consistency. Several kinds are known in commerce. Socotrine aloes also called East Indian or Zanzibar aloes, the produce mainly of varieties of *A. Perryi*, comes chiefly from Red Sea ports and Aden. Barbados and Curacao aloes are produced in the West Indies from *A. vulgaris*, which has been introduced from the Mediterranean. Cape and Natal aloes are obtained probably from *A. ferox*, and form by far the greater part of the supply. The name *hepatic aloes* is applied to any opaque and liver colored variety of the drug. The extract of aloes when treated with nitric acid gives rise to various yellow and brown products, which by the aid of mordants can be fixed to silk and wool, but they are seldom used in dyeing.

2 The fragrant resin or wood of the *agallochum*, lign-aloes, aloes-wood, wood-aloes the usual meaning in the Bible. See *agallochum* - Fetid, caballine, or horse aloes, a coarse, impure preparation of aloes. *U S Dispensatory*.

There is an immanent teleology in his [Julius Bahnsen's] universe, but it is not merely *alogical*, but anti logical, and even anti causal. *G S Hall*, *German Culture*, p. 43.

alogism (al'ō-jizm), *n* [Gr *alogy* + -ism.] An illogical or irrational statement.

alogotrophy (al'ō-jōt'rō-fī), *n* [Gr *αλογος*, without reckoning, incommensurable (see *alogy*), + *τροφος*, ill-fed see *atrophy*.] Unequal nutrition of different parts of the body, especially of the bones.

alogy (al'ō-jī), *n* [L *alogia*, < Gr *αλογία*, < *αλογος*, without reason, unreasoning, unreasonable, < α-priv + *λογος*, speech, reason, reckoning, proportion, also Logos, the Word see *logos*.] Unreasonableness, absurdity.

The error and *alogy* in this opinion is worse than in the last. *Sir T. Browne*, *Vuln*, l. 17, p. 108.

aloin (al'ō-in), *n* [Gr *αλόη* + -in².] A crystalline bitter principle obtained from aloes in pale-yellow prismatic needles, grouped in stars. It is found to differ in constitution according to the material from which it is obtained, Socotrine aloes yielding *isocaloin* (C₁₅H₁₆O₇), Cape aloes *isocaloin* (C₁₅H₁₆O₇), and Barbados aloes *isocaloin* (C₁₇H₂₀O₇). It is an active cathartic. Also called *alutin*.

alomancy (al'ō-man-sī), *n*. Same as *halomancy*.

Alombrado, *n*. See *Alumbrado*.

alondet, *prep*, *phr* as *adv*. A Middle English form of *alond*¹.

alone (a-lōn'), *a* and *adv* [ME *alone*, al on, usually separated, al one (= G *allein* = D. *alleen* = Dan *alene*) al, E all, adv, one, orig a dissyllable, < AS *āna*, alone, weak inflection of *ān*, one see all and one. The pronunciation given to one in *al-one*, *at-one*, *on-ly*, is strictly regular, the pronunciation "wun" given to the simple word is a comparatively mod corruption. In mod dial or colloq use abbrev *lone*, as an attributive. In most instances *alone* may be construed equally well as adj or adv, no separation is here made.] 1. Apart from another or others, single or singly, solitary or solitarily, without the aid or company of another applied to a person or thing as, to be or remain alone, to walk alone.

It is not good that the man should be alone. *Gen* ii 18.
He rode all unarmed, and he rode all alone.
Scott, *Young Lochinvar*.

Concert fires people to a certain fury of performance they can rarely reach alone. *Finnemore*, *Society and Solitude*.

2 Only, to the exclusion of other persons or things, sole or solely as, he alone remained. In this sense *alone* is sometimes used attributively before a noun.

Man shall not live by bread alone. *Luke* iv 4.
It is not to rulers and statesmen alone that the science of government is important and useful. It is equally indispensable for every American citizen.

Story, *Misc Writings*, p. 624.
Even one alone verse sometimes makes a perfect poem.
B. Jonson, *Timber*.

The universal soul is the alone creator of the useful and beautiful.

Emerson, *Art*.

8. Without a parallel; above or beyond all others, unique

To her, whose worth makes other worthless nothing
She is alone
Shak, 1 G. of V, ll. 4

I am alone the villain of the earth
Shak, A and C, iv. 6.

44. Devoid, destitute

For both a widow was she and alone
Of only friend to whom she dost hire none
Chaucer, Troilus, l. 98

To let alone See *let* = *syn* *Alone*, Only The attributive use of *alone* is now very rare. In the Bible and earlier English *alone* is often used for the adverb *only*, but it is now becoming restricted to its own sense of solitary, unaccompanied by other persons or things

Who can forgive sins but God alone? Luke v. 21
Not alone at I phantas, but almost throughout all Asia
Acts xix. 26

In each of these examples *only* would now be considered better, though *not alone* for *not only* is in common use. *Alone* means unaccompanied as, he stood alone. *Only* applies to that of which there is no other as, an only son, advantage, *only* this

And I only am escaped alone to tell thee Job i. 16

alpaca (al-pak'a), *n* [Formerly also *alpaco*, < Sp *alpaca*, *alpaco*, < Ar. *al*, the (see *al*-2), + Peruv *paco*, native name of the animal] 1

Alpaca or Paco (*Auchenia pacos*)

A mammal, the *Auchenia pacos*, a native of the Andes, especially of the mountains of Chili and Peru. It is so closely allied to the llama that by some it is regarded rather as a smaller variety than as a distinct species. It has been domesticated, and remains also in a wild state. In form and size it approaches the sheep, but has a longer neck. It is valued chiefly for its long, soft, and silky wool, which is straighter than that of the sheep, and very strong. The fiber is small, very soft, pliable, and elastic and is woven into fabrics of great beauty. The animal's flesh is whole some.

2. A fabric manufactured from the hair or wool of the alpaca, either wholly or in part, or made in imitation of this, used for clothing in warm climates, for coat-linings, and very largely for umbrellas. The material sold under the name of alpaca for women's dresses and other clothing contains now little if any alpaca wool. It is a fabric of cotton and wool with a hard and somewhat shining surface, generally, though not always, dyed black.

alphabetism (al'fa-bet-izm), *n* [< *alphabet* + *-ism*] The use of an alphabet as a stage in

the development of written language; notation by means of an alphabet.

It must, however, be acknowledged that the idea of *alphabetism* may not improbably have been suggested to the Persians by their acquaintance with the Phenician alphabet, which, as early as the 8th century B C, was used in the valley of the Euphrates concurrently with the cuneiform writing. Isaac Taylor, *The Alphabet*, I 80

From this [ideography] men have passed to phonetic writing, first, apparently, in the form of syllabism, in which each syllable of a word is regarded as an independent whole and represented by a single sign, then from this to *alphabetism*, in which the syllable is no longer denoted by an indivisible symbol, but is resolved into vowel and consonant, each with its own accepted sign. *Encyc Brit*, I 602

alphabetize (al'fa-bet-iz), *v*, t, pret and pp *alphabetized*, pp *alphabetizing* [< *alphabet* + *-ize*] 1. To arrange alphabetically.

The earliest altars were turf mounds, large flat topped stones, or other rude elevations, natural or artificial, but when temples came to be built altars were generally made of hewn stone, marble, or metal, and became more and more ornate. Greek and Roman altars were round, triangular, or square in plan, often elaborately adorned with sculpture, and bearing inscriptions. Sometimes, as at Pergamon the altar was a structure of vast size and complex plan, and was in itself an art monument of the highest importance. In the Jewish worship two altars were used the altar of burnt offering, which stood at the entrance to the tabernacle, and afterward occupied a corresponding position in the temple, and the altar of incense, which stood in the holy place. Both were made of shittim wood, the former being overlaid with brass, the latter with gold.

2 In most Christian churches, the communion-table. In the primitive church it was of wood, and frequently of stone, marble, or bronze, sometimes with rich architectural ornaments, sculptures, and painting. In the Roman Catholic Church the altar is the table, since the early ages of the church either of stone or including a block of stone (the altar stone), upon which the priest consecrates the eucharist. The altar stone is con-
